PART TWO

THE GRADUATE SCHOOL

THE GRADUATE SCHOOL

The Graduate School at the University of Southern Mississippi was established in 1947 to recognize the University's growing responsibilities as a center of higher learning, and to provide an academic environment in which advanced research and free inquiry could develop to the advantage of both the student and the State. In the years since 1947, the University's graduate programs have developed logically on the growing points of strong undergraduate schools and departments to meet the needs for professional competence beyond the academic measure of the baccalaureate degree.

The Graduate School's Place Within the University Structure

The Graduate School is administered by a dean executing policies determined by the Graduate Council of which the Dean of the Graduate School serves as chairman.

The present composition of the Graduate Council (see Part I) includes the Dean of the Graduate School as chairman with two representatives from the College of Education and Psychology and one representative each from the College of Liberal Arts, the College of Science, the School of Business Administration, the School of Fine Arts, the School of Health, Physical Education, and Recreation, and the School of Home Economics. Council members are appointed by the President of the University upon the recommendation of the Dean of the University. Permanent **ex officio** members are the President of the University and the University Librarian. The University Registrar serves as secretary to the Council.

The responsibilities of the Graduate Council, representing both administration and faculty, include:

1. Determining policies of admission to the Graduate School.

2. Considering and approving graduate programs submitted to the Council through curriculum committees of each college and school.

3. Electing members of the Graduate Faculty upon recommendation by the academic deans.

4. Approving new courses and deleting courses for graduate credit.

5. Acting upon any other problems affecting graduate programs.

The graduate programs approved by the Council are carried out through the Graduate Faculty (see Part VII of this **Bulletin**) in each degree-granting college or school of the University's academic organization.

Degree and Specialist Programs Offered

The University of Southern Mississippi now offers graduate level programs in nearly every recognized academic discipline. Even those departments not yet ready to offer master's or doctoral degrees are usually equipped to offer a graduate minor.

The degrees which are offered and their fields are listed below.

DOCTOR OF PHILOSOPHY

Biology
Chemistry
Communication
Comparative Literature
Educational Administration
Elementary Education
English
Guidance
Health, Physical Education, and Recreation
History
Microbiology
Music Education
Political Science
Psychology (Clinical)
Psychology (General - Experimental)
Secondary Education
Special Education
Speech and Hearing Sciences

DOCTOR OF EDUCATION

Educational Administration
Educational Psychology
Elementary Education
Guidance
Health, Physical Education, and Recreation
Psychology
Psychology (Clinical)
Secondary Education
Science Education
Special Education

DOCTOR OF MUSIC EDUCATION

Music Education

MASTER OF PHILOSOPHY

Biology
Chemistry
Communication
Comparative Literature
English
History
Microbiology
Political Science
Speech and Hearing Sciences

SPECIALIST CERTIFICATE

Business Education
Curriculum and Supervision
Educational Administration
Educational Research
Elementary Education
Guidance and Counseling
Secondary Education
Special Education

MASTER OF ART EDUCATION

Art Education

MASTER OF ARTS

Biology
Chemistry
Communication
Comparative Literature
Economics
English
Foreign Language
Geography
Geology
History
Latin American Studies
Library Science
Mathematics
Philosophy
Political Science
Polymer Science
Psychology
Sociology
Speech and Hearing Sciences
Theatre Arts

MASTER OF BUSINESS ADMINISTRATION

Business Administration

MASTER OF EDUCATION

Business Education
Early Childhood Education
Educational Administration
Educational Media and Technology
Elementary Education
School Counseling
Science Education
Secondary Education
Special Education
Supervision of Instruction

MASTER OF FINE ARTS

Theatre Arts

MASTER OF MUSIC

Applied Music
Church Music
Conducting
Music History and Literature
Theory-Composition

MASTER OF MUSIC EDUCATION

Music Education

MASTER OF SCIENCE

Accounting
Biology
Business Education
Chemistry
College Counseling
Communication
Community Counseling
Economics

Physics
Political Science
Polymer Science
Psychology
Reading
Recreation
Science Education
Secondary Education
Speech and Hearing Sciences
Vocational Technical Education

The undergraduate, master's, and specialist programs in teacher education are accredited by the National Council for Accreditation of Teacher Education. All graduate programs in music are approved by the National Association of Schools of Music.

See Part V of this **Bulletin** for the department curricula covering each of these degrees and the specialist programs and Part VI for course descriptions.

PART THREE

ADMISSION REQUIREMENTS AND PROCEDURES

FINANCIAL INFORMATION

ADMISSION REQUIREMENTS AND PROCEDURES

Since applicants must always be admitted to a specific program within the Graduate School, all applications for admission to the Graduate School are closely reviewed and must be approved by the chairman of the department in which the student intends to study, by the school or college dean, and by the Graduate Dean. Admission forms are procurable from and should be submitted to the University Admissions Office.

The aptitude phase (verbal and quantitative sections) of the Graduate Record Examinations is required of all applicants to the Graduate School except in the School of Business Administration which requires the Admission Test for Graduate Study in Business. Prospective students should plan to take the appropriate examination, given several times a year at a number of university testing centers, early in their senior year and request that a copy of their scores be sent to the Graduate Office.

The academic record, character, and conditions of application of the applicant must be in accordance with the rules and regulations of the Board of Trustees of State Institutions of Higher Learning and with the laws of the State of Mississippi. The applicant must have excellent moral character in conformity with the generally accepted standards customarily in effect in the University.

The University reserves the right to cancel the admission or registration of an individual whose attendance at the University, in the opinion of the appropriate administrative officer and the President, would not be mutually beneficial to himself and to the institution.

It should be clearly understood that the admission requirements listed below represent the minimal standards set by the Graduate Council and that additional requirements and higher standards may well be stipulated by the various department chairmen.

TYPES OF ADMISSION TO MASTER'S PROGRAMS

I. Regular Admission:

A. The applicant must hold a baccalaureate degree from an institution approved by a recognized accrediting agency.

B. The applicant must be eligible to re-enter in good standing the last college or university he attended.

C. The applicant must present evidence, by official transcript (two copies), of a grade-point average of at least 2.75 (figured on an A equals 4.0 scale) for the last two years of undergraduate study, and a grade-point average of at least 3.0 on undergraduate courses in the field of proposed graduate study. Any exception to this requirement must be cleared with the appropriate department chairman, the dean concerned, and the Graduate Dean.

D. The applicant must present a combined score of 750 or above on the aptitude sections of the Graduate Record Examinations or a total score of 400 or above on the Admission Test for Graduate Study in Business. Certain departments within the University require higher totals and/or the advanced section of the Graduate Record examinations. Consult specific departmental requirements for this information.

E. The appropriate department chairman, the school or college dean, and the Graduate Dean must be satisfied that the applicant shows promise of satisfying graduate degree requirements.

II. Conditional Graduate Student:

A student who does not meet the minimum admission standards for either grade-point average or Graduate Record Examinations may be admitted on a conditional basis in one of two ways:

A. He must present a score of 750 or above on the aptitude sections of the Graduate Record Examinations or a total score of 400 or above on the Admission Test for Graduate Study in Business and a grade-point average no lower than 2.5.

B. He must present a grade-point average of 2.75 or above if he has scored lower than 750 on the aptitude sections of the Graduate Record Examinations or lower than 400 on the Admission Test for Graduate Study in Business.

Conditional admission can be given only upon the specific recommendation of the department chairman, the school or college dean, and the Graduate Dean.

A conditional graduate student must meet the following conditions if he is to continue in the Graduate School:

A. If his first enrollment is as a full-time student, he must make grades of B or better on each graduate course attempted during that first quarter.

B. If his first enrollment is as a part-time student, he must make grades of B or better on his first twelve (12) quarter hours, or grades of B or better on all courses taken while completing the twelve-hour requirement.

All courses taken to remove conditional admission must be taken on the Hattiesburg campus. Upon the recommendation of the department chairman and the Graduate Dean, the conditional admission may be removed and the student reclassified as a regular student.

III. Special Graduate Student:

Admission as a special graduate student may be granted a student for any of the following reasons:

A. He can not meet requirements for a conditional or regular admission but desires to enroll in graduate courses.

B. He may or may not be able to meet admission requirements, but does not desire to work toward a graduate degree.

C. He is enrolled in another graduate school and desires to take work at the University of Southern Mississippi to be transferred to the graduate school in which he is seeking a degree.

A special graduate student must hold a baccalaureate degree from an accredited institution. If he should decide to become a degree-seeking student, he must meet the grade-point average and Graduate Record. Examinations requirements for regular or conditional admission.

A student may remain classified indefinitely as a special graduate student; however, **no more than sixteen (16) quarter hours earned while classified as a special graduate student may be applied toward a graduate degree at the University of Southern Mississippi.** The Graduate Dean may revoke the admission of a special graduate student should his work become unsatisfactory.

Special graduate students desiring to enroll on the Hattiesburg campus will be expected to file an application for admission by the appropriate deadline.

Students may be admitted as special graduate students to the School of Business Administration only if they have undergraduate grade point averages of 2.75 or above.

A graduate student of any classification may count a total of **no more than sixteen (16) quarter hours of extension work, transfer work, resident center work, and special graduate work toward a master's degree.**

TYPES OF ADMISSION TO ADVANCED GRADUATE STUDY

Three advanced level programs are available for students who hold a master's degree and who wish to do additional graduate work. The first of these programs leads to the Educational Specialist Certificate, the second to the Master of Philosophy degree, and the third to the various doctoral degrees.

I. Regular Admission:

For regular admission to advanced graduate study a student must present a grade point average no lower than 3.25 for the specialist and the Master of Philosophy programs or 3.50 for the doctoral program on previous graduate work and a score no lower than 800 for the specialist and the Master of Philosophy programs or 850 for the doctoral program on the aptitude phase of the Graduate Record Examinations.

II. Conditional Admission:

For conditional admission to advanced graduate study a student must present either (a) a grade point average of between 3.00 and 3.25 for the specialist and the Master of Philosophy programs or 3.25 and 3.50 for the doctoral program on previous graduate work and a Graduate Record Examinations score no lower than 800 for the specialist and the Master of Philosophy programs or 850 for the doctoral program or (b) a grade point average no lower than 3.25 for the specialist and the Master of Philosophy programs or 3.50 for the doctoral program and a Graduate Record Examinations score between 750 and 800 for the specialist and the Master of Philosophy programs or 800 for the doctoral program.

Conditional status at the advanced graduate level may be removed on the recommendation of the department chairman provided the student has attained a grade point average of at least 3.25 on the first twelve (12) or sixteen (16) hours of course work numbered 500 or above or on all courses taken while completing this requirement.

To be admitted to advanced graduate study, the student must submit a formal application through the Admissions Office even though he may have successfully completed a master's degree program at the University of Southern Mississippi. Acceptance as an advanced graduate student is contingent upon the

approval of the department chairman, the school or college dean, and the Graduate Dean.

III. Special Graduate Student:

An applicant for advanced study may be admitted as a special graduate student under the same conditions outlined for a master's degree applicant.

Limitations on University Faculty Members

Members of the faculty of the University of Southern Mississippi above the rank of instructor cannot become candidates for a doctoral degree at this institution. They may, however, enroll for graduate courses. Faculty members of the rank of instructor may become candidates for doctoral degrees at the University of Southern Mississippi on the same terms as any other advanced graduate student candidate.

PROCEDURES FOR APPLYING FOR ADMISSION

I. Application materials are available from the Director of Admissions, Southern Station, Box 11, Hattiesburg, Mississippi 39401.

II. All credentials (application, recommendations, two official transcripts from each institution attended) must be submitted to the Director of Admissions by the deadline published in the University Calendar.

III. After all credentials are received, the Admissions Office will compute the applicant's grade point average and will forward the application and transcripts to the appropriate department chairman, school or college dean, and the Graduate Dean. As soon as the application has been processed by the department chairman, the school or college dean concerned, and the Graduate Dean, the Director of Admissions will notify the applicant of the University's decision on his request for admission.

Permission for Undergraduate Seniors to Register for Graduate Credit

Exceptionally well qualified undergraduate students at the University of Southern Mississippi may apply to the Graduate Office for permission to take course work for graduate credit if they are within (8) quarter hours of meeting bachelor's degree requirements as certified by the Registrar. If the Graduate Dean approves, the student may then register for graduate courses up to a maximum of eight (8) quarter hours of graduate credit with a total course load not exceeding sixteen (16) quarter hours. The student must complete requirements for the baccalaureate degree within the first quarter in which he registers for graduate courses. The student's application for admission to the Graduate

School will not be given final approval until after he satisfies all requirements for the baccalaureate degree.

STUDENT EXPENSES

The University of Southern Mississippi is supported chiefly by legislative appropriations. Increases in student fees are put into effect only when public support funds are inadequate and no other recourse is available Increases are made only for support of the institution or improvement of the activity program of the student; therefore **the University must reserve the right to increase or modify fees and expenses without prior notice but with approval of the Board of Trustees of State Institutions of Higher Learning.**

Fees and expenses are in the form of incidental fees, room and board, and special fees.

INCIDENTAL FEE. This fee, together with the allocation from the legislative appropriation, is used for general support of the University and consists of charges for matriculation, library, textbook service, athletic activities, health service, University Union, University newspaper, laboratory, concert series, maintenance, administrative and academic salaries, etc. Athletic activities, health service, UAC programs, and newspaper are not included for part-time students.

Full-time students for purposes of assessing fees are as follows: Graduate School, nine (9) or more quarter hours; all other schools and colleges, twelve (12) or more quarter hours. Students enrolled for more than eighteen (18) hours will be assessed the applicable fee for each additional quarter hour. (Students training under Veterans Administration programs are required by the Veterans Administration to carry a minimum number of quarter hours for the entire quarter to receive full subsistence. The requirements are nine (9) quarter hours on the graduate level and twelve (12) quarter hours on the undergraduate level.)

Clinical and hospital services covered by the health service charge included in the incidental fee are limited to cases of ordinary illness. Services are provided within the limits of the professional, technical, and physical resources of the Clinic. The University does not assume responsibility in cases of extended illness or for the treatment of chronic diseases. Cases requiring surgery must be handled by a physician and hospital of the student's choice.

ROOM AND BOARD. The room and board fees are assessed for all students living in University-controlled dormitories and those students living in fraternity houses. All students rooming in dormitories or fraternity houses are required to take their meals in the University Commons. Students living in Elam Arms and Hillcrest will eat in the cafeterias in those residence halls.

A room deposit of $15.00 is payable in advance for the reservation of space in the dormitories. This amount is held as a breakage deposit until a student withdraws from the dormitory.

A student accepting dormitory space will be financially obligated to pay a full quarter's room rent. A refund of the dormitory fee will be made only upon withdrawal from the University.

OTHER FINANCIAL INFORMATION. Fees of all students are due and payable at time of registration; however, fees of full-time students may be paid one-half upon entrance and the balance one week prior to the beginning of the second half of the quarter.

The University reserves the right to withhold readmission to a student until all delinquent accounts have been paid. Transcripts of credits will not be issued for students whose accounts are delinquent.

Fines accumulated as a result of failure to adhere to the established procedures of the University, such as Library and Security regulations, or any other policy establishing regulations for the protection of University property shall become collectible by the Business Office, and if not collected shall constitute a delinquent account.

A fee of $2.00 for operation of the University Union is included in the fees of all full-time students. A $1.00 fee is added to the incidental fee assessment of part-time students.

Courses requiring special fees and music fees are shown in the Special Fee listing (Table II).

A fee of $6.50 for The Southerner (University annual) is payable each school year by all full-time undergraduate students.

NON-RESIDENT STATUS. The Legislature of the State of Mississippi has passed the following legislation concerning non-resident status:

The board of trustees of each junior college in this state, the board of trustees of state institutions of higher learning, and the administrative authorities of each institution governed by said boards, in ascertaining and determining the legal residence of and tuition to be charged any student applying for admission to such institutions, shall be governed by the following definitions and conditions:

Legal residence of a minor. The residence of a person less than twenty-one (21) years of age is that of the father. After the death of the father, the residence of the minor is that of the mother. If the parents are divorced, the residence of the minor is that of the parent who was granted custody by the court; or, if custody was not granted, the residence continues to be that of the father. If both parents are dead, the residence of the minor is that of the last surviving parent at the time of the parent's death, unless the minor lives with a legal guardian of his person, duly appointed by a proper court of Mississippi, in which case his residence becomes that of the guardian.

Legal residence of an adult. The residence of an adult is that place where he is domiciled, that is, the place where he actually physically resides with the intention of remaining there indefinitely or of returning there permanently when temporarily absent.

Removal of parents from Mississippi. If the parents of a minor who is enrolled as a student in an institution of higher learning move their legal residence from the State of Mississippi, the minor is immediately classified as a non-resident student.

Twelve months of residence required. No student may be admitted to any institution of higher learning as a resident of Mississippi unless his residence, as defined hereinabove, has been in the State of Mississippi for a continuous period of at least twelve (12) months immediately preceding his admission.

Residence in an education institution not counted. A person who has entered the State of Mississippi from another state and enters an educational institution within twelve (12) months is considered a non-resident For this reason, any period of time when such a person is enrolled in any educational institution in Mississippi may not be counted as any part of the twelve (12) months prerequisite to his admission to an institution of higher learning as a resident student. Even though he may have been legally adopted by a resident of Mississippi, or may have been a qualified voter, or a landowner, or may otherwise have sought to establish legal residence, such a person will still be considered as being a non-resident of Mississippi if he has entered this state for the purpose of enrolling in an educational institution.

Residence status of a married woman. A married woman may claim the residence status of her husband, or she may claim independent residence status under the same regulations, set forth above, as any other adult.

Children of parents who are employed by institutions of higher learning. Children of parents who are members of the faculty or staff of any institution under the jurisdiction of the board of trustees may be classified as residents during the time that their parents are such faculty or staff members without

regard to the residence requirement of twelve (12) months, for the purpose of attendance at the institution where their parents are faculty or staff members.

Military personnel assigned an active duty station in Mississippi. Members of the armed forces on extended active duty and stationed within the State of Mississippi, except those military personnel whose active duty assignment in the State of Mississippi is for education purposes, may be classified as residents, without regard to the residence requirement of twelve (12) months, for the purpose of attendance of State-supported institutions of higher learning and junior colleges of the State of Mississippi. Resident status of such military personnel who are not legal residents of Mississippi, as defined under "Legal residence of an adult" in paragraph 2 above, shall terminate upon their reassignment for duty in the continental United States outside the State of Mississippi.

Children of military personnel. Resident status of children of members of the Armed Forces on extended active duty shall be that of the military parent for the purpose of attending State-supported institutions of higher learning and junior colleges of the State of Mississippi during the time that their military parents are stationed within the State of Mississippi and shall be continued through the time that military parents are stationed in an overseas area with last duty assignment with the State of Mississippi, excepting temporary training assignments en route from Mississippi. Resident status of minor children shall terminate upon reassignment under Permanent Change of Station Orders of their military parents for duty in the continental United States outside the State of Mississippi, excepting temporary training assignments en route from Mississippi.

Certification of residence of military personnel. A military person on active duty stationed in Mississippi who wishes to avail himself or his dependents of the provision of paragraph 8, must submit a certificate from his military organization showing the name of the military member; the name of the department, if for a dependent; the name of the organization of assignment and its address (may be in the letterhead); that the military member will be on active duty station in Mississippi on the date of registration at the State-supported institution of higher learning or junior college of the State of Mississippi; that the military member is not on transfer orders; and the signature of the Commanding Officer, the Adjutant, or the Personnel Officer of the unit of assignment with signer's rank and title. A military certificate must be presented to the registrar of the State-supported institution of higher learning or junior college of the State of Mississippi each semester or tri-semester at (or within ten (10) days prior to) registration each semester for the provision of paragraph 8 hereof to be effective.

Aliens. All aliens are classified as non-residents.

Students holding fellowships. Non-resident students holding University financed fellowships will not be required to pay the non-resident fee during the time they hold such appointments.

REFUND POLICY. A student who officially withdraws after enrollment may obtain a refund in accordance with the following:

a. A refund of 80% of incidental and special fees paid will be made to a student who withdraws within the week following the week of registration.

b. A student who withdraws for any reason prior to midterm of any quarter but after the week following the week of registration will be refunded 50% of the incidental and special fees.

c. A student who withdraws after midterm of any quarter will not be entitled to a refund of fees.

d. No adjustment of incidental and special fees will be made when courses are dropped after the week following the week of registration.

e. Room and board fees are refunded on the basis of full weeks remaining in the quarter.

TABLE I
EXPENSES EACH QUARTER

(All fees are subject to change without notice. See Page 24.)

FULL-TIME STUDENTS	
Fixed Fees	
Incidental Fee	$159.00
*Room rent—air-conditioned dormitory	100.00
Room rent—other dormitory	70.00
*Board	105.00
Other Fees When Applicable	
Non-resident fee	$200.00
The Southerner	6.50
Post Office box, per quarter	1.25
PART-TIME STUDENTS—Each quarter hour	
Incidental fee: graduate student	$ 18.00
Non-resident fee: graduate student	23.00
*Note: Hillcrest (Room and Board)	$260.00
Elam Arms (Room and Board)	260.00
Vann Hall (Room and Board)	225.00

TABLE II
SPECIAL FEES AND EXPENSES

Music Fees—Private Lessons for other than full-time music majors:	
1 quarter hour per instructor	$ 19.00 per quarter
2 quarter hours per instructor	36.00 per quarter
3 quarter hours per instructor	53.00 per quarter
Each additional supervised lesson	17.00 per quarter
Orchestral or Band Instrument rental*	6.00 per quarter
*This fee applies to music majors and minors as well as to other students.	
Examinations and Graduation:	
Miller Analogies Test	$ 3.50 when applicable
Revalidation Examination	5.00 when applicable
Special Examination	3.00 when applicable
Graduation fee—**	
Master's	12.00 with application for degree
Specialist certificate	12.00 with application for degree
Doctoral	90.00 with application for degree
Thesis binding per copy	4.50 when applicable
Continuing Education:	
Resident Center	
Graduate Course	16.00 per quarter hour
Resident Center—laboratory fee	6.00 per course
Resident Center—typing fee	5.00 per course
Extension Center	
Graduate Course	16.00 per quarter hour
Registration and Records:	
Change of Schedule	5.00 when applicable
Audit Fee (Non-credit)***	
Graduate Course	9.00 per quarter hour
Late Registration	10.00 full load
	5.00 partial load
Application Fee for Foreign Students (non-refundable)	10.00 with application
Memorandum of credits	.50 each
Transcript of Credits	1.00 when applicable

**Requests for refund of this fee will be based on circumstances existing at the time of request in accordance with policy on file. This fee covers the following expenses: diploma, cap and gown, commencement speaker, and alumni dues for one year.

***An audit fee is charged when the student does not wish to receive credit in a course. Courses such as physical education activity courses, typing, shorthand, and Foreign Language 173, will be assessed at the full rate per quarter hour ($18.00 graduate) even though the student registers as an auditor.

AVAILABLE FINANCIAL ASSISTANCE FOR GRADUATE STUDENTS

At present the University has available some 180 master's and 50 doctoral University fellowships in all areas as well as fellowships provided by federal and private agencies. Though amounts may vary from department to department, University fellowships average $1500 per year at the master's level and $2000 at the doctoral level and entail a teaching or research assignment. Out-of-state tuition, though not the incidental fee, is currently waived for fellowship holders. The University also currently waives out-of-state tuition for a limited number of Regional Merit Scholars and for students on sabbatical leave from schools and colleges.

Inquiries regarding fellowships should be directed to the Graduate Office.

EQUAL EDUCATION OPPORTUNITY POLICY

The University of Southern Mississippi does not discriminate on grounds of race, color, or national origin.

PLACEMENT BUREAU

The function of the Placement Bureau is dual in nature. It provides assistance to graduating seniors, graduate students, and alumni in obtaining suitable employment, and to employers in recruiting qualified employees. The services are provided at no cost to the student or to the employer.

Throughout the year, current listings of employment opportunities, both in state and out of state, in teaching, business, industry, and government are made available to the students. Also, on-campus interviews are scheduled with personnel representatives from schools, businesses, industries, and governmental agencies. Students registered with the Bureau are notified of these interview schedules, and all who are interested are given the opportunity for individual interviews.

All seniors should register with the Placement Bureau and establish a confidential placement credential folder during the last quarter of their junior year, or the first quarter of their senior year. Graduate students may register any time they desire. These placement credentials are very valuable to on-campus recruiters and to those who telephone or write for information about prosepctive employees. After graduation and/or when the registrant has found suitable employment, the placement file is stored and may be quite helpful in later years if a registrant wishes to change employment or to enter graduate school.

PART FOUR

GENERAL ACADEMIC REGULATIONS AND REQUIREMENTS

GENERAL ACADEMIC REQUIREMENTS

It is reasonable to assume that a graduate student accepts full responsibility for knowing the policies and regulations of the Graduate School and the departmental requirements relevant to his individual degree program.

Only the general academic regulations and requirements governing all graduate programs are given below. Specific requirements pertaining to individual degree programs are outlined within the departmental sections.

Course Work and Grading System

Courses open to graduate students are of two categories: (1) those numbered G-400 to G-499 which are open to advanced undergraduates as well as to graduate students; and (2) those numbered 500 or above which are open only to graduate students.

Students registered for any course numbered from G-400 to G-499 are required to have graduate standing before the extra work required for graduate credit may properly be assigned or graduate credit granted. The assignment of this extra work is left to the discretion of the instructor concerned but should approximate a fifty per cent increase in laboratory or library work over that required of undergraduate students in the same course.

All courses have certain prerequisites. A student who wishes to register for a particular course must satisfy the department concerned that he has had preparation adequate for admission to the course.

The grading system in the Graduate School is as follows:

A– Indicates that the student's work is of unusually high quality.

B– Indicates that the student's work is of high but not exceptional quality.

C– Indicates that the student has met the minimum requirements for passing the course.

D– Indicates that the student's work is below that which is expected of a graduate student. A course in which the student has earned a grade of D will not apply toward a graduate degree. A student who earns more than eight hours in grades of D or below may not be considered as a candidate for a degree. Retaking a course will not remove this disability.

F– Indicates that the student has failed the course. A student who accumulates more than four (4) quarter hours of F grades will not be considered as a candidate for a degree. Retaking a course will not remove this disability.

An average of B or better is required of all candidates for graduate degrees by the time they complete the course-hour requirements for the degree.

In computing averages, a C must be balanced by one A, a D by two A's, and an F by three A's of equal graduate credit.

The one-year limitation for an "Incomplete" to be removed does not apply to theses. The general regulation that degree work must be completed within a six-year period does apply.

Course Loads

I. Although the maximum load of a full-time graduate student is seventeen (17) quarter hours, the normal load for a full-time graduate student is generally considered to be twelve (12) quarter hours; the normal time required for a master's degree is thus four quarters.

II. The minimum load for a full-time graduate student is nine (9) quarter hours for the purpose of living in Pine Haven, using the services of the Clinic, for Selective Services deferments, and other such requirements.

III. The usual load for a part-time student with a full-time position is four (4) hours. A maximum of eight (8) hours may be carried by such a student provided the faculty adviser and department chairman approve. (Teachers should note that the Mississippi State Department of Education allows a full-time teacher to take only four (4) hours per quarter.)

IV. Thirteen (13) hours is the maximum load for a graduate fellow teaching one undergraduate class or its equivalent. In no case may the total hours involved in a student's program, including both his course work and his fellowship assignment, exceed seventeen (17) hours.

V. The incidental fee for the full load of nine (9) quarter hours will be the same amount as paid by graduates for a normal load of twelve (12) hours.

VI. The courses numbered 597, 697, 797 – **Independent Study and Research** – may be taken for any amount of credit with the exception that students who are not in residence but who are actively working on

a thesis or dissertation and consulting with the major professor or making use of the library or other University facilities must enroll for four (4) quarter hours each quarter.

MASTER'S DEGREE REQUIREMENTS

A convenient checklist of master's degree requirements may be procured in the Graduate Office.

I. Credit Hours:

A minimum of forty-six (46) quarter hours credit is required for any master's degree.

II. Time Limitation:

The student must complete the master's degree within six calendar years from the date of initial enrollment as a graduate student. Six years is the maximum age allowed for graduate credits toward a master's degree. If more than six years are needed to complete requirements, the Graduate Dean, under extenuating circumstances, may revalidate over-age credit hours if the original credit was earned at the University of Southern Mississippi and if the dean of the college or school concerned approves the revalidation. The revalidation is secured by the student's successfully passing a special examination on the course. However, any student who fails to complete his master's degree program within the six-year time period becomes subject to any changes in degree requirements made at any date six years prior to his graduation. The fee charged for the special revalidation examination is $5.00 per course. This fee is to be paid before the revalidation examination is taken. Over-age extension courses can not be revalidated.

III. Credit Hour Limitations:

A. A minimum of thirty (30) quarter hours must be earned on the University's Hattiesburg campus for all master's degrees.

B. A minimum of twenty-four (24) quarter hours must be in courses numbered 500 or above. Master of Business Administration degree candidates are permitted to take a maximum of one course below the 500-level.

C. As many as nine (9) quarter hours of graduate credit from other accredited institutions may be transferred to the student's program with the approval of the appropriate department chairman and the Graduate Dean provided that the course work transferred falls within the six-year period allowed for the degree.

D. As many as eight (8) quarter hours of course work taken by extension may be accepted toward the master's degree provided that such courses were taught by a member of the University of Southern Mississippi graduate faculty.

E. However, a student may apply a total of no more than nine (9) quarter hours by extension and/or transfer toward a master's degree, and, as previously stated, a total of no more than sixteen (16) quarter hours of extension work, transfer work, resident center work, and work earned as a special graduate student may be applied toward a master's degree.

F. No more than twelve (12) quarter hours earned in institutes may be applied toward a master's degree.

IV. The Master's Committee:

The student's work toward the master's degree is supervised by a departmental committee composed of a chairman and two members recommended by the department chairman and appointed by the Graduate Dean.

V. The Minor Field:

If a minor field is required in the master's program, it shall consist of sixteen (16) quarter hours of course work.

VI. The Master's Thesis:

Although the degree of Master of Arts usually entails the writing of a thesis, the thesis requirement is generally optional for the Master of Science and the Master of Education degrees. Students intending to pursue a degree higher than the master's are encouraged to write a thesis.

A separate bulletin outlining University requirements concerning the preparation of theses is available in the Graduate Office.

VII. Examinations:

A. The aptitude phase of the Graduate Record Examinations or the Admission Test for Graduate Study in Business is required for admission into the Graduate School. Individual departments may require the advanced area tests.

B. The Graduate School Foreign Language Test is required for some master's degrees, particularly the Master of Arts. Languages other than French, German, Spanish, and Russian must be approved by the department chairman and the Graduate Dean. Students may procure the proper registration forms in the Graduate Office.

C. If a master's degree student has not had an English writing proficiency test on the undergraduate junior or senior level, he will be required to take the University English Proficiency Test.

D. In addition to regular course examinations, final comprehensive examinations are required for master's degrees. The major department will determine whether the comprehensive examination will be written or oral or both. The written comprehensive, if required, will be prepared by the student's committee and will cover the area of the major field. If an oral examination is required, the chairman of the student's committee will send written notices of the time and place of the examination to the examiners and to the student and will conduct the examination. Comprehensive examinations, whether written or oral, will be administered no later than the seventh week of the quarter in which the student expects to receive his degree and their results reported by the department chairman to the Registrar and to the Graduate Office no later than Monday of the eighth week of that quarter. A student who fails the comprehensive examination may not retake the examination until its next regular administration and may repeat the examination only once.

EDUCATIONAL SPECIALIST CERTIFICATE REQUIREMENTS

The Educational Specialist Certificate earned in the Departments of Educational Administration and Supervision, Business Education, Curriculum and Instruction, Guidance, Research and Human Development, and Special Education provides sixth-year programs designed to prepare students for positions in school administration, advanced technical education for business, teacher training, guidance and counseling, and to develop research and evaluation specialists for the public schools. Individual programs and requirements are fully described in the departmental sections of this **Bulletin.**

Students who are seeking the Education Specialist Certificate must meet all degree requirements relating to the master's degree, must earn at least forty-six (46) quarter hours beyond the master's degree, must write an acceptable thesis and defend it in an oral examination, and must complete one full-time quarter of residence taking all twelve (12) hours on the Hattiesburg campus.

Credit earned in institutes cannot be applied toward a specialist certificate.

THE MASTER OF PHILOSOPHY DEGREE REQUIREMENTS

The Master of Philosophy (M.Phil.) provides a directed semiterminal degree beyond the master's in a subject area primarily for the benefit of junior college

faculties. At present the Southern Association of Colleges and Schools requires that "in all colleges at least forty percent of the teaching faculty should possess professional preparation equivalent to two years of advanced study beyond the bachelor's degree." This degree more than fulfills this requirement and in addition provides an intermediate stepping stone for the student who wishes to pursue the Doctor of Philosophy at a later time.

General Requirements

I. The program consists of a minimum of forty-six (46) hours of work beyond the master's degree or ninety-two (92) hours beyond the bachelor's degree in one subject matter area of which no more than six (6) hours can be in thesis research. With departmental permission, a related minor of twelve (12) hours can be elected. At least one-half of the work in both the major and minor areas must be in courses numbered 500 or above. No more than twelve (12) quarter hours or nine (9) semester hours by extension or transfer can apply to the degree nor is any institute or project credit applicable. Junior college teachers can substitute a course in the philosophy and administration of the junior college for one of their minor area courses.

II. Proficiency in a foreign language or, with departmental permission, in computer science and/or statistics is required unless the student's master program includes such a requirement.

III. One quarter of full-time work on the Hattiesburg campus constitutes the residency requirement for the degree.

IV. A departmental qualifying examination, a thesis of considerable scope, a written comprehensive examination covering the entire discipline, and a final oral examination of the thesis are required.

V. Since the work done for the Master of Philosophy degree is applicable to the Doctor of Philosophy degree, it can be awarded only by departments authorized to grant the Doctor of Philosophy degree, and all departments presently so authorized are permitted to grant the Master of Philosophy. At present, these areas are biology, chemistry, communication, comparative literature, English, history, microbiology, political science, and speech and hearing sciences.

Completion of the Doctor of Philosophy Degree

1. In order to achieve the Doctor of Philosophy degree the student holding a Master of Philosophy degree must take at least thirty-six (36) additional hours of course work, of which twelve (12) hours may be in research leading to the dissertation and of which twenty (20) must be in courses numbered 500 or above.

2. He must spend three (3) consecutive quarters of full-time study on the Hattiesburg campus in order to fulfill the residency requirement.

3. He must achieve proficiency in a second language (or in computer science and/or statistics) if he has not previously done so.

4. He is required to take a rigorous written examination in the specialized area of his discipline in which he plans to write his dissertation.

5. He must write an acceptable dissertation and defend it orally.

DOCTORAL DEGREE REQUIREMENTS

A convenient checklist of doctoral degree requirements may be procured in the Graduate Office.

I. **Credit Hours**

All doctoral degrees entail a minimum of 118 quarter hours of course work beyond the bachelor's degree or seventy-two (72) quarter hours of course work beyond the master's degree.

II. **Time Limitations:**

Courses taken above the master's degree or its equivalent which will fit into the degree program but which are six or more years old at the time of admission to the advanced graduate program may be counted toward meeting degree requirements when recommended by the department chairman and approved by the Graduate Dean.

The degree requirements must be completed within a period of six years after the student has been admitted to advanced graduate standing at the University of Southern Mississippi.

III. **Credit Hour Limitations:**

A. A minimum of forty-eight (48) hours of work beyond the master's degree must be earned on the University's Hattiesburg campus. Work taken to fulfill proficiency requirements may not be included in meeting this minimum requirement.

B. Transfer of credit for graduate work done at other institutions must be approved by the department chairman and Graduate Dean. Final evaluation of an acceptance of transfer credit will not be made until the student has been in residence for one quarter. Transfer of credit for doctoral degree programs is limited to not more than six (6) semester hours or nine (9) quarter hours beyond the master's degree.

Exceptions to this restriction may be made with the approval of the department chairman and the Graduate Dean.

C. No credit earned in institutes can be applied toward a doctoral degree.

D. No more than sixteen (16) quarter hours earned as a special graduate student may be applied toward a doctoral degree.

IV. Residency:

The residence requirement for a doctoral degree consists of three consecutive quarters during which the student devotes his full time to graduate work and so earns a minimum of twelve (12) hours of credit for each of the three quarters.

A student who holds a fellowship or an assistantship may fulfill this residence requirement by earning a total of thirty-six (36) hours of credit during consecutive quarters on the Hattiesburg campus of the University. The summer quarter may be counted in this sequence at the option of the candidate. A student may not fulfill the residency requirements if he is employed in a regular position.

V. The Doctoral Committee:

The student's work toward the doctoral degree is supervised by a departmental committee composed of a chairman and four members recommended by the department chairman and appointed by the Graduate Dean.

VI. The Minor Field:

If a minor field is required in the doctoral program, it shall consist of sixteen (16) quarter hours of course work and may consist of courses from a number of related areas.

VII. Examinations:

A. The aptitude phase of the Graduate Record Examinations or the Admission Test for Graduate Study in Business is required for admission into the Graduate School. Individual departments may require the advanced area tests.

B. The Miller Analogies Test is required of all doctoral students in the College of Education and Psychology.

C. If a doctoral student has not had an English writing proficiency test on either the baccalaureate or master's level, he will be required to take the University English Proficiency Test.

D. The foreign language and statistics requirements for the doctoral degree may be fulfilled in several ways:

1. The Doctor of Education degree does not require foreign language proficiency. However, the student must establish proficiency in statistics or computer science either by examination or by completing a prescribed course sequence, the credit hours for which do not apply toward the degree. Doctor of Music Education students refer to doctoral programs in music education.

2. The Doctor of Philosophy degree requires either (1) proficiency in two languages, (2) proficiency in one language and in statistics or computer science, or (3) proficiency in one language and the completion of a twelve-hour minor, the hours for which do not apply toward the degree, or (4) proficiency in statistics and in FORTRAN, COBOL, or other computer programming language suitable to to the degree program and research needs of the candidate. Proficiency in a specific computer language is to be certified by examination in that language devised and administered by the Department of Computer Science and Statistics. Languages other than French, German, Spanish, and Russian must be approved by the department chairman and the Graduate Dean. The particular option followed by the student must have the approval of the department chairman and the Graduate Dean.

E. All students must take a written and/or oral doctoral qualifying examination in their field and in the College of Education and Psychology in the Foundations of Education as well. This examination should be taken during the first or second quarter of the student's enrollment and is designed both to judge the student's fitness to pursue doctoral work and to guide his advisory committee in planning his program. The qualifying examination may be retaken only once.

F. At the completion of his course work and other examinations, the doctoral student is required to take a written and/or oral comprehensive examination in his major and minor field. If a student does unsatisfactory work on the comprehensive examination, he may be granted a second examination at the next regularly scheduled time, or later. His committee will recommend the conditions to be met before the examination may be repeated. The comprehensive examination may be retaken only once.

G. After the dissertation has been accepted and after all required course work has been completed, but at least four weeks before the candidate is scheduled to receive his degree, a final oral examination on

the dissertation and related fields will be conducted by the student's advisory committee and any other faculty members designated by the Graduate Dean. The examination will be open to any member of the graduate faculty.

VIII. The Dissertation:

The dissertation topic must be approved by the student's major professor and advisory committee and must be an original contribution to knowledge in the chosen field.

A separate bulletin outlining University requirements concerning the preparation of dissertations is available in the Graduate Office.

The student should register for 798 – **Dissertation** – during the quarter in which he defends his dissertation.

IX. Documents:

The doctoral student must file a number of documents with the Graduate Office.

A. After his doctoral committee has been appointed and his qualifying examination completed but before he has passed thirty-six (36) hours of doctoral course work, he should prepare in conjunction with his adviser a "Doctoral Planning Sheet," one copy of which is to go to each member of his committee and two copies to the Graduate Office.

B. After the student has completed all the requirements for the doctoral degree other than the dissertation but at least two quarters prior to graduation he should file two copies of the "Application for Candidacy" form with the Graduate Office and one copy with his adviser.

C. The student should present three copies of the "Application for Degree" form, properly stamped by the Business Office, to the Graduate Office during the quarter preceding that of graduation.

D. When completed, the student's file in the Graduate Office should contain in addition to the three documents described above statements from his adviser and/or department chairman appointing his doctoral committee, approving his dissertation prospectus, acknowledging the receipt of a first draft of his dissertation, and verifying the successful completion of his qualifying and comprehensive examinations and dissertation defense. Also contained in his file should be statements of proficiency in language and/or statistics.

DEPARTMENTS AND GRADUATE DEGREE PROGRAMS

The School of Business Administration currently offers the following graduate degree programs: a Master of Business Administration, a Master of Science in Accounting, and a Master of Science or Master of Arts in Economics. The curricular requirements for each of these programs are detailed below.

A prospective student should examine each degree program carefully as to its objective, course content, and prerequisites before deciding which to pursue.

Graduate fellowships are available in each of the departments and the Bureau of Business Research within the School of Business Administration. Students with good undergraduate records are encouraged to apply for fellowships at the time they apply for admission to the Graduate School. The student must have regular graduate status and ordinarily must have achieved a 3.0 average on his last two years of undergraduate work to be eligible.

GRADUATE DEGREE REQUIREMENTS

All of the general academic regulations and requirements outlined in Part IV of this **Bulletin** apply to students pursuing graduate work in the School of Business Administration. Specific requirements regarding prerequisites and courses are detailed under the outlined programs which follow. An applicant for admission who may be deficient in quality-point average or in his prerequisites may be admitted conditionally upon recommendation of his major professor, the Dean of the School of Business Administration, and the Dean of the Graduate School. If he is in doubt, he may make regular application and will be notified if his admission is regular, conditional, or if it is denied.

DEGREE PROGRAMS IN BUSINESS ADMINISTRATION
MASTER OF BUSINESS ADMINISTRATION

The Master of Business Administration program is primarily designed to prepare the student for a position of responsibility in business or industry. However, it is also used as preparatory graduate work for the doctoral degree or for teaching in junior colleges where a teaching certificate is not required. The

program is broad in nature and aimed at developing general competence in overall management.

Research reveals that, individuals with technical or other specialized degrees frequently discover that, after experienceing initially satisfying careers in their specialties, further promotions require a transition into the managerial area. The MBA program supplements the education of the specialist and should enable him to make the transition more readily. For this reason, the MBA program includes many students with undergraduate degrees in other fields as well as those who majored in business or economics as undergraduates.

The student who did his undergraduate work in some other field will have to spend additional time making up his deficiencies. Courses which are considered as definite prerequisites to the program are principles of accounting, principles of economics, and at least one course in each of the following fields: management, marketing, business law, business finance, and statistics. The major professor may ascertain other deficiencies upon examination of a transcript. A student who is deficient in these requirements may be allowed to remove the deficiency while doing graduate work provided that the undergraduate prerequisites of the specific graduate courses to be taken have been fulfilled.

The requirements for the Master of Business Administration degree may be completed in an academic year by the student who has graduated from an approved curriculum in a department or school of business and is exceptionally strong academically. Ordinarily the student spends a full calendar year completing the requirements.

A field emphasis may be taken in accounting, economics, finance, management, or marketing. A student who uses one of the curriculum courses in his field emphasis must substitute an acceptable 500 level course in another field in the curriculum. Master of Business Administration degree candidates are permitted to include a maximum of one G-400 level course in their program.

The degree will be conferred upon candidates who (1) meet the general requirements of the Graduate School, (2) complete the special curriculum requirements as outlined below, and (3) pass an oral and/or written examination. A thesis is optional.

CURRICULUM REQUIREMENTS

	Hours
*ACCOUNTING 525—**Managerial Accounting**	4
*ECONOMICS 515—**Managerial Economics**	4
ECONOMICS 520—Quantitative Analysis for Decision Making**	4

*A student taking a major emphasis in accounting, economics, or marketing will make a proper substitution for the course in his department upon advice of his chairman.

**Management 515, Operations Research, may be substituted, especially by those students taking a field emphasis in management.

MASTER OF SCIENCE IN ACCOUNTING

The Master of Science in Accounting program is designed to prepare students for professional accounting positions in industry, government and public accounting. It may likewise be used as preparatory for additional graduate work at the doctorate level. It differs from the MBA degree in that it is more highly specialized and directed precisely to the discipline of accounting. In addition to the accounting curriculum requirements, this program requires one minor field of sixteen (16) hours which permits the student to pursue an in-depth study of a related discipline of his choosing.

CURRICULUM REQUIREMENTS

ACCOUNTING 505—Advanced Accounting Theory	4
ACCOUNTING 510—Advanced Problems in Public Accounting	4
ACCOUNTING 520—Advanced Cost Accounting and Controllership	4
ACCOUNTING 530—Tax Planning and Research	4

MASTER OF ARTS OR MASTER OF SCIENCE IN ECONOMICS

The Department of Economics offers a program leading to a Master of Arts with a major in economics and a program leading to a Master of Science with a major in economics. The purpose of both programs is to prepare students for positions as economists in education, business, and government.

Under either program, the student must meet the general requirements of the Graduate School. There is no language requirement for a Master of Science degree and the thesis is optional with the student. A student pursuing the Master of Arts degree must demonstrate a proficiency in an approved foreign language and must also successfully complete an approved research project as evidenced by an accepted thesis. The specific requirements for the two degrees are listed below.

The recommended graduate minor in economics constitutes a systematic study of the economic environment in which we live. Several advanced undergraduate courses which have been designed to provide appropriate instruction in economics to students in other major fields may be taken for graduate credit.

In order to promote scholarship, fellowship, and the advancement of economics, all graduate students are encouraged to participate in the activities of the Economic Society, a student organization sponsored by the Department. Graduate students who qualify may be offered membership in Omicron Delta Epsilon (Artus), the national honorary economics society.

The recommended graduate minor in economics consists of Economics 500, 505, and two electives.

COLLEGE OF EDUCATION AND PSYCHOLOGY

Eric M. Gunn, Dean
Walter E. Cooper, Assistant Dean
Herman Boroughs, Coordinator of Graduate Studies

Requirements for Admission to Graduate Programs

Admission to the Graduate School for study in the College of Education and Psychology requires a specific grade point average and a minimum GRE score. (See general admission requirements in Part III of this Bulletin.) Any individual who does not meet the general admission requirements may request additional consideration of his application by appealing to the appropriate department chairman. He may be admitted to a graduate program if he receives the approval of the department chairman, the Dean of the College of Education and Psychology, and the Dean of the Graduate School.

Anyone holding a bachelor's degree from an accredited institution may be admitted as a special graduate student. A special graduate student is not considered to be in a graduate program leading to a degree. If the student demonstrates proficiency in graduate work, he may make application for a graduate degree program and, if approved, the student may use up to sixteen (16) quarter hours of work taken as a special graduate student in the degree program.

Those applicants who wish to study for a master's degree in any area of professional public school work should study for the Master of Education degree, and, therefore, must first hold or qualify to hold a Class A teaching certificate based on a baccalaureate degree in the area in which they wish to concentrate. A Master of Education degree applicant who does not yet qualify for an A certificate may be admitted to the Graduate School, but must meet the requirements of the State of Mississippi for an A certificate in teaching before the degree will be awarded. However, upon the recommendation of the departmental chairman, the Dean of the College of Education and Psychology may waive the requirements of satisfying certification requirements for those students currently employed or preparing for employment in junior or senior colleges, non-public institutions, or positions not requiring certification. In the event that certification requirements are waived, it is incumbent upon the student to recognize this limitation upon the scope of the areas within which he might seek employment in the future.

Degree and Specialist Programs Offered

The College of Education and Psychology offers graduate programs at three levels: master's degree; specialist certificate, and doctor's degree.

Master's Degrees: Master's degrees are offered in the following departments, with majors as indicated:

Department of Business Education
- Master of Science
- Master of Education

Department of Curriculum and Instruction
- Master of Education in
  - Elementary Education
  - Early Childhood Education
  - Secondary Education
- Master of Science in
  - Reading
  - Secondary Education

Department of Educational Administration and Supervision
- Master of Education in
  - Educational Administration
  - Supervision of Instruction

Department of Guidance
- Master of Education in School Counseling
- Master of Science in
  - College Counseling
  - Community Counseling

Department of Industrial and Technical Education
- Master of Science

Department of Library Science
- Master of Arts
- Master of Science

Department of Psychology (Including Educational Psychology)
- Master of Arts
- Master of Science

Department of Research and Human Development
- Master of Education

Department of Science Education
Master of Science
Master of Education

Department of Special Education
Master of Education

Specialist Certificate: Specialist certificates are offered in the following departments, with majors as indicated:

Doctoral Degrees: The following departments offer the Doctor of Education and/or the Doctor of Philosophy degrees:

Department of Curriculum and Instruction
Elementary Education
Secondary Education

Department of Educational Administration and Supervision

Department of Guidance

Department of Psychology
Psychology
Clinical Psychology
Educational Psychology

Department of Science Education

Department of Special Education

DEPARTMENT OF BUSINESS EDUCATION (BED – 105)

The Department of Business Education offers programs of study leading to the Master of Science degree in business education, the Master of Education degree in business education, certification in cooperative officer education, and an Education Specialist Certificate in business education. Persons who plan to teach business subjects in junior and senior colleges, who desire Class AA certification in secondary education, who desire certification in cooperative office education, or who desire additional training for employment in the business world can find a program suited to their professional goals. A person pursuing any one of these programs should have completed an undergraduate major in business teacher education. Candidates not having completed this major must become eligible for Class A certification as a business teacher as a prerequisite to the completion of all requirements for the first three programs listed. To be eligible for admission to the Education Specialist Certificate program, a person must present evidence of satisfactory scholarship in undergraduate and graduate study, hold a master's degree with a major in business education, have a well-defined professional goal, and meet other admission requirements of the University.

The appropriate master's degree will be conferred upon candidates who (1) meet the general requirements of the Graduate School and of the Department of Curriculum and Instruction; (2) complete the special curriculum requirements outlined below; and (3) pass an oral examination. In addition a comprehensive written examination covering course content may be required by the Department of Business Education. A thesis is optional.

The Education Specialist Certificate will be conferred upon candidates who satisfactorily complete items (1) and (2) in the preceding paragraph, (3) pass oral and written examinations, and (4) complete a research problem.

A business student seeking the Doctor of Education or the Doctor of Philosophy degree may major in business education and earn the degree through the Department of Curriculum and Instruction.

CURRICULUM FOR COORDINATORS OF BUSINESS AND OFFICE EDUCATION PROGRAMS

Persons who hold a Bachelor of Science degree with a major in business teacher education may take the three courses listed below and become certified as coordinators of business and office education programs.

	Hours
BED G-452—Philosophy of Vocational Business Education	4
BED G-453—Coordination of Office Occupations Programs	4
BED 591—Problems in Cooperative Office Education	2

EDUCATION SPECIALIST CERTIFICATE

Curriculum Requirements

As part of the requirements for the specialist certificate with a major in business education, a student must maintain satisfactory scholarship in completing the following course work:

	Hours
1. **Required courses in basic education or equivalent**	20
Select five:	
a. RED 501—Research: Its Introduction and Methodology	4
b. CIF 504—Foundations in American Education	4
c. GED 506—Foundations in Guidance	4
d. CIF 507—Basic Course in Curriculum Development	4
e. EPY 510—Educational Psychology	4
f. CIF 532—Measuring Results in Education	4
2. **Area Major** (specialization in business education)	28
a. BED 504—Foundations in Business Education	4
b. BED 551—Principles of Business Education	4
c. Select two:	
BED 553—Improvement of Instruction in Bookkeeping and Related Basic Skills	4
BED 554—Improvement of Instruction in Basic Business	4
BED 555—Improvement of Instruction in Typewriting and Related Skills	4
BED 556—Improvement of Instruction in Shorthand and Transcription	4
d. BED 601—Seminar in Business Education	4
e. Select one:	
BED 650—Business Education in the Junior College	4
BED 660Administration and Supervision in Business Education	4
f. BED 698—Research Problem	4
3. **Related Field**	20 hours.

The related field selected should both complement and supplement the major area in rounding out the preparation for one of the career goals of the specialist program, i.e., (a) advanced technical education for business;

(b) teacher education; or (c) administration and supervision. Course credits earned in the basic courses in education are not applicable to the related field.

With the approval of the candidate's advisory committee, a related field may be selected from one of the following: (a) school administration; (b) guidance; (c) educational psychology; (d) vocational education; (e) techniques (research, statistics, and tests and measurements); (f) secondary education.

Also with the approval of the candidate's advisory committee, a combination of courses selected primarily from the foregoing fields may consitute a related field provided such selection contributes directly to the career goal of the candidate.

4. **Outside minor** - field other than education 16 hours
A candidate pursuing the Education Specialist Certificate with a major in business education pursues an outside minor in business administration and/or economics.

5. **Elective courses** (ten [10] quarter hours provided minimum hours are taken in the basic, major, related, and minor areas) 0-10 hours
Electives should be selected with approval of adviser to strengthen the candidate's preparation for his chosen career goal.

Scholarship and Examinations

In addition to achieving acceptable scores on admission examinations and maintaining satisfactory scholarship through the course work, a candidate will be required to achieve satisfactorily in both written and oral comprehensive examinations in business education.

Completion of Work for Certificate

A candidate must complete the requirements for the specialist certificate within six years from the date of admission to candidacy.

DEPARTMENT OF CURRICULUM AND INSTRUCTION

The Department of Curriculum and Instruction includes the areas of elementary education, early childhood education, reading, and secondary education. The Department offers programs at the master's, specialist, and doctoral levels in these areas. The following degrees are offered:

Master of Education in Elementary Education

Master of Education in Early Childhood Education

Master of Science in Reading

Master of Education and Master of Science in Secondary Education

Specialist Certificate in Elementary Education

Specialist Certificate in Elementary Education with Emphasis in Early Childhood Education

Specialist Certificate in Elementary Education with Emphasis in Reading

Specialist Certificate in Secondary Education

Doctor of Education and Doctor of Philosophy in Elementary Education

Doctor of Education and Doctor of Philosophy in Elementary Education with Emphasis in Early Childhood Education

Doctor of Education and Doctor of Philosophy in Elementary Education with Emphasis in Reading

Doctor of Education and Doctor of Philosophy in Secondary Education

Only candidates holding a Class A certificate, or who exhibit willingness to meet Class A certification requirements at the undergraduate level prior to completion of a graduate degree program, will be admitted to the Department of Curriculum and Instruction. However, upon the recommendation of the departmental chairman, the certification requirement may be waived for a student pursuing a graduate degree in the area of secondary education who is currently employed or preparing for employment in a junior or senior college, non-public institution, or for a position not requiring certification. In the event the certification requirement is waived, it is incumbent upon the student to recognize this limitation upon the scope of the areas within which he might seek employment in the future.

The Department of Curriculum and Instruction strongly recommends that a student gain teaching experience before completing the latter two-thirds of his master's degree program. No student will be eligible to receive a specialist certificate until he has completed at least one year of teaching experience. Three years of teaching experience is a requisite for a doctor's degree.

MASTER'S DEGREES

The Department of Curriculum and Instruction offers master's degrees in elementary education, early childhood education, reading, and secondary education.

The program of study at the master's degree level is designed to increase the professional competency of the classroom teacher and to provide the course work necessary to meet standards of teacher certification at this advanced level.

The master's program requires regular admittance procedures, appointment of a graduate adviser, the filing of an approved program of studies, satisfactory completion of the English Proficiency Test, and successful completion of the comprehensive examination.

ADMISSION REQUIREMENTS

In order to be admitted on a regular basis to a master's degree program, an applicant must have a grade point average of at least 2.75 (figured on an A equals 4.0 scale) for the last two years of undergraduate study and at least 3.0 on undergraduate courses in the area of proposed graduate study. In addition, the applicant must make a combined score of at least 750 on the aptitude sections of the Graduate Record Examinations.

If an applicant does not meet the above requirements for regular admission, he may be admitted to a master's degree program on a conditional basis in one of two ways.

1. He must make a combined score of at least 750 on the aptitude sections of the Graduate Record Examinations and must have a grade point average no lower than 2.5.

2. He must have a grade point average of at least 2.75 if he has scored lower than 750 on the aptitude sections of the Graduate Record Examinations.

DEGREE PROGRAMS

Master of Education Degree in Elementary Education

RED 501—**Research: Its Introduction and Methodology.** Four hours.
CIF 504—**Foundations in American Education.** Four hours
CIE 506—**Psychology of Reading.** Four hours.
or

SPE G-455—**Speech and Hearing Problems for the Classroom Teacher.** Four hours.
AED 542—**Supervision and Curriculum in Reading.** Four hours.
CIE 598—Thesis. Optional. Credit deferred until thesis is completed. Six hours.

Total Hours—40 non-thesis program; 46 thesis program
Free Electives—8 hours non-thesis program

Master of Education Degree and Master of Science Degree in Secondary Education

Plan I (Thesis Program—46 Hours)
RED 501—**Research: Its Introduction and Methodology.** Four hours.
CIF 504—**Foundations in American Education.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
GED 506—**Fundamentals of Guidance.** Four hours.
or
CIS 508—**High School Curriculum.** Four hours.
or
CIF 532—**Measuring Results in Education.** Four hours.
CIS 598—Thesis. Credit deferred until thesis is completed. Six hours.

Plan II (Non-thesis Program—48 Hours)
RED 501—**Research: Its Introduction and Methodology.** Four hours.
CIF 504—**Foundations in American Education.** Four hours.
GED 506—**Fundamentals of Guidance.** Four hours.
CIS 508—**High School Curriculum.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
CIF 532—**Measuring Results in Education.** Four hours.

In addition to the above twenty-two (22) hour core requirement of Plan I and the twenty-four (24) hour core requirement for Plan II, a minor of at least twenty-four (24) hours must be taken in one of the following subject areas:

Art	Communication
Biology	Theatre Arts
Chemistry	Geology
Physics	Technical and Industrial Education
English	*Mathematics
Foreign Languages	**Science
Music	***Social Studies

*Courses in computer science and statistics may be included in this area.
**A combination of science courses may be used if the adviser determines that the need exists.
***Courses may be taken in any one or a combination of the following areas: history, geography, political science, sociology, and economics.

Under certain conditions, other minors may be selected with the approval of the department chairman.

SPECIALIST CERTIFICATES

The Department of Curriculum and Instruction offers specialist certificates in elementary education, secondary education, elementary education with emphasis in reading, and elementary education with emphasis in early childhood education. As a sixth year program, the specialist program requires regular admittance procedures, appointment of a graduate adviser and committee, filing an approved program of studies, satisfactory completion of the English Proficiency Test, and completion of an approved field study.

Course work within the specialist programs includes the requirements outlined under the master's degree programs in addition to the requirements specified in this section.

ADMISSION REQUIREMENTS

In order to be admitted on a regular basis to a specialist program, an applicant must have a grade point average no lower than 3.25 on previous graduate work and a combined score of at least 800 on the aptitude sections of the Graduate Record Examinations.

If an applicant does not meet the above requirements for regular admission, he may be admitted to a specialist program on a conditional basis in one of two ways.

1. He must make a combined score of at least 800 on the aptitude sections of the Graduate Record Examinations and must have a grade point average no lower than 3.00 on previous graduate work.

2. He must have a grade point average no lower than 3.25 on previous graduate work and must make a combined score of at least 750 on the aptitude sections of the Graduate Record Examinations.

Specialist Certificate in Elementary Education

RED 502—**Introduction to Educational Statistics.** Four hours.
CIF 716—**History of Public Education in the United States.** Four hours.
CIF 718—**Comparative Philosophies of Education.** Four hours.
AED 526—**Supervision of Instruction.** Four hours.
EPY 503—**Learning and Motivation I.** Four hours.
or
EPY 510—**Advanced Educational Psychology.** Four hours.
CIE 698—**Research Problem.** Four hours.

Total Hours—24

In addition to the above required core courses, at least four courses (16 hours) must be taken in a subject field or fields.
Total Required Hours—40 minimum
Electives—8 hours

Specialist Certificate in Elementary Education With Emphasis in Early Childhood Education

RED 502—**Introduction to Educational Statistics.** Four hours.
CIF 716—**History of Public Education in the United States.** Four hours.
CIF 718—**Comparative Philosophies of Education.** Four hours.
AED 526—**Supervision of Instruction.** Four hours.
EPY 503—**Learning and Motivation I.** Four hours.
or
EPY 510—**Advanced Educational Psychology.** Four hours.
CIE 698—**Research Problem.** Four hours.

Total Hours—24

In addition to the above required core courses, at least four courses (16 hours) will be taken in the area of early childhood education.
Total Required Hours—40 minimum
Electives—8 hours

Specialist Certificate in Elementary Education with Emphasis in Reading

RED 502—**Introduction to Educational Statistics.** Four hours.
CIF 716—**History of Public Education in the United States.** Four hours.
CIF 718—**Comparative Philosophies of Education.** Four hours.
AED 526—**Supervision of Instruction.** Four hours.
EPY 503—**Learning and Motivation I.** Four hours.
or
EPY 510—**Advanced Educational Psychology.** Four hours.
CIE 698—**Research Problem.** Four hours.

Total Hours—24

In addition to the above required core courses, at least four courses (16 hours) will be taken in the area of reading.
Total Required Hours—40 minimum
Electives—8 hours

Specialist Certificate in Secondary Education

RED 502—**Introduction to Educational Statistics.** Four hours.
CIF 716—**History of Public Education in the United States.** Four hours.
CIF 718—**Comparative Philosophies of Education.** Four hours.
EPY 575—**Advanced Adolescent Psychology.** Four hours.
AED 704—**School Community Relations.** Four hours.
or
AED 526—**Supervision of Instruction.** Four hours.
CIS 698—**Research Problem.** Four hours.

In addition to the above twenty-four (24) hour core requirement, a minor of at least twenty-four (24) hours must be taken in one of the subject areas listed under the heading **Master of Education Degree and Master of Science Degree in Secondary Education.** With the approval of the department chairman, a student who will be assuming major responsibility for reading programs at the secondary or college level may use reading as the subject area (minor) for his specialist certificate.
Total Required Hours—48 minimum

DOCTORAL DEGREES

The Department of Curriculum and Instruction offers the Doctor of Education and the Doctor of Philosophy degrees in elementary education, secondary education, elementary education with emphasis in reading, and elementary education with emphasis in early childhood education. If a student

desires to receive a Doctor of Philosophy degree he should follow one of the programs outlined in this section and, in addition, gain proficiency in one foreign language.

There are three distinct phases through which all students proceed in pursuit of the doctoral program. These include:

1. Phase One—involvement in procedures relative to general admittance requirements; appointment of a major professor; successful completion of the Miller Analogies, English Proficiency, and qualifying examinations; and appointment of the candidate's doctoral committee.

2. Phase Two—involvement in procedures relative to tentative program of studies, acceptance of prospectus, successful completion of the language and/or statistics requirements, completion of the residency and course work requirements, successful completion of the comprehensive examination, and admission to candidacy for a doctoral degree.

3. Phase Three—involvement in procedures relative to approval of dissertation.

ADMISSION REQUIREMENTS

In order to be admitted on a regular basis to a doctoral program, an applicant must have a grade point average no lower than 3.5 on previous graduate work and a combined score of at least 900 on the aptitude sections of the Graduate Record Examinations.

If an applicant does not meet the above requirements for regular admission, he may be admitted to a doctoral program on a conditional basis in one of two ways.

1. He must make a combined score of at least 900 on the aptitude sections of the Graduate Record Examinations and must have a grade point average no lower than 3.25 on previous graduate work.

2. He must have a grade point average no lower than 3.5 on previous graduate work and must make a combined score of at least 850 on the aptitude sections of the Graduate Record Examinations.

DEGREE PROGRAMS

Doctor of Education Degree in Elementary Education

RED 552—**Educational Research: Descriptive Statistical Methods.** Four hours.
RED 553—**Educational Research: Significance Tests and Research Design.** Four hours.
RED 796—**Advanced Educational Research.** Four hours.
CIF 716—**History of Public Education in the United States.** Four hours.

or
AED 526—**Supervision of Instruction.** Four hours
CIS 797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
CIS 798—Dissertation.

The courses listed above will serve as a core program for students pursuing the doctoral degree in secondary education. The doctoral program consists of a minimum of 118 graduate hours, exclusive of the dissertation and statistics (RED 552 and RED 553), beyond the bachelor's degree. More than 118 hours may be required in order to satisfy deficiencies which may exist in the student's background and preparation. Of the total number of hours required of a doctoral student in secondary education, approximately one half (½) must be taken in one of the subject areas listed under the heading **Master of Education Degree and Master of Science Degree in Secondary Education.**

DEPARTMENT OF EDUCATIONAL ADMINISTRATION AND SUPERVISION (AED – 130)

The programs for the major in educational administration encompass the full range of administrative positions and lead to the master's degree, the specialist certificate, and the doctor's degree. Programs at the master's degree level provide preparation in the elementary school principalship, the junior high school principalship, the high school principalship, and supervision of instruction. Programs at the specialist certificate and doctorate levels provide preparation for the superintendency and central administrative staff positions. In addition, the program at the doctoral level provides preparation for college teachers of educational administration and persons desiring to prepare for administration in higher education.

The following course patterns for the different levels set forth only the minimum core requirements, and the electives selected to suit individual needs and objectives must be chosen with the advice and approval of the student's

major professor. Therefore, it is mandatory that the student consult early in his program, and frequently thereafter, with his major professor concerning the selection of courses and sequence in which these courses will be taken.

DEPARTMENTAL POLICIES

The following departmental policies are supplementary to the rules and regulations of the University and the Graduate School as set forth elsewhere in this **Bulletin.**

PROGRAMS AND COURSES IN EDUCATIONAL ADMINISTRATION

MASTER'S DEGREE

Admission

Regular: A minimum grade point average of 2.75 and a combined score of 750 on the aptitude phase of the Graduate Record Examinations.

Conditional: Departmental action provided the student has a score of 750 or above on the aptitude section of the Graduate Record Examinations and a grade point average no lower than 2.5 or a grade point average of 2.75 or above if the Graduate Record Examinations score is below 750.

Application for Graduation Graduation is based upon:

1. Satisfactory completion of the English Proficiency Test.
2. Completion of an approved program of studies consisting of a minimum of forty-eight (48) quarter hours.
3. Satisfactory completion of the comprehensive examination.

PROGRAMS

Educational Administration

RED 501—**Research: Its Introduction and Methodology.** Four hours
(Initial enrollment in the program must be in this course)
CIF 504—**Foundations in American Education.** Four hours.
CIF 507—**Basic Course in Curriculum Development.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
AED 520—**Basic Course in Educational Administration.** Four hours.
AED 526—**Supervision of Instruction.** Four hours.*

AED 550—**School Business Management.** Four hours.*
AED 598—Thesis. Six hours. Credit deferred until thesis is completed.**
Total—28 or 34 hours.

Electives—14 or 20 hours. Subject to the approval of the student's adviser, elective courses are to be taken as follows:

1. 12 quarter hours must be taken in Educational Administration and Supervision with one course selected from the following:
   AED 513—**Organization and Administration of the Junior High School.** Four hours.
   AED 516—**Secondary School Administration.** Four hours.*
   AED 518—**The Elementary School Principal.** Four hours.*

2. The remaining elective courses may be taken in related areas.

*Prerequisite: AED 520.
**Required only of student writing a thesis.

Supervision of Instruction

RED 501—**Research: Its Introduction and Methodology.** Four hours.
(Initial enrollment in the program must be in this course)
CIF 504—**Foundations in American Education.** Four hours.
CIF 507—**Basic Course in Curriculum Development.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
AED 520—**Basic Course in Educational Administration.** Four hours.
AED 526—**Supervison of Instruction.** Four hours.*
AED 611—**Advanced Curriculum Development.** Four hours.**
AED 638—**Practicum in Supervision.** Four hours.**
AED 598—Thesis. Six hours. Credit deferred until thesis is completed.***
Total—32 to 38 hours.

Electives—10 to 16 hours. These courses will be chosen from related areas subject to the approval of the student's major professor.

*Prerequisite: AED 520
**Prerequisite: AED 526
***Required only of students writing a thesis.

SPECIALIST CERTIFICATE

Admission

Regular: A minimum grade point average of 3.25 on previous graduate work and a combined score of 800 on the aptitude phase of the Graduate Record Examinations.

Conditional: A grade point average between 3.00 and 3.25 on previous graduate work and a Graduate Record Examinations score no lower than 800 or a grade point average no lower than 3.25 and a Graduate Record Examinations score between 750 and 800.

Admission to Candidacy

1. It is mandatory that the application for admission to candidacy be submitted upon the completion of twelve (12) to sixteen (16) quarter hours of course work at the University of Southern Mississippi.

2. Satisfactory completion of the English Proficiency Test.

Application for Graduation Graduation is based upon:

1. Completion of an approved program of studies as determined by the student's committee and which may consist of more than the minimum forty-eight (48) quarter hours of credit required for graduation.

2. Satisfactory completion of the comprehensive examination.

3. Successful defense of the research project.

PROGRAMS

The specialist certificate students must have completed all courses or thier equivalent in the master's degree program. Those courses not taken must be completed but will not count as part of the specialist program. Additional electives are required for previously completed required courses.

A minimum of twelve (12) quarter hours in cognate areas is required in all of the specialist certificate programs. The Department defines cognate areas as those courses which broaden and complement the student's program which are outside the areas of professional education. These courses and other electives will be chosen with the approval of the student's major professor and additional hours may be required to satisfy deficiencies in the student's program.

Administration

AED 611, 636, 638, 668, 698, 700, 704, 706, 710
Total–36 hours
Electives–12 hours in cognate areas.

Secondary Administration

AED 611, 638, 698, 704, 708, 710, 718
Total–28 hours
Electives–20 hours with 12 in cognate areas.

Elementary Administration

AED 611, 638, 698, 704, 710 – RED 502 – CIF 718

Total–28 hours

Electives–20 hours with 12 in cognate areas.

Curriculum and Supervision*

AED 611, 638, 698, 708 – CIF 532, 718 – CIE 528 – CIS 508 – EPY 580 or 610

Total–36 hours

Electives–12 hours in cognate areas. AED 517 or CIF 519 is required as the first elective if any of the above courses have been completed prior to entering this program.

*AED 520 and 526, CIF 507, and EPY 510 are required prerequisites.

School Business Management*

AED 550, 668, 704, 706, 708, 710

Total–24 hours.

Electives–24 hours with 20 from business oriented courses.

Suggested courses are MGT 525, G-472, G-468 – ACC G-470 – RED 612 – FIN 540 – BED G-460.

*CIF 507, AED 520, and RED 501 are required prerequisites.

DOCTORAL DEGREE

Admission

Regular: A minimum grade point average of 3.50 on previous graduate work and a combined score of 900 on the aptitude phase of the Graduate Record Examinations.

Conditional: A grade point average between 3.25 and 3.50 on previous graduate work and a Graduate Record Examinations score no lower than 900 or a grade point average no lower than 3.50 and a Graduate Record Examinations score between 800 and 900.

Qualifying Entrance Examination

1. Must be taken prior to the completion of twenty-four (24) quarter hours of study within the department.

2. May not be taken prior to the receipt of satisfactory GRE scores, the results of the Millers Analogies Test, and satisfactory completion of the English Proficiency Test.

3. Regularly admitted doctoral students who fail the examination may repeat it upon the completion of twenty-four (24) quarter hours of credit after

the quarter in which the examination was taken.

4. The results of a master's degree comprehensive examination may not be substituted for this examination.

Planning Sheet Planning sheets are completed after the qualifying examination has been passed and the committee appointed, but before the student has completed thirty-six (36) hours of course work.

Admission to Candidacy Admission to candidacy should be submitted two quarters prior to graduation and will be approved by the student's graduate committee upon:

1. Completion of an approved program of studies.
2. Satisfaction of the language or statistics requirement.
3. Completion of an approved dissertation prospectus.
4. Completion of the comprehensive examination.
5. Completion of the residence requirement, which consists of three consecutive quarters of full-time studies.

Application for Graduation Graduation is based upon:

1. Meeting the departmental and Graduate School deadlines for receiving completed dissertation.
2. Successful defense of the completed dissertation.

PROGRAMS

At the doctoral level, programs are provided in (1) Public School Administration and (2) Education Administration with an emphasis in Higher Education. The general administration program provides preparation for the superintendent, other central office positions, and college teachers while the program emphasizing higher education is designed to prepare administrators of higher education.

The doctoral program requires a minimum of 118 quarter hours beyond the bachelor's degree exclusive of the dissertation and proficiency in statistics. A minimum of forty-eight (48) quarter hours must be taken on the Hattiesburg campus. The student's doctoral committee, appointed by the Graduate Dean, will approve the selection of required courses and electives and in order to secure breadth and depth in the student's preparation program may require more than

the minimum number of hours. The student's program shall include a minimum of twelve (12) quarter hours of graduate credit in cognate areas, preferably in the social sciences. The Department defines cognate areas as those courses which broaden and complement the student's program which are outside the areas of professional education.

Each doctoral student will be required to participate in a variety of laboratory and field experiences, many of which may not be connected with specific courses.

DEPARTMENT OF GUIDANCE (GED – 140)

The Guidance Department offers programs at the master's, specialist, and doctorate levels in guidance, counseling, and student personnel services. The programs are designed to provide specialized professional preparation in the areas of: (1) School Guidance and Counseling; (2) College and University Student Personnel Work; (3) Community Agency Counseling; and (4) Counselor Education and Supervision.

MASTER'S DEGREES

The Guidance Department offers the Master of Education degree in school counseling, the Master of Science degree in college counseling, and the Master of Science degree in community counseling. The general requirements for these programs are as follows:

Admission

Regular:	An undergraduate grade point average of 2.75 and a combined score of 750 or above on the aptitude sections of the GRE
Conditional:	A student may be admitted on a conditional basis if he has: (a) A score of 750 or above on the aptitude sections of the GRE and a grade point average no lower than a 2.5 (b) A grade point average of 2.75 or above if the GRE is lower than 750.
Removal of Conditional Status:	Maintain a grade of B or better on each graduate course attempted during the first quarter as a full-time student. If a part-time student, a grade of B or better is required on the first twelve (12) hours or grades of B or better on all courses taken while completing the twelve-hour requirement.

Admission to Candidacy

1. An application for admission to candidacy must be filed with the Department upon the completion of twelve (12) to sixteen (16) quarter hours of course work in the Department.

2. Satisfactory completion of the English Proficiency Test.

Application For Graduation Graduation is based upon:

1. Completion of a minumum of forty-six (46) quarter hours course work in an approved program of studies.

2. Satisfactory completion of the comprehensive examination.

3. Satisfactory performance in the counseling practicum.

CURRICULUM PRESCRIPTIONS

The Master of Education Degree in School Counseling: The course pattern is designed to provide learning experiences in the area of school guidance and counseling and will meet the professional and academic requirements for Class AA certification for elementary or secondary school counselors in Mississippi. A teaching certificate based upon a baccalaureate degree is a prerequisite for this program.

Required Courses: (36 hours)
RED 501—**Research: Its Introduction and Methodology.** Four hours.
CIF 504—**Foundations in American Education.** Four hours.
GED 506—**Fundamentals of Guidance.** Four hours.
GED 522—**Organization and Administration of Pupil Guidance.** Four hours.
GED 571—**The Information Services in Guidance.** Four hours.
GED 581—**Methods and Techniques of Counseling.** Four hours.
GED 582—**Use and Interpretation of Tests in Guidance.** Four hours.
GED 587—**Analysis of the Individual.** Four hours.
GED 600—**Guidance and Counseling Laboratory I.** Four hours.
TOTAL: 36 hours

Elective courses highly recommended: (10 - 12 hours)
GED 505*—**Guidance in the Elementary School.** Four hours.
GED 593 I—**Supervised Practicum.** Four hours.
PSY G-480—**Psychology of Personality.** Four hours.
or
SOC G-430—**Social Foundations of Personality.** Four hours.
ITE 511—**Organization and Philosophy of Vocational Education.** Four hours.
PSY 587—**Individual Psychological Testing: Stanford-Binet.** Four hours.

or
PSY 588—**Individual Psychological Testing: Wechsler Scales.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
EPY 574—**Child Psychology.** Four hours.
EPY 575—**Advanced Adolescent Psychology.** Four hours.
GED 684—**Group Counseling.** Four hours.
SPE G-486—**Psychology and Education of the Exceptional Child.** Four hours.

*Required for Elementary Counselors.
TOTAL: 46 - 48 hours.

The Master of Science Degree in College Counseling: The course pattern is designed to meet the professional preparation needs of a variety of individuals who expect to work in the broad field of college student personnel services. Providing a flexible program through the selection of electives and participation in variable field practicum experiences, the program is geared to the needs of college student personnel workers such as counselors, deans of men and women, directors of housing, directors of student affairs, directors of placement, directors of admissions, and registrars.

Required Courses: (32 hours)
RED 501—**Research: Its Introduction and Methodology.** Four hours.
CIF 504—**Foundations of American Education.** Four hours.
or
AED 711—**Higher Education in the U.S.** Four hours.
GED 506—**Fundamentals of Guidance.**Four hours.
GED 581—**Methods and Techniques of Counseling.** Four hours.
GED 582—**Use and Interpretation of Tests in Guidance.** Four hours.
GED 588—**Student Personnel Work in Higher Education.** Four hours.
GED 600—**Guidance and Counseling Laboratory I.** Four hours.
GED 593I—**Supervised Practicum.** Four hours.

Elective Courses Highly Recommended: (14 - 16 hours)
GED 684—**Group Counseling.** Four hours.
GED 571—**The Information Service in Guidance.** Four hours.
GED 586—**Seminar in Student Personnel Problems.** Four hours.
GED 580—**Marital and Pre-Marital Counseling.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
or
EPY 512—**Learning and Instruction in Higher Education.** Four hours.
EPY 575—**Advanced Adolescent Psychology.** Four hours.
PSY G-455—**Social Psychology.** Four hours.
PSY G-480—**Psychology of Personality.** Four hours.
SOC G-450—**Social Institutions.** Four hours.
TOTAL: 46 - 48 hours.

The Master of Science Degree in Community Counseling: The course pattern for this degree program is purposely broad and flexible. It is designed to prepare individuals for counseling and personnel roles in a variety of community agency settings such as vocational rehabilitation, employment placement, community mental health, family and social welfare, church ministry, and business.

Required Courses: (28 hours)

SOC G-485—**Methods of Social Research.** Four hours.
or
RED 502—**Introduction to Statistics.** Four hours.
CIF 504—**Foundations of American Education.** Four hours.
or
CIF 509—**Social Foundations of Education.** Four hours.
GED 605—**Principles of Guidance.** Four hours.
or
GED 560—**Introduction to Community and Rehabilitation Services.** Four hours.
GED 581—**Methods and Techniques of Counseling.** Four hours.
GED 582—**Use and Interpretation of Tests in Guidance.** Four hours.
GED 600—**Guidance and Counseling Laboratory I.** Four hours.
GED 593—**Supervised Practicum.** Four hours.

Elective Courses Highly Recommended: (18 - 20 hours)

GED 682—**Community Resources for Guidance.** Four hours.
GED 684—**Group Counseling.** Four hours.
GED 571—**The Information Services in Guidance.** Four hours.
GED 563—**Case Management Processes in Rehabilitation Counseling.** Four hours.
GED 561—**Socio-Psychological Aspects of Disability.** Four hours.
GED 562—**Medical Aspects of Disability.** Four hours.
PSY G-445—**Social Theory.** Four hours.
PSY G-480—**Personality Theory.** Four hours.
PSY G-481—**Abnormal Psychology.** Four hours.
PSY 588—**Individual Testing: Wechsler Scales.** Four hours.
EPY 645—**Psychology of Mental Retardation.** Four hours.
SPE 505—**Psychology and Education of Emotionally Disturbed.** Four hours.
SOC G-429—**Juvenile Deliquency.** Four hours.
SOC G-420—**Industrial Sociology.** Four hours.
SOC G-430—**Social Foundations of Personality.** Four hours.
MGT 525—**Human Relations in Business.** Four hours.
MGT G-468—**Wage and Salary Administration.** Four hours.
TOTAL: 46 - 48 hours.

SPECIALIST CERTIFICATE

The Department of Guidance offers the specialist certificate in guidance and counseling with emphasis (1) School Counseling, (2) College Counseling and Personnel Work, and (3) Community Counseling. As a sixth year advanced program, the specialist curriculum presupposes a master's degree in guidance or its equivalent and requires completion of an approved program of study including a minimum of forty-six (46) quarter hours credit beyond the master's degree.

The curriculum for the specialist program is purposely designed to be flexible in order that candidates may develop greater specialization in an area related to their individual professional goals. Included in the course of study is a minimum of twelve (12) quarter hours credit in cognate areas and an approved field study. The general requirements for the specialist certificate are as follows:

Admission

Regular:	A grade point average no lower than 3.25 and a combined score of 800 or above on the aptitude section of the GRE.
Conditional:	A grade point average between 3.00 and 3.25 on previous graduate work and a GRE score no lower than 800 or a grade point average no lower than 3.25 and a GRE score between 750 and 800. An on-campus interview is required before a recommendation for conditional admission is made.
Removal of Conditional Status:	On the recommendation of the department chairman provided the student has attained a grade point average of at least 3.25 on the first twelve (12) hours of course work numbered 500 or above or on all courses taken while completing this requirement.

Admission to Candidacy

1. The application for admission to candidacy must be submitted upon the completion of twelve (12) to sixteen (16) quarter hours of course work in the Department beyond a master's degree in guidance or its equivalent.

2. The English Proficiency Test must be satisfactorily passed.

Application for Graduation Graduation is based upon:

1. Completion of an approved program of studies containing a minimum of forty-six (46) quarter hours credit beyond a master's degree in guidance or its equivalent.

2. Satisfactory completion of a comprehensive examination.

3. Satisfactory completion, write-up, and defense of the field study.

DOCTORAL DEGREES

The Guidance Department offers the Doctor of Education (Ed.D.) and the Doctor of Philosophy (Ph.D.) degrees in guidance and counseling. General course requirements beyond the baccalaureate degree include a minimum of fifty (50) quarter hours work in the major area of guidance and counseling, a minimum of thirty (30) quarter hours work in an interdisciplinary supporting minor, and the remainder of 118 hours work in foundations excluding research tools (languages and/or statistics) and dissertation.

Working from a common core of courses in guidance and counseling, the student may develop from among the following program emphases a program of study which is consistent with his professional needs and career objectives:

A. **School Guidance.** This emphasis is designed for individuals who expect to work as counselors, guidance directors, and directors of pupil personnel services in school settings.

B. **Student Personnel Work in Higher Education.** This emphasis is designed for individuals who expect to work as student personnel specialists and deans in college and university settings. Standards prepared by the Commission on Professional Development of the Council of Student Personnel Associations in Higher Education and the Interdivisional Committee of the American Personnel and Guidance Association serve as guides in developing programs of study.

C. **Counseling.** This empahsis is designed for students who are preparing for positions in college and university counseling centers and in community agencies such as vocational rehabilitation, the Veterans Administration, and other agencies which utilize skills and competencies of doctoral-level counseling specialists. Students taking this emphasis typically are given greater exposure to counseling and human development theory and engage in extensive laboratory practice in counseling with a range of normal clients.

D. **Counselor Education and Supervision.** This emphasis is designed for students who plan to engage in the teaching and training of counselors at the college and university level. Students in this program typically combine either the school guidance or student personnel emphasis with the counseling emphasis and, toward the end of their program, are placed

in supervised internship experiences in counselor education and supervision.

General Requirements for the Doctoral Program

Admission

Regular: A minimum grade point average of 3.50 on previous graduate work and a combined score of 850 on the aptitude section of the Graduate Record Examinations.

Conditional: A grade point average between 3.25 and 3.50 on previous graduate work and a GRE score no lower than 850 or a grade point average no lower than 3.50 and a GRE score between 800 and 850. An on-campus interview is required before a recommendation for conditional admission will be made.

Removal of Conditional Status: On the recommendation of the department chairman provided the student has attained a grade point average of at least 3.25 on the first twelve (12) hours of course work numbered 500 or above or on all courses taken while completing the requirement.

Qualifying Examinations

1. Should be taken after completion of approximately twenty-four (24) quarter hours work in the Department beyond a master's degree or equivalent in guidance.

2. May not be taken prior to admission to a doctoral program and satisfactory completion of the English Proficiency Test.

3. May not be taken prior to completion of at least one quarter of on-campus laboratory counseling practicum.

4. May be retaken one time after an initial failure. Students may be asked to retake all or parts of the examination after complying with departmental recommendations regarding additional study and preparation. Oral followups to the examination may be scheduled at the discretion of the Department.

5. The results on a master's degree or specialist certificate comprehensive examination may not be substituted for this examination.

6. The doctoral advisory committee will be appointed, and the course planning sheet will be filed after satisfactory completion of the qualifying examinations.

Comprehensive Examinations

1. May be scheduled by individual appointment with the department chairman during or after the last quarter in which the student is enrolled in courses listed on the approved course of study.

2. Will consist of written and/or oral examination.

3. May be retaken one time after initial failure.

4. Must be completed a minimum of two quarters prior to graduation.

Residency

1. Completion of the doctoral residency requires full-time on-campus study for three consecutive quarters. During the residency period, students are expected:
   (a) To carry a minimum course load of twelve (12) quarter hours per quarter for three consecutive quarters or, in the case of students on one-half time University fellowships, thirty-six (36) quarter hours work in consecutive quarters.

   (b) To participate in a variety of credit and non-credit departmental activities including a residency seminar, laboratory and practicum experiences, individual case work, field trips, and other related professional activities.

   (c) To be relieved of job responsibilities with off-campus employers.

Admission to Candidacy

Admission to candidacy for a doctoral degree will be approved by the student's advisory committee upon:

1. Completion of language and/or statistics requirements. Doctor of Education candidates will meet intermediate level statistics proficiency; Doctor of Philosophy candidates must show proficiency in (a) one language and statistics or (b) statistics and computer science.

2. Completion of residency requirements.

3. Satisfactory completion of the comprehensive examination.

4. Approval of a dissertation prospectus. The dissertation prospectus may be presented to the advisory committee for approval any time after the comprehensive examination has been satisfactorily passed.

Application For Graduation Graduation is based upon:

1. Completion of all requirements described above.

2. Successful defense of the completed dissertation.

DEPARTMENT OF INDUSTRIAL AND TECHNICAL EDUCATION (ITE – 165)

The Department offers programs leading to the Master of Science degree.

(1)**Major in Industrial Arts Education:** The student will be guided by the department chairman in selecting a minimum of thirty (30) quarter hours from courses offered in the Department, and sixteen (16) quarter hours in a minor area. The minor may include education, psychology, and guidance courses.

(2)**Major in Vocational Technical Education:** The student will be guided by the department chairman in selecting a minimum of twenty-eight (28) quarter hours offered in the Department, and an additional twenty (20) quarter hours in the administration and curriculum and instruction areas.

For additional information pertaining to the specific courses in the program, contact the department chairman.

DEPARTMENT OF LIBRARY SCIENCE (LS – 170)

The Department of Library Science participates in programs leading to the Master of Arts and Master of Science degrees. The general requirements for these degrees are outlined in Part IV of the **Graduate Bulletin.** A graduate student in library science must meet the general requirements for admission to the University's graduate program. Every master's degree candidate is required to take the following core courses: LS 504, LS 508, LS 560 or LS 561, and LS 565 or LS 566. If the student's undergraduate major is in library science, the two (2) core courses, LS 504 and LS 508, will not be required. Students will elect additional courses on the basis of their professional objectives in the library field, such as school library, college and university library, public library, and special library, and the recommendations of their adviser.

For the Master of Science degree, a minimum of forty-eight (48) graduate hours is required, half of which must be in courses numbered 500 or above. A student may elect eight (8) hours in a subject field or in the area of educational media approved by the department chairman and his adviser. There is no foreign language requirement and the writing of a thesis is optional.

The Master of Arts degree requires a minimum of forty-six (46) graduate hours, twenty-four (24) of which must be in courses numbered above 500. The student in the Master of Arts program is required to write a thesis for six (6) hours of graduate credit. The student must also demonstrate proficiency in a modern language. Appropriate graduate course work in statistics may be accepted as a part of the major when approved by the department chairman.

Students wishing to prepare for positions in the public, college and university, and special library fields should major in an academic area other than library science at the undergraduate level and complete the master's program in library science. If a student, whose undergraduate major is not in library science, plans to use this graduate program for the school librarian's certification, he must take additional undergraduate library science courses in order to meet the requirements as stated in the Special Subject Field Certificates–Librarian section of the "Regulations for Teacher Certification" issued by the Division of Instruction, Mississippi State Department of Education. However, if a student already holds a Class A Elementary Teacher's Certificate in the State of Mississippi, additional undergraduate courses are not required.

DEPARTMENT OF PSYCHOLOGY (PSY – 175)

The Department offers the Master of Arts, the Master of Science, and doctoral programs in general psychology, in clinical psychology, in developmental psychology, and in school psychology. The general requirements for master's and doctoral degrees are listed in Part IV of this Bulletin.

Students desiring to do graduate work in psychology must have a foundation of undergraduate courses in statistics and experimental psychology. Foundation courses in psysiological psychology, psychological measurement, and the history of psychology are also highly recommended as prerequisites. A minimum total score (quantitative + verbal) of 1,000 on the Aptitude Section of the Graduate Record Examinations is required for regular admission to graduate work in psychology. Students seeking admission to post-master's level work normally are required to come to the campus for a personal interview as a part of the application procedure for advanced standing.

THE MASTER OF ARTS DEGREE IN PSYCHOLOGY

This degree program is planned to prepare students for advanced graduate work to the doctoral level, or to teach in junior or senior colleges, or to work in certain research settings. Candidates must pass the foreign language requirement and are required to write a thesis. Core courses for this degree include 562, 563, 531, 522, 524, 503, 594, and 598.

THE MASTER OF SCIENCE DEGREE IN PSYCHOLOGY

This degree plan is essentially a professional-training, terminal program with emphasis on formal course work and paralleling practicum experience in schools, community mental health centers, hospitals and state schools for the mentally retarded, etc. The emphasis is on pschometrics and behavior modification. Core courses include 562, 503, 505, 531, 534, 587, 588, and 594 with supervised practicum for a minimum of five quarters. Neither a foreign language nor a thesis is required in this degree program. It normally requires two years to complete.

THE DOCTOR OF PHILOSOPHY DEGREE

The sequence of courses leading to the Doctor of Philosophy degree in general psychology is planned to prepare students to be college and university teachers of psychology, or to become research workers in a variety of settings, including universities, governmental agencies, schools and hospitals, and industry.

The Doctor of Philosophy degree in clinical psychology is planned to prepare students for diagnostic, psycho-therapeutic and research work in a variety of settings which represent programs for community-wide prevention or amelioration of mental illness. The sequence of courses and other experiences provided for these students is outlined according to American Psychological Association standards. Included in the program are wide practicum and internship experiences both in the University Clinic, mental hospitals, and in community mental health and mental retardation settings.

The doctoral program in developmental psychology is designed to prepare students to be college and university teachers and to conduct basic and applied research in the various areas of developmental psychology. An interdepartmental sequence of courses stresses the theorectical and empirical foundations of child and adolescent psychology as well as various areas emphasizing exceptional children. Developmental research is encouraged in conjunction with the experimental, clinical, or school programs within the Department. In addition, campus facilities for observational studies and child research include the Infant Development Center and the University Nursery and Kindergarten schools. Plans are being formulated for a mobile Developmental Laboratory.

The doctoral program in school psychology consists of a sequence of courses and other experiences which prepare students for a variety of psychological services in schools, or to conduct research in schools on psychological development, learning and pupil-teacher interaction, psychological measurement, educational psychology, and psycho-educational processes.

Students contemplating graduate work in psychology are invited to communicate directly with the Department of Psychology.

DEPARTMENT OF RESEARCH AND HUMAN DEVELOPMENT (RED – 135) (CIF – 125) (CIA – 110)

The Department of Research and Human Development provides supportive services in teacher education. At the graduate level, these services include Educational Foundations, Educational Media, Research Training, and Adult Education. The Master of Education degree is offered in Educational Media and Technology. A research minor is offered at the specialist or doctoral level.

Master of Education in Educational Media and Technology

This degree program is designed for those persons who plan to serve as media specialists or other curriculum workers in the public schools, junior colleges, or other educational agencies.

Curriculum Requirements

RED 501—**Research: Its Introduction and Methodology.** Four hours.
RED 502—**Introduction to Educational Statistics.** Four hours.
or
CIF 532—**Measuring Results in Education.** Four hours.
CIF 504—**Foundations in American Education.** Four hours.
CIF 507—**Basic Course in Curriculum Development.** Four hours.
EPY 510—**Advanced Educational Psychology.** Four hours.
CIF 519—**Utilization, Selection, and Preparation of Audiovisual Materials.** Four hours.
CIF 535—**Advanced Production Techniques. (Audiovisual)** Four hours.
AED 517—**Administration of Audiovisual Communications Programs.** Four hours.
AED 526—**Supervison of Instruction.** Four hours.

In addition to the above required core courses, at least one course (4 hours) must be chosen from the following:

CIE 528—**Curriculum Problems in the Elementary School.** Four hours.
CIS 508—**High School Curriculum.** Four hours.
AED 713—**Curricula in Higher Education.** Four hours.

In addition to the above required core courses, at least two courses (8 hours) must be chosen from the following:

LS 560—**Introduction to Information Science and Technology.** Four hours.
CIF 540—**Programmed Instruction.** Four hours.
CIF 541—**Instructional Graphics.** Four hours.
CIF 542—**Research in Instructional Systems Technology.** Four hours.

CIE 528, CIS 508, or AED 713, if not used to meet the above requirement may be elected. Four hours.

EDUCATIONAL RESEARCH TRAINING (RED – 135)

The program in educational research offers the student two options:

1. A structured minor in educational research at the doctoral level.

2. A choice of a number of advanced research courses as additional course electives in the student's major or minor field.

MINOR

The structured minor in educational research at the doctoral level provides for maximum flexibility in meeting the unique needs for research training in the departmental major fields. A total of sixteen (16) hours plus RED 552 and 553 constitute the minimum requirements.

The required courses should be viewed as a minimum basis for training in educational research and are designed to prepare the student for more advanced study. Additional advanced courses offered in educational research are recommended for qualified students. Students desiring emphasis in psychology orientation may substitute equivalent statistics and design courses offered in the area of psychology. Such substitutions must be approved by both departments.

Curriculum Requirements*

CSS G-412–**Educational Statistics.** Four hours.
or
RED 612–**Computer Applications in Educational Research.** Four hours.
RED 552–**Advanced Correlational Methods.** Four hours.
RED 553–**Significance Tests and Design.** Four hours.
RED 624–**Research Design in Educational Research.** Four hours.
RED 630–**Multivariate Analysis.** Four hours.
RED 796–**Advanced Educational Research.** Four hours.
Total–24 hours.

*Prerequisites: (1) Basic courses consisting of RED 501, 502, and CIF 532 are recommended. (2) A grade point average of 3.0 in RED 552 and 553 is required.

Suggested Educational Research Electives

CSS G-412–**Educational Statistics.** Four hours.
RED 618–**Practicum in Educational Research.** Four hours.
RED 624–**Design in Educational Research.** Four hours.

RED 694—**Special Problems I, II, III.** One hour each.
RED 691—**Field Problems in Educational Research.** One-twelve hours.

DEPARTMENT OF SCIENCE EDUCATION (SCE – 380)

The Department of Science Education recognizing the increased emphasis on the art of science teaching and the additional opportunities for individuals with advanced training in these arts provides a program for the Master of Arts, the Master of Science, the Doctor of Philosophy, and the Doctor of Education degrees in Science Education.

In addition to the general requirements and procedures pertaining to graduate degrees as outlined in Parts III and IV of this **Bulletin**, the following requirements must be fulfilled:

MASTER'S PROGRAM

1. Completion of fifty-eight (58) or sixty (60) quarter hours of graduate work.

2. A minimum of twenty-four (24) quarter hours in a specific science—biology, chemistry, earth and environmental sciences, or physics.

3. A minimum of eight (8) hours in related sciences.

4. Demonstration of competence in the following Professional Education areas:
   (a) Psychology of learning
   (b) History and philosophy of education
   (c) Statistical methods and procedures in education
   (d) Research methods in education
   (e) Guidance and educational testing
   (f) Public school science curriculum
   (g) Problems in science teaching

Generally, the fulfillment of the above requirements will involve:

A. Twelve (12) to twenty (20) quarter hours in professional education.

B. Thirty-eight (38) to forty-eight (48) quarter hours in the sciences and science education.

Approximately one-third of the graduate work will be in professional education and two-thirds in the sciences. Students with sufficient background are not

required to take additional courses in professional education, but will complete their programs in the sciences.

A thesis carrying six quarter hours is optional and would substitute for two courses in education. The total program with thesis requires fifty-eight (58) quarter hours graduate credit. The thesis may involve research in a particular science or research in science education.

DOCTOR OF EDUCATION PROGRAM

1. Completion of a minimum of seventy-two (72) quarter hours of graduate work above that accepted at the master's level.

2. A minimum of twenty-four (24) quarter hours in a specific science—biology, chemistry, earth and environmental sciences, or physics.

3. A minimum of eight (8) quarter hours in related science.

4. Competence in the areas of professional education as listed above.

Generally, the fulfillment of the above requirements will involve:

A. Twelve (12) to twenty-four (24) hours in professional education.

B. Thirty-two (32) or more hours in the sciences.

C. Twelve (12) or more hours in science education.

In all, two-thirds or more of the graduate work will be in the sciences and science education. In planning the overall program consideration is given to the student's background and his particular interests and goals.

Additional requirements include demonstrated proficiency in educational statistics and independent research. Research, culminating in a dissertation, may deal with a problem in the student's science speciality or a problem in science education.

In addition to an evaluation of the student's record, tests and examinations are used for diagnostic purposes in planning programs. The Graduate Record Examinations verbal and quantitative scores and the National Teacher Examinations commons and teaching area scores should be submitted with the application for advanced graduate study. During the first or second quarter of study additional tests are administered by the Department and the College of Education and Psychology.

DEPARTMENT OF SPECIAL EDUCATION (SPE – 190)

The Department of Special Education offers a variety of graduate programs, plus the opportunity for experienced teachers, and other degree holders, to become certified in several areas of work with exceptional children and adults.

The Master of Education degree is offered to prepare master teachers and special personnel for a variety of programs. The program is interdepartmental and may be individualized depending on one's experience and background. Basically, the student will place his major emphasis of study in his area of interest (mental retardation, learning disabilities, emotionally disturbed, gifted, visually or physically handicapped) and will take associated courses, which may be from many disciplines. Together these will total a minimum of forty-eight (48) quarter hours. Included will be RED 501 and EPY 510 as foundation areas; and courses required for special education certification must be taken and completed before a graduate degree is given.

The specialist certificate may be earned in special education through an intensive study program. The purpose of this program is to train highly qualified personnel in the education of exceptional children and adults.

Admissions

In general, candidates must show evidence of meeting the requirements listed under **Types of Admission to Advanced Graduate Study** of this **Bulletin**. Regular admissions include a grade point average of 3.25 and a minimum score of 800 on the Graduate Record Examinations. Conditional status includes 3.00 (GPA) and 800 GRE or 3.25 and a minimum score of 800 or 3.25 (GPA) and 750 GRE. The conditional status may be removed on the recommendation of the department chairman, provided the student has attained a grade point average of at least 3.25 on the first twelve (12) or sixteen (16) hours of course work numbered 500 or above. Further, the following requirements may be satisfied:

1. Completed master's degree.
2. State certification, or the equivalent, in an applicable area in programs for exceptional children or adults
3. Two years experience in working with exceptional populations.
4. Two letters of recommendation.
5. Approval of tentative program.
6. Satisfactorily passed the English Proficiency Test.

The specialist certificate is to be awarded upon completion of an approved program directed toward one of the areas listed below and will include work in special education and related areas which together will minimally total forty-eight (48) quarter hours. Included will be a satisfactory comprehensive examination and the completion, writing, and defense of a field study.

PROGRAMS

Mental Retardation
EPY 645; RED 502; SPE 580, 595, 602, 625 = 26 quarter hours, plus cognate and electives

Learning Disabilities
RED 502; SPE 513, 520, 580, 595, 601, 602 = 26 quarter hours, plus cognate and electives

Emotionally Disturbed
RED 502; SPE 505, 506, 508, 580, 595, 602 = 26 quarter hours, plus cognate and electives

Visually Handicapped
RED 502; SPE 441G, 442G, 580, 595, 603, 604, 605 = 34 quarter hours, plus cognate and electives

Gifted and Creative
EPY 520, 542; CIE 578; RED 502; SPE 530, 580, 595, 602 = 32 quarter hours, plus cognate and electives

Special Education Administration
AED 517, 520, 526; RED 502; SPE 580, 587, 595, 600, 602, 696 = 38 quarter hours, plus cognate and electives

Curriculum and Evaluation
EPY 540; PSY 587, 588; RED 502; SPE 580, 591, 595, 602 = 38 quarter hours, plus cognate and electives

The doctoral degree may be earned in special education, In general, the requirements are the same as those listed in this **Bulletin** (see Doctoral Degree Requirements). Candidates, however, must have at least three years' experience in an appropriate area of work with exceptional populations.

The doctoral program is comprehensive and places emphasis on teacher education, administration, research, and community services. (An internship is required in at least one of the above.) The candidate is expected to develop a competency in each of the above areas; and his program will be based upon these as well as his experience, background, and the information gathered from written and oral qualifying examinations. Details of this program, and all special education graduate programs, may be secured from the Department of Special Education, Southern Station, Box 115.

SCHOOL OF FINE ARTS

Raymond Mannoni, Dean
Gomer Pound, Acting Dean

The School of Fine Arts currently offers graduate program leading to the degrees of Master of Art Education, Master of Music, Master of Music Education, Master of Fine Arts, and Master of Arts. The Master of Music degree may be earned either in performance, church music, conducting, music history and literature, or in theory and composition. The Master of Arts or the Master of Fine Arts may be earned in theatre arts.

The School of Fine Arts offers the Doctor of Philosophy and the Doctor of Music Education degrees in music education.

Prescribed curricula for master's degree programs are listed below. As can be seen, they provide for some latitude and flexibility in arranging individual degree programs. Course selections must be approved by the student's advisory committee. The student's major professor will assist in every way possible, but final responsibility for following all general departmental regulations lies with the student.

Examinations and Auditions

Examinations for advisory purposes are given to all new master's degree students during registration week of each quarter. Entering students should contact the Coordinator of Graduate Studies for information and schedule of these examinations. Auditions for students who plan to major in performance are also given at this time. Approval of the graduate faculty must be obtained before a student can major in a performance area.

Ensemble Participation

All graduate music students are required to participate in at least one ensemble each quarter they are in residence.

Deficiencies

The School of Fine Arts retains the right to determine deficiencies in the preparation of any graduate student, regardless of the number of course credits accumulated. The School will recommend appropriate means of removing such deficiencies.

PROGRAMS

Master of Art Education Degree

	Hours
Seminar in Elementary Art Education and Supervision	4
Seminar in Secondary Art Education and Supervision	4
Research in Art Education	2
Aesthetics (AA 500 or PHI G-446)	4

MASTER'S DEGREE PROGRAMS IN MUSIC AND MUSIC EDUCATION

Master of Music Degree In Performance

Undergraduate requirements for a major: completion of a bachelor's degree in music with a major in performance at the University of Southern Mississippi or an equivalent program. Applicants must demonstrate by means of audition a high level of performance proficiency in the major area. Voice majors must demonstrate adequate knowledge of languages and diction to understand and perform the vocal repertory.

Requirements for a major: a minimum of fifteen (15) quarter hours in the major performance area, MUS 515 (Recital), and representative courses in literature and pedagogy related to the major performance area. Remaining course work must include at least six (6) quarter hours in music history and literature, a minimum of six (6) quarter hours in music theory beyond the undergraduate requirements, and may include graduate work in appropriate related fields. The total is forty-six (46) quarter hours.

Master of Music Degree in Church Music

Undergraduate requirements for a major: completion of a bachelor's degree with a major in church music from the University of Southern Mississippi or an equivalent program.

Requirements for a major: the program must include ACR G-408, ACR G-409, MUS 550, MUS 551, four (4) to six (6) quarter hours in the major

performance area and at least three (3) quarter hours in a minor performance area. One of the following must also be included: MED 598, MUS 514, or eight (8) quarter hours of music electives. Remaining course work must include a minimum of six (6) quarter hours in music theory, at least six (6) quarter hours in music history and literature, and appropriate electives in music or cognate fields. The student whose major performance area is either organ or voice must take at least two (2) hours of graduate conducting. The total is forty-six (46) quarter hours.

Master of Music Degree in Conducting

Undergraduate requirements for a major: completion of a bachelor's degree in music or music education from the University of Southern Mississippi or an equivalent program. Applicants must demonstrate advanced competency in the major performing area, above average knowledge and ability in all areas of music theory including counterpoint, orchestration, and analysis, practical knowledge of performing techniques on all instruments and voice, and sufficient ability at the piano to play simple scores. The applicant must also have had experience as a member of one or more performing organizations and at least one year of conducting experience.

Requirements for a major: a minimum of six (6) quarter hours in graduate conducting (MUS 532, I, II, III), MUS 515, MUS 516, MUS 630, MUS 696, and three (3) quarter hours in performance study. Remaining course work must include at least ten (10) quarter hours in music history and literature, six (6) quarter hours in music theory, other course work in related fields, and may include an additional three (3) quarter hours in performance study. The total is forty-six (46) quarter hours.

Master of Music Degree in Music History and Literature

Undergraduate requirements for a major: completion of bachelor's degree in music with a major in music history and literature at the University of Southern Mississippi or an equivalent program. Applicants must demonstrate reading ability in at least one foreign language, preferably German or French.

Requirements for a major: a minimum of twelve (12) quarter hours selected from the following: MUS G-431, MUS G-432, MUS G-433, MUS G-435, MUS G-436, MUS G-437, MUS 561, MUS 562, MUS 563, and at least eleven (11) quarter hours of additional courses in music history and literature and appropriate related areas. The following courses are required: MUS 500, MUS 501, MUS 521, MUS 522, MUS 523, MUS 593, MED 598, and three (3) quarter hours in performance study. The total is forty-six (46) quarter hours.

Master of Music Degree in Theory and Composition

Undergraduate requirements for a major: completion of a bachelor's degree with a major in music theory and composition at the University of Southern Mississippi or an equivalent program which must have included counterpoint, orchestration, original composition, performance study throughout the program, and practical command of the piano.

Requirements for a major: a minimum of six (6) quarter hours in advanced composition (MUS G-411, MUS G-412, MUS-413), MUS 514 or MED 598, and MUS 521, MUS 522, MUS 523, and three (3) quarter hours in performance study. The remaining twenty-five (25) quarter hours may include additional courses in theory, composition, and related fields, but must include a minimum of six (6) quarter hours in music history and literature. The total is forty-six (46) quarter hours.

Master of Music Education Degree

Undergraduate requirements for a major: completion of an undergraduate degree in teacher education which conforms to NASM requirements.

Requirements for a major: a minimum of sixteen (16) quarter hours in music education which must include MED 525, MED 526, and MED 527. The remainder of the program may be in music, music education, and cognate areas, but must include at least six (6) quarter hours in music history and literature, six (6) quarter hours in music theory, three (3) quarter hours (but not more than six (6) quarter hour) in performance study, and MED 598 (thesis, six (6) quarter hours). Eight (8) quarter hours in music and music education may be taken in lieu of MED 598 (thesis). The total is forty-six (46) quarter hours including the thesis or forty-eight (48) quarter hours not including the thesis.

DOCTORAL PROGRAMS IN MUSIC EDUCATION

The degrees of Doctor of Philosophy in Music Education and Doctor of Music Education are offered to candidates who pursue the course of study with distinction and who show ability to do research and scholarly study. General requirements for the Doctor of Philosophy and Doctor of Education (the Doctor of Music Education general requirements are the same as the Doctor of Education degree) are found in Part IV of this Bulletin. The School of Fine Arts further stipulates the following requirements.

ADMISSION: An applicant for admission to doctoral study in music education must possess a master's degree in music education, or its equivalent, from an approved institution. A complete record of previous education and experience, accompanied with recommendations from responsible persons who

are personally acquainted with the applicant and his work are required to support all applications for admission to doctoral study in music education. A personal interview may be required by the School of Fine Arts. Each applicant must have at least three years' successful teaching experience. If the degree work is concerned with college administration, the applicant must have at least three years' experience in a college or university or equivalent.

RESEARCH TOOLS: Candidates for the Doctor of Philosophy degree in music education must comply with the language requirements as specified for Doctor of Philosophy candidates in Part IV of this **Bulletin**. A candidate for the Doctor of Music Education degree is required to demonstrate proficiency in statistics or computer science. At the discretion of the graduate faculty, this candidate may be required to demonstrate a reading knowledge of one modern foreign language.

All doctoral students are required to take MED 550, **Music In General Education**, MED 625 and MED 626 (doctoral seminars in music education), MUS 630, **(History of Style In Music)**, and MUS 696 **(Seminar in Performance Practices)**. The remaining course work will be determined in light of the candidate's qualifying examination, his interests, and the counsel of his major professor and advisory committee. In planning this program, the following minimum distribution of graduate courses (including master's degree work) is required: thirty-six (36) hours in music education, sixteen (16) to eighteen (18) hours in musicology, sixteen (16) to eighteen (18) hours in music theory, twelve (12) hours in education, and thirty-six (36) to thirty-eight (38) hours of approved electives. Although Part IV of this **Bulletin** states that 118 hours are required for doctoral degrees, it should be clearly understood that few candidates are able to receive a degree on the basis of this minimum. The distinction implied by the degree and the traditions relating to it require comprehensive knowledge and demonstration of a high degree of proficiency in the major field and related areas of study, as well as the ability to conduct advanced research.

A brochure containing more detailed policies and procedures related to doctoral programs may be obtained from the Coordinator of Graduate Studies, School of Fine Arts.

MASTER'S DEGREE PROGRAMS IN THEATRE ARTS

Master of Fine Arts Degree in Theatre Arts

The objective of the Master of Fine Arts curriculum is to develop the educated performer by offering sound theory and intensive practical training simultaneously. Students in the Master of Fine Arts program will elect a plan of study for specialized acting and directing or designing. A demonstration of performance abilities will be required for admission to this program.

The satisfactory completion of a minimum approved program of seventy (70) quarter hours is required for the Master of Fine Arts degree. Candidates will be required to pass a comprehensive examination covering the area of specialization and theatre in general. In addition, the candidate will satisfactorily complete a creative project in his major area of emphasis and defend it orally before the Theatre Arts faculty.

Master of Arts Degree in Theatre Arts

For the Master of Arts degree, the Department of Theatre Arts requires successful completion of forty-six (46) hours plus a thesis and its oral defense. Twelve (12) of the required forty-six (46) hours may be chosen from graduate courses in a related field.

Theatre 501 and Theatre 506 are required of **all** master's candidates. The remainder of the student's degree program will be designed by the graduate committee and the student to accommodate the particular professional interests of the student.

A minimum of twenty-eight (28) quarter hours of undergraduate course work in theatre is required of the prospective graduate student. Students with inadequate preparation may be admitted but will be expected to take undergraduate make-up courses. (See admission and general academic requirements as set forth in Parts III and IV of this **Bulletin.**)

SCHOOL OF HEALTH, PHYSICAL EDUCATION, AND RECREATION

William T. Schmidt, Dean

Clarence E. McCarver, Director of Graduate Studies

The School of Health, Physical Education, and Recreation offers the Doctor of Education and the Doctor of Philosophy degrees. These degrees are interdisciplinary in nature, requiring the student to concentrate his study in one department of the School, and to demonstrate proficiency in the other two.

Masters of Science degrees are offered in the Department of Health, the Department of Physical Education, and the Department of Recreation.

DEPARTMENT OF HEALTH (HTH – 715)

The general requirements for the Master of Science degree offered by the Department of Health are found in Part IV of this **Bulletin**. A minimum of forty-six (46) graduate hours is required for this degree.

HEALTH PROGRAM 1 – Master of Science Degree with a Professional Preparation Emphasis

This program is designed to prepare students for college and public school teaching. The program requirements include:

Health 540, 546, 550, 583, 660

Students, with the advisement of a major professor, will plan additional courses to complete the degree. Recommended electives may be selected from biology, computer science, education, guidance, microbiology, physical education, psychology, recreation and sociology. The student may elect to write and defend a thesis.

HEALTH PROGRAM 2 – Master of Science Degree with an Emphasis in Safety and Driver Education

Thirty-two (32) graduate hours in Safety and Driver Education will be required. The following courses make up this requirement:

Health 530, 531, 532, 535, 536, 550

Eight (8) hours may be chosen from G-437, G-449, G-450, G-453, G-456.

Electives to complete the forty-six hours required for the degree will be chosen, with the advisement of a major professor, from health courses and other recommended areas. The student may elect to write and defend a thesis.

DEPARTMENT OF PHYSICAL EDUCATION (PE – 730)

The Department of Physical Education offers three master's degree programs.

PE PROGRAM 1 – **Master of Science Degree Program in Physical Education with a Research-Scientific Emphasis**

This program is designed to give students a research and scientific background in preparation for post-master's study. The requirements for this program are:

PE: 544, 560, 561, 580, 584, 592, 594, 598

Students, with the advisement of the major professor, will take fourteen (14) hours of electives to complete a total of forty-six (46) required hours for the Master of Science degree. Recommended electives are: HTH 546, 660; PE G-401, G-480, 509, 540; RED 502; and selected courses in chemistry, biology, or physics. Study of one foreign language is also recommended.

PE PROGRAM 2 – **Master of Science Degree Program in Physical Education with Professional Preparation Emphasis**

This program is designed to be a terminal degree program which will prepare students for public school and small college teaching. The requirements for this program are:

PE: G-401, 540, 542, 544, 551, 584, 590, 594

Students, with the advisement of the major professor, will take fourteen (14) hours of electives to complete a total of forty-six (46) required hours for the Master of Science degree. Recommended electives are:

HTH: 546, 660; PE 509, 561, 570, 580, 592; AED 516, 520

PE PROGRAM 3 – **Master of Science Degree in Physical Education with Athletic Administration and Coaching Emphasis**

This program is designed to prepare students to coach and administer high school athletic program. The requirements for this program are:

PE: 541, 550, 551, 584, 590

HTH: 576

Students needing proficiency in physiology should take PE 561.

Students, with the advisement of the major professor, will take twenty-two (22) hours of electives to complete a total of forty-six (46) required hours for the Master of Science degree. Recommended courses are: PE 540, 542, 560, 570, 571, 572, 573, 574, 575, 576, 580, 594.

DEPARTMENT OF RECREATION (REC – 735)

The Department of Recreation offers the Master of Science degree with a major in recreation. Students will choose a concentration in any one of seven specialized programs. Requirements for this degree include the completion of forty-eight (48) hours of graduate level coursework consisting of: (1) REC 501, 502, 503, and 504 for sixteen (16) hours; (2) a minimum of twenty (20) hours selected from the courses recommended for the chosen specialization, and (3) an additional twelve (12) hours of electives. Students may pursue an optional program designed to develop individual competency in research by completing REC 501 and REC 598 (Thesis). For this program, the twelve (12) hours of elective coursework are waived, thereby lowering the requirement to a total of forty-six (46) hours. All students intending to pursue the doctoral program are urged to follow the optional program in research. Students who have previously received undergraduate credit cannot receive graduate credit for the same G-level course. Students receiving an undergraduate degree in a field other than recreation may be required to complete certain prerequisites before pursuing the master's degree.

REC PROGARM 1 – Park and Recreation Administration (Executive Development)

This program provides a curriculum with concentration in executive development for students interested in career work at the administrative and executive levels in city, county, or regional recreation and/or park departments.

Recommended courses (twenty hours minimum): REC G-410, G-412, G-414, G-423, G-425, G-439, G-442, G-444, G-460, G-462, G-464, and G-466.

REC PROGRAM 2 – Recreation Programming

This program provides a curriculum with concentration in programming for students who are interested in career work in supervisory or program and activity leadership positions, dealing primarily with people and activities. Emphasis is on programming and leading recreational activities in a variety of situation.

Recommended courses (twenty hours minimum): REC G-410, G-423, G-425, G-455, G-457, G-460, G-464, G-466, G-473, and G-475.

REC PROGRAM 3 – Park and Recreation Planning

This program provides a curriculum with concentration in planning for students who desire career work with local, regional, state, or federal agencies, as park and recreation planning specialists. Such recreation specialists prepare master and comprehensive plans, site and facility layouts and designs, and

funding programs.

Recommended courses (twenty hours minimum): REC G-410, G-414, G-431, G-435, G-437, G-439, G-442, G-444, G-446, and GHY G-426.

REC PROGRAM 4 – **Park and Resources Management**

This program provides a curriculum with concentration in park and resource management for students who are interested in outdoor career work as park rangers, park managers, or outdoor recreation specialists for local, regional, state, or federal park systems and resource managing agencies.

Recommended courses (twenty hours minimum): REC G-410, G-412, G-431, G-435, G-437, G-442, G-444, G-446, G-455, and G-457.

REC PROGRAM 5 – **Outdoor Education and Camping**

This program provides a curriculum for students interested in career work as outdoor education, camping interpretation specialists in school, community, organizational or other outdoor education programs or camps, or in interpretive programs of local, regional, state, or federal park agencies.

Recommended courses (twenty hours minimum): REC G-423, G-425, G-431, G-446, G-455, G-457, G-460, G-462, G-464, G-466, and G-473.

REC PROGRAM 6 – **Youth Service**

This program provides a curriculum for students who desire career work as administrators, supervisors or leaders with youth-serving agencies and organizations. Such work involves a balanced combination of recreation programming and agency administration with emphasis on service to youth.

Recommended courses (twenty hours minimum): REC G-410, G-412, G-423, G-425, G-439, G-455, G-460, G-462, G-464, G-466, G-473.

REC PROGRAM 7 – **Therapeutic Recreation**

This programs provides a curriculum for students interested in working as recreational therapists in hospitals, mental and corrective institutions, rehabilitative centers, retirement villages, or in special education centers.

Recommended courses (twenty hours minimum): REC G-423, G-425, G-455, G-460, G-462, G-473, G-475; PSY G-481; SPE G-450, G-453, G-461, and G-486.

SCHOOL OF HOME ECONOMICS

Sarah A. Weaver, Dean

The Master of Science degree is offered in the Departments of Family Life Services, Food and Nutrition, and Home Economics Education. Graduate courses in clothing and textiles are offered in the Department of Environmental Design. The general requirements for the Master of Science degree are listed in the front of the **Bulletin**. For detailed information concerning a specific degree program, please refer to that department in the following pages.

DEPARTMENT OF ENVIRONMENTAL DESIGN (EVD – 812)

The Department of Environmental Design offers a supportive curriculum comprised of courses in the area of clothing and textiles. In choosing a minor field of specialization, the student must have had satisfactory undergraduate prerequisites or enough related work to indicate proficiency in pursuing graduate work.

DEPARTMENT OF FAMILY LIFE SERVICES (CD – 805) (HHM – 825) (MFL – 830)

The Department of Family Life Services offers programs leading to a Master of Science degree with majors in child development and in family living.

Graduate work in the major and minor fields of specialization must be preceded by course work sufficient to satisfy undergraduate requirements or enough related work to indicate the student's ability to do graduate work in his major and minor fields. Deficiencies in the student's background may be made up by auditing recommended undergraduate courses.

Requirements for the Master of Science degree include: forty-six (46) quarter hours of course work which include RED 501, a thesis or a field study, and sixteen (16) quarter hours in a minor in a related field.

Upon completion of the graduate program, a comprehensive oral examination covering major and minor fields will be required to fulfill the qualifications for a degree.

DEPARTMENT OF FOOD AND NUTRITION (F&N – 815)

The Department of Food and Nutrition offers the opportunity to earn the Master of Science degree in institution management. For a master's degree, a minimum of forty-six (46) graduate hours is required. Twenty-four (24) of these hours must be in courses numbered 500 and above.

The master's program requires twenty-four (24) quarter hours in the major area with sixteen (16) hours in an approved minor field and six (6) hours of electives. The candidate has a choice of a thesis or field study as part of the program with RED 501 a prerequisite for both plans. For completion of this program, a comprehensive oral examination is required.

DEPARTMENT OF HOME ECONOMICS EDUCATION (HEE – 820)

The Department of Home Economics Education offers the Master of Science degree with a major in home economics education and a minor in either general home economics or in one other department of home economics. Those planning to teach on the secondary level are encouraged to minor in general home economics; however, the minor area will depend on the needs of the individuals.

Students interested in the Cooperative Extension Service will major in home economics education and may choose a minor in a field outside of the home economics area if this meets their needs.

Students may have the option of the thesis plan or the non-thesis plan. A four-quarter-hour course in research methods must be completed regardless of the choice of plan - thesis option or non-thesis option. Those preparing for teaching on the college level or for supervisory positions in home economics are advised to write a thesis. Others may follow the non-thesis plan.

Thesis Plan . . . . . Total hours 48
- Major Area . . . . . 24 hours
  - RED 501 . . . . . 4 hours
  - HEE 598 . . . . . 6 hours
  - CIF 504 . . . . . 4 hours
  - Other Home Economics Education . . . . . 10 hours
- Minor . . . . . 16 hours
- Electives . . . . . 8 hours

Non-Thesis Plan . . . . . Total hours 48
- Major Area . . . . . 24 hours
  - RED 501 . . . . . 4 hours
  - HEE 596 (Field Study) . . . . . 4 hours
  - CIF 504 . . . . . 4 hours
  - Other Home Economics Education . . . . . 12 hours
- Minor . . . . . 16 hours
- Electives . . . . . 8 hours

Upon the completion of the graduate program, a comprehensive oral examination covering major and minor fields will be required to fulfill the qualifications for a degree.

COLLEGE OF LIBERAL ARTS

Claude E. Fike, Dean

The College of Liberal Arts offers the Doctor of Philosophy degree in communication, comparative literature, English, history, political science, and speech and hearing sciences.

The Master of Arts and Master of Science degrees are offered in communication, comparative literature, English, foreign languages, linguisitics, geography, history, philosophy, political science, social science (with several departments cooperating), sociology, and speech and hearing sciences.

With the approval of the major professor and the chairman of the major department, the student may choose a graduate minor from the above listed fields as well as from anthropology and comparative religious studies. A student in the College of Liberal Arts may also choose a graduate minor in education or psychology from the College of Education and Psychology, or in economics from the School of Business Administration, always subject to the approval of the major professor and the chairman of the major department.

Various departments of the College of Liberal Arts also participate with the College of Education and Psychology in programs leading to the Master of Education degree.

Since the master's degree in social sciences is normally intended for teachers, students interested in this degree should consult the Dean of the College of Liberal Arts and the Dean of the College of Education and Psychology, who will jointly arrange suitable degree programs with the appropriate chairmen.

For general academic requirements and regulations governing each of these degree programs, see Part IV of this **Bulletin**.

For specific degree requirements of each department, consult the appropriate department in Part V of this **Bulletin**.

LATIN AMERICAN STUDIES PROGRAM (LASP)

The Latin American Studies Program participates in a Master of Arts degree in Latin American Studies from several inter-University disciplines with major emphasis in political science. A minimum of forty-nine (49) graduate hours are required as follows:

Political Science	28 hours
Sociology	4 hours
Geography	4 hours
Economics	4 hours
History	2 hours
Thesis	6 hours
Colloquium	1 hour

A minimum of twenty-two (22) of the course hours, exclusive of the thesis, are to be above the G-400 level.

A prerequisite for admission to the master's program is a baccalaureate degree accepted by the Graduate School and by the Latin American Studies Committee (LASC), and twenty-four (24) quarter hours or the equivalent in Spanish or Portuguese, including a reading knowledge and the ability to pass the Princeton Test.

The student will be required to spend a minimum of six (6) weeks residence in a Latin American country, preferably at the end of the first year, for thesis research, orientation, and language improvement.

The Latin American Studies Committee will monitor the program and may accept students who lack the necessary background, such as language, provided they make up these requirements prior to the completion of the program. The LASC may also make other variations which will best meet the individual student's background, needs, and desires while assuring the highest standards for the degree.

DEPARTMENT OF ANTHROPOLOGY AND COMPARATIVE RELIGIOUS STUDIES (ACR – 286)

The Department of Anthropology and Comparative Religious Studies offers a graduate minor requiring sixteen (16) quarter hours of graduate work to be selected from the courses listed in the Course Description Section of this **Bulletin.**

DEPARTMENT OF COMMUNICATION (COM – 208)

The Department of Communication offers the Master of Arts, the Master of Science, and the Doctor of Philosophy degrees. Requirements for each of these are:

Master of Arts. A minimum of forty-six (46) quarter hours, half of which (excluding thesis credit) must be in courses numbered 500 and above; acceptable

proficiency in one foreign language; and the completion of an approved thesis. An outside minor of sixteen (16) quarter hours in a suitable related field may be included in the total hours required. Adequate proficiency in statistics will be expected for any thesis based on experimental research.

Master of Science. Either a thesis or a non-thesis plan may be elected, subject to approval of the major professor and the department chairman. The thesis plan is essentially the same as for the Master of Arts except that a foreign language is not required, while acceptable proficiency in statistics is required. The non-thesis plan requires a minimum of forty-six hours of course work, at least thirty (30) of which must be in courses numbered 500 and above. An outside minor of sixteen (16) quarter hours in a suitable related field may be included in the total hours required.

Students who are candidates for master's degrees may meet the foreign language requirement by giving evidence of having satisfactorily passed two years of the language in their undergraduate program, by taking the non-credit course in the language provided for graduate students, or by practical experience with the language acquired from residence.

Students may meet the statistics requirement by evidence of having satisfactorily passed three courses in statistics in the undergraduate program or by enrolling in two courses in statistics. Recommended are: PSY 360 **(Introduction to Statistics for the Behavioral Science)** and CSS 412 **(Educational Statistics)**; or CSS 201 and 202 **(Statistical Methods I and II)**.

Students in the master's degree programs may focus in either of the two graduate areas of public address or communication. The public address focus is essentially directed toward a teaching career, and should include course work from other areas of the Department. The general communication focus is designed for careers in public relations, advertising, mass media, and related fields, and should include course work in journalism, radio-TV-film, and public address in addition to courses listed as communication (COM).

Doctor of Philosophy. The doctoral degree is considered qualitative rather than quantitative. The course credit hour requirement of seventy-two (72) quarter hours beyond the master's or one hundred eighteen (118) quarter hours beyond the baccalaureate, is considered minimal. The graduate committee may recommend additional course work when such appears necessary.

Doctoral candidates must elect an outside minor to be approved by the major professor and the graduate faculty of the Department of Communication. The outside minor may be spread among various fields providing the courses chosen have relevance to the area of major emphasis.

The doctoral candidate may take courses from all areas of the Department but will select one area as the field of primary concentration. A suitable dissertation, approved by his advisory committee, will be submitted in his field of major emphasis.

DEPARTMENT OF ENGLISH (ENG – 224)

The Department of English offers programs leading to the Doctor of Philosophy, Master of Philosophy, Master of Arts, and Master of Science degrees. General academic requirements for all graduate degrees are set forth in Part IV of this **Bulletin.** Specific departmental requirements for each degree are stated in information sheets obtainable at the English Office, College Hall 210. See also Master of Arts and Doctor of Philosophy degrees in comparative literature.

DEPARTMENT OF FOREIGN LANGUAGES

Candidates may study toward the attainment of either the Master of Arts or the Master of Science degree in French, German, or Spanish. Applicants for admission to the graduate program in this Department should be able to demonstrate advanced undergraduate knowledge of an appropriate foreign language. Those intending to emphasize literature should have already engaged in systematic study of the literature of some linguistic area. Each degree program requires at least forty-six (46) hours of graduate credit, half of which must be numbered 500 or above. If a minor is elected, it consists of sixteen (16) hours of course work. Courses to be counted toward a major are drawn from the student's chosen language area; or, with concurrence of the student's adviser, the courses may be drawn from the group listed as Foreign Languages (FL). On special advisement a course in comparative literature may be counted toward the major.

The Master of Arts degree specifically requires proficiency in a second foreign language and the satisfactory completion of a thesis. No minor is necessary. The Master of Science degree requires a minor, but no thesis and no second foreign language. It is intended primarily for secondary school teachers and for those who do not plan to study toward a more advanced degree.

CURRICULUM IN COMPARATIVE LITERATURE

The curriculum in comparative literature offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. Students commencing work in the Master of Arts program should have knowledge of two languages, one of which may be English. During the course of study, proficiency in foreign languages and minor areas will be increased; therefore, it is not expected that beginning students be expert in all facets of their proposed curricula. Graduate

work beyond the master's level requires knowledge of at least three languages, one of which must be English. The aim of the curriculum is to prepare students to deal intelligently and originally with any literary document and with any problem related to belles lettres.

Requirements for the Master of Arts degree include successful completion of the following:

1. Forty-eight (48) hours graduate credit, half of which is numbered 500 or above, to include:
   a. Sixteen (16) hours in the literature of one language, ancient or modern, including English.
   b. Ten hours of thesis. (Exceptions to this requirement may, under certain circumstances, be approved by the Director of the Curriculum.)
   c. Twenty-two (22) hours in comparative literature and in approved related disciplines (e.g., the literature of another language, art, music, philosophy, history, linguistics, and others with special approval.)

2. An examination covering the student's specific course of study.

Requirements for the Doctor of Philosophy degree include successful completion of the following:

1. One hundred and eighteen (118) hours of graduate credit beyond the bachelor's degree, half of which credit is numbered 500 or above, to include:
   a. Forty-four (44) hours in the literature of one language.
   b. Sixteen (16) hours in the literature of a second language.
   c. Sixteen (16) hours in comparative literature.
   d. Either thirty-two (32) hours in the literature of a third language or sixteen (16) hours in the third language and sixteen (16) hours in an approved related discipline.
   e. Ten (10) hours of electives.

(One of items a., b., and d. must be English literature. Items b., c., and d. should complement each other so as to establish a specialization for the student.)

2. A comprehensive examination covering the history of one literature from the Middle Ages to the present, the methods of comparative literature, and the student's area of specialization.

3. A dissertation and a final defense of the dissertation.

DEPARTMENT OF GEOGRAPHY (GHY – 268)

The Department of Geography participates in programs leading to the Master of Arts and the Master of Science degrees.

The Department offers concentrations in resource management and land use, urban and regional planning, and population and cultural systems, plus other staff specialties in a variety of topical and regional areas. Most students will be expected to develop a primary interest in one of the preceding topical fields or a particular specialization within either physical or economic geography. This emphasis on topical specialization is not intended to discourage students from developing a regional interest. However, all students must have a topical interest and it will take precedence over a regional interest.

Field research, the application of geographic techniques, and the development of a research capability in the selected topical field are stressed. At the same time the program is sufficiently flexible to provide both for those students intending to pursue further work in geography and for those who desire to make the master's degree their terminal degree.

A student beginning graduate study in geography is normally expected to hold a bachelor's degree in geography. However, a student who has achieved a good record in an undergraduate field other than geography may, at the discretion of the Department, be accepted for graduate study in geography. In such cases, some prerequisite course work in geography is usually added to the normal M.A. and M.S. requirements.

Admission Requirements

Regular: This Department requires of all entering students a minimum grade point average of 2.75 and a combined score of 750 on the aptitude phase of the Graduate Record Examinations.

Conditional: A student who does not satisfy the minimum admission requirements may be admitted on a conditional basis in one of two ways: (1) he must achieve a score of 750 or above on the aptitude section of the GRE and a grade point average no lower than 2.5; (2) he must achieve a grade point average of 2.75 or above if he has scored lower than 750 on the aptitude section of the GRE.

Financial Aid

NSF traineeships, University grants-in-aid, and teaching or research assistantships are available on a competitive basis. The latter include stipend plus waiver of out-of-state tuition. March 1st is the deadline for fellowship applications. Applications for fall admission without aid will be considered until the end of the summer quarter.

Master of Arts Degree in Geography

1. Completion of the Departmental Diagnostic Examination early in the first quarter of enrollment—as scheduled by the Department.

2. A total of forty-six (46) quarter hours in geography with fifty percent of work in courses at the 500 level.

3. Demonstrated proficiency in cartography and one other techniques course in geography. Proficiency is generally established by evidence that the student has satisfactorily completed a course in cartography and another techniques course sometime in his academic career—at either the graduate or undergraduate level. Geography 312, 412, 425, 485, or 486 may be used to satisfy the "other techniques" requirement.

4. Geography 502 and 540 at their first offering by the Department.

5. Geography 501—whenever offered by the Department.

6. A reading knowledge of one approved foreign language.

7. With the approval of the major professor, the student may optionally take (outside the Department) up to sixteen (16) quarter hours of cognate courses within the minimum hourly requirements.

8. A thesis, which will confer six (6) quarter hours credit within the minimum hourly requirements.

9. After satisfactory completion of the course work, language requirement, and thesis, the student will be expected to take and pass a comprehensive oral examination covering the specific course of study.

Master of Science Degree in Geography

1. Completion of the Departmental Diagnostic Examination early in the first quarter of enrollment—as scheduled by the Department.

2. A total of forty-eight (48) quarter hours with fifty percent of work in courses at the 500 level.

3. Demonstrated proficiency in cartography, quantitative methods, and one other techniques course in geography. Proficiency is generally established by evidence that the student has satisfactorily completed a course in cartography, quantitative methods, and another techniques course sometime in his academic career—at either the graduate or undergraduate level.

Geography 412, 425, 485, or 486 may be used to satisfy the "other techniques" requirement.

4. Geography 502 and 540 at their first offering by the Department.

5. Geography 501—whenever offered by the Department.

6. Demonstrated proficiency in statistics or in a computer-programming language suitable to the degree program and research needs of the candidate.*

7. With approval of the major professor, the student may optionally take (outside the Department) up to sixteen (16) quarter hours of cognate courses within the minimum hourly requirements.

8. A thesis (optional).

9. After satisfactory completion of the course work, the statistics or computer science requirement, and thesis (optional), the student will be expected to take and pass a comprehensive oral examination covering the specific course of study.

*Proficiency in statistics may be established either by examination or by satisfactorily completing a prescribed sequence. Proficiency in a specific computer language will be certified by examination in that language devised and administered by the Department of Computer Science and Statistics. Credit hours taken in satisfaction of either requirement may not be applied toward the minimum requirements for the degree.

DEPARTMENT OF HISTORY (HIS – 272)

The Department of History participates in programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

General Regulations: The student is held responsible for following all graduate regulations. The student's major professor will help in any way possible, but the student is expected to know what is required and to take full responsibility. The procedure is explained fully in Part IV of this **Bulletin.**

MASTER'S DEGREES

Admission Requirement

Regular: This Department requires of all entering students a minimum grade point average of 2.75 and a combined score

of 750 on the aptitude phase of the Graduate Record Examinations.

Conditional: A student who does not meet the minimum admission requirements may be admitted on a conditional basis in one of two ways: (1) He must present a score of 750 or above on the aptitude section of the GRE and a grade point average no lower than 2.5; (2) He must present a grade point average of 2.75 or above if he has scored lower than 750 on the aptitude sections of the GRE.

Master of Arts

All students are expected to complete the following requirements:

1. A total of forty-six (46) quarter hours in history with fifty percent of work in courses on the 500 level.

2. History 504 and 506 (depending on his major field) at its first offering by the Department.

3. A reading knowledge of one foreign language.

4. With the approval of the major professor the student can optionally take a sixteen (16) hour minor within the minimum hourly requirements.

5. A thesis, which will confer ten hours credit within the minimum hourly requirements.

6. After satisfactory completion of the course work and the thesis, the student will take a comprehensive oral examination, which will be given at stated times throughout the year, usually during the seventh week of a quarter. Comprehensive examination must be arranged when the candidate's major professor is present. It is understood that the candidate for the Master of Arts degree must pass all fields in the comprehensive examination. To this end the following procedure will govern examinations.

   If a candidate fails to satisfy his major professor, he is deemed to have failed and must retake the entire examination. If he fails to satisfy one minor professor, he automatically receives a conditional pass and must satisfy that professor of his proficiency in that field within six months or he will be required to retake the entire examination. If the candidate is re-examined, his overall proficiency will be determined by a majority vote of the committee, provided the major professor votes with the majority.

Master of Science

All students are expected to complete the following requirements:

1. A total of forty-eight (48) quarter hours with fifty percent of work in courses on the 500 level.

2. An outside minor of sixteen (16) hours within the minimum hourly total of forty-eight (48) quarter hours.

3. History 504 or 506 (depending on his major field) at its first offering by the Department.

4. A thesis (optional).

5. After satisfactory completion of the course work, the student will take a comprehensive oral examination, which will be given at stated times throughout the year, usually during the seventh week of a quarter. Comprehensive examination must be arranged when the candidate's major professor is present. It is understood that the candidate for the Master of Science degree must pass all fields in the comprehensive examination. To this end the following procedure will govern examinations:

   If a candidate fails to satisfy his major professor, he is deemed to have failed and must retake the entire examination. If he fails to satisfy one minor professor, he automatically receives a conditional pass and must satisfy that professor of his proficiency in that field within six months or he will be required to retake the entire examination. If the candidate is re-examined, his overall proficiency will be determined by a majority vote of the committee, provided the major professor votes with the majority.

Fields: The Department of History presently offers the following fields for the Master of Arts and the Master of Science degrees:

1. U. S. History to 1789
2. U. S. History, 1789-1848
3. U. S. History, 1848, 1900
4. U. S. in the 20th Century
5. Medieval History
6. Latin America
7. Russia to 1917
8. Russia Since 1917
9. Britain, 1485-1760
10. Britian, 1760 - Present
11. Europe, 1789-1870

12. Europe, 1870-1919
13. Europe, 1919 - Present
14. A specialized field which might include the Far East, the Middle East, Africa, etc.

2. The Master of Arts candidate must demonstrate proficiency in the field of his thesis, plus one field in U.S. history and one in a non-U.S. field.

3. The Master of Science degree requires proficiency in three fields of history and the outside minor. The history fields offered must include at least one U.S. and one non-U.S. field.

DOCTORAL PROGRAM

Admission Requirements

The Department requires a minimum grade point average of 3.5 on all graduate work and a combined score of 900 on the aptitude phase of the Graduate Record Examinations. Exceptions to these requirements may be made of those students who have received Master of Arts degrees from the University of Southern Mississippi, provided they received a GRE score of 800, a unanimous recommendation by their Master of Arts committees, and approval by a majority of the members of this Department. Students so accepted will be classified "conditional," which status is removed by achieving a 3.5 average in twenty-four (24) hours work during the first two quarters.

A minimum of 118 hours of course credit beyond the baccalaureate degree, which includes a minimum of three research seminars – two in the field of the major and one in the departmental minor – and History 504 and 506, must be attained by all students.

Major and Minor Requirements

The Department offers the Doctor of Philosophy degree in United States History and in European History Since 1789. If a candidate seeks a doctorate in United States History, he must demonstrate proficiency in all of American History. In addition he must demonstrate proficiency in either European History from 1789-1870 or European History from 1870 - Present. He must also demonstrate proficiency in one of the following fields: Medieval, Latin American, British History 1485-1760 or British History 1760 - Present, one of the European fields not selected above, or a specialized field such as Russian History with the consent of the major professor and the graduate committee. He is required also to develop an outside minor in one of the social sciences or humanities in which he will take sixteen (16) quarter hours of work.

If a candidate majors in the field of European History, he must major in the period of Europe Since 1789. He must demonstrate proficiency in either American History to 1865 or American History Since 1865. He is also required to demonstrate proficiency in one of the following fields: Medieval, Latin American, Britain, 1485-1760 or Britain, 1760 to Present, or a specialized field such as Russian History with the consent of the major professor and graduate committee. In addition, he must establish an outside minor of sixteen (16) quarter hours in any one of the fields of social sciences or humanities. The outside minor in either case should be decided after consultation with the candidate's major professor and his graduate committee.

Language Requirement

Each prospective candidate for the doctoral degree must demonstrate proficiency in French and in German during his period of residence for the Doctor of Philosophy degree. Upon the recommendation of the major professor and the approval of the graduate committee, some other language may be substituted for either French or German. The first language must be completed before the start of the second year of graduate study, and the second language in the quarter before the general comprehensive examinations are taken.

Doctoral Committee

The student's major professor, who is usually selected in accordance with the preference of the student, will guide the candidate through the early part of his graduate work. Upon admission to candidacy for degree, an advisory committee will be appointed which will direct the work of the student through the completion of requirements for the degree: The committee will be composed of the major professor, who will be chairman, representatives from the student's major and minor fields, and as many other members of the graduate faculty as the Department deems necessary. The committee will be composed of from five to seven members.

Doctoral Examinations

The candidate's major professor and committee will review the candidate's progress and may require the candidate to stand a qualifying examination at the end of the first quarter.

Upon the conclusion of all course work and the satisfactory completion of the language requirements, the candidate is expected to take a written and an oral general examination in the field of his major, his departmental minors, and his outside minor. Again it is understood that candidates for the doctoral degree must pass all fields in their comprehensive examinations. Upon satisfactory

completion of the comprehensive examination the candidate shall be admitted by application to candidacy for the degree.

If the candidate fails to satisfy his major professor he is deemed to have failed and must retake the entire examination. If he fails to satisfy one minor professor he automatically receives a conditional pass and must satisfy that professor of his proficiency in that field within six months, or he will be required to retake the entire examination. If he fails to satisfy more than one minor professor he is deemed to have failed the entire examination.

If the candidate should fail the general comprehensive examination he will be permitted to apply for re-examination two quarters after such failure. If the candidate is re-examined his overall proficiency will be determined by a 2/3 vote of the committee provided that the major professor votes a pass. A second failure of the general comprehensive examination will render the candidate ineligible for the Doctor of Philosophy in history at this institution.

Dissertation

A dissertation is expected to be a mature and competent piece of writing, embodying the results of significant and original research on a subject chosen by the candidate and approved by the major professor and the graduate committee.

Upon completion and approval of the disseration, the candidate is expected to stand satisfactorily a final examination on the dissertation and the field in which the dissertation lies.

DEPARTMENT OF PHILOSOPHY (PHI – 284)

The Department of Philosophy participates in programs leading to a Master of Arts degree in philosophy and a graduate minor in philosophy.

The requirements for the Master of Arts degree in philosophy are as follows:

1. A minimum of forty-six (46) quarter hours of graduate work, twenty-four (24) quarter hours of which must be in courses numbered 500 or above, which includes ten (10) quarter hours in a thesis.

2. Students whose undergraduate preparation is adjudged inadequate may be required to make up their deficiencies by taking undergraduate courses without credit. Specifically, students whose undergraduate program does not include the History of Philosophy and Elementary Logic will be required to enroll in those courses without receiving credit.

3. All students must pass a proficiency test in one foreign language, preferably modern; also Greek and Latin will be accepted.

4. A thesis and an oral defense of it are required.

5. Oral and written examinations, comprehensive and otherwise, may be required as determined by the chairman of the department and the student's advisory committee.

The Minor Program:
To complete a graduate minor in philosophy, a total of sixteen (16) quarter hours of graduate work is required.

DEPARTMENT OF POLITICAL SCIENCE (PS – 280)

MASTER'S DEGREE PROGRAM

Master of Arts. Requirements for the Master of Arts degree include: forty-six (46) quarter hours of course work, which includes a thesis, and a sixteen (16) hour minor (optional). A reading knowledge of one foreign language is also required.

Master of Science. Requirements for the Master of Science degree include: forty-six (46) quarter hours of course work, including an outside minor of sixteen (16) hours. A thesis is optional. The Master of Science degree should be considered a terminal degree.

Course Requirements in the Major. Graduate students who expect to receive the Master of Arts degree will select three fields in political science in which to concentrate their course work, Political Theory being one of the three. Graduate students who expect to receive the Master of Science degree will, in addition, select an outside minor, with the advice and consent of their committee.

The fields of political science and the courses in each field are:

Political Theory and Methodology
G-401, G-402, G-403, G-408, 500, 511, 512, 545

American Government and Politics
G-406, G-407, G-410, G-412, G-414, G-434, G-435, G-436, G-438, G-461, 532, 560

International Relations
G-453, G-454, G-455, G-457, G-458, G-470, G-472, G-474, G-482, G-483, G-486, G-487, 550, 555, 558, 580

Comparative Government and Politics
G-450, G-451, G-452, G-470, G-472, G-474, G-480, 540, 580

Public Administration
G-460, G-462, G-463, G-464, G-481, 560, 561

Public Law
G-412, G-414, G-416, G-486, G-487, 520, 525

Comprehensive Examination. A written and oral comprehensive examination will be given at or near the end of the course work on the three fields of concentration and on the minor, if applicable.

Undergraduate Preparation. Before undertaking a graduate major in the Department of Political Science, a student should have at least twelve (12) hours of undergraduate political science. Additional work may be required at the discretion of the student's advisory committee.

Courses Accepted from Other Departments. The following courses will be accepted as political science for purposes of completing a major or minor if approved by the student's adviser:
ECO G-400; HIS G-411, G-469, G-470, G-475, and G-477.

DOCTORAL PROGRAM

In addition to the general requirements listed above in this **Bulletin**, the Department of Political Science makes the following specific requirements.

Proficiency in two foreign languages is expected. The student must be able to use the first language before beginning doctoral work (the second year of graduate study), and must satisfy the requirement for the second language at least one full quarter prior to the quarter in which the comprehensive examination is taken. A dissertation based on scholarly research in original sources is required.

The qualifying examination (if required) is to be taken during the first quarter of graduate work beyond the master's degree.

Course Requirements in the Major. Doctoral candidates must specialize in four fields of political science and in one outside minor. (The fields and courses are listed under the master's program above.)

Comprehensive Examination. At the end of the course work, and following successful completion of the foreign language requirements, a written and oral comprehensive examination will be taken in the four fields of the major, and, at the student's doctoral committee's discretion, in the minor. Should the student fail the comprehensive examination in one or more fields, a re-examination may be given by the Department following a lapse of two quarters, or when the student has taken sufficient remedial work to warrant re-examination. Should the student fail the second examination, he will not normally be allowed to continue graduate work in the Department.

DEPARTMENT OF SOCIOLOGY (SOC – 292)

The Department of Sociology offers a graduate major and graduate minor on the master's degree level. The Department's graduate program provides for the Master of Arts degree in sociology and a sociology minor in the master's and doctor's degree programs of other departments.

General regulations governing admission to the Graduate School, requirements of the College of Liberal Arts, and requirements for admission to candidacy for degree are to be found elsewhere in this **Bulletin.** The graduate student should familiarize himself with these requirements and assume responsibility for their discharge.

The major professor and departmental chairman will work out a program of study with, and for, each student electing to do graduate work in sociology.

If the student is uncertain as to whether he has satisfied undergraduate course prerequisites for any particular course, he should consult the instructor for clarification.

The Master of Arts Program in Sociology

In the major area, the Department of Sociology offers only the Master of Arts degree. General requirements correspond to the requirements of the University and its Graduate School. Policies of admission to the University, admission to the Graduate School, admission to candidacy for degree, and grading standards conform to those laid down by the University.

The Master of Arts Degree

Thirty-four (34) quarter hours in sociology (including ten (10) hours of thesis credit).

Sixteen (16) quarter hours in a minor subject approved by the Sociology Department.

At least half of the hours must be in courses numbered 500 or above.

Reading knowledge of one foreign language (proficiency as determined by Graduate School policy).

A thesis to be approved by the major professor.

A written comprehensive examination.

An oral examination by the student's committee to be based on the thesis, the major, and the minor.

DEPARTMENT OF SPEECH AND HEARING SCIENCES (SHS – 296)

The Department of Speech and Hearing Sciences participates in programs leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Part IV of this **Bulletin** covers the specific requirements for these degrees. At the master's level, specialization is possible in four principal areas: (1) Speech and Hearing Science, (2) Audiology, (3) Speech Pathology, and (4) Language Disorders. The program of study at the doctoral level will usually be planned with specialization in one of three principal areas: (1) Speech and Hearing Science, (2) Audiology, or (3) Speech Pathology.

COLLEGE OF SCIENCE

Shelby F. Thames, Dean

The College of Science offers the Doctor of Philosophy degree in biology, chemistry, and microbiology.

The Master of Arts degree is offered in the Departments of Biology, Chemistry, Geology, and Mathematics, and the Master of Science degree is offered in these departments plus the Departments of Microbiology, Physics, Polymer Science, and Medical Technology.

The Departments of Biology, Geology, Mathematics, and Science Education, in cooperation with the College of Education and Psychology, offer programs leading to the Master of Education degree.

The Doctor of Education degree is offered in cooperation with the College of Education and Psychology by the Departments of Mathematics and Science Education.

Environmental Science courses are so constructed as to provide a minor for a master's or doctoral degree program.

For detail information concerning a department's specific degree program, please refer to that department in the following pages. The student's attention is also directed to Part IV of this **Bulletin** for general Graduate School requirements and regulations.

DEPARTMENT OF BIOLOGY (BIO – 305)

MASTER'S DEGREE PROGRAM

The Department of Biology participates in programs leading to the Master of Arts, Master of Science, and Master of Education degrees. For these degrees a minimum of forty-six (46) graduate hours is required, sixteen (16) of which should be in a minor area determined by the chairman of the department or the student's major professor. Twenty-four (24) of these hours must be from courses numbered above 500. An acceptable problem in research must be completed by both a written thesis and an oral examination defending the thesis. Within the Department the student may study zoology, botany, and, in conjunction with the Gulf Coast Research Laboratory, marine biology.

The general requirements for the Master of Arts and the Master of Science degrees are found in Part IV of this **Bulletin**.

DOCTORAL PROGRAMS

The Department of Biology offers the Doctor of Philosophy degree with majors in botany, zoology, and, in conjunction with the Gulf Coast Research Laboratory, marine biology. The degree of Doctor of Philosophy is conferred only in recognition of excellence in research and scholarship.

Work at the Gulf Coast Research Laboratory is recognized as resident work.

DEPARTMENT OF CHEMISTRY (CHE – 320)

MASTER'S DEGREE PROGRAMS

The Department of Chemistry participates in programs leading to the Master of Arts and the Master of Science degrees. For all master's degrees a minimum of forty-six (46) graduate hours is required.

The Department has the same requirements for the Master of Arts and Master of Science degrees, so the title of the degree is optional with the student. These degrees require proficiency in a language, knowledge of computers, and major courses selected by the student in consultation with a faculty graduate committee chaired by the major professor. The Department will require a qualifying examination to be taken by the student during the first week upon his entrance to the Graduate School. The results of this examination will be used to determine any deficiencies which must be removed. The student will also be required to attend seminars each quarter of residence. The candidate must successfully pass a comprehensive examination in his major area which will be administered to him approximately six months before his graduation. An acceptable problem in research must be completed and terminated by a thesis and an oral examination defending the thesis.

DOCTOR OF PHILOSOPHY PROGRAM

The Department of Chemistry feels that the degree of Doctor of Philosophy is not to be conferred because of the successful completion of a pre-determined number of credit hours but only in recognition of excellence in research and scholastic attainment. However the University requires a minimum of 118 hours beyond the bachelor's or seventy-two (72) beyond the master's degree.

The departmental requirements for the Doctor of Philosophy degree are those stated under the general requirements in this Bulletin plus the following:

1. The Department of Chemistry is offering majors in the fields of analytical, biochemistry, inorganic, organic, and physical chemistry.

2. A student, with faculty consent, may choose to bypass the master's degree as he proceeds toward the doctoral degree.

3. The course work required will be determined by the student and the graduate committee. The choice of the field of study shall rest with the student as shall the choice of the major professor after consultation of the student with each member of the graduate faculty.

4. One year of residence time will be allowed for the time spent in obtaining the master's degree if it is transferred from another school. Residence time is based on full-time study as determined by the Department. Only under exceptional circumstances will a student be permitted to do any of the last two years of residence at another location. The dissertation shall be presented to the major professor for correction and criticism before the end of the quarter preceding the quarter of graduation. After approval by the major professor the candidate will circulate copies of the dissertation to his doctoral committee for correction and criticism. After the committee's approval the oral examination will be scheduled by the chairman of the doctoral committee consistent with University policy.

DEPARTMENT OF COMPUTER SCIENCE AND STATISTICS (CSS – 330)

The Department of Computer Science and Statistics participates in the program leading to a minor in statistics at the master's level. For a minor, the student must take sixteen (16) graduate hours which should be selected from the following courses:

CSS G-415—Methods of Mathematical Statistics I. Four hours.
CSS G-416—Methods of Mathematical Statistics II. Four hours.
CSS G-425—Experimental Design. Four hours.
CSS G-427—Sampling Methods. Four hours.
CSS 535—Probability Theory. Four hours.
CSS 536—Statistical Inference. Four hours.
CSS 537—Least Squares Techniques. Four hours.

Students may take the following courses in the Department of Psychology and apply them to a minor in statistics:

PSY 562—Research Methods: Descriptive Statistical Methods. Four hours.
PSY 563—Research Methods: Significance Tests and Experimental Designs. Four hours.
PSY 701—Factor Analysis. Four hours.

Doctoral candidates may take twelve (12) hours in either statistics or computer science in lieu of a second language. Specific courses will be determined by this Department and by the student's graduate committee.

DEPARTMENT OF GEOLOGY (GLY – 340)

The Department of Geology participates in programs leading to the Master of Arts, the Master of Science, and the Master of Education degrees in geology. For all master's degrees, a minimum of forty-six (46) graduate hours is required, twenty-four (24) of which must be in courses numbered above 500. For the Master of Arts or the Master of Science, the student must complete an original research program and submit a thesis acceptable to the Department; a thesis committee which supervises these activities is established when the student is formally admitted to degree candidacy. In addition to the general University requirements, the student must take an evaluation examination. This examination must be taken before the student can be formally admitted to degree candidacy; it is desirable to schedule it, upon consultation with the department chairman, before initial enrollment in graduate study, but in no case may it be delayed later than the time of completion of twelve (12) hours of graduate study. The score on the advanced subject (in the area of science) on the Graduate Record Examinations must be submitted prior to enrollment; no student will be admitted to candidacy for the master's degree in geology who has a score of less than 900 on the combined total of aptitude and advanced sections of the Graduate Record Examinations.

Students following programs leading to the Master of Arts or the Master of Science degree in geology will be required to take a summer field course if they did not have such a course as undergraduates (this stipulation may be waived, upon application, on account of sex or physical disability). All graduate students in geology are required to attend seminars during each quarter of residence.

For the Master of Arts and the Master of Science degrees the student must take a minor of sixteen (16) hours in a field approved by the Department; for the Master of Arts degree, he must also demonstrate a reading knowledge of a language pertinent to the subject of his thesis.

For the Master of Education the student electing earth science as a subject matter area must take a minimum of twenty-four (24) hours of graduate geology courses (up to eight hours of graduate courses in allied fields, such as geography or physics, may be substituted, if, in the opinion of the student's advisory committee, the courses fall in the category of "earth science").

The Department has a cooperative arrangment with the Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Certain courses in marine geological studies may be taken at the Laboratory; these are generally taught in the summer.

DEPARTMENT OF MATHEMATICS (MAT – 350)

The Department of Mathematics offers programs leading to the Master of Arts, Master of Science, and Master of Philosophy degrees with a major in mathematics. In cooperation with the College of Education and Psychology, the Master of Education and the Doctor of Education degrees are offered.

For all master's degrees, a minimum of forty-six (46) quarter hours of graduate work is required, twenty-four (24) quarter hours of which must be in courses numbered above 500. At least twenty (20) hours of the courses numbered above 500 must be in mathematics. A student who is a resident for less than three (3) quarters must complete a minimum of twenty-four (24) quarter hours of mathematics courses numbered above 500.

For the Master of Science degree, proficiency in a foreign language is not required. The writing of a thesis is optional with the student's advisory committee.

Before completing twelve (12) hours of graduate work the student, with the help of his adviser, should outline his tentative graduate program. As a guide to the student, the courses are grouped into four areas: algebra, analysis, applied mathematics, and topology. Subject to schedule consideration and interest, the student, with the help of his adviser, should obtain a suitable balance in at least three of the four areas.

A mathematics seminar is conducted each quarter for graduate students in mathematics. Its purpose is to contribute to the student's mathematical development. Each graduate student is required to attend the mathematics seminar each quarter in residence for a total of four (4) quarter hours or until he graduates. A maximum of six (6) quarter hours credit may be earned for participation in the seminar.

The three-quarter sequence in advanced calculus should be completed before beginning the programs leading to the Master of Arts or the Master of Science degree. If not, then it must be included as a part of the program approved by the student's adviser.

A student must satisfy the present undergraduate requirements for a major in mathematics at the University of Southern Mississippi before beginning a program leading to a master's degree in mathematics. If a student cannot meet

these requirements, he may be admitted to the Graduate School as a conditional graduate student and allowed to take work to fulfill these requirements. The hours required for a graduate degree will be in addition to this prerequisite. It should be emphasized that admission to the Graduate School does not imply acceptance of the student as a candidate for a graduate degree.

Graduate students in mathematics are required to pass an oral preliminary examination before being admitted to candidacy for a master's degree. The preliminary examination will cover fundamentals and will serve to identify the student's level of mathematical maturity. No student will be granted more than three attempts to pass the preliminary examination with at least a three-month interval between attempts. This examination will be administered not later than the fourth week of any quarter on a date arranged by the student with the student's adviser and the chairman of the Mathematics Department. A minimum of twenty (20) quarter hours of graduate courses must be registered for and completed after the examination is passed.

Candidates for either the Master of Arts or the Master of Science degree will take an oral comprehensive examination not later than the sixth week of the last quarter of residence on a date arranged by the student with the student's adviser and the chairman of the Department of Mathematics.

No student will be permitted to select a thesis topic until he has been admitted to candidacy for a master's degree. The thesis in mathematics must conform to University regulations. Four copies of the candidate's thesis are required to be distributed as follows: two copies to the Dean of the Graduate School, one copy to the chairman of the Department of Mathematics and one copy to the student's major professor.

DEPARTMENT OF MEDICAL TECHNOLOGY (MTC – 354)

Admission

The applicant must hold a baccalaureate degree from an accredited college or university, and certification by the Board of Registry, American Society of Clinical Pathologists. In addition to the entrance requirements set forth by the Graduate School of the University of Southern Mississippi, the applicant must obtain a combined score of 800 or above on the aptitude sections of the Graduate Record Examinations. This examination may be taken after the student has enrolled in the program. The Department of Medical Technology endeavors to prepare students for positions as either education coordinators or as chief technologists in medical technology.

MASTER'S DEGREE PROGRAM

Students entering the program will be given the option of writing a thesis or of taking twelve quarter hours of graduate course work beyond a basic forty-eight (48) hour course requirement. The latter option will be made by those students who do not wish to pursue a degree beyond the Master of Science. Those students who choose to write a thesis will, in addition to completing the forty-eight (48) hours of basic course work, choose a clinically oriented problem which meets the approval of a staff pathologist.

Pre-Service Teaching. A pre-service teaching experience will be part of the required activities for the program. Students will assume responsibility for various phases of instruction to fourth year medical technology students enrolled in the undergraduate program at the University. This phase of instruction will be carefully supervised by the department chairman and the education coordinator.

Internship. Upon successful completion of all course work, the student will be assigned to an affiliated hospital laboratory for his internship requirement. He will serve as assistant education coordinator or assistant chief technologist, and, where applicable, complete his research. While at the hospital, the student will be under the direct supervision of the director of laboratories and the education coordinator of that hospital.

Master of Science Degree in Medical Technology

The following is a list of the courses required of all candidates:

	Hours
CHE 525—General Biochemistry I	4
CHE 526—General Biochemistry II	4
CHE 527—General Biochemistry III	4
CHE 461—Applications of Nuclear Techniques	4
MIC 570—Principles of Immunochemistry	4
MIC 571—Immunhematology	4
MIC 589—Cytogenetics	4
CIF 507—Basic Course in Curriculum Development	4
EPY 510—Advanced Educational Psychology	4
CIF 519—Utilization, Selection, and Preparation of Audiovisual Materials	4
CIF 532—Measuring Results in Education	4
MGT 525—Human Relations in Business	4

DEPARTMENT OF MICROBIOLOGY (MIC – 310)

Any student having successfully completed a Bachelor of Science or Bachelor of Arts degree in any of the biological or physical sciences, who demonstrates a minimum score of 900 on the aptitude section of the Graduate Record Examinations, who has a grade point average of at least 3.0 in the physical or biological sciences, and who meets the requirements set forth by the Graduate School of the University of Southern Mississippi is eligible to pursue a program leading toward the Master of Science or the Doctor of Philosophy degree in the Department of Microbiology. The Department of Microbiology endeavors to prepare students for teaching and/or research positions in industrial and medical microbiology and in genetics.

MASTER'S DEGREE PROGRAM

The Department of Microbiology will require a qualifying examination to be taken during the first week upon entering Graduate School. The results of this examination will be used to determine any deficiencies the student may possess which will be required to be removed. A minimum of forty-six (46) graduate hours is required, sixteen (16) of which must be in an approved minor area of science. An acceptable problem in research must be completed and terminated by a written and/or oral comprehensive examination.

DOCTOR OF PHILOSOPHY PROGRAM

The Doctor of Philosophy degree in the Department of Microbiology is considered foremost to be a research degree; however, a student must demonstrate excellence in scholastic attainments as well as research capabilities. The University requires a minimum of one hundred and eighteen (118) hours beyond the bachelor's or seventy-two (72) hours beyond the master's degree. The Department of Microbiology requires one foreign language and proficiency in statistics as set forth by the Graduate Council.

During a student's first or second quarter of enrollment, the Department will require a written and/or oral qualifying examination. This examination is designed to assess both the student's fitness to pursue doctoral work and to assist the committee members in planning his doctoral program. A written and/or oral comprehensive examination must be taken at or near completion of the candidate's course work. Upon acceptance of the dissertation by the candidate's committee and at least four weeks prior to graduation, a final oral examination in defense of the candidate's dissertation will be administered by the Department of Microbiology. The Department furthermore requires that the candidate's research results be of a quality to be accepted for publication by a scholarly scientific journal.

DEPARTMENT OF PHYSICS (PHY – 360)

The Department offers programs leading to the Master of Arts and the Master of Science degrees. For either degree, a minimum of forty-six (46) graduate hours is required. For the Master of Arts degree, a reading knowledge of either French, German, or Russian is required. For the Master of Science degree, the applicant must achieve proficiency in computer science, either through examination or by successfully completing CSS 210 and 311 or their equivalents.

A thesis is required for the Master of Arts and the Master of Science degrees. Research areas from which the thesis may be chosen include magnetic resonance, impurity states in semiconductors, atomic collisions, and viscous fluid flow.

The prospective beginning graduate student should have completed mathematics through differential equations, and in addition to introductory physics, courses in mechanics, electricity and magnetism, modern physics and optics. Students with inadequate preparation may be admitted but will be expected to take some make-up courses. Students who plan to do graduate work are expected to take the advanced physics portion of the Graduate Record Examinations.

DEPARTMENT OF POLYMER SCIENCE (PSC – 370)

MASTER'S DEGREE PROGRAM

The Department of Polymer Science offers a Master of Science degree for which a minimum of forty-six (46) graduate hours in courses numbered above 500 is required. In addition an original research problem must be completed, terminated with a written thesis.

DEPARTMENT OF SCIENCE EDUCATION (SCE – 380)

The Department of Science Education recognizing the increased emphasis on the art of science teaching and the additional opportunities for individuals with advanced training in these arts provides a program for the Master of Education and the Doctor of Education degrees in science education.

In addition to the general requirements and procedures pertaining to graduate degrees as outlined in Part III and IV of this Bulletin, the following requirements must be fulfilled.

MASTER'S PROGRAM

1. Completion of fifty-eight (58) or sixty (60) quarter hours of graduate work.

2. A minimum of twenty-four (24) quarter hours in a specific science—biology, chemistry, earth and environmental sciences, or physics.

3. A minimum of eight (8) quarter hours in related sciences.

4. Demonstration of competence in the following Professional Education areas:
   (a) Psychology of learning
   (b) History and philosophy of education
   (c) Statistical methods and procedures in education
   (d) Research methods in education
   (e) Guidance and educational testing
   (f) Public School science curriculum
   (g) Problems in science teaching

Generally, the fulfillment of the above requirements will involve:

A. Twelve (12) to twenty (20) quarter hours in professional education.
B. Thirty-eight (38) to forty-eight (48) quarter hours in the sciences and science education.

Approximately one-third of the graduate work will be in professional education and two-thirds in the sciences. Students with sufficient background are not required to take additional courses in professional education, but will complete their programs in the sciences.

A thesis carrying six quarter hours is optional and would substitute for two courses in education. The total program with thesis requires fifty-eight (58) quarter hours graduate credit. The thesis may involve research in a particular science or research education.

DOCTOR OF EDUCATION PROGRAM

1. Completion of seventy-two (72) quarter hours of graduate work above that accepted at the master's level.

2. A minimum of twenty-four (24) quarter hours in a specific science—biology, chemistry, earth and environmental sciences, or physics.

3. A minimum of eight (8) quarter hours in related sciences.

4. Competence in the areas of professional education as listed above.

Generally, the fulfillment of the above requirements will involve:

A. Twelve (12) to twenty-four (24) hours in professional education.
B. Thirty-two (32) or more hours in the sciences.
C. Twelve (12) or more hours in science education.

In all, two-thirds or more of the graduate work will be in the sciences and science education. In planning the overall program consideration is given to the student's background and his particular interests and goals.

Additional requirements include demonstrated proficiency in educational statistics and independent research. Research, culminating in a dissertation, may deal with a problem in the student's science speciality or a problem in science education.

In addition to an evaluation of the student's record, tests and examinations are used for diagnostic purposes in planning programs. The Graduate Record Examinations verbal and quantitative scores should be submitted with the application for advanced graduate study. During the first or second quarter of study additional tests are administered by the Department and the College of Education and Psychology.

PART SIX

COURSE DESCRIPTIONS

ACCOUNTING (ACC – 605)

G-405—**Current Accounting Theory and Research.** Four hours. Quarterly.
Prerequisites: ACC 401, 402, 409, 429, or consent of instructor.
The study of current accounting problems, with special emphasis on the published bulletins (pronouncements) of professional accounting organizations.

G-410—**Auditing II.** Four hours. As needed.
Prerequisite: ACC 409.
A study of the principles and philosophy of auditing.

G-420—**Advanced Cost Accounting and Budgeting.** Four hours. Fall, Spring, Summer.
Prerequisite: ACC 320.
A study of the development of accounting data for managerial use, including budgetary procedures and control.

G-430—**Federal Income Tax Accounting II.** Four hours. Winter, Spring.
Prerequisite: ACC 429.
A continuation of ACC 429 with emphasis on research in taxation and guides for partnerships, estates, trusts, and corporations.

G-450—**Accounting Systems.** Four hours. Fall, Winter, Spring.
Prerequisite: ACC 409.
A study of the nature and procedure of systems work with attention given to the design and use of mechanical and computer oriented accounting systems.

G-460—**Consolidated Statements and Accounting for Fiduciaries.** Four hours. Fall.
Prerequisite: ACC 402 or consent of instructor.
An in-depth study of fiduciary accounting and reports, parent and subsidiary accounting including consolidations and mergers and foreign exchange.

G-470—**Municipal and Governmental Accounting.** Four hours. Spring.
Prerequisite: ACC 202.
An in-depth study of the principles and standards of governmental accounting, with emphasis on classification of accounts, fund accounting, statements, and reports.

G-492—**Research in Accounting Problems.** Four hours.
Prerequisite: Approval of instructor.
A seminar course for advanced study in problems in cost accounting, budgeting, auditing, income tax, or governmental accounting.

505—**Advanced Accounting Theory.** Four hours. Winter.
Prerequisites: 20 hours of accounting above accounting principles.
An extensive study of financial accounting literature including current areas of controversy.

510—**Advanced Problems in Public Accounting Practice.** Four hours. Fall.
Prerequisite: 20 hours of accounting above accounting principles including ACC 409 or equivalent.
A study of current topics in public accounting practice.

520—**Advanced Cost Accounting Problems and Controllership.** Four hours. Spring.
Prerequisite: 20 hours of accounting above accounting principles including ACC 320 or equivalent.
A study of the evolution of cost concepts and the controllership functions with emphasis on the current role of costs in managerial planning, control, and policy making.

525—**Managerial Accounting.** Four hours. Fall, Spring, Summer.
Prerequisite: Principles of Accounting.
A study of the potential managerial uses of accounting information for planning and control.
(Not to be taken by accounting emphasis students.)

530—**Tax Planning and Research.** Four hours. Summer.
Prerequisites: ACC 429 and 430 or equivalent.
A study of tax planning and reporting, the library of tax services, preparation of tax briefs, and client representation.

592—**Special Problems in Accounting.** Four hours.
Individual study of specific topics in accounting.

598—**Thesis.** Eight hours.

ADULT EDUCATION (CIA – 110)

G-440—**Methods and Materials in Adult Basic Education.** Four hours. Winter.
The uses and adaptation of various materials and techniques for teaching adults will be reviewed with specific study of the relationship of basic subject matter and teaching methods.

G-441—**Foundations of Reading Instruction for the Adult.** Four hours. Quarterly.

This course is designed to examine the basis of reading instructions in relation to the needs and characteristics of the non-literate adult. Topics included are: the reading process; essential reading skills; effects of economic, personal, and social forces; and a review of current literature.

G-442—**Methods and Materials for Teaching Adults to Read.** Four hours. Quarterly.

This course will include a study of materials and methods appropriate for teaching reading to functionally illiterate adults. Materials, diagnostic and evaluative procedures, and laboratory experiences will be included.

G-445—**Teaching the Disadvantaged Adult.** Four hours. Fall.

A study of the educational problems of culturally deprived and handicapped adults. Characteristics and needs are related to programs and procedures found to be successful.

G-490—**Special Problems in Adult Education.** One to four hours. Quarterly.

A consideration of special areas of interest in adult education. May be arranged for an individual or a group with common interests. Permission of the department chairman required.

501—**Principles of Adult Education.** Four hours. Fall.

A survey of the history, philosophy, form, structure, and current developments in the field of adult education.

507—**Program Planning and Curriculum Development in Adult Education.** Four hours. Spring.

The design of programs, courses and other instructional units for adults is related to institutions, community groups, business and industrial groups, governmental and volunteer agencies. Emphasis is placed upon evaluation and appraisal as a built-in element in the process of curriculum development.

ALLIED ARTS (AA – 655)

AA 500—**Aesthetics in the Arts.** Four hours. Quarterly.

A study of the formulation of aesthetic tastes. Emphasis is placed upon an analysis of artistic expression and the affective quality of experiences with the fine arts.

ANTHROPOLOGY AND COMPARATIVE RELIGIOUS STUDIES (ACR – 286)

G-401–**Comparative Indo-European Studies.** Four hours. Spring, alternate years.

A survey of contemporary Indo-European studies designed to illustrate the proper use of comparative method and the combination of data acquired from diverse sources, involving archeological, historical and linguistic research, in the solution of anthropological problems.

G-402–**Religion in the Rise of American Culture.** Four hours. Fall.

A study of the origin and development of the major religious groups and of the shifts in religious thought in the United States from colonial times to the present.

G-404–**Mythology and Folklore.** Four hours. Winter, alternate years.

The utilization of folklore and mythological data in anthropological research with special reference to the work of Georges Dumezil.

G-406–**Anthropological Theory.** Four hours. Spring, alternate years.

A general survey of the history of anthropology and of the major schools of anthropological theory, with particular reference to the work of those anthropologists whose views are of contemporary relevance.

G-408–**A History of the Christian Church I.** Four hours. Winter.

A study of the history of the church from the apostolic period through the Renaissance.

G-409–**A History of the Christian Church II.** Four hours. Spring.

A study of the history of the church from the Reformation to the modern era.

G-425–**Studies in the Religious Dimensions of Secular Literature.** Four hours. Spring.

An examination of religious issues as expressed in modern plays and novels.

G-450–**Religious Literature and Thought of India.** Four hours. Winter, alternate years.

A study of Hinduism, Buddhism, Jainism, and Sikhism as a part of the culture of India.

G-451–**Religious Literature and Thought of China and Japan.** Four hours. Spring.

A study of Confuscian, Taoist, Shinto, and Zen literature and thought.

G-452—**Religious Literature and Thought of the Near East.** Four hours. Winter.

A study of Jewish, Zoroastrian, and Islamic literature and thought.

G-490—**Contemporary Religious Problems.** Four hours. Winter, alternate years.

A discussion of selected topics of contemporary interest. Topics will vary and course may be repeated to a total of 12 hours on different topics.

508—**Graduate Seminar in Anthropology.** Four hours. As needed.

509—**Seminar in Ethnology.** Four hours. Fall, Spring.

Individually designed and supervised studies in general anthropology. Seminar discussion on methodology and findings.

APPLIED MUSIC AND ORGANIZATIONS (APM – 670)

501-502-503-504—**Piano.** One to four hours each quarter.

511-512-513-514—**Organ.** One to four hours each quarter.

521-522-523-524—**Strings.** One to four hours each quarter.

531-532-533-534—**Woodwinds.** One to four hours each quarter.

541-542-543-544—**Brass.** One to four hours each quarter.

551-552-553-554—**Percussion.** One to four hours each quarter.

561-562-563-564—**Voice.** One to four hours each quarter.

571-572-573—**Ensemble.** One hour each.

581—**Orchestra.** One hour. May be taken three times.

582—**Band.** One hour. May be taken three times.

583—**Chorus.** One hour. May be taken three times.

671-672-673—**Ensemble.** One hour each.

681—**Orchestra.** One hour. May be taken three times.

682—**Band.** One hour. May be taken three times.

683—**Chorus.** One hour. May be taken three times.

(Above offered Fall, Winter, Spring, Summer.)

ART (ART – 660)

551—**Painting Studio.** Four to twelve hours. As needed.

552—**Drawing Studio.** Four to twelve hours. As needed.

553—**Ceramic Studio.** Four to twelve hours. As needed.

ART EDUCATION (ARE – 665)

501—**Research in Art Education.** Two hours. Spring.
A study of current research and research techniques in the area; includes the compilation of bibliographic material and the organization of research projects.

515—**Trends in Current Plastic Expression.** Four hours. Summer.
A course designed to keep the student abreast of current trends in the plastic arts.

520—**Adapting Selected Current Art Trends to School Practice.** Four hours. As needed.
Current art trends are identified and selections of them are developed in terms of philosophies, practitioners, background, and techniques. Students will identify, select, analyze, and develop these into studio practice and school art lessons.

525—**Seminar in Elementary Art Education and Supervision.** Four hours. Fall.
A study of the problems of teaching and supervising the public school program in art grades K through six.

526—**Seminar in Secondary Art Education and Supervision.** Four hours. Winter.
A study of the problems of teaching and supervising the public school program in art in grades seven through twelve.

592—**Special Studies in Art Education I, II, III.** One to three hours each.

597—**Independent Study and Research.** Hours arranged.

598—Thesis. Six hours.
A conventional thesis, or a catalogued exhibition, or an exhibition with a supporting paper.

BIOLOGY (BIO – 305)

Graduate courses of the 400 level may also be taken by undergraduate students, but courses above the 400 level are limited to graduate students.

G-400—Protozoology. Four hours. As needed.
Prerequisites: BIO 101, 102, and 103.
Two lecture periods and two 2-hour laboratory periods per week.
Introduction to parasitic and free-living protozoa.

G-401—Genetics. Four hours.
Prerequisites: BIO 101, 102, and 103.
The fundamental principles of heredity.

G-409—Introductory Phycology. Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: Consent of instructor.
Taxonomy, physiology, and biochemistry of the algae.

G-411—Plant Ecology. Four hours. As needed.
Prerequisite: Advanced standing in botany.
Relationship of plants to their environment.

G-412—Plant Physiology I. Four hours. As needed.
Two lecture and two laboratory periods per week.
Prerequisite: BIO 103; general chemistry and organic chemistry recommended.
The basic physiological processes of green plants.

G-417—Taxonomy of Higher Plants. Four hours. As needed.
Prerequisites: BIO 101 and 103.
Two lecture periods and two 2-hour laboratory periods per week.
The classification of seed plants.

G-418—Invertebrate Zoology I. Four hours. Fall.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101, 102, and 103.
Survey of the Protozoa, Porifera, Coelenterata, Platyhelminthes, Aschelminthes, and the minor protostomes. Natural history, comparative anatomy, and evolution are emphasized.

G-419—**Invertebrate Zoology II.** Four hours. Winter.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101, 102, and 103.
Survey of the Annelida, Mollusca, Arthropoda, Echinodermata, and the Hemichordata. Natural history, comparative anatomy, and evolution are emphasized.

G-421—**Embryology I.** Four hours. Winter.
Two lecture periods and two 2-hour laboratory periods per week.
Prerequisites: BIO 101, 102, 103, 301, and 302.
Embryology of vertebrates, emphasizing the frog. Maturation, fertilization, cleavage, origin and development of germ layers, histogenesis, and organogenesis.

G-422—**Embryology II.** Four hours. Spring.
Two lecture periods and two 2-hour laboratory periods per week.
Prerequisite: BIO G-421.
A continuation of BIO G-421 emphasizing the higher vertebrates.

G-423—**Plant Anatomy.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: BIO 103.
A study of the anatomy of vascular plants.

G-424—**Histology.** Four hours. As needed.
Three lecture periods and two hours laboratory per week.
Prerequisites: 24 hours of biology.
Microscopic anatomy of mammalian organ systems.

G-425—**Introductory Mycology.** Four hours. Winter.
Two hours lecture and four hours laboratory per week.
Prerequisite: Consent of instructor.
Taxonomy, physiology, and biochemistry of fungi.

G-427—**Biogeography.** Two hours. Winter.
Two lectures per week.
A descriptive and analytical study of the distribution of plants and animals.

G-430—**Mammalian Physiology I.** Four hours. Fall.
Three hours lecture and one two-hour laboratory period per week.
Prerequisites: BIO 101-103, BIO 228 or 301-302.
The major mammalian physiological systems, emphasizing their interrelationships and their regulation of the internal environment.

G-432—**Mammalian Physiology II.** Four hours. Winter.
Prerequisite: BIO G-430.
Continuation of BIO G-430.

G-433—**Medical Entomology.** Four hours. Winter.
Two hours lecture and four hours laboratory per week.
Prerequisite: BIO G-452.
Anthropod vectors and agents of disease.

G-435—**Mammalogy.** Four hours.
Two hours lecture and four hours laboratory and field work per week.
Prerequisite: BIO 301 and 302 recommended.
Morphology, taxonomy, life history, distribution, evolution, and adaptations of mammals.

G-437—**Ornithology.** Four hours. Spring.
Two hours lecture and four hours laboratory and field work per week.
Prerequisite: BIO 301 or 302 recommended.
Morphology, taxonomy, life history, distribution, evolution, and adaptations of birds.

G-438—**Morphology of Non-Vascular Plants.** Four hours. Winter.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101 and 103.
Life cycles, evolution, and diagnostic characteristics of representative algae, fungi, lichens, liverworts, and mosses.

G-439—**Morphology of Vascular Plants.** Four hours. Spring.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101 and 103.
Life cycles, evolution, and diagnostic characteristics of representative ferns, fern allies, and seed plants.

G-448—**Comparative Animal Physiology I.** Four hours. Winter, Spring.
Two hours lecture and four hours laboratory per week.
Prerequisites: 16 hours of biology, 12 hours of chemistry.
A comparison of vertebrate physiological systems, emphasizing the influence of the environment.

G-449—**Comparative Animal Physiology II.** Four hours. Spring, Summer.
A continuation of BIO G-448.

G-450—**Principles of Nomenclature.** Two hours. As needed.
Prerequisite: Consent of instructor.
Discussions and problems in biological nomenclature.

G-452—**Entomology.** Four hours. Fall.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101, 102, and 103.

Structural adaptations, classification, life histories and habits, and the economic importance of insects.

G-455—**Experimental Embryology.** Four hours. Fall.
Prerequisites: BIO 421 and 422.
Factors which activate or regulate developmental processes.

G-466—**Ichthyology.** Four hours. Fall.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101, 102, 103.
Collection, preservation, and identification of local species of fishes and fish-like vertebrates, with primary emphasis on fresh water forms. Field work when possible.

G-467—**Ecology of Parasitic and Vector-Borne Diseases.** Two hours. As needed.
Two hours lecture per week.
Prerequisite: Consent of instructor.
Transmission and pathogenesis of parasitic and vector-borne diseases in their ecological framework.

G-468—**Human Helminthology.** Four hours. Fall, Summer.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 101 and 102.
Life histories, systematics, and host relationships of helminths of medical significance.

G-469—**Human Protozoology.** Four hours. Winter, Summer.
Two hours lecture and four hours laboratory per week.
Prerequisite: Consent of instructor.
Life histories, epidemiology, and diagnostic characteristics of protozoans parasitic in man.

G-472—**Freshwater Biology.** Four hours. Fall, Summer.
Two hours lecture and four hours laboratory per week.
Prerequisite: Consent of instructor.
Collection, identification, and ecology of aquatic organisms significant to the assessment of water quality.

G-475—**Endocrinology.** Four hours. Winter.
Four hours lecture per week.
Prerequisite: BIO 101 or consent of instructor.
Survey of the endocrine glands and their role in regulating the physiological processes of mammals.

G-477—**Economic Botany.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: BIO 103 or consent of instructor.
Origin, distribution, and significance of plants most important to man. Lectures are supplemented with films and with living and preserved specimens. Field trips may be taken.

G-478—**Plant Pathology.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: BIO 103.
Taxonomy, physiology, and control of economically important plant pathogens.

G-480—**Aquatic and Marsh Plants.** Four hours. Fall, Summer.
Collection, identification, and ecology of aquatic and marsh plants occurring in fresh and brackish water. Field and laboratory investigations of common locally occurring aquatic vegetation.

G-481—**Ecology I.** Four hours. Fall.
Two hours lecture and four hours laboratory or field work per week.
Prerequisites: 24 hours of biology including a course in botany.
Interrelations between organisms and their environment. Biogeochemical cycles and nutrient distribution. Limiting factors, productivity, and energy transfer in food chains. Ecological succession.

G-482—**Ecology II.** Four hours. Winter.
Two hours lecture and four hours laboratory or field work per week.
Prerequisite: BIO 481.
Ecological effects of temperatures, light, rainfall, and salinity. Relationship of respiration and osmoregulation to environmental factors. Population growth.

G-484—**Limnology.** Four hours. Spring.
Lectures, laboratories, and field trips.
Prerequisites: Consent of instructor; BIO G-481 and G-482 strongly recommended.
The physical, chemical, and biological conditions in lakes, ponds, and streams.

G-485—**History of Biology.** Two hours. As needed.
Prerequisites: 36 quarter hours of biology.
Lectures and readings concerning the development and organization of biological sciences. The development of biological principles and theories will be emphasized. For seniors and graduate students only.

G-492—**Biological Problems I, II, III.** Two hours each.
Given only by special arrangement.
A course in special techniques, designed for majors with a need for certain basic biological techniques as tools for future research.

G-493—**Field Biology I, II, III, IV.** Two hours each. As needed.
Prerequisite: Consent of instructor.
Ecological and taxonomic studies of the fauna and flora of a variety of habitats. Offered between quarters as four to six day field trips.

502—**Taxonomy of the Flowering Plants for High School Teachers.** Four hours. As needed.
Eight hours lecture-laboratory and/or field trips per week.
The taxonomy and ecology of flowering plants; especially designed for teachers of secondary biology.

507—**Advanced General Botany for High School Teachers.** Four hours. As needed.
Eight hours laboratory-discussion and/or field trips per week.
The general physiology and ecology of seed plants; especially designed for teachers of secondary biology.

511—**Vertebrate Biology for High School Teachers.** Four hours. As needed.
Eight hours lecture-laboratory and/or field work per week.
The biology of vertebrates, emphasizing techniques of collection and preservation of specimens; especially designed for teachers of secondary biology.

512—**Cytology I.** Four hours. Winter.
Four hours lecture per week.
Prerequisites: 12 hours of chemistry, 12 hours of physics, or consent of the instructor.
Cellular morphology, metabolism, growth, differentiation, and reproduction.

515—**Biological Oceanography.** Four hours. Spring or Summer.
Two hours lecture and four hours laboratory per week.
Prerequisite: BIO 482 or G-482.
The sea as a biological environment.

516—**Cell Ultrastructure.** Four hours. As needed.
Four hours lecture per week.
Prerequisites: Graduate standing and consent of instructor.
Structure and function of cells and cell organelles at the sub-cellular level.

518—**Aquaculture.** Four hours. Spring, Summer.
Two hours lecture and four hours field work per week.

Prerequisites: Graduate standing and consent of instructor.
Principles of production of aquatic organisms in natural and artificial environments. Techniques of propogation, harvesting, disease control and water quality management are included.

519—**Invertebrate Physiology.** Four hours. As needed. Fall.
Two hours lecture and four hours laboratory per week.
Prerequisites: Graduate standing and consent of instructor.
General principles of invertebrate physiology with emphasis on growth and reproduction.

521—**Advanced Systematic Herpetology.** Four hours. Winter.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 360 and consent of instructor.
Systematics, natural history, distribution, and economic importance of reptiles and amphibians.

522—**Experimental Phycology.** Four hours. As needed.
Four hours lecture per week.
Prerequisites: Graduate standing and consent of instructor.
Experimental studies in phycology, with emphasis on special techniques of study.

524—**Experimental Mycology.** Four hours. As needed.
Four hours lecture per week.
Prerequisites: Graduate standing and consent of instructor.
Experimental studies in mycology, utilizing special techniques of study.

526—**Advanced Systematic Ichthyology.** Four hours. Fall.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 466 or G-466 and consent of instructor.
Systematics, natural history, distribution, and economic importance of fishes.

527—**Speciation.** Two hours. Fall.
Prerequisite: BIO 401 or G-401.
Current concepts of phylogeny and the origin of the species.

530—**Helminthology.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO G-468 or G-469.
Systematics, morphology, and host-relationships of helminths.

550—**Advanced Taxonomy of Seed Plants.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisites: BIO 103 and 417.

Experimental approaches to problems in plant taxonomy. Laboratory devoted to classification of seed plants.

552—**Analytical Methods in Biological Research.** Four hours. As needed.
Four hours lecture and laboratory combined.
Prerequisites: Graduate standing and consent of instructor.
Special techniques of data gathering and interpretation.

560—**Topics in Marine Biology.** Two hours. Fall or Spring.
Prerequisites: BIO 101, 102, 103; CHE 301, 302, 303.
Special topics in marine physiology and biochemistry.

563—**Fisheries Biology.** Four hours. Winter.
Two hours lecture and four hours laboratory or field work per week.
Prerequisite: BIO 466 or G-466. BIO 484 or G-484 highly recommended. Consent of instructor.
Ecology and conservation of fishes.

564—**Biological Photography.** Two hours. As needed.
One hour of lecture and two hours laboratory per week.
Techniques of biological photography.

567—**Marine Ecology.** Four hours. Spring.
Two hours lecture and four hours laboratory of field work per week.
Prerequisite: BIO 482 or G-482.
The physical and chemical nature of the marine environment and the ecology of marine organisms.

568—**Planktology.** Four hours. Spring.
Two hours lecture and four hours laboratory or field work per week.
Prerequisite: BIO 418 or G-418 or BIO 453 or G-453.
The morphological adaptations and life histories of plankton.

569—**Invertebrate Embryology.** Four hours. Spring.
Two hours lecture and four hours laboratory or field work per week.
Prerequisites: BIO 101, 102, 103.
The embryology of invertebrates, emphasizing that of marine animals.

575—**Experimental Endocrinology.** Four hours. Spring or Summer.
Two hours lecture and four hours laboratory.
Prerequisites: Graduate standing and consent of instructor.
Experimental approach to the study of hormones, utilizing techniques of bioassay and surgery.

582—**Physiology of Marine Animals.** Four hours. As needed.
The environmental physiology of marine animals.

584—**Seminar in Animal Behavior.** Two hours. Fall.
Special topics in ethology, in areas of individual interest.

586—**Seminar in Physiology.** Two hours. As needed.
Special topics in physiology in areas of individual interest.

592—**Special Problems in Biology I, II, III, IV.** Two hours each.
Prerequisite: A thorough background in biology.
Faculty-directed research in areas of individual interest.

596—**Biology Seminar I, II, III.** One hour each. As needed.
The presentation of current concepts in special areas of individual interest.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

601—**Research in Zoology.** Credits to be arranged for maximum of eight quarter hours.

791—**Research in Biology.** Credit to be arranged.
Prerequisite: approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

COURSES TAUGHT AT THE GULF COAST RESEARCH LABORATORY IN OCEAN SPRINGS BY THE GULF COAST RESEARCH LABORATORY STAFF

G-429—**Marine Botany.** Six hours.

Prerequisites: General botany, plant taxonomy, and BIO 339.

A survey, based upon local examples, of the principal groups of marine algae, treating their structure, reproduction, distribution and general biology; including a survey of the common maritime flowering plants, their identification and ecology.

G-431—**Marine Vertebrate Zoology.** Nine hours.

Prerequisites: 12 hours in biology, including comparative anatomy.

A formal lecture and laboratory survey of all marine chordates, including the lower subphyla, the fishes, reptiles, mammals, and shore birds.

G-454—**Marine Invertebrate Zoology I.** Nine hours.

Prerequisites: 24 hours of zoology and junior standing. Applicant should have a strong background in zoology.

The lower marine invertebrates, especially those of Mississippi. Emphasis on morphology, distribution, and ecology of the phyla from Protozoa through Lophophorata. Lecture, laboratory, and field work are included.

G-464—**Marine Invertebrate Zoology II.** Nine hours.

Prerequisites: 24 hours of zoology and junior standing. Applicants should have a strong background in zoology.

The higher marine invertebrates, especially those of Mississippi. Emphasis on morphology, distribution, and ecology of the protostome and deuterostome phyla from Mollusca through the protochordates. Lecture, laboratory, and field work is included.

G-465—**Parasites of Marine Animals.** Nine hours.

Prerequisite: 24 hours of zoology, including invertebrate zoology.

Parasites of marine animals, with emphasis on morphology, taxonomy, life histories, and host-parasite relationships. Lecture, laboratory, and field work are included.

G-488—**Introduction to Marine Zoology.** Six hours.

Prerequisite: 12 hours of biology.

A general introduction to the marine environment with emphasis on local fauna. Weekly boat trips will be made for the purpose of collecting specimens for laboratory study. Lectures by guest scientists and visits to local areas are included.

541—**Marine Fisheries Biology.** Six hours.

Prerequisites: 18 quarter hours of zoology and one year of college mathematics.

As introduction to the general principles of the subject including the simpler statistical procedures, collection of production statistics, and a general review of the world fisheries with special emphasis on the United States.

548—**Biological Electron Microscopy I.** Four and one-half hours.

Prerequisite: Consent of instructor. Offered only to graduate students conducting dissertation research in ultrastructure at the Gulf Coast Research Laboratory.

A study of tissue preparation, theory, and techniques of ultramicrotomy, and an introduction to the fundamentals of electron microscopy.

549—**Biological Electron Microscopy II.** Four and one-half hours.

Prerequisite: BIO 548.

This course is a continuation of BIO 548 and includes a study of special techniques and the operation and maintenance of an electron microscope.

565—**Marine Microbiology.** Four hours.

Twelve hours of lecture and laboratory per week.

Prerequisite: Graduate standing in microbiology, or in marine biology with adequate microbiological background.

Examination of microbial flora of representative environments. Taxonomy, physiology, economic significance, and effect upon biologic communities.

566—**Marine Phycology.** Credits (maximum six hours) and schedules by arrangement.

Prerequisites: Graduate standing, consent of instructor, and some familiarity with the fundamentals of both plant physiology and phycology (culture and taxonomy).

Areas of concentration according to seasonal activities and needs or interest of the student.

600—**Advanced Problems in Marine Microbiology.** Credits (maximum six hours) and schedules by arrangement.

Prerequisites: Marine Microbiology (BIO 565) and consent of instructor.

Supervised research problems and projects selected to meet the needs of the graduate students of microbiology or marine biology.

604—**Research in Marine Biology.** Credits to be arranged.

BUSINESS EDUCATION (BED – 105)

G-452–**Philosophy of Vocational Business Education.** Four hours. Winter.
History of vocational business education; changing concepts resulting from Federal legislation; changing nature of office systems and occupations; changing employment opportunities and consequent changes in procedures and techniques of vocational business education.

G-453–**Coordination of Office Occupations Programs.** Four hours. Summer.
Problems of the coordinator in the development of programs to meet the needs of employed youth and adults in office occupations programs.

G-460–**Office Management.** Four hours. Fall, Winter, Spring.
A study of the principles of management as applied to office work, covering office organization, supervision, layout, supplies, machines, personnel, office forms and reports, and office services.

G-480–**Research and Report Writing.** Four hours. Summer.
The study of concepts and methods of business research and style in business reports; a comprehensive coverage of problems encountered in researching business data and in reporting findings. Practical experiences will be provided in gathering, organizing, analyzing, and interpreting business data and in the presentation of findings in effective written report form.

504–**Foundations in Business Education.** Four hours. As needed.
Examination and analysis of the history and philosophy of business education.

508–**Curriculums in Business Education.** Four hours. Summer.
Curriculum construction; content organization; selection and preparation of instructional materials; and application of instructional techniques.

551–**Principles of Business Education.** Four hours. Spring.
Principles and objectives of business education in junior high school, high school, and junior college and other post high school institutions; guidance; qualifications and professional activites of the business teacher; and public relations with business.

552–**Seminar in Business Education.** Four hours. Summer.
An intensive study of specific problems in business education, and a survey of literature pertaining to the problems.

553–**Improvement of Instruction in Bookkeeping and Related Basic Skills.** Four hours. As needed.
Problems and procedures in the mastery of bookkeeping and related

knowledges and skills; materials and teaching procedures in bookkeeping and business mathematics; teaching problems emphasized; significant research relating to methodology and testing examined.

554—**Improvement of Instruction of Basic Business.** Four hours. As needed.
Objectives, teaching procedures, instructional materials, and other related problems of social business subjects such as general business, economic geography, business law, consumer economics, business organization and management, salesmanship, economics, and other nontechnical business subjects. Significant related research is studied.

555—**Improvement of Instruction in Typewriting and Related Skills.** Four hours. As needed.
Teaching procedures basic to vocational proficiency in typewriting and related skills; available instructional materials; measurement of skills; standards of achievement; teaching problems of students in class; review of related research.

556—**Improvement of Instruction in Shorthand and Transcription.** Four hours. As needed.
Problems in the development of occupational proficiency in shorthand; available instructional materials; transcription problems; integration of shorthand, typewriting, English, and style; achievement tests; standards of achievement. Special attention to teaching problems of students in the class. Evaluation of related literature and research.

569—**Measurement and Evaluation in Business Education.** Four hours. Fall.
Concept of evaluation; tools of evaluation; evaluation in the different business subjects; construction of tests; selection, administration, and scoring of tests; determination of grades; evaluation on the job (National Business Entrance Tests, Civil Service, et cetera).

591—**Problems in Cooperative Office Education.** Two hours. As needed.
Analysis of problems in administering cooperative office education programs.

592—**Special Problems I, II, III.** One hour each.
Prerequisite: 12 quarter hours of advanced courses in business education.
A problem study to be approved by the department chairman to develop knowledge and facility in a field of interest of the student. Preparation of a scholarly paper is required.

594—**Field Problems.** Four hours. Arranged.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit is deferred until thesis is completed.

601—**Seminar in Business Education.** Four hours. As needed.
Analysis and evaluation of significant research studies in the field of business education.

650—**Business Education in the Junior College.** Four hours. As needed.
A study of forces affecting the junior college business curricula, nature and philosophy, programs, relationship to community and business, and trends. Significant related research is studied.

660—**Administration and Supervision of Business Education.** Four hours. As needed.
Study of the principles, agencies, and general techniques of effective administration and supervision of business education in junior high, senior high, and evening high schools, and in colleges.

680—**Readings in Business Education.** Four hours. As needed.
Readings in selected areas of interest including both periodical literature and research, with a formal organization and presentation of findings.

691—**Research in Business Education.** One to twelve hours.

697—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a research problem and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

698—**Research Problems.** Four hours.

CHEMISTRY (CHE – 320)

G-401, G-402, G-403—**Physical Chemistry.** Four hours each. Fall, Winter, Spring sequence.
Three hours lecture and one 3-hour laboratory period per week.
Prerequisites: CHE 303, Integral Calculus, and 1 year of physics.
A mathematical treatment of the laws governing chemical and physical changes. Topics treated are chemical thermodynamics, kinetics, surface and interface phenomena, nuclear chemistry, quantum chemistry, and spectroscopy. Emphasis is placed on problem solving in each of these areas.

G-405—**Instrumental Analysis.** Five hours. Spring.
Three hours lecture and two 3-hour laboratory periods per week.
Prerequisites: CHE 303 and 305.
A course in the theory and use of analytical techniques such as colorimetry, polarimetry, ultraviolet, visible and infrared spectrophotometry, gas chromatography, mass spectroscopy, nuclear magnetic resonance spectroscopy, etc.

G-406—**Qualitative Organic Analysis I.** Two hours. Winter.
One hour lecture and one 3-hour laboratory per week.
Prerequisite: CHE 303.
The systematic identification of pure organic chemicals.

G-407—**Qualitative Organic Analysis II.** Three hours. Spring.
One hour lecture and two 3-hour laboratories per week.
Prerequisite: CHE 406-G-406.
A study of the analysis of mixtures, with emphasis on chromatographic separation techniques and spectroscopic methods of analysis.

G-425—**Introduction to Biochemistry.** Five hours. Fall, Summer.
Three hours lectures and four hours laboratory per week.
Prerequisite: CHE 303.
Subjects discussed include proteins, enzymes, nucleic acids, biological oxidations and photosynthesis.

G-426—**Intermediary Metabolism.** Five hours. Winter, Summer.
Three hours lecture and four hours laboratory per week.
Prerequisite: G-425.
This course is designed to acquaint the student with the major metabolic cycles and pathways. Energy considerations and the interrelation of these pathways are included.

G-427—**Metabolic Control.** Five hours. As needed.
Three hours lecture and four hours laboratory per week.
Prerequisite: G-426.
The many systems of metabolic control are discussed. The role of hormones, vitamins and nucleic acids in control mechanisms are included along with a discussion of the circulatory system and the chemical basis of antibody diversity.

G-435—**Chemistry of the Atmosphere.** Four hours. As needed.
Three hours lecture and one 3-hour laboratory period per week.
Prerequisite: CHE 305.
A course relating natural atmospheric chemical conditions to the chemical changes wrought in the atmosphere by man's environmental pollution. Topics such as the natural radiocarbon cycle, atmospheric photochemistry, cosmic ray influences, weather patterns, combustion product pollutants, health hazards,

greenhouse effect, detection and measurement of atmospheric constituents, etc., will be examined.

G-445—**Industrial Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
A study of the more important chemical processes used in industry. Plant site visits and frequent lectures by representatives from the chemical industry will constitute an important part of this course.

G-461—**Applications of Nuclear Techniques.** Four hours. As needed.
Three hours lecture and one 3-hour laboratory per week.
Prerequisite: Permission of the instructor.
Nuclear techniques applied to the solution of biological, chemical environmental, geological, physical, health, and medical problems. Training consists of radioisotope handling, radiation detection, radiation shielding, nuclear design problems, tracer techniques, and radiological health monitoring. Numerous radiation sources are used and studied.

512—**Problems in Analytical Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An intensive study of analytical chemistry designed to bring a student who lacks an adequate preparation in this area, but who has a B.S. degree in some biological or physical science, to such a level of competency in analytical chemistry that he may with confidence enroll in higher-numbered graduate courses in analytical chemistry. (Credit for this course will not be counted toward the stated credit requirements for a graduate degree in chemistry.)

513—**Problems in Biochemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An intensive study of biochemistry designed to bring a student who lacks an adequate preparation in this area, but who has a B.S. degree in some biological or physical science, to such a level of competency in biochemistry that he may with confidence enroll in higher-numbered graduate courses in biochemistry. (Credit for this course will not be counted toward the stated credit requirements for a degree in chemistry.)

514—**Problems in Inorganic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An intensive study of inorganic chemistry designed to bring a student who lacks an adequate preparation in this area, but who has a B.S. degree in some

biological or physical science, to such a level of competency in inorganic chemistry that he may with confidence enroll in higher-numbered graduate courses in inorganic chemistry. (Credit for this course will not be counted toward the stated credit requirements for a graduate degree in chemistry.)

515—**Problems in Organic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An intensive study of organic chemistry designed to bring a student who lacks an adequate preparation in this area, but who has a B.S. degree in some biological or physical science, to such a level of competency in organic chemistry that he may with confidence enroll in higher-numbered graduate courses in organic chemistry. (Credit for this course will not be counted toward the stated credit requirements for a graduate degree in chemistry.)

516—**Problems in Physical Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An intensive study of physical chemistry designed to bring a student who lacks an adequate preparation in this area, but who has a B.S. degree in some biological or physical science, to such a level of competency in physical chemistry that he may with confidence enroll in higher-numbered graduate courses in physical chemistry. (Credit for this course will not be counted toward the stated credit requirements for a graduate degree in chemistry.)

521—**Advanced Analytical Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 405 or permission of instructor.
This course consists of sampling techniques, equilibria and activity, chemical and physical separations, and chemical methods of analysis.

525—**General Biochemistry I.** Four hours. Fall.
Four hours lecture per week.
Prerequisite: CHE 303.
An intensive study of modern biochemistry. Topics covered include the biochemistry of carbohydrates, lipids, proteins, nucleic acids, porphyrins and chlorophyll.

526—**General Biochemistry II.** Four hours. Winter.
Four hours lecture per week.
Prerequisite: CHE 525.
An introduction to the major metabolic pathways and cycles including metabolism of carbohydrates, lipids, amino acids, purines and pyrimidines, with emphasis on the interrelationships of these pathways.

527—**General Biochemistry III.** Four hours. Spring.
Three hours lecture and three hours laboratory per week.
Prerequisite: CHE 526.
The genetic aspects of metabolism and protein synthesis are discussed. Also included is a discussion of specialized tissue, body fluids, vitamins and hormones and their role in metabolic control.

530—**Advanced Biochemistry.** Four hours. Fall.
Four hours lecture per week.
Prerequisite: Permission of instructor.
Selected topics include mechanisms of drug actions; biological control mechanisms; the biosynthesis of proteins, nucleic acids, terpenes, and steroids; and structural elucidations of macro-molecules.

531—**Advanced Inorganic Chemistry.** Four hours. Winter.
Four hours lecture per week.
Prerequisite: Permission of instructor.
Selected topics include the examination of chemical and physical phenomena as related to bonding and their effects on stereochemistry, compounds with unusual covalent bonding schemes, inorganic polymers, modern acid-base concepts, chelates, rare earths and transition metals with emphasis given to the current literature.

536—**Introductory Structural Chemistry.** Four hours. Fall.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
A study of symmetry including group theory and point group designation, stereochemistry, and the origin of spectra.

537—**Spectral Ellucidation of Structure.** Four hours. Winter.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
Applications of spectra to structural determination. Topics include infrared, raman, and ultra violet spectroscopy, nuclear magnetic resonance spectrometry, mass spectrometry, optical rotatory dispersion, and circular dichroism.

538—**Introduction to Kinetics and Synthesis.** Four hours. Spring.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
An introduction to kinetics, synthesis (a general approach to both inorganic and organic), and separations.

540—**Advanced Chemical Analysis.** Four hours. Fall.
Four hours lecture per week.
Prerequisite: CHE 521.

Theory and applications of quantitative chemical methods for inorganic and organic analysis. Topics include nonaqueous acid-base theory, functional group analysis, reaction rates in analysis, complexometric methods and organic reagents for metals. Emphasis on recent advances.

541—**Advanced Organic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Successful completion of Organic Qualifying Examination or in special instances, permission of instructor.
A study of the structure of organic compounds and the relation to chemical bonding, stereochemistry, resonance concepts, and in general, the effects of structure on reactivity.

542—**Advanced Synthetic Organic Chemistry I.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 541.
An in-depth study of the synthesis of organic compounds emphasizing modern reagents and methods.

543—**Advanced Synthetic Organic Chemistry II.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 542.
An intensive study of reaction pathways that integrates stereochemistry, kinetics, and thermodynamics. Both ground-state and excited-state (photochemical) processes will be considered.

545—**Inorganic and Organic Preparations.** Two or four hours. As needed.
One hour lecture and six or twelve hours laboratory per week.
Prerequisite: Permission of instructor.
A course designed to familiarize the student with specialized synthetic techniques in both inorganic and organic chemistry which are not encountered at the undergraduate level. These include inert atmosphere, vacuum line and non-aqueous system work as well as large scale preparations.

561—**Advanced Physical Chemistry.** Four hours. As needed.
Four hours lecture per week.
A course designed to give the student working knowledge of physical chemistry and its applications. Topics discussed are: statistical mechanics and classical thermodynamics; kinetics and absolute rate theory; group theory and symmetry applied to spectroscopy problems; potential functions; quantum mechanics and spectroscopy; introductory nuclear chemistry.

594—**Seminar.** One hour each quarter. Fall, Winter, Spring.
One hour per week.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.
Prerequisite: Consultation with and permission of major professor.

621—**Analytical Spectroscopy.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 405.
Quantitative determinations by atomic and molecular spectroscopy. Topics include atomic emission, atomic absorption, molecular absorption in IR, visible, and UV regions as well as fluorescence, phosphorescence, and x-ray techniques.

632—**Coordination Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 533 or permission of instructor.
A study of molecular orbital and ligand field treatments of various complexes. Emphasis on electronic vibronic transitions.

635—**Element of Defraction.** Four hours. As needed.
Three hours lecture and three hours laboratory per week.
This course will consist of a treatment of scattering by x-rays, by neutrons, and by fast electrons from solids, liquids, and gases. Emphasis will be placed upon the current literature as well as classical techniques and analyses.

641—**Physical Organic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 543.
Selected topics including application of quantum mechanics to organic chemistry, use of kinetic and product studies to determine mechanisms, and use of cryoscopy, isotopes, etc., in the elucidation of structure and mechanism in organic chemistry.

642—**Mechanisms of Organic Reactions.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 543.
Principles and applications of organic chemistry relative to structure of molecules and the mechanism of organic reactions. Much emphasis is placed on newer developments as reported in the chemical literature. Stereochemistry, kinetics, and thermodynamics are topics of special interest.

643—**Advanced Chemical Instrumentation.** Two hours. As needed.
Two hours lecture per week.
Prerequisite: Permission of instructor.
Principles and characteristics of electrical instruments used in chemical research. Basic electronics, integrated instruments, chemical and physical problems encountered in automatic measurement and control.

644—**Analytical Separations.** Two hours. As needed.
Two hours lecture per week.
Prerequisite: CHE 521
Topics include gas, ion exchange, and thin-layer chromatography; precipitation and crystallization; zone refining; sublimation diffusion; and electromigration.

645—**Polymer Chemistry I.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 543 and permission of instructor.
A study of selected polymer systems, polymerization mechanisms, structure-property relationships and methods of evaluation.

646—**Polymer Chemistry II.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 645.
A study of selected polymer systems, polymerization mechanisms, structure-property relationships and methods of evaluation.

651—**Enzymes.** Four hours. As needed.
Four hours lecture per week.
Prerequiste: CHE 427 or CHE 527.
Mechanisms of enzymatic action, enzyme kinetics, regulation of enzyme action and synthesis of enzymes.

652—**Physical Biochemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 427 or CHE 527.
Application of physical-chemical methods to the study of biological macromolecules.

653—**Proteins.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 530 or permission of instructor.
Topics discussed include the purification of proteins, the determination of amino acid sequences, the determination of protein confirmation, and the relationship between structure and biological activity.

662—**Special Topics in Statistical Thermodynamics.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 551 or permission of instructor.
Statistical mechanical theory and techniques are applied to calculations of thermodynamics properties. Topics may include theory of liquids, real gas behavior, application to polymer systems, etc.

665—**Structural Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 563.
This course will consist of a theoretical treatment of structural determinations and will encompass the following: symmetry, wave mechanics, rotation, nuclear magnetic resonance, molecular vibrations, anisotropic polarization, crystal structure analysis, electron diffraction.

673—**Chemistry of the Representative Elements.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 531.
A survey of the physical and chemical properties as well as synthesis and reactivities of compounds of the Group s, Group p, Lanthanide, and Actinide elements. Particular emphasis will be placed upon the current literature.

674—**Physical Methods in Inorganic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 531.
A theoretical approach to the chemical bonding and structural analysis of inorganic complexes and compounds. Emphasis will be directed towards Raman and far infrared spectral analysis, electron spin resonance analysis, Mossbauer spectral analysis, and magnetic susceptibility analysis as each applies to the determination of structure and bonding.

683—**Introduction to Quantum Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 510 or permission of instructor.
Development of quantum theory relating to energy levels and bonding in chemical systems.

690—**Chemical Literature.** Four hours.
Four hours lecture per week.
Prerequisite: Permission of the instructor.
In this course, the student learns in detail how to search the literature for information related to his research. The major part of the course is concerned with information retrieval methods but discussions of general library procedures are included.

731—**Organometallic Compounds.** Four hours. As needed.
Four hours lecture per week.
Prerequisites: CHE 553 and CHE 543 or permission of instructor.
The chemistry of compounds containing carbon-metal and carbon-metalloid bonds. The preparation, structure, physical properties and chemical reactions of organometallic derivatives will be stressed along with topics of current interest in the chemical literature.

732—**Nuclear Chemistry.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: Permission of instructor.
This course consists of a study of the interactions of radiation with matter, the nature of radioactivity, radioactive decay, radiation detection, nuclear reactions, nuclear models, tracers in chemical applications, nuclear spectroscopy, nuclear processes as chemical probes, and safety in handling radioactive materials. The laboratory is devoted to radiation detection using gieger, proportional, scintillation, surface barrier, and multichannel analyzer techniques and chemical problems utilizing these detection devices. A laboratory project involving the use of radioactive tracers in chemical synthesis is required.

734—**Radiation Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisites: CHE 563 and permission of the instructor.
A study of the interaction of radiation with matter. Radiation sources, radiation dosimetry, ions and excited molecules, ion-molecule reactions, free radicals, radiation-induced polymerization, radiation interactions in gaseous, liquid, and solid systems, and the application of radiation to chemical processing.

743—**A Survey of Heterocyclic Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 543.
Nomenclature, synthesis, and reactions of the more common heterocylic systems are presented with the purpose of teaching fundamental facts that can be applied to the study of more complex heterocyclic systems.

745—**Biosynthetic Pathways.** Four hours. As needed.
Prerequisite: Permission of instructor.
Four hours lecture per week.
A course designed to acquaint the student with metabolic pathways in detail. Subjects discussed are biosynthesis of terpenes, sterols and steroid hormones.

753—**Nucleic Acid and Protein Synthesis.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 530 or permission of instructor.

An intensive study of protein and nucleic acid biosynthesis, with emphasis on biological control mechanisms.

761—**Special Topics in Quantum Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: CHE 501 or permission of instructor.
This course develops some topic of current interest in quantum chemistry, such as magnetic resonance, electron spectroscopy, etc.

762—**Chemical Kinetics.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of instructor.
A study of the experimental techniques of measuring chemical reaction rates and the mathematical treatment of rate data. Topics include reaction order; molecularity; modern rate theories; ionic, free radical and complex reaction mechanisms; homogeneous, heterogeneous and enzyme catalysis; and the study of very fast reactions.

763—**Analytical Electrochemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of instructor.
The theory of thermodynamics of electrochemistry, theoretical derivations of electrochemical techniques and applications thereof will be presented.

783—**Surface Chemistry.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: Permission of instructor.
A study of the properties of surface such as calalysis, adsorption, ion exchange and electrical phenomena, etc.

791—**Research in Chemistry.** Credit arranged.
Prerequisite: Approval of major instructor.

794—**Seminar.** One hour each quarter. Fall, Winter, Spring.
One hour per week.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

CHILD DEVELOPMENT (CD – 805)

G-420–**Administration of Preschool Program.** Four hours. Spring.
A course in the organizational structure and management of various preschool programs.

G-440–**Infant Development.** Four hours. Spring.
A course for students and parents concerned with the infant. Particular emphasis will be placed on acquiring understanding of infant development. Readings, class discussions, and field trips into home and group situations will apply theory to practice.

G-482–**Child Development Methods and Materials.** Four hours. Winter.
A study of the role of play in the development of young children with emphasis on selection, care, and use of equipment. Opportunities are provided to evaluate and select materials for use, to develop teaching techniques, and to plan play activities for children.

G-484–**Supervised Participation.** Six hours. Quarterly.
Prerequisite: CD 420
Directed participation as an assistant in the Child Development Laboratories for one quarter. Hours arranged.

G-485–**Participation Experiences in the Infant Development Center.** Four hours. Quarterly.
Directed participation and responsibility for the guidance of the infants and toddlers in the Infant Development Center. Administration and parent education experiences arranged. Opportunity for study of community agencies concerned with the development and care of infants and toddlers.

G-486–**Creative Materials and Activities for the Preschool Child.** Four hours. Fall.
A study of creative activities (literature, art, music, nature study, etc.) for preschool children and practical experiences with these in the Child Development Laboratories.

520–**Advanced Child Development.** Four hours. Alternate summers.
A study of the development of the individual from birth through the preschool years investigated in the light of personality development theories and current research.

592–**Special Problems in Child Development.** Two to six hours.

594–**Seminar in Child Development.** Two to six hours. As needed.

596—**Research in Child Development.** Two to six hours. As needed.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

CLOTHING AND TEXTILES (C&T – 810)

G-420—**Tailoring.** Four hours. Winter, Summer.
Principles and techniques of tailoring applied to a suit or coat; attention given to suitability of pattern and fabric to individual, pattern and fabric to each other, cost, garment fitting, creative design details, and appropriate accessories; application of learnings to selection and evaluation of ready-made tailored garments.

G-452—**Textile Testing.** Four hours. Spring.
Prerequisite: C&T 312 or 360.
Testing apparel and household textile fabrics by standard ASTM and AATCC methods; interpreting and evaluating test results; application of data to better consumer understanding and practices.

G-456—**Textile Economics.** Two hours. Fall.
Prerequistie: C&T 312 or C&T 360 or the equivalent.
A study of problems which affect the consumer in the production, distribution, and consumption of textiles and clothing items.

G-460—**Apparel Design.** Four hours. Winter.
Prerequisite: C&T 304, 312, or 360.
Development of original designs for apparel items and survey of how the fashion world operates.

550—**Demonstration Techniques and Preparation of Teaching Materials in Clothing and Textiles.** Four hours. As needed.
Prerequisite: Minimum of 12 credit hours of clothing and 4 credit hours of textiles.

555—**Speed Techniques and Coordinated Pattern Manipulation in Clothing Construction.** Four hours. Summer.
Prerequisite: 12 hours undergraduate work in clothing.

560—**Apparel Designing Through Draping.** Four hours. Spring.
Creative dress design through draping principles and procedures; study of leading designers, their techniques, and places in the market.

565—**Flat Pattern Design.** Four hours. Winter.
Creative dress design through the principles and application of flat pattern techniques; emphasis on solving figure problems; study of manufacturing process of commercial patterns; setting sizing standards.

570—**Textiles: Recent Developments.** Two hours. Fall.
Prerequisite: C&T 312 or 360 or equivalent.

592—**Special Problems in Clothing and Textiles.** Two to six hours.

596—**Research in Textiles and Clothing.** Two to six hours. As needed.

COMMUNICATION (COM – 208)

G-430—**Business and Industrial Communication.** Four hours. Fall.

G-447—**Theories of Mass Communication.** Four hours. Winter, alternate years.

G-451—**Source Credibility and Public Image.** Four hours. Winter, alternate years.

530—**Problems in Business and Industrial Communication.** Four hours. Winter, alternate years.

544—**Modern Theories of Meaning.** Four hours. Summer.

545—**Process and Effects of Communication.** Four hours. Fall.

568—**Social Dissemination of Information and Innovation.** Four hours. Spring.

570—**Communication Seminar.** Four hours. May be repeated once. Winter, Summer.

591—**Research in Communication.** One to twelve hours.

592—**Special Problems.** Four hours.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis in Public Address or Communication.** Ten hours.

600--**Introduction to Graduate Research in Communication.** Four hours. Fall.

610—**Content Analysis of Communication.** Four hours. Winter.

620—**Design and Administration of Communication Field Studies.** Four hours. Spring.

623—**Communication Models.** Four hours. Spring.

627—**Comparative International Communication Systems.** Four hours. Summer, alternate years.

710—**Technological Developments in Mass Communication.** Four hours. Summer, alternate years.

712—**Seminar in Mass Media Control and Ethics.** Four hours. Fall, alternate years.

791—**Research in Communication.** One to twelve hours.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Non-credit.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and counseling with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

COMPARATIVE LITERATURE (CLT – 230)

501—**Introduction to Comparative Literature.** Four hours. Fall.

550—**Comparatist History of World Literature.** Four hours. May be repeated for a total of sixteen hours credit when topics vary. Winter.

560—**Principles of Comparatist Interpretation.** Four hours. May be repeated for a total of sixteen hours when topics vary. Spring.

592—**Special Problems.** Two to six hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

791—**Research in Comparative Literature.** One to twelve hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library and other University facilities must enroll in this course.

798—**Dissertation.**

COMPUTER SCIENCE AND STATISTICS (CSS — 330)

G-403—**Introduction to Analog Computers.** Four hours. Winter, Summer.
Prerequisite: MAT 378.
Design and testing of basic analog circuits.

G-404—**Advanced Analog and Hybrid Systems.** Four hours. As needed.
Prerequisite: CSS G-403.
Use of the analog computer to solve engineering problems.

G-412—**Educational Statistics.** Four hours. Winter, Summer.
Prerequisite: Permission of instructor.
Elementary probability, conditional probability, Binomial experiments, curve fitting, least squares techniques, correlation and regression models.

G-415—**Methods of Mathematical Statistics I.** Four hours. Winter, Spring.
Prerequisite: MAT 276 or permission of instructor.
Continuous and discrete distributions, moments of distributions, point and interval estimation, hypothesis testing, power of tests, analysis of variance (one-way classification, orthogonal contrasts), two-way classification analysis of variance, fixed, random and mixed methods.

G-416—**Methods of Mathematical Statistics II.** Four hours. Spring, Summer.
Prerequisite: CSS G-415.
Orthogonal polynomial contrasts, multi-way classification, simple linear regression, multiple linear regression, polynomial regression, Designs (simple randomized blocks, nested factorials), intra-class correlation, quality control.

G-425—**Experimental Design.** Four hours. Summer.
Prerequisite: CSS G-416.
Factorials, randomized blocks, Latin Squares and split-plot, fractional factorials and confounding, response surface models.

G-427—**Sampling Methods.** Four hours. As needed.
Prerequisite: CSS G-416.
The planning, execution and evaluation of sample surveys. Simple random sampling, stratified random sampling, cluster sampling.

G-474—**Boolean Algebra and Switching Circuits.** Four hours. Fall, Spring.
Prerequisite: Permission of instructor.
Symbolic logic and Boolean algebra for descriptions and analysis of switching circuits, basic sequential circuits, digital systems design principles.

G-475—**Computer Design.** Four hours. Winter, Summer.
Prerequisite: CSS G-474.
A study of control units, arithmetic units, memories and microprogramming concepts.

535—**Probability Theory.** Four hours. Fall.
Prerequisite: MAT 379.
Basic concepts in probability, properties of continuous and discrete distribution, characteristic functions, laws of convergence, transformations.

536—**Statistical Inference.** Four hours. Winter.
Prerequisite: CSS 535.
Properties of estimators, Bernoulli and Poisson processes, Cramer-Rao lower bound, power of tests.

537—**Least Squares Techniques.** Four hours. Spring.
Prerequisite: CSS 536.
Regression Analysis, Doolittle method, curvilinear regression, experimental design models.

ECONOMICS (ECO – 610)

G-400—**Public Finance.** Four hours. Fall.

Prerequisite: ECO 255-256.
A study of federal and state spending and fund raising policies within the context of the social goals to be accomplished by such policies.

G-420—**Economics of Public Utilities.** Four hours. Winter.
Prerequisite: ECO 255-256.
A study of the development, institutional bases, structure, and regulation of public utilities.

G-430—**Economics of Urban Areas.** Four hours. Winter.
Prerequisite: ECO 255-256 or consent of instructor.
A study of the economic problems of urban areas, with special reference to the problem of urban land utilization and the spending and fund-raising problems of municipal governments.

G-435—**International Trade Theory.** Four hours. Fall.
Prerequisite: ECO 255-256.
A study of the historical development of international trade theory, the importance of international trade, the mechanism of international payments and modern theories dealing with the subject.

G-436—**International Economic Relations.** Four hours. Winter.
Prerequisite: ECO 435 or consent of the instructor.
A study of the problems and policies arising out of international economic relations and practices.

F-440—**Economic Development.** Four hours. Spring.
Prerequisite: ECO 255-256.
A study of the nature, causes, and effects of regional and national economic development.

G-460—**Fiscal Theory.** Four hours. Summer.
Prerequisite: ECO 345.
A study of the theoretical bases for governmental fiscal operations.

G-470—**Comparative Economic Systems.** Four hours. Fall.
Prerequisite: ECO 255-256.
A course designed to acquaint the student with the origins, development, and characteristics of fascism, socialism, communism, and capitalism.

500—**Microeconomic Theory.** Four hours. Fall.
Prerequisite: ECO 340.
An advanced study of the theory of price.

505—**Macroeconomic Theory.** Four hours. Winter.

Prerequisite: ECO 345.
An advanced study of the theories of income and employment, general equilibrium, and growth.

510—**Monetary Theory.** Four hours. Spring.
Prerequisite: ECO 330.
An advanced study of the determination of the level of prices and of alternative monetary and fiscal policies in the light of social goals.

515—**Managerial Economics.** Four hours. Fall, Winter, Summer.
An advanced study involving theory and actual cases in the application of economic analysis to the solution of business problems.

520—**Statistics for Quantitative Analysis.** Four hours. Winter.
Prerequisites: ECO 301 and 302, or equivalent.
The application of statistical procedure to business problems.

530—**History of Economic Thought I.** Four hours. Spring.
A study of the development of economic theories from Aristotle through the critics of the classical tradition.

531—**History of Economic Thought II.** Four hours. Fall.
A study of economic doctrines from the marginal revolution to Keynes. (Non-economic majors are advised to take Economics 531 rather than 530.)

550—**Problems in Political Economy.** Four hours. Alternate years.
Prerequisite: Consent of the instructor.

565—**Advanced Labor Economics.** Four hours. Alternate years.
Prerequisite: ECO 365 or consent of instructor.
An advanced study of wage and employment theory, unionism, and current labor force problems.

592—**Special Problems.** Four hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Eight hours.

EDUCATIONAL ADMINISTRATION (AED – 130)

513–**Organization and Administration of the Junior High School.** Four hours. Winter.

The philosophy, functions, and curriculum and their implementation in the organization and administration of the junior high school program.

516–**Secondary School Administration.** Four hours. Fall, Spring, Summer.

The practical problems encountered by high school principals: scheduling, calendar, attendance, discipline, office management, records and reports, activities, selection and supervision of staff; the principal's professional growth, and his relationship to the school, teachers, and patrons.

517–**Administration of Audio-Visual Communications Programs.** Four hours. Spring, Summer.

Prerequisite: Basic courses in the field or by permission.

Considers problems in management of an intergrated program, including production, selection, utilization, and administration of communications media; problems of finance; functions and organization of different services; relationship among school systems, college, and community groups; and evaluation standards for various services.

518–**The Elementary School Principal.** Four hours. Fall, Spring, Summer.

A study emphasizing the administrative problems faced by the principal. Considers practices in administration, supervision, school plant, supplies and equipment, attendance, curriculum, personnel, and parent-teacher cooperation. Stresses the professional leadership of the principal.

520–**Basic Course in Educational Administration.** Four hours. Quarterly.

A basic course designed for teachers and prospective school administrators. This course emphasizes school organization, business management, personnel, public relations, school policies, board policies, leadership, school construction, school plant maintenance, transportation, special services, and evaluation.

526–**Supervision of Instruction.** Four hours. Quarterly.

A practical course in supervision from the standpoint of the elementary, junior high, or high school principal and supervisor of instruction. Deals with principles and procedures of supervision.

540–**Organization and Administration of Adult Education.** Four hours. Winter.

The design and administration of educational programs for adults will be studied. Emphasis will be given to the following: establishing objectives, evaluating needs, implementing programs, selecting course and instructional resources, financing and administering programs.

542—**Supervision and Curriculum in Reading.** Four hours. Winter, Summer.

A study of organizational patterns in reading curricula and methods of improvement in reading instruction in schools from the point of view of the reading supervisor or consultant and the school administrator.

550—**School Business Management.** Four hours. Winter, Summer.

A practical course in the over-all aspects of present day school business administration. The relationships of the educational program to the various business functions of a school district will be covered as well as the adaptation of current school financial accounting on a state and national basis for a local school system.

555—**Problems of the County Superintendent.** Four hours. Winter.

A course designed for county superintendents in which they study their problems under the direction of a graduate professor.

592—**Special Problems I, II, III.** One to three hours.

A problem study to develop knowledge and facility in a field of interest for the student which requires preparation of a scholarly paper under the supervision of a graduate professor. This registration must be approved by the departmental chairman upon the recommendation of the student's major professor.

594—**Field Problems in Production I and II.** Four hours each. Quarterly.

Opportunity to study local school problems of curriculum revision, course of study construction, evaluation of methods, building projects, community surveys, testing programs, and record systems under careful supervision of a graduate professor.

The project must be approved by the departmental chairman upon the recommendation of the student's major professor.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

611—**Advanced Curriculum Development.** Four hours. Fall, Spring.

This course is designed for the school administrator who has or will have responsibility for curriculum development in a school system. Areas covered are: modern elementary, junior high school, and senior high school curricula; the scope and sequence of curriculum patterns for a school system; correlation of elementary, junior high, and senior high curriculum and courses of study;

in-service education of the instructional staff; and the utilization of community in curriculum development.

636—**Practicum in Educational Administration.** Four hours. Fall, Spring.
A study emphasizing problems connected with modern educational administration. Contemporary theories are related to the problems of administering the public school from the standpoint of the superintendent and the central office staff.

638—**Practicum in Supervision.** Four hours. Winter, Summer.
This advanced course in supervision deals mainly with supervsiory services provided from the central administrative office of the school district. A seminar approach is utilized in coordinating such services and individual problem solutions.

668—**Public School Finance.** Four hours. Winter, Summer.
Principles of taxation; local, state, and federal financing of public education; equalization of educational opportunity, budget making.

680—**Continuing Education and Community Service.** Four hours. Summer.
The course will deal with the role and scope of continuing education and community service in higher education, including the community college.

681—**The Organization and Administration of Occupational Education in the Community College.** Four hours. Spring.
The history of occupational education in the community college, coordination with industry and other levels of education, organization, administration, supervision, and evaluation will be stressed.

691—**Research in Educational Administration, Supervision, and Curriculum.** One to twelve hours.

692—**Special Problems.** Four hours.

697—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a research problem and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

698—**Research Problem.** Four hours.
Selection of practical educational problems for solution by candidates for Education Specialist Certificate, using research and professional knowledge. A scholarly report is required.

700—**Advanced School Administration and Supervision.** Four hours. Fall, Spring.

This course deals with the theory and concepts underlying present day school administration and supervision.

704—**School Community Relations.** Four hours. Fall, Spring.

A study of public relations problems including reporting to parents and acquainting the community with the purposes, methods, accomplishments, and needs of the school.

706—**Administration of School Buildings and Grounds.** Four hours. Winter, Summer.

Designed for the local superintendent, treating the problem of housing, such as surveys, architect, finance, site, plans and specification, equipment, awarding contract, construction procedures, accepting, building and care of grounds.

708—**Administration of School Personnel.** Four hours. Fall, Spring.

A course stressing the administrative relationships involved in developing satisfactory personnel policies, techniques, and regulations dealing with the pupil, the staff, and the public. The general principles of personnel management as they affect the pupil and staff, instructional and noninstructional, will be covered.

710—**School Law.** Four hours. Winter, Summer.

Legal aspects of such factors as school income, injury to pupils; keeping the school census, enforcing attendance, teaching certain subjects, and related matter.

711—**Higher Education in the United States.** Four hours. Winter, Summer.

This course provides an overview of the development, scope, philosophy, objectives, and recent innovations in colleges and universities.

712—**The Junior College.** Four hours. Fall.

This course treats the development, functions, programs, philosophy, issues, and research related to the junior college.

713—**Curricula in Higher Education.** Four hours. Fall.

This course is concerned with curricula offered in the junior and senior college with particular attention to problems and issues in general education, technical education, professional education, and graduate education. Innovation and research in instruction will also be considered.

714—**Organization and Administration of Higher Education.** Four hours. Winter.

This course is designed to: examine typical organizational patterns of colleges

and universities; develop an understanding of the basic functions of governing and coordinating boards and of officials involved in college and university administration; and develop an understanding of principal problems faced in the administration of institutions of higher learning.

715—**Administration and Supervision of College Teachers.** Four hours. Summer.

This course stresses the processes and techniques of administration and supervision of college teaching. Topics covered include the roles of faculty and administration, the instructional budget, faculty selection, orientation, tenure, responsibilities of teachers.

716—**Seminar in Problems of Higher Education.** Four hours. Spring.

Discussion of problems and topics in higher education to be determined by the students and the instructor. Qualified resource people will be utilized as needed.

790—**Administrative Workshop I, II, III, IV, and V.** One and one-half hours per week. (Course may be repeated, with only nine hours counting toward a degree.) Summer.

791—**Research in Educational Administration, Supervision, and Curriculum.** One to twelve hours.

Prerequisite: Approval of the major professor.

794—**Field Problems in Administration I, II, III.** One hour each. As needed.

A project dealing with a specific problem in school administration. An on-the-job training program with the work being done under the supervision of a graduate professor. This registration must be approved by the departmental chairman upon the recommendation of the student's major professor.

797—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

EDUCATIONAL FOUNDATION (CIF – 125)

G-490—**Classroom Use of Instructional Television.** Four hours. Winter, Summer.

Workshop in the utilization of Mississippi's state program of instructional

television for elementary teachers, media directors, curriculum supervisors, and administrators. Provides a comprehensive experience in the planning, organization, presentation, and use of instructional television.

504—**Foundations in American Education.** Four hours. Quarterly.
A survey of the philosophies, psychologies, and history of American education intended to give the student a fundamental understanding of more specialized courses in these fields. Required of all graduate students.

507—**Basic Course in Curriculum Development.** Four hours. Quarterly.
A study of social and psychological factors influencing curricular planning, principles and procedures for validating educational objectives, selecting and structuring experiences, initiating and directing curricular change, and evaluating results of curricular planning.

509—**Social Foundations of Education.** Four hours. Summer.
A study of contrasting motivations and values of various cultural groups and their implications for education. Particular emphasis is given to the economically and culturally disadvantaged.

519—**Utilization, Selection, and Preparation of Audiovisual Materials.** Four hours. Winter, Spring, Summer.
General principles, problems, and practices involved in selecting, utilizing, and preparing of audiovisual materials for instructional purposes. Emphasis on the advantages, limitations, and practical uses of each major type of materials.

532—**Measuring Results in Education.** Four hours. Fall, Spring, Summer.
A course designed to equip the teacher for effective selection and construction of tests for measuring specific achievement of teaching objectives and for statistical interpretation of data. Stresses use of teacher-made tests.

535—**Advanced Production Techniques.** Four hours. Fall.
Deals with the communications skills ivolving the production of basic types of audiovisual materials. Theory and practices are covered relative to planning, shooting, and editing picture stories.

540—**Programmed Instruction.** Four hours. Fall, Summer.
Prerequisite: CIF 519.
Theories and techniques of programmed learning applied to the design, production, and evaluation of instructional materials. Students will prepare and field test programmed materials and survey research studies.

541—**Instructional Graphics.** Four hours. Winter.
Develops systems of production for a wide variety of visual materials. Laboratory practice is provided in each skill needed for programs of local

production in media centers of public schools. Relates principles of perception to the dynamics of visual media such as transparencies, slides, photos, maps, charts, posters, and bulletin boards. Lettering, mounting, and laminating techniques are practiced.

542—**Research in Instructional Systems Technology.** Four hours. Quarterly. Prerequisites: RED 501, CIF 532, or RED 502.

Problems in the formulation of educational objectives, audiences and their characteristics, integrated use of communications media, and evaluation of educational outcomes. Research methods applied to audiovisual communications.

543—**Educational Television Production.** Four hours. Spring.

Prerequisite: CIF 416 or 519.

A course designed for media specialists to provide them with the knowledge and skills to supervise and to produce instructional television programs for use in schools and colleges, government, churches, the military, and industry.

560—**Economic Education for Teachers.** Four hours. Summer.

A course designed to assist teachers in obtaining a deeper knowledge and understanding of our economic system. Emphasis will be placed on the attainment of economic concepts and the correlation of these concepts into the social studies curriculum.

580—**Direction and Supervision of Student Teaching.** Four hours. Summer.

A study of general techniques of a supervising teacher, including observation, guiding student teachers in planning, orientation of student teachers, student teacher participation and evaluation.

716—**History of Public Education in the United States.** Four hours. Fall, Spring.

A critical survey of the development of public education with emphasis on the social, political, religious, and economic forces that have influenced this development.

718—**Comparative Philosophies of Education.** Four hours. Winter, Summer.

A critical examination of philosophies and theoretical concepts of leading modern philosophies and their significance for education.

EDUCATIONAL PSYCHOLOGY (EPY – 180)

G-440—**Learning in Adult Education.** Four hours. Quarterly.

A study of learning in adulthood, and related to a range of educational programs.

503—**Learning and Motivation I.** Four hours. Winter.

Consideration of the basic concepts, problems, and research methodology in the studying of learning and motivation.

510—**Advanced Educational Psychology.** Four hours. Fall, Spring, Summer.

Designed primarily for the graduate student wishing to broaden his knowledge in the field of psychology of learning. Careful study of research and experimentation dealing with individual and group learning.

512—**Learning and Instruction in Higher Education.** Four hours. Winter, Summer.

A study of the application of learning principles and instructional techniques in higher education.

516—**Social Processes in Classroom Learning.** Four hours. Winter, Summer.

Pupil-teacher interaction; leadership in directing classroom activities, especially in instructing, developing goals, changing attitudes, resolving conflicts, and enhancing the individual's sense of worth.

520—**Intelligence: Theories and Development.** Four hours. Winter.

Nature of intelligence, and its development; critical evaluation of methods of measurement; relation of intelligence to social efficiency.

530—**Case Studies in School Psychology Problems.** Two hours. As needed.

A course designed to present the student with studies of clinical, school, and other psychological problems encountered by the school psychologist. Critical evaluation of the process and practice of writing and presenting case material.

540—**Interpretation of Psychological Tests for Exceptional Children.** Four hours. As needed.

Prerequisite: Permission of the instructor.

A study of the various psychological tests used in the appraisal and evaluation of exceptional children.

542—**Psychology of the Gifted Child.** Four hours. As needed.

Prerequisite: Permission of the instructor.

Study of the characteristics and needs of gifted children and the various means employed by the schools to provide for these children.

574—**Advanced Child Psychology.** Four hours. Winter, Summer.

A course dealing with the mental, motor, social, and emotional development of children of elementary school age. Stresses the application of developmental psychology to education and guidance. Considers child growth as progressive development.

575—**Advanced Adolescent Psychology.** Four hours. Fall, Spring.
An advanced study of the adolescent and his needs in the home, school, and community. Includes a survey of the research studies and literature on the period of adolescence, and individual group reports.

580—**Leadership.** Four hours. As needed.
Prerequisite: Permission of the instructor.
Study of the factors affecting leadership in a school or industrial setting; emphasis is placed on status and esteem as factors.

591—**Research in Educational Psychology.** One to twelve hours.

593—**Seminar in Psychological Services in Schools I, II, III.** Two hours each. Fall, Winter, Spring.
Advanced general psychology with special empahsis on relationships of each topic to the areas of school psychology, educational of the handicapped, etc.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

603—**Learning and Motivation II.** Four hours. Spring.
An intensive study of the role of contemporary theories of learning and motivation in current research.

610—**Group Dynamics.** Four hours. Summer.
Prerequisite: EPY 580 or permission of instructor.
A study of theory and practice in group development and group dynamics.

622—**Community Mental Health.** Four hours. Summer.
Prerequisite: Permission of the instructor.
Concepts and techniques of mental health consultation with emphasis on the psychologist's role in the field of mental health.

645—**Psychology of Mental Retardation.** Four hours. Fall.
Prerequisite: Permission of the instructor.
Study of personality development, problems of adjustment, and abnormal behavior of the mentally retarded. Consideration of psychological and medical treatment of the emotionally disturbed, mentally retarded individual.

670—**Seminar in Teaching of Psychology.** Two hours. As needed.
An anlysis of the psycho-educational problems involved in the undergraduate and graduate teaching of psychology.

680—**Practicum in Teaching Psychology.** Four hours. As needed.
Supervised teaching of courses in psychology.

685—**Brain Damage and Behavior.** Four hours. As needed.
Prerequisite: Permission of the instructor.
The numerous causes of brain injury are studied and their effects on the mental and physical behavior of man are considered.

690—**Advanced Social Psychology.** Four hours. As needed.
A study of theory, research, and practice related to group processes and their interaction with individual behavior.

696—**Practicum in School Psychology.** Four hours. As needed.
Provides an opportunity to perform the duties of the school psychologist under supervision. Group and individual testing, contact with school personnel, individual counseling, and community relations will be stressed.

791—**Research in Educational Psychology.** One to twelve hours.
Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

EDUCATIONAL RESEARCH (RED – 135)

501—**Research: Its Introduction and Methodology.** Four hours. Quarterly.
Methods of scientific inquiry, selection of a research topic, principles of reporting research, and functional statistical concepts.

502—**Introduction to Educational Statistics.** Four hours. Quarterly.
Basic concepts and computations in description statistics. Introduction to sampling procedures and inferential processes in educational research.

552—**Educational Research: Correlational Statistical Methods.** Four hours. Quarterly.

Prerequisite: RED 502 or permission of instructor.

A brief review of elementary statistics and normal curve functions. Correlation theory and application to educational data. Concepts and computations associated with bivariate, partial, and multiple correlation.

553—**Educational Research: Significance Tests and Statistical Methods for Experimental Design.** Four hours. Quarterly.

Prerequisite: RED 552

Probability theory and theoretical distributions in experimental design: binomial, normal curve, t ratio, chi square, and F ratio. Concepts and computations associated with the use of these distributions in making probability decisions in research, including t tests, simple analysis of variance, and complex analysis of variance through 3-way design.

612—**Computer Applications in Educational Research.** Four hours. Fall, Summer.

Prerequisites: RED 552, 553 (Recommended).

Skills development course in the computer analysis of behavioral science data and orientation toward the systems approach, communication procedures, and computer utilization in financial, pupil, and personnel accounting procedures. Practical applications will be emphasized.

618—**Practicum in Educational Research: Writing and Dissemination.** Four hours. Fall

Prerequisites: RED 552, 553. (Recommended)

Overview of types of current research related to education, primarily in student's major field. Experience in application of appropriate research models, writing behavioral objectives, structure of research reports, critique of published research problems, presentation and analysis of student's proposed research problem.

620—**Measurement in Educational Research.** Four hours. Winter.

Prerequisites: RED 552, 553.

A survey of the theory of measurement including true score theory, reliability, validity, theoretical and applied item analysis and item selection techniques. Examination of measuring instruments applicable to research in the educational setting.

624—**Research Design in Educational Research.** Four hours. Spring.

Prerequisites: RED 552, 553.

Study of experimental and quasi-experimental designs in educational research and appropriate statistical treatment and interpretation. Emphasis upon sources of invalidity and utilization of design principle and statistical controls in

educational research applications.

630—**Multivariate Analysis in Educational Research.** Four hours. Summer and by arrangement.

Prerequisites: RED 552, 553.

Theory and application of multiple regression analysis, multiple and connical correlation, multiple discriminant analysis, factor analysis, and advanced Anova techniques to data in educational research. Emphasis upon principles of application and interpretation.

691—**Field Problems in Educational Research.** One to twelve hours.

Prerequisite: Approval of major professor and Educational Research Staff.

694—**special Problems in Educational Research I, II, III.** One hour each. By arrangement.

Prerequisite: Approval of major professor and Educational Research Staff.

A problem study involving specific research procedures applicable to development of skills in different types of research within a field of interest. The preparation of a scholarly paper is required.

698—**Research Problem.** Four hours. Quarterly by arrangement.

Selection and development of a practical educational research problem for the educational specialist certificate. A scholarly research paper is required.

796—**Advanced Educational Research.** Four hours. Quarterly.

A seminar in problems related to philosophy of scientific method as applied to educational research, types of educational research, methods of observation and data collection, methods of quantifying a research data base, and methods of design, measurement, analysis, interpretation, and reporting of educational research.

ELEMENTARY EDUCATION (CIE – 115)

G-403—**Kindergarten-Primary Education.** Four hours. Quarterly.

A study of the contributions which group living makes to the mental and physical health of young children, with emphasis upon child development research in curricular experience and records. Designed to help teacher and parents understand the readiness program. Laboratory is included.

G-412—**Diagnosis and Remediation of Reading Disability for the Classroom Teacher.** Four hours. Quarterly.

This course deals with the need for corrective and remedial reading in the school; nature and causes of reading disability; procedure in making a classroom diagnosis, including interpretation of results; remedial treatment of reading difficulties to include techniques and materials; and some opportunity for testing and remedial teaching in the public schools.

G-490—**Workshop in Aviation Education.** Four hours. Summer.

A course designed to familiarize teachers, principals, and superintendents with developments and trends in aviation and aerospace exploration and with the implications of those developments on our social, economic, and political life. May be taken twice for a total of credit eight (8) hours.

G-491—**The Reading Conference.** One hour. Summer

An intensive program for three days during the Summer Quarter consisting of lectures, group discussions, and demonstration lessons.

505—**Modern Concepts in Reading Skill Development.** Four hours. Summer.

This course makes an intensive study of the skills required in reading, up-to-date methods and materials required to teach these skills, and classroom techniques for evaluating proficiency in the development of these skills. This course provides an understanding in depth of reading for the experienced teacher and in-service training groups.

506—**Psychology of Reading.** Four hours. Fall, Summer.

This course deals with (1) the nature of reading, (2) reading as a perceptual process, (3) learning principles and the reading process, (4) motivation and reading interest, (5) personality factors in the reading process, and (6) readability.

513—**Advanced Diagnosis and Remediation of Reading Disability for the Classroom Teacher.** Four hours. Winter, Summer.

Prerequisite: CIE 506.

A course dealing with the need for corrective and remedial reading in the school; the nature and causes of reading disability; procedure in making a classroom diagnosis; disability analysis interpretation; classroom remedial treatment of reading difficulty to include techniques and materials.

515—**Diagnosis and Remediation of Reading Disability for the Reading Clinician or Reading Specialist.** Four hours. As needed.

Prerequisite: CIE 506.

This course deals through lecture, discussion, demonstration, and observation with: (1) the role of the reading clinician or specialist in current society; (2) reading clinic organization; (3) the nature and causes of reading disability;(4) procedure and tools used in making a diagnosis in the clinical setting; (5) disability and analysis interpretation; (6) remedial instruction in the clinic of reading disability including techniques and materials; (7) a limited requirement to be met in testing and teaching observation in clinic.

517—**Professional Relationship in Improved Elementary Programs.** Four hours. Fall.

A course designed to investigate behavioral factors of individuals and groups

as they affect and improve elementary school environment. Concepts and techniques of elementary teacher behavior will be investigated in detail and in theory and practice.

521—**Practicum in Remedial Reading.** Four hours. As needed.
Prerequisite: CIE 515.
Methods and Materials. The course provides an opportunity to learn methods and materials useful in remedial instruction through laboratory experience with children with remedial reading difficuties. Course meets twice a week for discussion with four laboratory periods arranged.

524—**Problems of Teaching Arithmetic.** Four hours. Spring.
Prerequisite: MAT 318 or consent of instructor.
A study of techniques, particularly those related to number concept, or teaching arithmetic; an examination of research studies and of current practices used in teaching at the elementary school level.

525—**Social Studies Education in Elementary School.** Four hours. Winter, Summer.
Programs, practices, trends, and investigations of special problems; criteria for evaluating, planning, organizing and improving social studies programs.

526—**The Development of the Latin American Countries.** Four hours. Summer.
Consideration is given to the historical development of the region, the land, origin of the people, race mixture, population movements, and natural resources. Further consideration is given to the political, social and economic development of the region.

528—**Curriculum Problems in the Elementary School.** Four hours. Spring, Summer.
A course involving analysis of elements of the curriculum. Emphasis is placed upon the implications of social life and the nature of the individual for curriculum development. Evaluates various curriculum procedures in terms of the implications.

529—**Reading in the Elementary School.** Four hours. Fall, Spring, Summer.
A course providing for extensive study of recent trends in materials and methods in reading in the elementary school including significant research studies which relate to these.

530—**Reading and Study Improvement Techniques for the Junior and Senior College Teacher of Reading.** Four hours. As needed.
A study of research, discussion of theory, and a practicum with current materials and methods will be utilized. Characteristics of students, evaluation

techniques, organization, and administration of the total program will be included.

533—**Practicum in Diagnosis and Remediation of Reading Disability for the Classroom Teacher.** Four hours. Quarterly.

Prerequisite: CIE 515.

A course in which the student works with small groups of corrective reading cases, disgnosing needs, and teaching corrective lessons.

536—**Practicum in Reading Diagnosis.** Four hours. Quarterly.

Prerequisites: CIE 515 and PSY 588.

This course is to develop in the student the ability to make a complete reading diagnosis, interpret the results, make specific recommendations with regard to the diagnosis, and to be able to conduct a pre- and post- diagnosis parent interview.

537—**Practicum in Remedial Reading Instruction I.** Four hours. As needed.

This graduate course is to provide the student experience in interpretation of test results of reading disability cases, the selection of remedial materials, and teaching techniques which would be appropriate for different disabilities. The student will teach a remedial case and have experience in writing case progress reports.

537—**Practicum in Remedial Reading Instruction II.** Four hours. As needed.

This graduate course is an extension of the first practicum. The doctoral level student will need this additional experience.

570—**Practicum in Early Childhood Education.** Four hours. Fall, Winter, Summer.

A course of study concerned with the specific practices and research investigations relative to curriculum planning, administration, and supervision within early childhood laboratories. Observations and participation within the existing programs, including pupil contact and limited research activities, is required.

572—**Practicum with Parents.** Four hours. Winter.

An action research course dealing with specific techniques of counseling, intrapersonal relationship within family organization, parent-teacher interview techniques, parent-teacher organizations, and in-service counseling with parents of kindergarten and primary age pupils.

576—**Seminar in Early Childhood Education.** Four hours. Winter, Summer.

A study of general practice, theory, and research in the related fields of Early Childhood Education. The student will be involved with individuals and/or small groups of children in a practicum setting. The relatedness of the psychological,

sociological, physiological and intellectual patterns and their impact upon child development will receive major attention. A scholarly report considering these factors mentioned above will be required.

577—**Evaluation in Early Childhood Education.** Four hours. Fall, Spring.

An introduction to specific principles and practices relative to group evaluative procedures with emphasis placed upon the developmental, diagnostic, and projective techniques, case study and standardized testing procedures within the early childhood education range.

578—**Creative and Mental Growth.** Four hours. Spring, Summer.

Research in the development of habits of creative thinking and its relationship to mental growth, involving art, music, drama, creative writing, and other behavior patterns. Research exercises required.

580—**Research in Child Development.** Four hours. Winter, Summer.

Research in child behavior, child psychology, maturity factors, laboratory experimental studies, physiologic development, experimental methods of perception in children, interpersonal relationship, behavior among children, or family life variables.

582—**History and Philosophy of Early Childhood Education.** Four hours. Fall.

A course of study concerned with in-depth investigations of Pestalozzi, Froebel, Montessori, and others representing schools of thought influencing the curriculum and program of young children. Investigations into the social and cultural changes which have influenced and modified early childhood programs will be treated in detail.

592—**Special Problems I, II, III.** One hour each.

A problem study to be approved by the appropriate department head to develop knowledge and facility in a field of interest for the student which requires preparation of a scholarly paper under the supervision of a graduate professor.

594—**Field Problems in Production I, II.** Four hours. As needed

Opportunity to study local school problems of curriculum revision, course of study construction, evaluation of methods, building projects, community surveys, testing programs, and record systems under careful supervison of a graduate professor.

The project must be approved by the departmental chairman upon the recommendation of the student's major professor.

596 I—**Research in Reading.** Four hours. As needed.

This course is to provide the student with an intensive review of research in

reading. The student will develop a prospectus for a research project in reading.

596 II—**Research in Reading.** Four hours. As needed.

In this course the student in the specialist program carries out the research project which he formulated in CIE 596 I. The project will be written under the guidance of his major professor and will be presented as his field problem which is a requirement for the specialist certificate.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

604—**Reading for Different Cultural Groups.** Four hours. As needed.

This course will review the current research relating to the culturally different. Implications of these research findings will be drawn from the field of reading, relating specifically to the creation of appropriate materials and adapting methodology to these groups.

620—**Internship in Reading: Public School, Clinic, or Research.** Eight hours. As needed.

This is an instructional internship to prepare the individual to be able to assume a position in a public school as director or supervisor of reading instruction, or a psoition in a reading clinic. Since this is the capstone of the specialist program, an effort will be made to locate the student in the system where he will accept a position upon graduation. For those students going into research, an exchange program will also be set up with reading clinics and research groups in other states. In all three instances the student will work full time at his selected position, taking no other course work. There will be continuous evaluation of the student's progress during the internship between the University and the accepting agency.

662—**Research in Elementary Education.** Four hours. Fall.

Prerequisite: Advanced graduate status or permission of chairman of department.

A course designed to familiarize the student with the elements and methods of research, with the representative types of research, and with major contributions of research to the field of elementary education.

685—**Seminar in Reading Instruction.** Four hours. As needed.

Provides an intensive study in depth of facets of reading instruction.

697—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a research problem and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

698—**Research Problem.** Four hours.
Selection of practical educational problems for solution by candidates for education specialist certificate, using research and professional knowledge. A scholarly report is required.

762—**Seminar in Elementary Education.** Four hours. Winter, Summer.
Prerequisite: Advanced graduate status or permission of chairman of department.
An intensive examination into the issues relative to the elementary school program. This course will be interdisciplinary in nature and will focus upon contributions of research, philosophy, history, sociology, and educational psychology as it applies to the resolution of major issues in elementary education.

791—**Research in Elementary Education.** One to twelve hours.
Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

ENGLISH (ENG – 224)

G-406—**History of the English Language.** Four hours. Winter.

G-408—**Introduction of Linguistics.** Four hours. Spring.

G-414—**The American Literarary Renaissance, 1820-1870.** Four hours. Spring.

G-416—**The Rise of Realism in American Literature, 1870-1920.** Four hours. Winter.

G-418—**The American Novel, 1920-1960.** Four hours. Spring.

G-419—**Modern American Poetry.** Four hours. Winter.

G-420—**American Drama.** Four hours. Summer.

G-423—**Shakespeare's Comedies and Tragicomedies.** Four hours. Winter, Summer.

G-425—**Shakespeare's Histories and Tragedies.** Four hours. Fall, Spring.

G-427—**The British Novel.** Four hours. Fall.

G-429—**Sixteenth Century British Literature.** Four hours. Winter.

G-430—**Studies in Comparative Literature.** Four hours. May be repeated for credit as topics vary for a total of twelve hours. Fall, Spring.

G-431—**Studies in British Literature.** Four hours. May be repeated for credit as topics vary for a total of twelve hours. Fall, Winter.

G-432—**Studies in American Literature.** Four hours. May be repeated for credit as topics vary for a total of twelve hours. Winter, Spring.

G-433—**Advanced Grammar.** Four hours. Quarterly.

G-434—**English Syntax.** Four hours. An examination of analytical methods, including generative transformations. Winter, Summer.

G-435—**Nineteenth Century British Literature: Romantic.** Four hours. Fall.

G-436—**Nineteenth Century British Literature: Victorian.** Four hours. Spring.

G-437—**Studies in Linguistics.** Four hours. May be repeated as topic varies for credit to a total of twelve hours. Summer.

G-438—**Short Story Writing.** Four hours. Spring.

G-439—**Poetry Writing.** Four hours. Winter.

G-440—**Traditions and Forms.** Four hours. Fall, Summer.

G-443—**Readings in World Literature I.** Four hours. Fall.

G-444—**Readings in World Literature II.** Four hours. Winter.

G-446—**Readings in World Literature III.** Four hours. Spring.

G-447—**Major Writers of the Eighteenth Century.** Four hours. Winter, 1973.

G-453—**Medieval English Literature.** Four hours. Fall, 1973.

G-466—**Twentieth Century British Literature.** Four hours. Fall, Summer.

G-473—**Analysis of Literature.** Four hours. Fall.

G-474—**The Modern European Novel.** Four hours. Winter, 1973.

G-480—**Modern European Poetry.** Four hours. Winter.

G-483—**Modern Drama.** Four hours. Spring.

G-485—**Literature of the South.** Four hours. Fall, Spring.

G-486—**Seventeenth-Century Prose and Poetry.** Four hours. Spring, 1974.

G-487—**Milton.** Four hours. Winter.

G-488—**Chaucer.** Four hours. Spring.

G-490—**Proseminar in Poetics.** Four hours. May be repeated twice as topics vary. Summer, 1973.

500—**Bibliography and Methods of Research in English.** Four hours. Summer, Fall.

502—**Anglo-Saxon.** Four hours. Winter, 1973-1974.

503—**Modern English.** Four hours. Fall, 1974, and alternate years.
Prerequisite: English 434-G-434 or permission of instructor.

504—**Middle English.** Four hours. Fall, 1972-1973.

505—**Seminar in American Literature.** Four hours. Spring, alternate years.

506—**Beowulf.** Four hours. Spring, 1974, and alternate years.

508—**Seminar in Non-Dramatic Renaissance Literature.** Four hours. Spring, 1973, and alternate years.

510—**Seminar in Pope and His Contemporaries.** Four hours. Spring, 1973, and alternate years.

511—**Seminar in English Romaticism.** Four hours. May be repeated as topic varies to a total of eight hours. Summer, 1973, and alternate years.

513—**Seminar in Medieval Epic and Romantic Literature.** Four hours. Winter.

515—**Seminar in Modern Poetry.** Four hours. May be repeated as topic varies to a total of eight hours. Winter, 1973-1974, and alternate years.

518—**Seminar in Seventeenth Century British Literature.** Four hours. May be repeated as topic varies to a total of eight hours. Spring, 1973, and alternate years.

520—**Seminar in Analysis of Linguistic Structure.** Four hours. Summer, 1974, and alternate years.
Prerequisites: ENG 408-G-408 or permission of instructor.

538—**Advanced Creative Writing.** Four hours. Fall.

539—**Seminar in Literary Principles and Processes.** Four hours. Spring.

580, 581—**Tutorial in English and Germanic Philology I, II.** Eight hours. 4-4. As needed.

592—**Special Problems.** One to four hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

605—**Seminar in American Literature Before 1900.** Four hours. May be repeated as topic varies to a total of eight hours. Fall.

607—**Seminar in American Literature After 1900.** Four hours. May be repeated as topic varies to a total of eight hours. Winter.

608—**Seminar in Renaissance Drama.** Four hours. Spring, 1974, and alternate years.

610—**Seminar in Johnson and His Contemporaries.** Four hours. Spring, 1974, and alternate years.

611—**Seminar in Victorianism.** Four hours. Winter, 1972-1973, and alternate years.

613—**Seminar in Medieval Poetry and Drama.** Four hours. Spring, 1972, and alternate years.

615—**Seminar in Modern Fiction and Drama.** Four hours. May be repeated as topic varies to a total of eight hours. Fall, 1972, and alternate years.

620—**Readings in Linguistics.** Four hours. Winter, 1972-1973, and alternate years.

622—**Special Studies in Linguistics.** Four hours. Summer, 1973, and alternate years.

791—**Research in English.** One to twelve hours.
Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

ENVIRONMENTAL SCIENCE (ESC – 335)

G-401—**Pollution Detection.** Four hours. Fall.
A study of the composition of natural waters and clean air, water and air quality standards, and the physical, chemical, and biological sampling and testing for water pollutants or air pollutants. Emphasis is one field sampling and field tests.

G-402—**Pollution Analysis.** Four hours. Winter.
A continuation of ESC 401 with emphasis on analysing and evaluating pollution abatement systems.

G-411—**Electronics for Scientists.** Four hours. Quarterly.
A modern practical course in electronics necessary for an understanding of the functions and malfunctions of modern electronic instrumentation. The principles of automating laboratory and field measurements are stressed along

with digital computer logic circuits.

G-492–I, II, III–**Seminar in Environmental Science I, II, III.** One hour each. Modern topics in pollution of the environment will be discussed.

FINANCE (FIN – 615)

530–**Problems in Finance.** Four hours. Spring.
Application of tested and experimental financial theory by financial managers to decision making problems relating to working capital and fixed capital management. Some emphasis placed upon quantitative tools and techniques for analysis and decision making.

540–**Managing Financial Instutitions.** Four hours. Fall, Summer.
Gives the student an understanding of all of the major financial institutions, their organizational structures, functions, interrelationships, and methods of operation.

552–**Problems in Investments.** Four hours. Winter, Summer.
Application of tested and experimental theories by investment managers to problems of short and long-term decision making. Some emphasis upon quantitative tools and techniques applied to optimal investment goals.

580–**Seminar in Finance.** Four hours. Quarterly.
A study of selected problems in business finance. Outside research and class discussion of research projects.

585–**The Business Environment.** Four hours. Quarterly.
The relevant environmental pressures shaping the corporation are explored: government, labor, values and ethics, innovation and technology.

592–**Special Problems.** Four hours.
This is a closely supervised course in individual study and research emphasing some issue of special interest to the student that falls within the scope of materials that are taught in the department.

597–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598–**Thesis.** Eight hours. Credit deferred until thesis is completed.

FOOD AND NUTRITION (F&N – 815)

G-442—**Experimental Foods.** Four hours. Fall, Spring.
Prerequisite: F&N 285.

G-444—**The School Lunch.** Four hours. Spring.

G-459—**Institution Food Purchasing.** Four hours. Winter.

G-476—**Diet in Disease.** Four hours. Winter.
Prerequisite: F&N 335.

G-478—**Advanced Nutrition.** Four hours. Fall.
Four 1-hour periods per week.
Prerequisite: F&N 335.

575—**Community Health and Nutrition.** Four hours. Spring.

577—**The Nutrition of Children.** Four hours. Summer.

578—**Quantity Food Preparation.** Four hours. Summer.
Prerequisite: Approval of instructor.
One lecture and six hours of laboratory per week.

592—**Special Problems in:**
a. Nutrition. Two to six hours.
b. Institutional Management. Two to six hours.

594—**Seminar in Food and Nutrition.** Two to six hours. Winter, Summer.

596—**Research in Food and Nutrition.** Two to six hours. Quarterly.

579—**School Lunch Supervision.** Four hours. Summer.

580—**Institution Organization and Administration.** Four hours. Fall.
Analysis of quantity food service operations as related to methods of control, selection and training of personnel, labor laws, employer-employee relationships so as to produce a system of order into a group of related activities and provide the means for their direction and development.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

FOREIGN LANGUAGES (FL – 228)

G-401—**Introduction to the Advanced Study of Foreign Literature.** Four hours. Spring.

G-412—**Advanced Credit for Study Abroad.** Four to twelve hours. Quarterly.
Prerequisite: Advanced knowledge of the language to be studied; prior arrangement for evaluation and receipt of credit.
Credit will be granted for systematic study of the language and culture or the language and literature of a foreign area. Study must be under the direction of a recognized teaching institution approved in advance by the Department of Foreign Languages. The Department will examine and grade the progress and achievement of all participants in this program before granting credit.

G-420—**Translation.** Four hours. Winter.
Prerequisite: Bilingualism in languages approved by the instructor.
May be taken for a total of twelve hours.

G-452—**Advanced Methods of Teaching Foreign Languages.** Four hours. Quarterly.

591—**Advanced Studies.** Four hours. Quarterly.
May be taken for a total of sixteen hours.

592—**Special Problems.** One to four hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

FRENCH (FRE – 236)

G-411—**Proseminar in Literary Genres.** Four hours. May be taken for a total of sixteen hours. Quarterly.

561—**Introduction to Old French.** Four hours. Spring.

562—**Seminar in Literary Periods.** Four hours. May be taken for a total of twenty hours. Fall.

563—**Seminar in Literary Topics.** Four hours. May be taken for a total of twenty hours. Winter.

GEOGRAPHY (GHY – 268)

G-400–**Advanced Cartography.** Four hours. Winter.
Prerequisite: GHY 200.

G-401–**Water Resources.** Four hours. Fall.

G-405–**Industrial Location Analysis.** Four hours. Winter.
Prerequisite: GHY 305 or consent of instructor.

G-411–**Applied Climatology.** Four hours. Spring.
Prerequisite: GHY 311 or PHY 487.

G-412–**Aerial Photograph Interpretation.** Four hours. Fall.

G-421–**Population and Settlement Geography.** Four hours. Winter.
Prerequisite: GHY 301 recommended.

G-425–**Remote Sensing of the Environment.** Four hours. Winter.
Prerequisite: GHY 412 recommended.

G-426–**Urban and Regional Planning.** Four hours. Winter, Summer.
Prerequisite: GHY 305 or 484 or consent of instructor.

G-427–**Rural Land Use.** Four hours. Fall.

G-428–**Transportation Geography.** Four hours. Spring.
Prerequisite: GHY 305.

G-429–**Geography Internship.** Four to twelve hours. (May be repeated for a total of twelve hours.) Quarterly.
Prerequisite: Consent of instructor.

G-450–**Physiography of North America.** Four hours. Not offered during 1972-1973.
Prerequisite: GHY 204 or consent of instructor.

G-451–**Resource Management: Theories, Methods, and Models.** Four hours. Fall.
Prerequisite: GHY 376 or consent of instructor.

G-452–**Resource Management: Problems of Developed and Developing Areas.** Four hours. Winter.
Prerequisite: GHY 376 or consent of instructor.

G-453—**Geography of Soils and Vegetation.** Four hours. Spring.
Prerequisite: GHY 204 or consent of instructor.

G-471—**Advanced Political Geography.** Four hours. Spring.
Prerequisite: GHY 370.

G-484—**Urban Geography.** Four hours. Fall.
Prerequisite: GHY 305.

G-485—**Field Methods in Geography.** Four hours. Spring.

G-486—**Urban Field Methods.** Four hours. Spring.
Prerequisite: GHY 484.

501—**General Seminar.** One hour. May be repeated. Quarterly.

502—**Seminar in Research Techniques and Presentation of Geographic Data.** Four hours. Fall.

503—**Seminar in Physical Geography.** Four hours. Not offered during 1972-1973.

505—**Seminar in Economic Geography.** Four hours. Not offered during 1972-1972.

511—**Seminar in Cultural-Historical Geography.** Four hours. Not offered during 1972-1973.

521—**Seminar in Water Resources.** Four hours. Winter.

526—**Seminar in Urban and Regional Planning.** Four hours. Spring.

527—**Seminar in Rural Land Use.** Four hours. Winter.

540—**Seminar in History and Development of Geographic Thought.** Four hours. Fall.

551—**Seminar in Resource Management.** Four hours. Spring.

571—**Seminar in Political Geography.** Four hours. Not offered during 1972-1973.

591—**Problems in Geography.** Four hours.

597—**Independent Study and Research.** Hour arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Hours arranged, not to exceed ten hours.

GEOLOGY (GLY – 340)

G-401—**Principles of Statigraphy.** Four hours. Fall.
Four hours lecture; weekend field trip.
Prerequisite: GLY 302, 330, or permission of instructor.

G-413—**Paleoecology.** Four hours. As needed.
Two lectures and four hours laboratory per week; field trips.
Prerequisites: GLY 302 and BIO 481-G-481, or permission of instructor.
A study of the relationship between ancient organisms and the environment in which they lived.

G-420—**Sedimentology.** Four hours. Winter.
Two hours lecture and four laboratory hours per week.
Prerequisite: GLY 310.
Origin of sedimentary particles, sedimentary structures, and classification of sedimentary rocks.

G-422—**Petroleum Geology.** Four hours. As needed.
Two lectures and four hours laboratory per week.
Prerequisite: Permission of instructor.
The origin, occurrence, migration, and accumulation of oil and gas.

G-430—**Elements of Geochemistry.** Four hours. As needed.
Three lectures and one laboratory per week.
Prerequisites: Consent of instructor, CHE 103 or equivalent, GLY 101.
Geochemical cycles of the atmosphere, hydrosphere and lithosphere. Concentration controls. Geochemical effects in earth history. Techniques of geochemical exploration.

G-431—**Elements of Geophysics.** Four hours. As needed.
Three lectures and one laboratory per week.
Prerequisites: Consent of instructor, MAT 103, PHY 103 (or 203), GLY 101.
Terrestrial magnetism and electricity. Gravitational field variations and measurements. Seismic reflection and refraction. Nuclear geology. Surface and subsurface measurements. Concepts and significance of geophysical variations.

G-445—**Economic Geology.** Four hours. As needed.
Two lectures and four hours laboratory per week.
Prerequisites: GLY 310, 314, and 330.
Principles of ore deposits.

G-452—**Physical Marine Geology.** Up to 9 quarter hours. Gulf Coast Research Laboratory. Summer.
Prerequisites: GLY 103, 310, and 420.
A general introduction to the physical processes at work on the shores of Mississippi Sound with emphasis on the erosional and depositional effects of waves and currents at different stages of tide.

G-453—**Chemical Marine Geology.** Up to 9 quarter hours. Gulf Coast Research Laboratory. Summer.
Prerequisites: GLY 103, 310, 420, and CHE 203.
Supervised research in the chemistry of the waters and sediments of Mississippi Sound.

G-454—**Problems in Marine Sedimentation.** Up to 9 quarter hours. Gulf Coast Research Laboratory. Summer.
Prerequisite: Permission of instructor.
Supervised study of selected aspects of marine sedimentation along the Gulf Coast.

G-461—**Petrography.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisites: GLY 311 and 314.
Systematic study of rocks by means of the polarizing microscope.

G-468—**Micropaleontology I.** Four hours. As needed.
One hour lecture and six hours laboratory per week.
Prerequisties: GLY 302 and 303.
Taxonomy, morphology, and stratigraphic use of Foraminifera.

G-479—**Introductory Oceanography.** Four hours. Fall.
Prerequisites: GLY 103, PHY 103, CHE 103 or equivalents, and permission of instructor.
Techniques and results of study of the oceanic hydrosphere and its interfacial relationships with the lithosphere and atmosphere.

G-482—**Geological Excursion.** Two hours (May be repeated, in a different region, for four hours credit.)
Field studies of geological phenomena in areas remote from the campus, by means of 8-10 day field trips, between quarters. Must be registered for at registration time of quarter preceding the trip; credit granted during the quarter

following the trip, after completion of field report. Transportation fee will be assessed, dependent on length of trip.

505—**Paleoclimatology.** Four hours. As needed.
Prerequisite: Permission of instructor.
Methods of investigation of and evidence regarding the determination of climatic conditions of the past as based on the rock, mineral, and biologic record.

511—**Pleistocene Geology.** Four hours. As needed.
Prerequisites: GLY 101 and permission of instructor.
Geologic history of the earth since the beginning of the Pleistocene Epoch with emphasis on glacial phenomena.

514—**Geology of Groundwater.** Four hours. As needed.
Prerequisite: Permission of instructor.
Occurrence and production of groundwater.

515—**Principles of Geology for High School Science Teachers.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: Bachelor's degree in science or its equivalent.
Principles of physical and historical geology for teachers. The course can not be applied toward a major or minor in geology.

516—**Survey of the Lithosphere I.** Four hours. As needed.
Three lecture and two laboratory hours per week. Field trips.
Prerequisite: Permission of instructor.
Review of observations regarding and methods of analysis of the crust of the earth. This course cannot be applied toward a major in geology; it is especially designed for participants in science education programs, but it is also open to others.

517—**Survey of the Lithosphere II.** Four hours. As needed.
Three lecture and two laboratory hours per week.
Prerequisite: Permission of instructor.
Methods of study of the earth's interior (mantle and core), procedures of investigation, concepts and theorectical foundations; hypotheses of cosmology.

530—**Advanced Structural Geology.** Four hours. As needed.
Prerequisite: GLY 330.
Theorectical analysis of rock deformation on a regional scale.

531—**Tectonics.** Four hours. As needed.
Prerequisite: Permission of instructor.

Examination of large-scale disturbances of the earth, stresses and strains involved, and methods of response.

532—**Structural Petrology.** Four hours. As needed.
Prerequisite: Permission of instructor.
Macroscopic and microscopic techniques of analysis of rock and mineral deformation; geological significance of such deformation.

533—**Hypotheses of Continental Drift.** Four hours. As needed.
Prerequisite: Permission of instructor.
Examination of the evidence regarding and concepts advanced with respect to large-scale crustal dislocations, with emphasis on the hypothetical former contiguity of South America and Africa.

540—**Sedimentary Environments.** Four hours. As needed.
Comparison between modern studies of environments of sedimentation and the sedimentary record of paleoenvironments.

568—**Advanced Micropaleontology.** Four hours. As needed.
Prerequisite: Permission of instructor.

569—**Gulf Coast Geology.** Four hours. As needed.
Lectures, discussions, and field trips.
Sediments and stratigraphic problems of the Gulf Coastal Region.

580—**Field Methods in Earth Science.** Nine hours.
Field studies in geology. Minimum of eight hours daily, five days/week, for five weeks.
Supervised instruction in methods of geological field studies in varied field areas followed by individual geological studies and the preparation of reports. Not available to those who have previously taken GLY 480.

591—**Seminar.** One hour.
May be repeated once for a total of two hours credit.

592—**Special Problems in Geology I, II, III.** One to four hours each, by arrangement.
Open to graduate students only, who will be assigned a specific problem for investigation. Credit will be determined by the quality and quantity of accomplishment.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other

University facilities must enroll in this course.

598—**Thesis.** Six hours.

GERMAN (GER – 240)

G-411—**Proseminar in Literary Genres.** Four hours. May be taken for a total of sixteen hours. Quarterly.

561—**Introduction to Middle High German.** Four hours. Spring.

562—**Seminar in Literary Periods.** Four hours. May be taken for a total of twenty hours. Fall.

563—**Seminar in Literary Topics.** Four hours. May be taken for a total of twenty hours. Winter.

GUIDANCE (GED – 140)

G-480—**Curriculum Development for Occupational Orientation.** Four hours. Summer.

A course designed to introduce vocational teachers and counselors to principles of curriculum adaptation for school-based programs of occupational orientation. Emphasis is given to the acquisition, development, and organization of materials and resources for an experiential learning approach.

G-484—**Methods and Techniques of Group Guidance.** Four hours. Summer.

A course designed as an introduction to the fundamentals of developmental group guidance. Special attention is given to procedures and activities common to occupational orientation, homeroom and other types of group work in classroom and institutional settings.

505—**Guidance in the Elementary School.** Four hours. Winter.

A survey of guidance theories and practices as they relate to elementary education. Designed to give elementary teachers, principals, and counselors a fundmental understanding of the role of guidance in the elementary school.

506—**Fundamental of Guidance.** Four hours. Quarterly.

A survey of vocational and educational guidance services designed to give teachers, administrators, and beginning counselors a fundamental understanding of the role of guidance in school programs.

522—**Organization and Administration of Pupil Guidance.** Four hours. Fall, Spring.

Prerequisite: GED 506.

The course stresses administrative relationships in instituting and maintaining a program of guidance services, with a study of principles and techniques for formation and evaluation of a complete guidance program.

560—**Introduction to Community and Rehabilitation Counseling.** Four hours. As needed.

This course is designed to provide students with an orientation to community and rehabilitation counseling. Emphasis is given to historical and philosophical foundations, ethical and legal implications, counseling services, facilities and the interdisciplinary nature of community and rehabilitation helping services.

561—**Socio-Psychological Aspects of Disability.** Four hours. As needed.

This course is designed to help rehabilitation counselors more adequately understand that impact of disability on the rehabilitation process. Emphasis is given to theory and research findings from the social and behavioral sciences as they relate to the understanding of human disability. The case study method is used as an integrating activity.

562—**Medical Aspects of Rehabilitation.** Four hours. As needed.

This course is designed to familiarize students with medical terminology, with the muscular, skeletal and neurological systems, and with common diagnostic categories encountered in rehabilitation counseling. Understanding utilization of symptomatology, treatment, and other management aspects of physical medicine is emphasized. The major outcome is directed toward developing the counselor's ability to interpret medical information in conjunction with developing a plan of action for disabled clients.

563—**Case Management Processes in Rehabilitation Counseling.** Four hours. As needed.

This course will focus on methods of casefinding; eligibility determination; the collection and evaluation of medical, psycho-social, and vocational information; the establishment of feasibility goals, provision of case services; job placement and case recording in the rehabilitation process.

571—**The Information Service in Guidance.** Four hours. Fall, Spring, Summer.

A survey of practices in guidance programs which give teachers, administrators, and counselors knowledge and skills in setting up and maintaining an occupational information file and in making the materials available to students.

580—**Marital and Pre-Marital Counseling.** Four hours. Winter, Summer.

The course is designed to present information related to: (1) sex role

concepts in the maturation of young people; (2) sex development and pre-marital and early marriage adjustment problems; and (3) successful techniques used in pre-marital and marital counseling as revealed in case studies.

581—**Methods and Techniques of Counseling.** Four hours. Fall, Winter, Summer.

A course designed to acquaint the guidance worker with the basic fundamentals of counseling and interviewing the individual. Attention is given to both old and new methods and techniques used in counseling.

582—**Use and Interpretation of Tests in Guidance.** Four hours. Fall, Winter, Summer.

A course designed to provide the counselor with means of securing, recording, and using data concerning individuals and groups. Emphasis is given to practical experience in using tests, inventories, and other devices for measurement.

586—**Seminar in Student Personnel Problems.** Four hours. Fall, Spring.

Discussion and analysis of a variety of problems facing workers in guidance, counseling and student personnel services. Special attention is given to the legal and ethical implications of personnel work.

587—**Analysis of the Individual.** Four hours.

Prerequisite: GED 582

A study of methods and techniques used by teachers and guidance workers in helping individuals evaluate themselves, with consideration of collecting, assembling, and using information. Emphasis is on subjective techniques.

588—**Student Personnel Work in Higher Education.** Four hours. Winter, Summer.

This course is designed to give students interested in entering personnel work at the college level a knowledge of the scope of personnel work, including those services basic to campus life, services for student growth, and services for special student groups. The professional nature of the personnel worker is emphasized.

592—**Special Problems I, II, III.** One hour each.

By prior arrangement only.

A problem study to be approved by the departmental chairman to develop knowledge and facility in a field of interest of the student. Preparation of a scholarly paper is required.

593—**Supervised Practicum I, II.** Four hours each. Quarterly.

By prior arrangement only.

This course provides students with opportunities to do guidance, counseling and/or small group work under supervision in settings appropriate to their area of specialization.

594—**Advanced Guidance Research Seminar.** Four hours. Spring.
An advanced course for students interested in individual and group research methods, materials, and procedures in the various guidance service areas.

596—**Field Problems I, II, III.** Two hours each. As needed.
By prior arrangement only.
This course provides students with the opportunity to do independent studies relating to problems of a practical nature which are encountered in field settings. Students are expected to develop a proposal for carrying out the study and a written report of findings at the conclusion.

600—**Guidance and Counseling Laboratory I.** Four hours.
Prerequisites; GED 581 and 582 or equivalent and prior permission of instructor.
This course serves as an introduction to functional counseling practices. As a part of the basic guidance core, Laboratory I provides supervised practice in counseling activities that are primarily educational-vocational in nature. Particular attention is given to the development of competencies in counselor-client interaction, in the selection and proper use of tests and information as aids to the counseling process and in report writing. Attention is given to familiarization with intake procedures commonly used by counseling agencies. Students are expected to engaged in a minimum of 30 contact hours with clients during the quarter.

602—**Guidance and Counseling Laboratory II.** Four hours. Quarterly.
Prerequisites: GED 600 or equivalent and permission of instructor.
This course is designed to bring about a more sophisticated understanding of educational, vocational, and personal-social counseling. Working under direct supervision through visual and audio monitoring, students work with a variety of clients and are expected to develop a high level of professional competency in counseling interaction, in individual assessment, and in test reporting. Counselors are expected to engage in a minimum of 45 contact hours with clients during the quarter.

603—**Guidance and Counseling Laboratory III.** Four hours. Winter, Summer.
Prerequisites: GED 602 or equivalent and permission of instructor.
This course serves as a more advanced phase of counseling laboratory training with a focus on counseling of a personal-social nature. Students are expected to develop competencies in utilizing a range of procedures designed to bring about positive growth with clients having personal-social difficulties. Working under close supervision, students receive feedback through both audio and video tapeing.

660—**Seminar in Problems of Rehabilitation.** Four hours. Winter.
This course will deal with a variety of disabling conditions encountered in

community and rehabilitation settings. Students will study problems of special interest to counselors through reviews of the literature, use of consultants, on-site visits, and case studies.

680—**Theories, Techniques, and Practices of Guidance Consultation.** Four hours. Spring.

Theories of consultation that have been developed by various disciplines within the helping professions and business management will be discussed. Emphasis will be placed upon specific techniques derived from the various consultation theories; students will receive the opportunity to practice techniques derived from selected theories via role playing and use in actual professional situations, wherever possible.

681—**Seminar in Systems of Counseling.** Four hours. Winter, Summer.

Prerequisite: Consent of instructor.

A course designed to explore both the theoretical and functional implication for interaction settings. Students shall explore in depth specific theories of counseling and the application of such theories to practice. Extensive use of video-tapes and other audio-visual materials will be made.

682—**Community Resources for Guidance.** Four hours. Spring.

Prerequisite: Consent of instructor.

A course designed to study the nature and development of agency resources within the community, along with their purposes and functions, such as vocational rehabilitation, employment service, scouts, family counseling service, mental health centers, public welfare, and health agencies. Emphasis is on locating, understanding, and utilizing the services of the agencies in the exchange of information and for referral of counselors.

685—**Group Counseling Laboratory.** Four hours. As needed.

Prerequisites: GED 684 and consent of instructor.

A course designed to provide students with the opportunity to serve as facilitators of attitudinal counseling groups under supervision. Emphasis is on the application of contemporary theories to group work in functional settings.

691—**Research in Guidance.** One to twelve hours.

697—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a research problem and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

698—**Research Problems.** Four hours.

700—**Internship I, II.** Four to eight hours. Quarterly.
By prior arrangement only.

740—**Testing College Students.** Four hours. Fall.
Prerequisite: GED 582 or equivalent course.
Students are introduced to major types of testing programs available to institutions of higher learning. Emphasis is given to functional uses to test data in key areas such as admissions, research and evaluation, long-range planning, and counseling.

750—**Readings in Student Personnel Work.** Four hours. Spring.
Advanced seminar in which students do extensive reading in social and cultural foundations of guidance and student personnel work. Weekly seminar is designed to structure and integrate reading activities. In addition to general reading, students select one area of special interest for term project.

760—**Administration and Organization of Student Personnel Services.** Four hours. Winter.
This course introduces students to the organization of student personnel services within the context of the college or university. Stress is given to administrative principles of relationships involved in initiating and maintaining an effective program of student services. Outside consultants and case studies are utilized.

791—**Research in Guidance.** One to twelve hours.
Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

HEALTH (HTH – 715)

G-405—**Communicable and Chronic Disease in Man.** Four hours. Winter, Spring.
Problems, control programs, and prevention of communicable and chronic disease in modern society.

G-431—**Sanitation.** Four hours. Fall, Winter.

Problems of sanitation in the home and school, in food producing and handling, water supply, waste and excreta disposal. Based on an understanding of general biology.

G-437—**Driver Education.** Four hours. Fall, Winter, Spring.

Driver education provides an opportunity for public school teachers to obtain information on such items as programs of instruction, use of training cars, delegation of authority, legal responsibilities, and qualifications of teachers.

G-449—**Traffic Safety Education.** Four hours. Spring.

An in-depth study into the major problems in traffic safety. The driver, pedestrian, engineering, and enforcement will be the principal areas to be examined.

G-450—**Laboratory Programs in Driver Education.** Four hours. Winter.

An examination of the aims, objectives, and role of laboratory programs in driver education. Directed laboratory experiences will be provided.

G-453—**Methods of Driver and Traffic Safety Education.** Four hours. Fall, Winter, Spring.

Prerequisite: G-437.

Organization and administration of the driver education program, including scheduling, financing, and developing good public relations, will be primary areas of study.

G-454—**Health Education in Elementary Schools.** Four hours. Winter, Spring.

Methods and materials for the elementary teacher, with special emphasis on instruction and on coordination of school and community health programs.

G-455—**Health Education in the Secondary Schools.** Four hours. Fall, Winter, Spring.

Primarily for students majoring or minoring in health and physical education. Materials and techniques for high school teachers of health; conducting the school health program at the secondary level.

G-456—**Simulation in Driver Education.** Two hours. Fall, Winter, Spring.

Prerequisites: HTH G-437 and G-453.

Simulation is an audiovisual instructional method and has been designed to complement and supplement other instructional techniques utilized in the Driver Education program to prepare individuals to function safely and effectively in today's traffic.

G-460—**Measurement and Evaluation in Health Education.** Four hours. Winter, Spring.

A survey of evaluation instruments for appraising personal health, measuring

health knowledge, attitudes, interests and practices, and the interpretation of these data.

G-480—**Drugs in Society.** Four hours. Fall, Spring.
Prerequisite: HTH 179 or permission of instructor.
Psycho-social, medical, legal and health aspects of drugs and their abuse, plus a current analysis of the problem in our society.

G-483—**School Health.** Four hours. Winter, Spring.
Organization and operation of school health programs with emphasis on policies, procedures, problems, cooperating agencies, and field work.

G-485—**Marriage and Human Sexuality.** Four hours. Fall, Winter, Spring.
Physical, emotional, and medical basis for successful courtship, marriage, and parenthood.

530—**Facilities and Equipment in Driver Education Programs.** Four hours. Spring.
Planning for facilities and equipment for driver education programs with special consideration given to recommendation by the National Highway Safety Bureau and the American Driver and Traffic Safety Education Association.

531—**Multi-Media Systems in Driver Education Programs.** Four hours. Spring.
This course will deal with unique adaptation of newer media systems to the broad problems in driver and traffic safety.

532—**Organization and Administration of Driver and Traffic Safety Education.** Four hours. Winter.
Organization and administration aspects of driver and traffic education as they relate to the total school and other specialized programs. Historical and philosophical aspects, evaluation, related professional organizations, and occupational opportunities.

535—**Addictive Substances as Related to Traffic Safety Education.** Four hours. Fall.
A study of the nature and effect of addictive substances on the human body and the resulting problems in traffic safety.

536—**Psychological Factors in Driver and Traffic Safety Education.** Four hours. Winter.
A study of behavior with emphasis on attitudes, motivation, and adjustment and their relationship to safe driving. Investigation of principles and methods appropriate in identifying, understanding, and modifying unsatisfactory behavior.

540—**Marriage and Parenthood Education.** Four hours. Winter.
This course is designed to help students who are interested in programs and materials for marriage and family life; social adjustment problems related to high school and college; special problems of counseling with these groups; and sources and methods of research.

544—**Seminar In Health.** Four hours.

546—**Advanced Personal and Community Hygiene.** Four hours. Fall.
Intensive study in personal and community hygiene.

550—**Safety Education.** Four hours. Fall, Spring.
A study of the general program of safety education in public schools, with special reference to the selection and organization of materials, including the methods and techniques of instruction; visual aids, safety projects, special programs, and the utilization of the agencies outside the school.

576—**Care and Treatment of Athletic Injuries.** Four hours. Winter.
Modern techniques and facilities for providing adequate prevention and treatment of athletic injuries.

583—**The School Health Program.** Four hours. Winter.
This course deals with the organization and operation of the school health services. Means of developing school health services, safe and healthful school environment, and effective school-community relationships are especially emphasized.

592—**Special Problems.** Four hours.

597—**Independent Study.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.
Credit deferred until thesis is completed.

660—**Community Organization for Health Education.** Four hours. Spring.
Study of the philosophies of the community and the organizations that deal with health, with emphasis on group work techniques and their use in organizing the community for work in health education; current research in community organizations, and examination of programs of community health agencies.

791—**Research in Health.** One to twelve hours.
Prerequisite: Approval of the major professor.

792—**Special Problems in Health.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**
Credit deferred until dissertation is completed.

HISTORY (HIS – 272)

Certain graduate courses taken in other departments may be accepted for credit with the consent of the student's graduate committee.

G-401—**Russia to 1800.** Four hours. Fall.

G-402—**Nineteenth Century Russia.** Four hours. Winter.

G-403—**Russia Since 1917.** Four hours. Spring.

G-404—**Russian Intellectual History.** Four hours. Spring.

G-406—**History of Mexico and Caribbean.** Four hours. Fall.

G-408—**History of South America: The Andean Countries.** Four hours. Winter.

G-410—**History of South America: Brazil and the Rio de la Plata.** Four hours. Spring.

G-411—**English Constitutional History.** Four hours. Spring.

G-412—**The Diplomatic History of Latin America.** Four hours. Spring.

G-413—**Western Intellectual History.** Four hours. Winter.

G-424—**Medieval World I, Economic and Social History.** Four hours. Winter.

G-425—**Medieval World II, Cultural History.** Four hours. Spring.

G-430—**Modern Germany.** Four hours. Winter.

G-432—**French Revolution and Napoleon.** Four hours. Fall.

G-433—**Europe, 1815-1870.** Four hours. Winter.

G-434—**Europe, 1870-1918.** Four hours. Spring.

G-435—**Europe, 1918-1939.** Four hours. Winter.

G-436—**Europe Since 1929.** Four hours. Spring.

G-437—**Modern France.** Four hours. Fall.

G-439—**Tudor-Stuart Britain.** Four hours. Fall.

G-441—**Nineteenth Century Britain.** Four hours. Winter.

G-442—**Twentieth Century Britain.** Four hours. Spring.

G-448—**The Age of Jefferson.** Four hours. Fall.

G-449—**The Age of Jackson.** Four hours. Winter.

G-451—**U.S. Intellectural and Social History to 1865.** Four hours. Spring, 1974.

G-453—**U.S. Intellectual and Social History Since 1865.** Four hours. Spring, 1973.

G-455—**The Old South.** Four hours. Fall.

G-457—**The New South.** Four hours. Winter.

G-469—**United States Constitutional History to 1877.** Four hours. Winter.

G-470—**United States Constitutional History Since 1877.** Four hours. Spring.

G-475—**United States Foreign Relations to 1914.** Four hours. Winter.

G-477—**United States Foreign Relations Since 1914.** Four hours. Spring.

G-481—**Colonial America, 1607-1763.** Four hours. Fall.

G-482—**Revolutionary Era, 1763-1789.** Four hours. Winter.

G-484—**American Political Leaders.** Four hours. Spring, 1974.

G-487—**The Early American Frontier.** Four hours. Winter.

G-489—**The Trans-Mississippi West.** Four hours. Spring.

G-496—**The Sectional Controversy and the Civil War, 1840-1865.** Four hours. Spring.

G-497—**Reconstruction and the Emergence of Modern America, 1865-1898.** Four hours. Fall.

G-498—**The Progressive Era, World War I, Prosperity and Depression. 1898-1933.** Four hours. Winter.

G-499—**The New Deal, World War II, and Post-War America, 1933-Present.** Four hours. Spring.

504—**European Historiography.** Four hours. Winter.

506—**American Historiography.** Four hours. Fall.

510—**Medieval History.** Four hours. Spring, 1972-1973.

514, 515, 516—**Seminar in European History, 1870 to Present I, II, III.** Four hours each. Spring, 1973-1974; Fall, 1972-1973; Fall, 1973-1974.

520—**Modern Russia.** Four hours. As needed.

531—**British History.** Four hours. As needed.

540, 541—**Reading Seminar in European History I, II.** Four hours each. Spring, Summer.

553—**Seminar in Southern History.** Four hours. Summer, 1972-1973.

561—**Seminar in U.S. Diplomatic History.** Four hours. Winter.

572—**Seminar in American Colonial and Revolutionary Period.** Four hours. Fall, 1973-1974.

574—**Seminar in Nineteenth Century U.S.** Four hours. Fall, 1973-1974.

576—**Seminar in Twentieth Century U.S.** Four hours. Spring.

578, 579—**Reading Seminar in American History I, II.** Four hours each. Winter, Spring.

585—**Latin American History.** Four hours. As needed.

592—**Special Problems I, II, III, IV.** One hour each.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

600—**Seminar and Practicum in the Teaching of History in Colleges and Universities.** Four hours. As needed.
Required of all Ph.D. candidates and open to select M.A. candidates.
The course will emphasize the following areas: professional ethics, professional organizations, publications, educational philosophy, faculty-study relationships, community relationships. Special consideration will also be given to the mechanics of lecture preparation, testing, and methodology. Concurrently with the seminar the student will be assigned to a professor and will work closely with that professor in preparing lectures, and preparing and grading examinations. He will present a minimum of four supervised lectures.

602—**Internship in the Teaching of History.** Four hours. As needed.
Required of all Ph.D. candidates who have had no teaching experiences at the college or university level and optional for those with such experience. Each student will teach under his supervisory professor a section of History 101, 102, 111, or 112.

791—**Research in History.** One to twelve hours.
Prerequisite: Approval of the major professor.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

HOME ECONOMICS EDUCATION (HEE — 820)

500—**Supervision of Home Economics.** Four hours. Winter.
Designed for high school home economics teachers interested in the student-

teacher program. The course stresses the supervisory practices and procedures for promoting student-teacher growth and development. Supervisory problems in guidance of students for home economics education teachers will be included.

502—**Home Economics in American Education.** Four hours. Winter.
This course is a brief survey of home economics in American education. It is designed to give understanding of the trends and issues in curriculum development. instruction, guidance, supervision, administration and research in this field.

504—**Curriculum Problems in Home Economics.** Four hours. Spring.
A course for teachers which deals with problems in curriculum making. It will include the place of home economics education in the total school curriculum for that specialized area. Opportunity will be given for students to work out practical problems relating to their local schools.

510—**Home Economics in Higher Education.** Four hours. Fall.
Home economics at the college level will be studied with special reference to that of the junior college. Problems in development of the curriculum, in college instruction, in guidance of students, in administrative problems, and in evaluation of a department will be considered.

514—**Teaching Home Economics to Adults.** Four hours. Summer.
A study of the adult home economics education programs with experiences which will help toward effective participation in them whether for the gainfully employed or the full-time homemaker. Special problems will be included.

516—**Consumer Home Economics Education.** Four hours. Summer.
A course designed to acquaint the student with consumer problems in our present day society. Curriculum materials pertinent to teaching consumer education on the secondary level will be developed.

518—**Home Economics Related Occupations.** Four hours. Summer.
The exploration and planning of teaching units for home economics related occupations.

552—**Teaching Family Living on the Secondary Level.** Four hours. Fall.

590—**Selected Topics in Home Economics Education.** Two hours. Summer. (May be repeated four times but limited to four hours toward a degree)
Prerequisite: The corresponding subject matter course.
The development and application of units of work in selected areas for Levels I, II, and III in the secondary school program.

592—**Special Problems in Home Economics Education.** Two to six hours.

594—**Seminar in Home Economics Education.** Two to six hours.

596—**Research in Home Economics Education.** Two to six hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

HOUSING AND HOME MANAGEMENT (H&HM – 825)

540—**Home Engineering.** Four hours. As needed.
This course includes a study of the selection, placement, and storage of home appliances and their use as related to the mechanical features. Considerable time will be spent in design characteristics of the various appliances and the media used. The adaptation of certain activities to adult programs, as well as to the junior and the senior high school, will be made.

592—**Special Problems in any of the Following Areas:** Two to six hours.
a. Household Equipment
b. Housing
c. Home Furnishings
d. Home Management

INDUSTRIAL AND TECHNICAL EDUCATION (ITE – 165)

G-400—**School Shop Planning and Equipment Selection.** Four hours. Fall.
Planning the lay-out of rooms and other building facilities. Purchase and arrangement of equipment. Selection of suitable equipment for special conditions. The cost of equipment, supplies, and maintenance.

G-401—**Shop Care and Management.** Four hours. Winter.
A study of machine placement; student movement; arrangement of safety zones; upkeep and repair of tools; tool storage and distribution; storage of materials; assembly areas; general appearance of the shop.

G-403—**Occupational Analysis and Course Construction.** Four hours. As needed.
Techniques and procedures in analyzing occupations into their basic elements and arranging these elements for instructional purposes.

G-404—**Problems of the Coordinator.** Four hours. Summer and as needed.

Problems, procedures, and techniques in the operation of cooperative, part-time, and evening school programs, including the study of state and federal regulations and reporting.

G-421—**Power Transmissions.** Four hours. Winter.

Study of mechanical, hydraulic, pneumatic, and electrical power amplification and transmission.

G-431—**Principles of Trade and Industrial Teaching.** Four hours. Summer and as needed.

Interest and the motivation of learning in the shop, the development of reasoning ability and manipulative skill, job and lesson planning, teaching devices and procedures, shop management, measurement of achievement, interschool and community relations.

G-432—**Problems of Adult Education.** Four hours. As needed.

Rise of the adult education movement; learning abilities, educational interests and needs of adults; problems and procedures in organizing and operating adult educational programs; relation of adult education to public school education.

G-433—**Curriculum Construction for Cooperative and Adult Vocational Classes.** Four hours. As needed.

The derivation of objectives; selection and arrangement of instruction units and materials for cooperative and evening classes; the construction and use of evaluative devices.

G-434—**Occupational Surveys.** Four hours. As needed.

A study of problems, methods, and procedures involved in planning, organizing and conducting occupational surveys in local communities and labor market areas.

G-435—**Instructional Materials for Industrial Education.** Four hours. Summer.

Identification, selection, development and use of various instructional aids and materials.

G-436—**Curriculum Construction for Vocational Technical Education.** Four hours. As needed.

Principles, practices, and techniques in planning and establishing a curriculum in Vocational Technical Education.

G-481—**Testing and Evaluation in Vocational Technical Education.** Four hours. Summer.

Development and administration of teacher-made tests for measuring achievement. Evaluation and use of published tests; including paper and pencil,

object, and manipulative tests.

G-482—**School Shop Safety.** Two hours. Fall, Summer.
Analysis of fundamentals of accident prevention and their application to school shop supervision and management.

502—**Foundations and Principles of Industrial Arts.** Four hours. Spring.
A basic course of the underlying philosophy and principles of industrial arts education. Objectives and relations to allied fields. Research and individual reports required.

503—**Establishing the Industrial Arts Program.** Four hours. Winter.
A detailed consideration of the individual school program in industrial arts, its organization, physical and educational requirements, and coordination with other educational requirements. Specific problems studied and reported.

504—**Shop and Small Plant Design.** Four hours. As needed.
Fundamental problems in design of work space. Working drawings and reports required.

505—**History of Industrial Education.** Four hours. Fall.
A study of leaders, movements, and agencies in the development of industrial education. A critical consideration of economic and social factors in the development of industrial education in the United States is made.

506—**Philosophy of Industrial Arts Education.** Four hours. Fall.
A study and evaluation of the various viewpoints of the leading philosophers in the field.

507—**Organization of Instructional Materials in Industrial Education.** Four hours. Winter, Summer.
A systematic examination of instructional materials and methods in industrial arts; research and reports required.

511—**Philosophy and Organization of Vocational Education.** Four hours. Spring.
The basic principles involved in the development and operation of vocational programs under state and federal vocational laws.

530—**Advanced Graphic Science.** Four hours. As needed.
A study of the methods and materials used in graphic science, advanced engineering and architectural drafting. Study of the literature and techniqeus in this field.

562—**Research Methods: Industrial Arts.** Four hours. As needed.
A study of research methodology in industrial subjects with emphasis on design of experiments, research procedures, and statistical treatments.

592—**Special Problems in Industrial and Technical Education.** One to four hours.
Intensive study of a selected research area or problem in industrial and technical education.

594—**Seminar in Industrial Arts Problems I, II, III.** Two hours per quarter. May be taken three quarters. As needed.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

JOURNALISM (JOU – 212)

G-421—**Public Relations.** Four hours. Fall.

G-422—**Publicity Methods.** Four hours. Winter.

G-423—**Public Relations Practices.** Four hours. Spring.

G-431—**Business and Professional Publications.** Four hours. Winter, alternate years.

G-433—**Supervision of High School Publication.** Four hours. Spring, alternate years.

G-455—**Newspaper Organization and Management.** Four hours. Fall, alternate years.

G-456—**Public and Press Relations Management.** Four hours. Spring, alternate years.

LIBRARY SCIENCE (LS – 170)

G-470–**Multi-Media Materials and Services.** Four hours. Winter.

Principles and methods of developing multi-media materials and services in modern libraries. Emphasis is placed on the selection, evaluation, acquisitions, organization, storage, and utilization of multi-media in various types of libraries.

G-471–**Library Preparation and Production of Multi-Media Materials.** Four hours. Spring.

Fundamental techniques for design and production of multi-media materials for the purpose of using the various libraries and media centers with emphasis on laboratory practice in the preparation and production of such materials.

G-472–**Administration and Supervision of School Media Center.** Four hours. Summer.

Prerequisite: LS G-470 or LS G-471

A survey of the current trend for a media center in the modern school system with special attention to standards, planning, administration, personnel, facilities and equipment, materials, services, and management procedures of print and non-print materials.

G-491–**Library Workshop.** Four hours. Summer.

An intensive course through group study in the analysis of library problems with special attention given to current trends in school library and media center practice. Full-time work for two weeks, offered during the summer quarter, to be conducted through the cooperative efforts of the Department of Library Science and the Mississippi State Department of Education. May be taken twice.

504–**Reference Resources and Services.** Four hours. Fall.

The selection, evaluation, and use of general reference resources with emphasis on major types of reference works; provides the student with a working knowledge of the library as an information, study, or research center in the solution of typical reference problems.

508–**Principles of Classification and Cataloging.** Four hours. Winter.

A study of principles with practice in classifying and cataloging books and other library materials according to Dewey Decimal Classification, Anglo-American rules, and Sears subject headings with emphasis on the organization and function of the card catalog; the use and applications of printed cards and the organization of library resources for services in various types of libraries.

510–**The Library in Society.** Four hours. Summer.

The library as a social institution, its background, and the forces that have shaped its development. Particular attention is given to the public library's relationship to social, governmental, and educational agencies, and the national

and international role of the library.

520—**History of Books and Printing.** Four hours. Fall.
The evolution of the book from the earliest times to the present. An examination of the invention and spread of printing and its impact on the structure of society.

525—**Communication and Libraries. Four hours. Winter.**
Introduction to the audience, content, control, and channels of distribution of newspapers, radio, television, and motion pictures, with special attention to the relationship of the library to these media and its role as an agency of communication.

530—**Advanced Reference and Bibliography.** Four hours. Fall.
The study of major bibliographic and reference sources common to large research and reference collection. The importance of national and trade bibliographies for research and their use in library acquisition.

535—**Advanced Classification and Cataloging.** Four hours. Winter.
Problems in classification and cataloging, including serials, corporate entries, Library of Congress classification, and foreign rules of entry. The theory and practice of classification and subject headings.

540—**The College and University Library.** Four hours. Winter.
The development of the college and university library. Emphasis upon the role of the library in higher education, and upon problems of administration, personnel, financing, and buildings and equipment of academic libraries.

541—**The Public Library.** Four hours. Spring.
The development of the public library as an institution; organization, administration, community responsibilities; the library board, finance, and physical facilities.

542—**Special Libraries.** Four hours. As needed.
A study of the rise of the special library with a consideration of the objectives, administrative structure, and problems of special libraries. Provision of an opportunity for each student to investigate a particular field of special librarianship.

550—**Library Service to Children.** Four hours. Fall.
Consideration of library service to children in public libraries and school libraries with emphasis upon objectives, functions, problems of administration.

555—**Library Service to Young People.** Four hours. Spring.
The study of the objectives, functions, and problems of administration of

library services provided by public libraries and high school libraries to young people.

560—**Introduction to Information Science and Technology.** Four hours. Fall.
An introductory survey of information science and technology as related to library operation; overview of approaches and techniques currently developed to meet the information demands of research oriented library users. Emphasis is placed on terminology, historical background, system design and analysis, technological development, dissemination, organization, collection, storage, retrieval, interpretation, use of information and their potential for library information services.

561—**Library Automation.** Four hours. Spring.
A study of theory and practices in the application of electronic data processing equipment and utilization of automatic procedures for the performance of various library functions. Special attention is given to the augmentation of circulation, reference work, acquisitions, cataloging, book selection, serials control, inventory control, personnel and budget procedures.

562—**Information Retrieval Systems.** Four hours. Winter.
A survey and evaluation of the structure and operation of information storage and retrieval systems currently applied in libraries and information centers with special emphasis on abstracting, indexing, file organization, question analysis, research strategy, thesaurus construction and use.

565—**Bibliography and Literature of the Humanities.** Four hours. Fall.
Selection, evaluation, and utilization of library resources in the humanities with special attention to the development of collections in philosophy, religion, literature, art, music, and related fields.

566—**Bibliography of the Social Sciences.** Four hours. Winter.
Study and evaluation of major library resources in the social sciences with emphasis given to the development and growth of bibliographic and reference materials in the fields of history, political science, economics and business, geography, psychology, education, sociology and social welfare, anthropology, and related fields.

567—**Bibliography of Science and Technology.** Four hours. Spring.
An intensive study of library materials used in building collections and providing information in the pure and applied sciences. Special attention to such pure sciences as physics, chemistry, and biology, and to applied sciences of engineering, technology, agriculture, and related fields.

568—**Research Methods in Library and Information Sciences.** Four hours. Summer.

A survey of scientific research methods and their application to the fields of library and information sciences; designed to prepare students to select, formulate, and develop research projects as well as evaluate completed research in library and information sciences and related areas.

591—**Research in Library Science.** One to twelve hours. Hours arranged.

592—**Special Problems I, II, III.** One to three hours. Hours arranged.
Prerequisite: LS 540, 541, or 542.
Intensive reading and investigation of a selected problem in the student's field of particular interest.

594—**Field Problems.** Four hours. As needed.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

MANAGEMENT (MGT – 620)

G-468—**Wage and Salary Administration.** Four hours. Quarterly.
Prerequisite: MGT 360.
A study of wage and salary levels and structures including job analysis, job evaluation, wage surveys, and incentive systems.

G-472—**Collective Bargaining.** Four hours. Quarterly.
Prerequisite: MGT 370.
A study of the practices, techniques, procedures, methods, and legal and administrative requirements of collective bargaining relationships.

G-482—**Production Problems Seminar.** Four hours. Fall, Spring.
Prerequisite: Consent of instructor.
A case approach to the student of selected current problems in manufacturing management.

G-484—**Problems in Personnel Administration.** Four hours. Quarterly.
Prerequisite: Consent of instructor.
An application through problem solving and case analysis of the principles and techniques in personnel administration decision making.

510—**Production Management.** Four hours. Spring.
Prerequisite: Permission of department chairman.
An analysis of managerial production functions and processes by focusing upon the transformation of inputs into goods and services. Input factors of management, materials and land, labor, and capital will be interrelated with production functions.

515—**Operations Research.** Four hours. Fall, Winter.
An introductory course in the principles of operations research and management science.

520—**Problems in Managment.** Four hours. Winter.
A case study of selected social, economic, industrial, and personnel problems.

525—**Human Relations in Business.** Four hours. Fall, Winter, Summer.
A study of the problems of individuals and groups resulting from modern business organizations and techniques.

530—**Survey of Labor-Management Relations.** Four hours. Spring.
Prerequisite: Permission of department chairman.
A survey of the development and contemporary state of industrial relations, labor law, and collective bargaining.

560—**History and Philosophy of Management.** Four hours. Summer.
A review and analysis of the writings of Taylor, Gilbreth, Fayol, and later writers in the development of scientific and modern management.

565—**Organization Theory and Practice.** Four hours. Fall.
Prerequisite: MGT 525 or permission of department chairman.
The design, analysis, and evaluations of organizational structures in a business environment. Included are contemporary developments in the behavioral sciences, communications, quantitative and scientific management.

570—**Business Policy.** Four hours. Spring, Summer.
Prerequisite: Completion of 24 hours of graduate work.
A study of the fields of policy-making and administration from a top managment point of view. It integrates special fields of analysis and stresses the overall point of view in handling business problems.

592—**Special Problems in Management.** Four hours.
Prerequisite: Permission of department chairman.

598—**Thesis.** Six hours.
For students taking a management emphasis in the MBA program.

MARKETING (MKT – 625)

G-410–**Market Research.** Four hours. Quarterly.
Prerequisites: MKT 300 and MAT 320.
A study of principles and techniques used in market research and evaluation of such research.

G-475–**Promotion Development.** Four hours. Spring.
A study of the relationship of the business organization to the various interest groups which affect its promotional results, and the policies and procedures utilized in connection with such groups.

G-480–**Marketing Management.** Four hours. Quarterly.
A comprehensive course designed to synthesize the more specialized marketing knowledge of the student. The interrelation of all marketing activities in reaching the firms objectives is emphasized through the study of case histories.

535–**Seminar in Marketing.** Four hours. Fall, Winter, Spring.
Advanced study of marketing theories and phenomena.

540–**Market Planning.** Four hours. Spring.
A case study of the methods used by firms to reach their marketing goals.

550–**Market Research Seminar.** Four hours. Fall.
A study of advanced research techniques used in market analysis.

560–**Seminar in Marketing Theory.** Four hours. Winter.
A survey, analysis, and evaluation of the current research in marketing theory. Detailed attention is given to problems of determining the meaning and boundaries of marketing theory. The functional, psychological, and historical approaches are utilized. Emphasis is placed on the substantial content of marketing theories and their methodologies.

592–**Special Problems in Marketing.** Four hours.

598–**Thesis.** Six hours.

MARRIAGE AND FAMILY LIFE (M&FL – 830)

550–**Early Marriage Adjustment.** Four hours. Fall.
A study will be made of college marriages.

551—**The Family in the Community.** Four hours. Spring.
Designed to help the teacher understand better the social setting in which students live and its importance in the development of family living courses to meet student needs.

554—**Parents and Children.** Four hours. Winter.

592—**Special Problems in Family Living.** Two to six hours.

594—**Seminar in Family Living.** Two to six hours. Summer.

596—**Research in Family Living.** Two to six hours. Quarterly.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

MATHEMATICS (MAT – 350)

G-401—**Geometry.** Four hours. Fall, Spring.
Prerequisite: Secondary school geometry or MAT 409.
Essentially Euclidean geometry from a modern approach with brief mention of historical topics and some non-Euclidean geometries.

G-406—**Numerical Analysis I.** Four hours. Winter.
Prerequisites: MAT 326, CSS 210.
Methods of solving equations and systems of equations, error analysis, difference equations.

G-407—**Number Theory.** Four hours. Winter, Summer.
Mathematical induction, the well-ordering principle, the division algorithm, the Euclidean algorithm, the Fundamental Theorem of Arithmetic, number theoretic functions, the theory of congruences.

G-409—**Mathematics for Teachers of Junior High School Mathematics.** Four hours. Winter, Summer.
Prerequisite: MAT 310.
Introduction to numbers and infinite sets, geometry, non-Euclidean geometry, coordinate geometry, trigonometry, functions, probability, statistics, nature of mathematics.
(Open only to elementary and special education majors.)

G-411—**Vector Analysis.** Four hours. Fall, Spring.
Prerequisite: MAT 379.
Vector algebra, differentiation of vector valued functions, analysis of space curves, scalar and vector field theory, line and surface integration with introduction to the divergence theorem, Green's theorem, and Stoke's theorem.

G-415—**Introduction to Differential Equations II.** Four hours. Winter.
Prerequistie: MAT 405.
Homogeneous and nonhomogeneous systems of linear differential equations, characteristic equations, operator methods, methods of approximating solutions, application of Laplace transform to differential equations.

G-416—**Numerical Analysis II.** Four hours. Spring.
Prerequisites: MAT 405, MAT 406, and CSS 311.
The interpolating polynomial, numerical differentiation and integration, numerical solutions of differential equations, propagation of round-off error.

G-417—**Partial Differential Equations.** Four hours. Spring.
Prerequisties: MAT 405 and MAT 411.
Integrability conditions, differential geometry, quasilinear equations, linear equations, applications to physics, classifications of second order equations and canonical forms, the method of separation of variables.

G-418—**Linear Programming.** Four hours. Fall.
Prerequisite: MAT 326.
Convex sets, linear inequalities, general linear programming problems, extreme-point solutions, simplex computational procedure, applications.

G-420—**Statistics and Probability.** Four hours. Fall, Winter, Summer.
Sets, permutations, combinations, binomial and multinomial theorems, mathematical induction, graphic methods, basic statistical concepts.

G-423—**Modern Algebra I.** Four hours. Fall, Spring.
A development of the systems of integers, rational numbers, real numbers and complex numbers based on the properties of the natural numbers with emphasis on their structures.

G-424—**Modern Algebra II.** Four hours. Winter.
Prerequisite: MAR 423.
Subgroups, normal subgroups, quotient groups, permutation groups, homomorphisms and automorphisms of groups, Cayley's theorem.

G-425—**Fourier Series.** Four hours. Spring.
Prerequisites: MAT 326 and MAT 405.
Orthogonal functions, Fourier series, convergence of Fourier series, applications.

G-426—**Linear Algebra II.** Four hours. Fall, Spring.
Prerequisite: MAT 326.
Determinants, polynomials, complex numbers, single linear transformations, orthogonal, unitary and symmetric linear transformations.

G-431—**Theory of Functions of a Complex Variable I.** Four hours. Winter, Summer.
Prerequisite: MAT 379.
Complex numbers, functions of a complex variable, limits, continuity, differentiation, analytic functions, branch points and branches of multivalued functions, contour integration, power series, Taylor's theorem, Laurent's theorem.

G-435—**Laplace Transform.** Four hours. Winter, Summer.
Corequisite: MAT 405.
Laplace transforms, inverse transforms, the convolution theorem, differentiation and integration of transforms, applications to ordinary differential equations and linear partial differential equations.

G-441—**Advanced Calculus I.** Four hours. Fall.
Point set theory, sequences, continuity, uniform continuity, properties of continuous functions, limits, mean value theorems, L'Hospital's rule.

G-442—**Advanced Calculus II.** Four hours. Winter.
Prerequisite: MAT 441.
Riemann integration, Taylor's theorem, improper integrals, infinite series, uniform convergence.

G-443—**Advanced Calculus III.** Four hours. Spring.
Prerequisite: MAT 442.
Directional derivatives, partial derivatives, differentials, inverse functions, implicit function theorems, applications to geometry.

G-471—**General Topology.** Four hours. Winter.
General topological spaces, bases and subbases, continuity, connectedness, separation axioms, countability axioms, compactness, metrizability.

G-472—**Algebraic Topology.** Four hours. As needed.
Prerequisites: MAT 424 and MAT 471.
The fundamental group, homology and cohomology groups, simplicial complexes.

G-473—**Metric Spaces.** Four hours. Fall.
Continuity, Hausdorff and countability axioms, product topologies. Euclidean spaces, connectedness, compactness, Heine-Borell theorem, Bolzano-

Weierstrass theorem.

501—**Differential Geometry I.** Four hours. Fall.
Prerequisite: MAT 411.
An introduction to the theory of plane curves, space curves, and surfaces.

503—**Modern Algebra.** Four hours. Spring.
Prerequisite: MAT 424.
A study of the structure of rings, ideals, integral domains, and fields.

505—**Differential Equations I.** Four hours. As needed.
Prerequisite: MAT 415.
Topics from the theory of ordinary differential equations. Specific topics to be selected by the instructor.

506—**Differential Equations II.** Four hours. As needed.
Prerequisite: MAT 417.
Dirichlet, Neuman, and mixed boundary value problems. Classical techniques of solution of partial differential equations. Applications to various scientific fields.

507—**Differential Equations III.** Four hours. As needed
Prerequisite: MAT 506.
Topics to be selected by the instructor.

531—**Functions of a Complex Variable II.** Four hours. As needed.
Prerequisite: MAT 431.
Taylor series and Laurent series, residue calculus, conformal mapping with applications to physical problems, integral formulas of the Poisson type, analytic continuation.

532—**Functions of a Real Variable I.** Four hours. As needed.
Prerequisite: MAT 443.
Set theory, relations and equivalences, ordering of sets, real number system, sequences of real numbers, Borel sets, convergence of sequences, Lebesque measure; Riemann and Lebesque differentiation and integration theory.

533—**Functions of a Real Variable II.** Four hours. As needed.
Prerequisite: MAT 532.
Lebesque differentiation and integration theory, classical Banach spaces; functions, homomorphisms, completeness, subspaces, and uniform continuity in metric spaces; bases, separation axioms, product spaces, connectedness in topological spaces.

534—**Functions of a Real Variable III.** Four hours. As needed.
Prerequisite: MAT 533.
Vector spaces, linear manifolds, linear operators, topological vector spaces, weak topologies, convexity, Hilbert space, general measure and integration theory.

551—**Applied Mathematics I.** Four hours. Fall.
The study of vector spaces, linear transformations, matrices, eigenvalues, eignevectors, diagonalization, spectral decomposition, and cannonical forms.

552—**Applied Mathematics II.** Four hours. Winter.
Prerequisites: MAT 441, MAT 551. Corequisite: MAT 442.
Point sets in Euclidean n-space, sequences, continuity, convergence, integration, integral operator, and expansion theorems.

553—**Applied Mathematics III.** Four hours. Spring.
Prerequisite: MAT 552. Corequisite: MAT 443.
Integral equations, series and special functions.

571—**General Topology II.** Four hours. As needed.
Prerequisite: MAT 471.
A study of properties of topological spaces such as imbedding theorem and extension theorems, metrizability and compactification.

581—**Topics in Algebra.** Four hours. As needed.
Prerequisites: MAT 424 and permission of the instructor.

582—**Topics in Analysis.** Four hours. As needed.
Prerequisite: Permission of instructor.

583—**Topics in Topology and Geometry.** Four hours. As needed.
Prerequisite: Permission of the instructor.

591—**Research in Mathematics.** One to twelve hours.

594—**Mathematics Seminar I, II, III.** One hour each. Fall, Winter, Spring.
Prerequisite: Permission of instructor.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

631—**Functions of a Complex Variable III.** Four hours. As needed.
Prerequisite: MAT 531.
A continuation of MAT 531 including selected topics from the advanced theory of functions of a complex variable.

694—**Mathematics Seminar I, II, III.** One hour each. Fall, Winter, Spring.
Prerequisite: Permission of instructor.

MEDICAL TECHNOLOGY (MTC – 354)

592—**Special Problems in Medical Technology I, II, III, IV.** Two hours each.
Individuals will be assigned some specific clinical problem in medical technology to investigate under faculty direction. Credit will be determined by the quality of work done, varying from two to a maximum of eight hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as hours toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or doing internship at an affiliated hospital must enroll in this course.

598—**Thesis.** Six hours.

MICROBIOLOGY (MIC – 310)

G-400—**Medical Genetics.** Four hours. Fall, Summer.
Four hours lecture per week.
The basic principles of human genetics with emphasis on the causation of abnormality and disease.

G-405—**Pathogenic Microbiology.** Four hours. Fall, Summer.
Two hours lecture and four hours laboratory per week.
Prerequisite: MIC 339 and 340 and consent of instructor.
Schemes for isolation and indentification of major groups of disease producing organisms.

G-406—**Virology and Tissue Culture.** Four hours. Winter, alternate years.
Two hours lecture and four hours laboratory per week.
Prerequisite: MIC 340.
Survey of viruses and viral classification, including viral diseases, involving tissue culture techniques as applied to virology.

G-420—**Soil Microbiology.** Four hours. Fall, alternate years.
Two hours lecture and two 2-hour laboratory periods per week.
Prerequisites: MIC 339, 340, and organic chemistry, or consent of instructor.
Study of soil microflora, emphasis on Nitrogen-Carbon cycle in environment.

G-428—**Advanced Genetics.** Four hours. Spring, alternate years.
Prerequisites: BIO 101, 102, 401.
A continuation of BIO 401. Study of phenotypic effects of genes, of radiations and other mutagens, population genetics, speciation, microbial genetics, and regulations of gene motion.

G-429—**Microbial Genetics.** Four hours. Fall, alternate years.
Four hours lecture per week.
Prerequisites: MIC 340 and 428.
The genetics and molecular biology of microorganisms and their viruses. Mutation, transformation, transduction, conjugation, sex factors, and other plasmids studied.

G-436—**Interpretation of Biological Data.** Four hours. Winter, alternate years.
Prerequisites: MAT 103, BIO 401.
Techniques applicable to the design and interpretation of biological research data.

G-440—**Physiological Genetics.** Four hours. Fall, alternate years.
Prerequisite: BIO 401.
Recent advances in physiological genetics. Attention will be directed to literature on the nature of genes and to the interaction of heredity and environment in the expression of the characteristics of higher organisms.

G-441—**Microbiology of Water and Sewage.** Four hours. Spring, alternate years.
Two hours lectures and two 2-hour laboratory periods per week.
Prerequisites: MIC 339, 340, and organic chemistry, or consent of instructor.
Control of purity water supply: sources and types of pollution and control of sewage disposal.

G-442—**An Introduction to Clincial Instrumentation.** Four hours. Winter, Spring, Summer.
This course is particularly designed for the advanced medical technologists, to familiarize them with instrumental procedures commonly encountered in modern medical technology. Particular emphasis will be placed on spectrophotometry (visible and UV determinations), flame photometry, and fluorescent antibody techniques.

G-444—**Advanced Microbiology Techniques.** Four hours. Spring, alternate years.

Two hours lecture and four hours laboratory per week.

Prerequisite: MIC 339, 340, and organic chemistry, or consent of instructor.

Special emphasis is placed on microbiological techniques beyond the scope of MIC 340.

G-447—**Advanced Pathogenic Microbiology.** Four hours. Winter, Summer.

Prerequisite: MIC 405.

Contiuation of MIC G-405, on an advanced level; schemes for isolation and identification of major groups of disease producing organisms.

G-450—**Microorganisms in Health and Disease I.** Four hours. Fall, Summer.

Four hours lecture.

Course not designed for majors in the College of Science.

A comprehensive survey of the bacteria, viruses, rickettsiae, chlamydiae, yeasts, molds, protozoa and other human parasites, their relationship to man and his environment.

G-451—**Microorganisms in Health and Disease II.** Four hours. Winter, Summer.

A continuation of G-450.

A study of immunology, serology, and pathogenic microorganisms.

G-455—**Microbial Physiology.** Four hours. Spring, alternate years.

Four hours lecture per week.

Prerequisites: MIC 340.

Studies of the microorganisms' response to the environment by means of adaptive control mechanisms. Roles of transcription and translation of genetic information, along with replication of DNA considered.

G-471—**Immunology and Serology.** Four hours. Spring.

Two lectures and two 2-hour laboratory periods per week.

Prerequisite: MIC G-405.

Studies of infection, resistance, types of immunity, hypersensitivity and major techniques of diagnostic immumological reactions.

G-492—**Microbiological Problems I, II, III.** Two hours each.

Given only by special arrangement.

A course in special techniques, designed for majors with a need for certain basic microbiological techniques as tools for future research.

506—**Advanced Microbial Physiology.** Four hours. As needed.

Four hours lecture per week.

Concepts of microbial nutrition, metabolism, adaptation and genetics as

related to growth and environment.

508—**Medical Mycology.** Four hours. As needed.
Four hours lecture per week.
Prerequisite: BIO G-425.
Consideration of the fungi of medical significance.

539—**Industrial Microbiology.** Four hours. As needed.
An intensive study of yeasts, molds, and bacteria as they are applied in the production of amino acids, vitamins, steroids, enzymes, and organic acids and alcohols.

540—**Industrial Microbiology.** Four hours. As needed.
Continuation of MIC 539.

554—**Dynamics of Experimental Populations.** Four hours. As needed.
Prerequisites: BIO 401-G-401, MIC 428-G-428, or permission of instructor.
Review of concepts associated with phylogeny with particular attention to factors associated with changes in population structure leading to the formation of species.

570—**Principles of Immunochemistry.** Four hours. As needed.
Prerequisite: MIC 471.
A study of the chemistry of antigens, antibodies and complement and the mechanism of their interaction. Advanced techniques and methods involved in the study of antigen-antibody reactions with emphasis on the quantitative aspects of serological reactions.

571—**Immunohematology.** Four hours. As needed.
Prerequisite: MIC 471.
A study of the serology, genetics, and anthropological aspects of human blood groups, isoantigens and antibodies.

589—**Cytogenetics.** Four hours. As needed.
Two hours lecture and four hours laboratory per week.
Prerequisite: Consent of instructor.
Relationships between cytological and genetic systems.

592—**Special Problems in Microbiology I, II, III, IV.** Two hours each.
Prerequisite: A thorough background of microbiology.
Individuals will be assigned some specific problem in microbiology to investigate under faculty direction. Credit will be determined by the quality and quantity of work done varying from two to maximum of eight hours.

596—**Microbiology Seminar I, II, III.** One hour each. As needed.
The presentation and defense of current, classical concepts and principles of microbiology.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

791—**Research in Microbiology.** Credit to be arranged.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

MUSIC (MUS – 675)

G-411, G-412, G-413—**Advanced Composition.** Two hours each. Quarterly as needed.
Writing in larger forms for various choral and instrumental combinations.

G-431—**History of Opera.** Four hours. As needed.
The history of musical theatre from Greek drama to present. Open to non-music majors with consent of instructor.

G-432—**American Music.** Four hours. Summer.
A study of the development of music in North America with particular emphasis in three areas: (1) European heritage, (2) jazz, (3) composers of the twentieth century whose idioms evidence strong roots in American culture. Open to non-music majors with consent of instructor.

G-433—**20th Century Music.** Four hours. Summer and as needed.
Examination of music trends since Debussy and Mahler. Open to non-music majors with consent of instructor.

G-435—**Baroque Music.** Four hours. Fall and as needed.
The development of musical styles and forms from Monteverdi through J.S. Bach.

G-436—**18th Century Music.** Four hours. Winter and as needed.
The development of classical styles and forms, with particular emphasis on style galant, the Mannheim school, Empfindsamer Stil, and the Viennese classicists.

G-437—**19th Century Music.** Four hours. Spring and as needed.
The development of musical romanticism, with emphasis on the transformation and expansion of classical forms and the appearance of new formal and stylistic concepts.

G-441A, G-442A, G-443A—**Vocal Literature.** Two hours each. As needed.

G-441B, G-442B, G-443B—**Piano Literature.** Two hours each. As needed.

G-441C, G-442C, G-443C—**Organ Literature.** Two hours each. As needed.

G-441D, G-442D, G-443D—**Instrumental Literature.** Two hours each. As needed.

G-441E, G-442E, G-443E—**Choral Literature.** Two hours each. As needed.
A survey of accompanied and unaccompanied choral music from Gregorian chant to the present. Open to non-music majors with consent of instructor.

G-462—**Hymnology.** Four hours. As needed.
The history of the Christian hymn from its root to present-day forms.

G-463—**Administration of Church Music.** Two hours. As needed.
Practical aspects of church music, such as building a church library, organizing and directing various church choirs, the volunteer choir system, directing from the console, etc.

G-441F, G-442F, G-443F—**Symphonic Literature.** Two hours each. As needed.
The history and literature of the symphony orchestra from 1600 to the present. Open to non-music majors with consent of instructor.

G-441H, G-442H, G-443H—**Chamber Music.** Two hours each. As needed.
A survey of music for small instrumental ensembles. Open to non-music majors with consent of instructor.

500, 501—**Introduction to Research.** Two hours each. Fall and as needed.
The study of research techniques: bibliographical compilation; investigation of standard reference literature; writing of research papers. The second quarter investigates more thoroughly those areas of research of particular interest to students of musicology.

511, 512—**Pedagogy of Theory.** Two hours each. Alternate summers.

513—**Seminar in Music Theory.** Two hours. As needed.
For theory and composition majors; open to others with consent of instructor.

514—**Composition in a Large Form.** Six hours. As needed.
Open to students with a major in theory and composition.

515—**Recital.** 0 hours. Quarterly.
Required of students majoring in performance and conducting. Each student must pass a pre-recital audition before a committee of the graduate faculty at least five weeks prior to the recital date.

516—**Research Essay.** Three hours. Quarterly.

520—**Musical Acoustics.** Four hours. Summer.
An investigation into the nature and perception of musical sounds designed to lead to a better understanding of problems of tone production, intonation, and allied musical aspects.

521, 522, 523—**Analytical Techniques.** Two hours each. Fall, Winter, Spring, and alternate summers sequence.
Comprehensive analysis of music from various style periods.

539—**Graduate Music Theory.** Two hours. Fall, Summer.

550—**Seminar in History of Church Music.** Four hours. As needed.

551—**Liturgies.** Two hours. As needed.
Liturgy in worship: the Jewish, Eastern Orthodox, and Roman Catholic liturgies and their music; liturgies of the Reformation period; music of the Lutheran, Calvinist, and Anglican churches; music of non-liturgical churches.

552—**Gregorian Chant.** Two hours. As needed.
The history and development of Gregorian chant, with literature and recordings for demonstration purposes; practical experience in conducting the Gregorian chant.

561, 562, 563—**Seminar in Music Literature.** Two hours each. Fall, Winter, Spring.

Study of music of individual composers, or of special areas of music literature.

586—**Arranging for School Bands.** Two hours. Summer.

587—**Arranging for School Choruses.** Two hours. Summer.

588—**Arranging for School Orchestras.** Two hours. Summer as needed.

592—**Special Studies I, II, III.** One to three hours each.

Investigation of specialized areas of interest within the broad field of music, with emphasis on individual research. A committee of not less than three graduate faculty is appointed to evaluate the results of each study.

593—**Notation.** Four hours. As needed.

The forms of musical notation from the Middle Ages to the present day, with particular emphasis on the notation of polyphonic music prior to 1600.

630—**History of Style in Music.** Four hours. Spring and summer as needed.

Detailed analysis of selected musical works from antiquity to the 20th century. Special emphasis is placed upon the identification of style determinants. Doctoral students and conducting majors only.

692—**Special Studies I, II, III.** One to three hours each.

Doctoral students only.

696—**Seminar in Performance Practices.** Two hours. Winter and summer as needed.

A seminar in the performance of music from selected periods, with emphasis on music composed before 1800. Transcription of older music into forms suitable for performance by modern media. Doctoral students and conducting majors only.

MUSIC EDUCATION (MED – 680)

G-463—**Principles of Music in Action.** Four hours. As needed.

Prerequisite: MED 362 or equivalent.

A further refinement in music skills designed specifically for the minor in fine arts for elementary teachers. A laboratory course in basic theory, keyboard, conducting, rhythmics, class instruments, and creative listening. May not be applied toward a Master of Music or Master of Music Education degree.

G-490A, G-491A, G-492A—**Piano Workshop.** 1½ hours each. As needed. Cannot be applied toward a music degree.

G-490B, G-491B, G-492B—**Instrumental Workshop.** 1½ hours each. As needed. Cannot be applied toward a music degree.

G-490E, G-491E, G-492E—**Elementary Music Workshop.** 1½ hours each. Cannot be applied toward a music degree.

510—**Advanced Topics in Instrumental Music.** Two hours. Summer.
Current trends and practical topics in vocal music education, with emphasis on secondary and collegiate instruction.

512—**Advanced Topics in Vocal Music.** Two hours. Summer.
Current trends and practical topics in vocal music education, with emphasis on secondary and collegiate instruction.

514—**Organization and Administration of School Music Programs.** Four hours. Summer.
The organization, supervision, and evaluation of the total school music program, including problems of finance, in-service training, consultants, and selection of personnel and equipment.

516—**Music Programs for Community and Junior Colleges.** Four hours. As needed.
The evolution of music programs in junior colleges throughout the United States, with emphasis upon influences, programs, and services in junior colleges in Mississippi.

525, 526, 527—**Seminar in Music Education.** Two hours each. Quarterly
Required of all students purusing the master's degree in music education. Open by permission to other interested students. This course reviews current philosophies of education and their application to the music curriculum. In addition, the student will engage in studies of individually chosen problems of special interest.

532—**Graduate Conducting I, II, III.** Two hours each. Quarterly.

535—**Woodwind Techniques and Materials.** Two hours. Summer and as needed.

536—**Band Literature.** Two hours. Alternate summers.
A study of band literature from its emergence to the present. Emphasis is placed on individual research and preparation of representative literature for

performance.

540—**Music Education In the Elementary Schools.** Four hours. Summer.

545—**Brass Techniques and Materials.** Two hours. Summer and as needed.

550—**Music In General Education.** Four hours. Summer and as needed.
An examination of the role of music in the general education of students throughout the educational system.

555—**Psychology of Music.** Four hours. Fall and as needed.
A course designed particularly for the teacher or prospective teacher of music. Review of fundamental concepts from the science of psychology. Special study in the areas of auditory preception, motivation, and personality, leading to an understanding of individual differences in musical capacities and concomitant application in teaching.

556—**Evaluation and Guidance in Music Education.** Four hours. Winter and as needed.
The administration and interpretation of tests of musical talent and musical achievement. Practical application of tests results, inventories and other devices used in the teaching and guidance of music students in public schools, colleges, and universities.

565—**Percussion Techniques and Materials.** Two hours. Summer.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.
No thesis will be accepted unless accompanied by an abstract. Theses which employ questionnaires will not be accepted unless accompanied by summaries of the findings to be mailed to respondents.

625—**Doctoral Seminar In Music Education.** Four hours. Winter.
Orientation to doctoral study. Studies in the history and philosophy of music education.

626—**Doctoral Seminar In Music Education.** Four hours. Winter.
Primary focus on advanced research methods, techniques, and procedures appropriate to the doctoral level of music education. Individual projects to develop skill in reporting research.

627—**Teaching Music in Higher Education.** Two hours. Spring.
A seminar dealing with problems of teaching music in institutions of higher learning. Doctoral students only.

629—**Administration of College and University Music Programs.** Two hours. Summer.
Doctoral students only.

791—**Research in Music Education.** One to twelve hours.
Prerequisite: Approval of the major professor.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

PHILOSOPHY (PHI – 284)

G-412—**Philosophy of Politics.** Four hours. Summer.
A study of fundamental political concepts including law, government, sovereignty and state, and the relation of man's understanding of his own nature to the structuring of such concepts.

G-416—**Empiricism.** Four hours. Fall of even years.

G-417—**Rationalism.** Four hours. Fall of odd years.

G-418—**Philosophical Method.** Four hours. Spring of even years.

G-419—**Ideology and Utopia.** Four hours. Winter, Summer.
A philosophical study of the idea that the good of man is best served by a total reconstruction of society. Marxian and anarchist thinkers and their critics will form the basis of the study. Considerable attention will be given to explaining what it is to have an ideology, and how an ideology affects a man's acts.

G-420—**The Philosophy of Science.** Four hours. Spring.
A study of the condition and status of knowledge, perception, measurement, hypothesis, causality, and concept formation based upon recent scientific and philosophical investigation.

G-454—**Introduction to Symbolic Logic.** Four hours. Fall of even years.
The basic theory and operations of the sentential calculas, quantification, and the logic of relations.

G-460—**Analytic Philosophy.** Four hours. Spring of odd years.
A study of the historical background and development of the contemporary linguistic approach to philosophical problems based upon the writings of Wittgenstein, Wisdom, Ryle, and Austin.

520—**Seminar in Metaphysics.** Four hours. Winter.
Classical and contemporary metaphysics will be examined. Modern criticism by logicians, analytic philosophers, and philosophers of science will be presented.

525—**Seminar in Modern Philosophy.** Four hours. Fall.
A critical investigation of the writings of selected modern and contemporary philosophers.

530—**Seminar in Epistomology.** Four hours. Winter.
The problem of knowledge as presented in modern philosophic thought. Topics include the mind-body problem, the neural identity problem, behaviorism, etc.

535—**Ethics.** Four hours. Fall.

536—**Major Philosopher.** Four hours. Spring.

590—**Special Problems.** Two to eight hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

PHYSICAL EDUCATION (PE – 730)

G-401—**Corrective, Adaptive, and Developmental Physical Education.** Four hours. Spring.
Recognition of and corrective exercises for functional abnormalities.

G-408—**Techniques of Teaching Rhythms.** Two hours. Winter.
Practical experiences in group instruction in various areas of dance.

G-470—**Development of Athletic Attributes.** Four hours. Winter, Spring. Summer.
The physiological and psychological aspects of coaching. Off-season programs for developing efficiency of an athlete, strength, conditioning, and agility drills. A program of weight training, isometric, and circuit training. Player analysis and placement of personnel.

G-471—**Practice Organization, Scouting, and Communication Techniques.** Four hours. Fall, Spring, Summer.
Daily practice plans. All phases of scouting techniques. Cinematography and instructional resources, materials, techniques, and equipment for coaches.

G-480—**Kinesiology.** Four hours. Quarterly.
Analysis of movement based on a knowledge of anatomy and physiology as applied to the function of muscles in body mechanics.

509—**Age Characteristics of Motor Skills.** Four hours. Summer.
Analysis of activities and relationships to motor development of children in grades kindergarten through sixth.

540—**Problems of Administration in Physical Education.** Four hours. Fall, Summer.
Consideration of problems faced by administrators of physical education, and including such things as staff selection, financial problems and teacher-student ratio.

541—**Administration of Athletics.** Four hours. Fall, Summer.
Special emphasis on problems of the athletic director and coach in organizing and directing the athletic program through all levels of the educational structure.

542—**Problems of Curriculum in Physical Education.** Four hours. Winter, Summer.
Fundamental principles and bases of curriculum construction, analysis of activity for teaching purposes and program planning.

544—**Foundations and Trends in Health and Physical Education.** Four hours. Fall, Summer.
Scientific bases, history, principles, curricula, and professional preparation in health and physical education.

550—**Organization and Administration of Intramural and Extramural Activities.** Four hours. Winter.

Theory and practices in the organization and administration of intramural-extramural activities as they relate to finances, facilities, equipment, programming activities, and personnel.

551—**Principles of Teaching Physical Education.** Four hours. Summer.
Developing personal skills for graduate students in methods of teaching employing physiological and kinesiological principles.

560—**Physiology of Exercise Laboratory.** Two hours. Winter.
Use and care of physiology laboratory equipment.

561—**Advanced Physiology of Exercise.** Four hours. Winter, Summer.
A study which affords the student the opportunity to acquire knowledge about the physiological changes which occur during and after physical activity. The physiological changes include: circulatory, respiratory, endocrine, skeletal, muscular, and nervous systematic adjustments.

570—**Facilities and Equipment in Physical Education.** Four hours. Fall, Summer.
Planning facilities for physical education, with special consideration given to recommendations of the Athletic Institute, College Physical Education Association.

571—**Special Athletic Problems - Football.** Four hours. Winter, Summer.

572—**Special Athletic Problems - Basketball.** Four hours. Fall, Summer.

573—**Special Athletic Problems - Baseball.** Four hours. Winter, Summer.

574—**Special Athletic Problems - Track.** Four hours. Spring.

575—**Minor Sports.** Two hours. Fall, Spring,
Modern coaching technqiues of swimming, golf, tennis, and other sports of interest.

580—**Advanced Kinesiology.** Four hours. Summer.
The objectives of this course will be to apply the anatomical and physiological principles of kinesiology to the field of physical education. Students in this course will be involved in a practicum enabling each student to study a practical situation and apply the above mentioned principles.

584—**Tests and Measurements in Physical Education.** Four hours.
Tests of fitness, skills, and abilities. Administration and interpretation.

590—**Motor Learning.** Four hours. Spring.

This course is designed to investigate fundamental principles of movement in man. Physical and psychological variables essential to motor learning will be considered.

592—**Research Problems I, II, III.** Four hours each.

594—**Seminar in Physical Education and Research Techniques.** Four hours. Spring.

Discovery and recognition of problems, evaluation of problems and procedures, types and techniques of research.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours.

Credit deferred until thesis is completed.

750—**Readings in Physical Education.** Four hours. Winter.

Extensive reading and discussion of physical education literature.

760, 761, 762—**Physiological Effects of Motor Activity I, II, III.** Four hours each. 760 Fall; 761, 762, quarterly.

A graduate course that allows the student to reach an understanding of various physiological effects of activity and to enable him to pursue further any particular interest in this area.

784—**Principles of Design and Construction of Tests in Physical Education.** Four hours. Winter, Summer.

Prerequisites: Proficient background in test and measurements or permission of instructor.

Techniques and procedures in designing and constructing tests in physical education to include the following: (1) Elements to be measured; (2) Criterion establishment; (3) Preliminary selection of methods of measurement; (4) Characteristics of reliability, validity, objectivity, and practicality; (5) Establishment of final battery; (6) Test manual.

791—**Research in Physical Education.** One to twelve hours.

Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

796—**Problems in Physical Education I, II, III.** Two hours each. Quarterly.
Research in special physiological problems.

797—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**
Credit deferred until dissertation is completed.

PHYSICS (PHY – 360)

G-444—**Fundamentals of Solid State Physics.** Four hours. Spring.
Three hours lecture and one 3-hour laboratory period per week.
Prerequisite: Permission.
The basic physical processes which occur in solids, with emphasis on semiconductors and metals.

G-461, G-462, G-463—**Modern Physics.** Four hours each. Fall, Winter, Spring.
Prerequisites: PHY 381 and Mechanics.
Electromagnetic waves, electron emission, X-radiation, relativity, quantum theory, spectroscopy, wave mechanics, atomic and nuclear structure, and cosmic rays.

G-476—**The Physics of Waves.** Four hours. Spring.
Four lecture hours per week.
Prerequisite: Mechanics.
A treatment of waves in one, two, and three dimensions. Transverse waves, waves on a membrane, theory of elasticity, acoustic waves, diffraction, and spectrum analysis of waveforms.

G-481—**Nuclear Physics.** Four hours. Spring.
Prerequisite: PHY 381.
Nuclear binding forces, chain reaction, criticality, the non-steady state reactor, radiation shielding and detection.

G-485, G-486—**History and Literature of Physics.** Four hours each. Fall, Winter.
A survey of the history of physics from ancient times to 1900, stressing the rise and fall of concepts.
A survey of the influence of the concept of quanta and relativity and the modern laboratory findings which impinge upon these theories.

G-487—**Metorology.** Four hours. Winter.

Prerequisites: CHE 103 and PHY 103 or equivalent.

General circulation, vertical structure, and principal variables will be stressed. The course will include radiation heating, and cooling with gravity-density effect on moisture, as well as large scale motion.

520, 521—**Quantum Mechanics I and II.** Four hours each. Winter, Spring, Summer.

Prerequisite: Permission.

The Schroedinger equation, operators and eigenfunctions, spherically symmetric systems, scattering theory, matrix mechanics, angular momentum and spin, perturbation theory and identical particles.

530—**Astronomy for Teachers.** Four hours. Spring.

Three lecture hours and one laboratory session per week.

Lectures, demonstrations and discussions covering selected topics in solar-system and stellar astronomy. Emphasis is placed on those concepts pertaining to science teaching in the secondary schools.

571, 572, 573—**Theoretical Physics.** Four hours each. Fall, Winter, Spring.

Prerequisite: Permission.

Selected topics of general physics from an advanced point of view. Generally mathematical development of basic physical concepts.

574—**Special Topics in Theoretical or Experimental Physics.** Four hours. Spring, Summer.

Four lecture hours per week.

Prerequisite: Permission.

Subjects which may be studied under this heading depend upon current interests of students and staff. Will ordinarily be in areas for which no formal courses are offered.

591—**Research in Physics.** One to twelve hours.

594—**Seminar I, II, III, IV.** One hour each. As needed.

Prerequisite: Consent of the chairman of the department.

This course will be devoted to the study of current literature in physics and may be supplemented by laboratory research. The student will prepare and deliver one or more papers before the Department.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

POLITICAL SCIENCE (PS – 280)

G-401—**Ancient and Medieval Political Theory.** Four hours. Fall.
A description and analysis of political theory from the time of pre-classical Greece to the Renaissance in Europe.

G-402—**American Political Theory.** Four hours. Winter, Summer.

G-403—**Political Theory from Machiavelli to 1800.** Four hours. Winter.
Political theory from the Renaissance to the nineteenth century.

G-406—**American Political Parties and Pressure Groups.** Four hours. Quarterly.

G-407—**Mississippi Government.** Four hours. Winter.

G-408—**Political Theory Since.1800.** Four hours. Spring.
Political theory of nineteenth and twentieth century Europe.

G-410—**Southern Politics.** Four hours. Spring, Summer.
An examination of the politics and political culture of the southern states since 1945. The course consists of an analytical, synthesizing, and expository examination of the empirical literature.

G-412—**U.S. Consititutional Law.** Four hours. Fall, Spring.

G-414—**The Judicial Process.** Four hours. Fall, Winter.

G-416—**Comparative Judicial Politics.** Four hours. Spring.
Prerequisite: 412 or 414 or consent of the instructor.

G-434—**County Government.** Four hours. Winter.

G-435—**Municipal Government.** Four hours. Fall.

G-436—**The Legislative Process.** Four hours. Spring.

G-438—**The Presidency and Congress.** Four hours. Spring.
A study of the interplay of roles and functions, powers, and pressures among the President, the Bureaucracy, and the Congress in shaping the policies and actions of the United States, internal and external.

G-450—**Governments and Politics of Western Europe.** Four hours. Spring.

G-451—**Soviet Government and Politics.** Four hours. Winter.

G-452—**British Government and Politics.** Four hours. Fall.

G-453—**Soviet Foreign Policy.** Four hours. Fall.

G-454—**Politics of the World's Power Blocs.** Four hours. Winter.
Prerequsite: G-457 or permission of the instructor.
An intensive analysis of the pattern of politics resulting from the formation of the two major power blocs and the developing formation of lesser blocs such as that led by Communist China and the Neutralist bloc, the Common Market bloc, and the Japanese sphere.

G-455—**Problems in U.S. Foreign Policy.** Four hours. Winter.
An advanced undergraduate-graduate course, conducted as a colloquium to investigate current problems, both structural and substantive, facing American foreign policy and those who must formulate and implement It.

G-457—**International Politics.** Four hours. Winter, Spring.

G-458—**International Organization.** Four hours. Spring.

G-460—**Public Administration.** Four hours. Fall, Winter.

G-462—**Public Personnel Administration.** Four hours. Alternate years beginning 1973-1974.

G-463—**Organization and Management.** Four hours. Winter.

G-464—**Policy Formulation.** Four hours. Spring.

G-470—**Middle Eastern Governments and Politics.** Four hours. Winter.

G-472—**Far Eastern Governments and Politics.** Four hours. Winter.

G-474—**Tropical African Governments and Politics.** Four hours. Spring.

G-480—**Latin American Governments and Politics.** Four hours. Fall.

G-481—**Public Administration in Latin America.** Four hours. Alternate years beginning 1973-1974.

G-482—**Inter-American Politics.** Four hours. Winter.

G-483—**Latin American Political Integration and Development.** Four hours. Alternate years beginning 1973-1974.

G-486—**International Law of Peace.** Four hours. Spring, 1972-1973.
A study of international law with emphasis on the law of peace.

G-487—**International Law of War.** Four hours. Spring, 1973.
A study of international law with an emphasis on the law of war.

500—**Scope and Methods.** Four hours. Fall.
A survey of the scope of political science and of the tools and methods utilized in the discipline.

511—**Seminar in Political Theory.** Four hours. May be taken twice for credit. Winter.
Prerequisite: Another course in political theory or consent of the instructor.
A research-type course in which each student will make an intensive study of one or more areas of political theory, or of one or more great writers on political theory.

512—**Problems in Political Theory.** Four hours. May be taken twice for credit. Alternate years beginning 1973-1974.
Prerequisite: PS 511 or consent of the instructor.
A seminar devoted to a select number of central problems, which will vary from year to year.

520—**Seminar in U.S. Constitutional Law.** Four hours. May be taken twice for credit. Alternate years beginning 1973-1974.
Prerequisite: Another course in constitutional law, a course in U.S. constitutional history, or consent of the instructor.
A research-type course in which each student will make an intensive study of one or more field of U.S. Constitutional Law.

525—**Seminar in Public Law.** Four hours. May be taken twice for credit. Spring.
Prerequisite: A course in constitutional law or permission of the instructor.
A research course in which the students examine in depth various aspects of the judicial system and its relationship to other elements in the political process.

532—**Seminar in U.S. Government.** Four hours. May be taken twice for credit. Fall, Summer.
Prerequisite: Course in American national, state, and local government or consent of instructor.

An advanced course in the United States Government, including state and local levels.

540—**Seminar in Comparative Government and Politics.** Four hours. May be taken twice for credit. Spring.

Prerequisite: One or more courses in comparative government or consent of the instructor.

A research-type course in which each student will make an intensive study of the political institutions of one country, or of a group of countries having similar governments.

545—**Communist Ideology.** Four hours. Summer.

A critical study of materials from the basic writings of Communist thinkers: Marx, Lenin, Stalin, and Mao, with attention to modification made from period to period.

550—**Seminar in U.S. Foreign Relations.** Four hours. May be taken twice for credit. Winter.

Prerequisite: Another course in U.S. foreign policy or history of U.S. foreign policy or consent of the instructor.

A survey of current United States foreign policies and problems.

555—**Seminar in International Relations.** Four hours. May be taken twice for credit. Spring.

An intensive survey and analysis of the methodology, literature, and substance of the process of trans-state politics.

558—**Seminar in International Organizations.** Four hours. Fall.

A detailed analysis of international organizations as a phenomenon of the present world political system. A research-type course in which each student will make an intensive inquiry into specific organizations: their roles, structure, and functionings, as well as their effectiveness.

560—**Regulatory Commissions.** Four hours. Winter.

A study of the independent regulatory commissions in the context of separation of powers. The analysis will include the policies of the commissions, and the constitutionality of delegation of legislative power.

561—**The Administrative Process.** Four hours. Summer, 1973-1974.

A study of the Bureaucracy as a part of American Government with special emphasis on the role of the expert in modern administration. Restricted to old line Departments. Covers chain of command and the problem of control of administrative discretion.

580—**Seminar in Latin America.** Four hours. May be taken twice for credit. Fall, 1973-1974.

Prerequisite: Two Latin American political science or history courses at the 400 level or consent of the instructor.

A research type course in which each student will make an intensive inquiry into a field such as those described in PS 480 or 483, or in Latin American nationalism—regionalism—hemisphereism, or in a special project.

591—**Research in Political Science.** One to twelve hours.

592—**Special Problems.** One to four hours.

The student works individually on a paper in political science under the supervision of a graduate faculty member.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

791—**Research in Political Science.** One to twelve hours.

Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation**

POLYMER SCIENCE (PSC — 370)

G-410—**Drug Identification.** Four hours. As needed.

Lectures, demonstrations, and discussions will cover all aspects of drug identification with emphasis on the subjective nature of identification particularly as would be important to a law enforcement officer. This does not count toward a degree in polymer science.

501, 502, 503—**Advanced Polymer Science.** Four hours each. Fall, Winter, Spring sequence.

An in-depth study of polymer forming reactions, their scope and limitation. Relationships between Mn, Mw, polymer structure and conformation to physical properties of polymers.

594—**Polymer Science Seminar.** One to six hours. Fall, Winter, Spring.

598—**Thesis.** One to ten hours.

610, 611—**Selected Topics in Polymer Science.** Four hours each. As needed.

To include a survey of such topics as thermally stable polymers, conducting polymers, silicone polymers, electro deposition polymers, radiation curing of polymers and the like.

620—**Characterization of Polymeric Materials.** Four hours. Fall.

A study of techniques employed in the characterization of macromolecules. To include such topics as light scattering, end group analysis, osmometry, polymer fractionation, NMR, I.R., U.V., and visible spectroscopy, thermo-analytical evaluation and mass spectrometry.

640, 641—**Advanced Physical Polymer Science I, II.** Four hours each. Winter, Spring sequence.

A study of polymer chain conformation, macromolecular solutions, molecular weight distributions, morphology, rheology, structure-property relationships, and kinetics of addition, condensation and copolymerization.

650, 651—**Organic Coatings.** Four hours each. As needed.

A study of film forming compositions to include such polymers as polyurethanes, polyesters, polyamides, polyimides.

PSYCHOLOGY (PSY – 175)

G-445—**Social Psychology.** Four hours. Winter, Summer.

Prerequisite: PSY 201.

Psychological factors and influences in group behavior. Study of the individual in group situations, and the influence of the social environment on his behavior and development.

G-449—**Industrial Psychology.** Four hours. Fall, Spring.

Prerequisite: PSY 201.

Applications of psychological principles and methods to problems of industry emphasizing employee selection and placement, merit rating, accident reduction, training and measurement and improvement of employee morale.

G-451—**Psychological Measurement.** Four hours. Winter, Summer.
Prerequisites: PSY 201 and 360 or equivalent.
Theory, problems, and techniques of psychological measurement. Group tests of ability, aptitude, interests, and personality are emphasized.

G-470—**Sensation and Perception.** Four hours. Winter.
Prerequisite: PSY 370.
A survey of sensory and perceptual processes with emphasis on the visual system.

G-472—**Psychology of Learning.** Four hours. Fall, Spring.
Prerequisite: PSY 370.
A study of the basic problems, theories, concepts, and research in the areas of human and animal learning.

G-474—**Comparative Psychology.** As needed.
Prerequisite: PSY 370.
An introduction to the study of animal behavior with special emphasis on the comparison of psychological processes along the phylogenetic scale.

G-480—**Psychology of Personality.** Four hours. Fall, Winter, Summer.
Prerequisites: PSY 201 and permission of the instructor.
A study of the factors involved in the development of the mature personality, with an analysis of the structure and dynamics of personality; critical review of methods of personality evaluation.

G-481—**Abnormal Psychology.** Four hours. Fall, Winter,
Prerequisites: Good background in psychology and permission of the instructor.
Study of the major psychoses, the psychoneuroses, and mental deficiency. Primarily for pscyhology majors, pre-medical students, and students planning to enter law, social work, teaching, or the ministry.

G-482—**Physiological Psychology.** Four hours. Fall, Spring. Summer.
Prerequisite: PSY 201.
Relationships between physiological functions, especially those of the nervous system, and psychological functions, including perception, emotion, motivation and learning. Primarily for psychology majors and pre-medical students.

G-484—**History and Systems of Psychology.** Four hours. Fall, Spring.
Prerequisite: Permission of the instructor.
Review of the history of psychology and intensive study of current systems of psychology. Primarily for psychology majors as final senior course.

502—**Advanced Experimental Psychology.** Two hours. As needed. May be taken twice for credit.

Critical evaluation of and use of a variety of experimental techniques. Each student conducts an original study.

505—**Research Evaluation in the Behavioral Sciences.** Four hours. Fall.

Seeks to develop skill in evaluating the methodological soundness and usefulness of behavioral science research.

522—**Personality.** Four hours. Spring.

Consideration of the major theories of personality, and research on the development and measurement of personality.

523—**Personnel and Industrial Psychology.** Four hours. Spring.

Intensive study of selected problems in industrial and personnel psychology.

524—**Physiological Psychology.** Four hours. Winter.

Study of neurophysiological mechanisms in behavior, and related problems.

531—**Clinical Psychology.** Four hours. Fall.

Prerequisite: Permission of the instructor.

A survey course intended to acquaint the student with the field of clinical psychology. Emphasis on the use of clinical tests in personality diagnosis, a survey of psychotherapeutic techniques, and the research functions of the clinician.

534—**Principles of Behavior Modification.** Four hours. Winter, Summer.

Prerequisite: Permission of the instructor.

An intensive study of the principles of behavioral change and the evaluation of educational and clinical research in behavior modification. Research projects will be required.

536—**Pre-Practicum in Clinical Psychology.** One to four hours per quarter with a maximum of twenty quarter hours. Quarterly.

Prerequisites: PSY 538, 587, or 588, and permission of the instructor.

Open only to psychology majors planning to enter the clinical field.

This course is designed to give actual clinical experiences to the beginning graduate student. Administration and interpretation of psychological tests as well as therapeutic work with children and adults.

538—**Introduction to Personality Assessment.** Four hours. As needed.

Prerequisite: Permission of instructor.

Introduction to the theory and use of various psychological tools, including objective and projective devices as well as interviewing techniques.

549–**Management Training and Development.** Four hours. As needed.

Study of the principles and procedures of the training and development of management, with emphasis on surveying training needs, applying the principles of learning and motivation in implementing training methods and techniques, and evaluating results of training and development.

562–**Research Methods: Descriptive Statistical Methods.** Four hours. Fall.

Prerequisite: PSY 360 or permission of instructor.

A brief review of measures of central tendency and variability with emphasis upon correlation theory, techniques of calculation and application of correlation methods to tests and research data. Introduction to sampling problems, Pearsons Product Moment Method of Correlation, biserial, point biserial correlations, tetrachoric correlation, contingency correlation, partial and multiple correlation.

563–**Research Methods: Significance Tests and Experimental Designs.** Four hours. Winter.

Prerequisite: PSY 562 or permission of instructor.

A brief review of descriptive statistics and normal curve functions. Study of inference and sampling theory emphasizing parametric and non-parametric tests of significance: critical ration, t-test, chi square, analysis of variance, problems of experimental design.

587–**Individual Psychological Testing: Stanford-Binet.** Four hours. Fall, Spring.

Prerequisite: Approval of departmental head or instructor.

To equip psychological workers to administer individual intelligence tests, and to interpret and apply the test results for diagnosing difficulties in scholastic and personality adjustment. Thorough analysis and intensive practice in mental testing is afforded. The Terman-Merrill Revision of the Stanford-Binet is employed.

588–**Individual Psychological Testing: Wechsler Scales.** Four hours. Winter, Summer.

Prerequisite: Approval of department head or instructor.

To equip the psychological worker to administer individual intelligence tests, and to interpret and apply the test results for diagnosing difficulties in scholastic and personality adjustment. Thorough analysis and intensive practice in mental tesing is afforded. The Wechsler Scales are employed.

591–**Research in Psychology.** One to twelve hours.

592–**Special Problems I, II, III.** One to three hours.

Intensive study of selected research area or field of professional psychology.

594—**Seminar in Problems in Contemporary Psychology I, II, and III**. One or two hours each quarter for three quarters, not to exceed a total of six hours. Fall, Winter, Spring.

597—**Independent Study and Research.** Four hours.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Four hours. Credit deferred until thesis is completed.

602—**Experimental Design.** Four hours. Spring.
A study of the rationale underlying the selection of appropriate design for experimental work and the analysis and interpretation of results obtained through the use of such designs.

620—**Philosophy of Science.** Four hours. As needed.
A study of scientific methodology, theory construction, and system building in modern psychology.

635—**Administration, Supervision, and Consultation in Psychology.** Four hours. Summer.
Prerequisites: PSY 536 and permission of the instructor. Required for clinical doctoral students.

A professional course to provide the student with knowledge of techniques of administration, supervision, and consultation. Emphasis will be placed on the similarities and differences in the three techniques. The primary aim is to broaden the student's abilities to meet the needs of more persons and groups by disseminating his professional knowledge in ways other than only by direct contact with clients.

640—**Comparative Psychology**. Four hours. As needed.
An examination of methodology employed in animal research, and results of experimentation in the area of animal behavior.

650—**Motivation.** Four hours. As needed.
Prerequisite: EPY 503 or EPY 603.
A study of the current theories and research in the area of human and animal motivation.

651—**Advanced Psychological Measurement.** Four hours. As needed.
Prerequisite: PSY 562 (PSY 451 is recommended).
An intensive study of the theory and techniques of psychological

measurement. Reliability, validity, combining tests into a battery, test construction and scaling are emphasized.

660–**Perception.** Four hours. Fall.
Prerequisite: Permission of the instructor.
The development and nature of human perception and its relation to adaptive behavior.

672–**Advanced Psychopathology.** Four hours. Winter.
Prerequisites: PSY 481, PSY 522, and permission of the instructor.
Intensive study of personality dynamics as related to aberrant behavior, with emphasis on current research.

676–**Experimental Child Psychology.** Four hours. Spring.
Prerequisite: PSY 370 or permission of the instructor.
An intensive study and evaluation of theory, methodology, and research in child psychology.

677–**Seminar in Developmental Psychology.** Four hours. May be taken for a total of twelve hours. As needed.
Prerequisite: Permission of the instructor.
Consideration of specific contemporary problems and issues in developmental psychology.

701–**Factor Analysis.** Four hours. Summer.
Methods of multivariate analysis, emphasizing methods of factor analysis and cluster analysis.

710–**Personality Assessment.** Four hours. Fall.
Prerequisites: PSY 538 and permission of instructor.
A study of the theory and practice in the selection, administration, and interpretation of tests used in assessment of personality. It is recommended that this course be taken in conjunction with PSY 731I.

731–**Clinical Psychology Practicum I, II, III.** Four hours each. Fall, Winter, Spring.
Prerequisites: PSY 538, PSY 587, PSY 588, and permission of the instructor. Open only to psychology majors at the doctoral level.
An analysis of the interrelations between behavior disorders and psychodiagnostics with a view to the selection and application of appropriate therapeutic programs within a clinic setting.

740–**Systems of Psychotherapy.** Four hours. As needed.
Prerequisites: PSY 672 and permission of instructor.

An analysis of the theories and techniques of current systems of psychotherapy.

787—**Advanced Experimental Psychology I, II, III.** Four to twelve hours. As needed.

For graduate students who wish to conduct research on individual problems not included in graduate thesis. Emphasis is placed upon background preparation, design, and analysis of research data. Problems should be of publishable quality.

791—**Research in Psychology.** One to twelve hours.

Prerequisite: Permission of the instructor.

792—**Seminar in Case Studies.** Two hours.

Prerequisite: Permission of the instructor.

Presentation of actual case studies for evaluation and discussion by advanced gradute students.

795—**Internship in Clincial Psychology.** Credit arranged.

Prerequisite: Successful completion of clinical psychology practicum and approval of Director of Clinical Psychology Training. Required calendar year of internship in mental health setting approved by the American Psychological Association. Credit may not be applied toward a graduate degree.

797—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and consulting with a major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation**

PUBLIC ADDRESS (PA – 216)

G-432—**Symbolic Function in Persuasion.** Four hours. Spring, alternate years.

G-438—**Theories of Speech Behavior.** Four hours. Winter, alternate years.

Study of interrelationships of communication theory and psychology, linguistics, computer analysis, and information theory.

G-453—**Political Campaign Rhetoric.** Four hours. Fall of election year, state or national.

575—**History and Criticism of American Public Address.** Four hours. Summer, alternate years.

RADIO-TELEVISON-FILM (RTF – 220)

G-424–**Radio and TV Law.** Four hours. Fall, alternate years.

G-426–**Radio Station Mangement.** Four hours. Fall, alternate years.

G-445–**Audience Analysis.** Four hours. Spring.

G-492–**Special Problems in Radio and Television.** Four hours.

RECREATION (REC – 735)

G-410–**Organization and Administration of Public Recreation.** Four hours. Fall.

A study of the organization and administration of public recreation agencies.

G-412–**Business Procedures for Parks and Recreation.** Four hours. Winter.

A study of specific business procedures and administrative policies and forms related to public and non-public recreation agencies.

G-414–**Financing Parks and Recreation.** Two hours. Winter.

A study of the specific financing methods and funding programs available for parks and recreation.

G-423–**Theory of Recreation Programming.** Four hours. Winter.

A study of the methods and techniques related to planning, scheduling, and organizing recreational programs and activities.

G-425–**Theory of Recreation Leadership.** Four hours. Fall.

A study of the methods and techniques for leading individuals in small and large group recreational activity.

G-431–**Environmental Aspects of Recreation.** Four hours. Winter.

A study of the inter-relationships between recreational participation, public enjoyment, and environmental resources.

G-435–**Park Development and Design.** Four hours. Spring.

A study of the theory of park site development and design.

G-437–**Park and Recreation Planning Methodology.** Four hours. Fall.

A study of the methods, techniques, and procedures for systematic park and recreation planning and plan preparation.

G-439—**Urban Recreation and Open Spaces.** Four hours. Winter.
A study of all aspects of parks and recreation in the urban community.

G-442—**Park Management and Operation.** Four hours. Fall.
A study of the theory and current practices involved in the effective management and operation of parks and recreation areas.

G-444—**Operation and Maintenance of Special Areas and Facilities.** Four hours. Winter.
A study of methods, techniques, and current practices for constructing, operating, and maintaining special recreation areas and facilities.

G-446—**Resources Management and Policy.** Four hours. Winter.
A study of management policies, methods, and procedures for large natural resource areas having recreational value and use.

G-455—**Outdoor Education.** Four hours. Spring.
A study of outdoor education, specifically its philosophy, programs, methods, and resources.

G-457—**Interpretation of Cultural and Natural Resources.** Four hours. Spring.
A study of the techniques of the interpretation of cultural and natural resources for recreational and educational purposes.

G-460—**Youth Service Programs and Organization.** Four hours. Fall.
A study of the responsibilities, relationships, organization, administration, and activities of youth-service programs.

G-462—**Community Center Programs and Operation.** Two hours. Winter.
A study of the administration, programs, and operation of public and organizational community centers.

G-464—**Playground Programs and Operation.** Two hours. Winter.
A study of the administration, programs, and operation of public and organizational neighborhood playgrounds.

G-466—**Community-School Recreation.** Four hours. Spring.
A study of the organization, inter-relationships, and conduct of community-school recreational programs.

G-473—**Therapeutic Recreation Programming.** Four hours. Winter.
A study of the organization, programming, and special conduct of recreation programs and activities in institutional and hospital settings.

G-475—**Gerontology and Recreation for Later Years.** Four hours. Spring.

A study of the aging process and the special recreational needs, problems, opportunities, and activities of older people.

G-480–**Field Orientation to Recreation I, II, III, IV**. Two hours each. Arranged.

A field investigation and evaluation of outstanding recreational projects, programs, areas, and facilities. This course is not to be counted toward major requirements.

501–**Problems and Emerging Trends in Recreation.** Four hours. Fall.

A study of the problems, emerging trends, and special opportunities related to the field and profession of recreation, with emphases on analysis, evaluation, and alterative solutions.

502–**Research and Evaluation in Parks and Recreation.** Four hours. Fall.

A theoretical study affording some practical application of the methods, techniques, procedures, standards, criteria, and other requirements related to research and evaluation in the professional field of recreation.

503–**Philosophical Foundations of Recreation.** Four hours. Winter.

A study of prevailing foundational concepts, theories, and professional philosophies, and those which should evolve to guide future professional endeavors and courses of action.

504–**Special Field Studies in Recreation.** Four hours. Spring.

An application of theory to practice involving individual investigation, research, and report on some pertinent and prevailing problem or project proposal related to the field of recreation.

590–**Seminar in Recreation I, II, III, IV.** One hour each. Arranged.

A seminar course pertaining to selected professional topics having pertinency and timeliness to the profession of recreation.

597–**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598–**Thesis.** Six hours.

Selected with approval of the department faculty.

791–**Research in Recreation.** One to twelve hours.

792–**Special Problems.** Four hours.

797—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

SCIENCE EDUCATION (SCE – 380)

G-400—**BSCS—Biology for Secondary Teachers.** Four hours. Spring.

Six hours lecture - laboratory per week.

Prerequisite: Biology background or permission of the instructor.

A detailed critical examination of the subject matter, techniques, and methods for teaching biology in secondary schools as proposed by the Biological Sciences Curriculum Study. Designed to orient teachers in modern biology subject matter and special techniques by presenting background materials and special laboratory exercises. Emphasis is placed on the laboratory as the source of information from which sound conclusions can be drawn.

G-401—**CHEM—Chemistry for Secondary Teachers—Methods and Techniques.** Four hours. Summer.

Two hours lecture and four hours laboratory work per week.

Prerequisite: Chemistry background or permission of the instructor.

A course designed to familiarize chemistry teachers with the materials, methods, and techniques of teaching chemistry developed by the Chemical Education Material Study Committee. Unifying principles of chemistry are emphasized, with laboratory work providing the basis of development. Not allowable as credit toward degree requirements for chemistry majors.

G-402—**PSSC—Physics for Secondary Teachers—Methods and Techniques.** Four hours. As needed.

Two hours lecture and four hours laboratory work per week.

Prerequisite: Physics background or permission of the instructor.

A course designed to familiarize physics teachers with methods, materials, and techniques of teaching physics developed by the Physical Science Study Committee. Not allowable as credit toward degree requirements for physics majors.

G-403—**Earth and Environmental Science for Intermediate School Teachers.** Four hours. Fall.

Prerequisite: Earth and environmental science background or permission of the instructor.

A course designed to familiarize teachers with the materials, methods, and

techniques developed by the earth and environmental science projects. Emphasis is placed on laboratory and field work for data collection, and principles of other sciences as they relate to the study of the earth.

G-404—**Biological Sciences for Intermediate School Teachers.** Four hours. Winter.

A detailed critical examination of the subject matter, techniques, and methods for teaching the life sciences in a locally structured, student-oriented-classroom. Micro-teaching is provided to insure a new kind of teaching as required by new kinds of educational materials. This course may be used to fulfill University core requirements.

G-405—**Physical Sciences for Intermediate School Teachers.** Four hours. Spring.

A detailed critical examination of the subject matter techniques, and methods for teaching the various modern physical science curriculum project materials. This course will orient teachers with the philosophy of science as a tool of learning and emphasize the use of the laboratory as a tool of science. This course may be used to fulfill University core requirements.

500—**Science Curriculum in the Public Schools.** Four hours. Fall.

Prerequisite: Permission of the instructor.

Involves a critical examination of the research, its implications, and trends in science course content. Course will include the use of seminars, research problems, independent study, advanced courses, etc., in the secondary schools.

501—**Problems in Science Teaching.** Four hours. Winter.

Prerequisite: Permission of the instructor.

A study of problems related to curriculum, methodology, activities, professionalism—scientific and educational, and evaluation in science teaching. Involves the examination of recent research in these areas.

502—**Techniques of Demonstrating and Experimenting with Scientific Principles.** Four hours. As needed.

Prerequisite: Permission of the instructor.

A course designed especially for general science teachers, considering fundamental aspects of biology, chemistry, geology, and physics. Provides for examination of modern material, equipment, and apparatus, and the use of the material in demonstrating and experimenting with scientific ideas.

510—**Physics for Elementary School Teachers.** Four hours. Summer.

Prerequisites: 8 hours in physical science and 8 hours in biological science.

The physics course is designed principally for the purpose of providing teachers with a deeper knowledge of matter and energy and understanding of their relationships. The course is organized around principles and general ideas

(and their developments) that can be directly applied to the elementary grade. Particular attention is given to quantitative processes pertaining to the understanding of the properties of matter and energy.

511—**Chemistry for Elementary School Teachers.** Four hours. Spring.

Prerequisites: 8 hours in physical science and 8 hours in biological science.

In keeping with the current trends in chemistry teaching, major emphasis in this chemistry course will be placed upon: (1) relating ideas and facts; (2) understanding widely applicable principles; (3) placing heavy reliance upon laboratory work; (4) striving toward closer continuity between subject matter and pedagogy; and (5) deriving the necessary operational and conceptional definitions necessary to think about chemical systems. There will be a shift of emphasis from descriptive chemistry toward chemical principles to represent the changes in chemistry that have taken place over the last two decades.

512—**Biology for Elementary School Teachers.** Four hours. Fall.

Prerequisites: 8 hours in physical science and 8 hours in biological science.

A course in general modern biology emphasizing the molecular aspects of animate matter.

513—**Earth Sciences for Elementary Schools Teachers.** Four hours. Winter.

Prerequisites: 8 hours in physical science and 8 hours in biological science.

This course is designed to provide elementary teachers with a general background understanding of natural phenomena of the earth with its relationships in space. Particular emphasis is placed on those processes that are directly applicable to grades 1 through 6.

598—**Thesis.** Six hours.

791—**Research in Science Education.** One to twelve hours.

796—**Seminar.** Two hours each quarter for no more than three quarters. Quarterly.

Meets for two hours weekly.

Discussion of current trends and practices in science education; invited speakers; and discussions of prospecti and research of current students in science education.

797—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward degree.

Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

SECONDARY EDUCATION (CIS – 120)

G-462–**Curriculum of the Secondary School.** Two hours. Winter, Summer.
A critical examination of the present day curriculum with emphasis upon the core curriculum.

G-464–**Student Activities in Secondary Schools.** Two hours. Winter, Summer.
Consideration is given to the general nature and organization of the program popularly known as extra-curricular activities. Major emphasis is upon the various activities that constitute an activity program in a modern high school.

501–**Algebra for Secondary Teachers.** Four hours. Fall.
A consideration of problems peculiar to the teaching of algebra and a review of special algebriac principles.

506–**Geometry for Secondary Teachers.** Four hours. As needed.
A consideration of problems peculiar to the teaching of high school geometry and a review of special geometric principles.

508–**High School Curriculum.** Four hours. Winter, Summer.
Various designs of the curriculum as they apply to general and specialized education, and a critical evaluation of content of subject matter areas in terms of the needs of youth.

597–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598–**Thesis.**

600–**Vocational Education in Mental Retardation.** Four hours. Winter, alternate summers.

601–**Developmental Learning in Learning Disabilities.** Two hours. Spring, alternate summers.

602–**Learning Theories in Special Education.** Two hours. Fall, alternate summers.

603–**Braille.** Four hours. Fall.

604–**Teaching of Braille.** Four hours. Winter.

605—**Special Adjustments for Visually Handicapped.** Four hours. Spring.

625—**Advanced Curriculum Studies for the Mentally Retarded.** Four hours. Winter, Summer.

Study of different approaches to curriculum development, with emphasis on basic philosophy and goals of teaching mentally retarded.

692—**Reading and Research in Special Education I, II, III, IV.** One hour each. As needed.

694—**Advanced Seminar in Special Education I, II.** Two hours each. As needed.

Problems of diagnosis, treatment, critically reviewing the literature, and designing and conducting research on exceptional children are considered.

696—**Field Problems in the Administration of Special Education.** One to six hours credit. As needed.

Students participate in the activities of an organization involved in administering or teaching special education. This may be at the state or local level, and the student gains supervised experience in an organized program.

735—**Advanced Study of Problems and Issues in Special Education.** Four hours. May be repeated for credit. On demand.

Study of special problems and issues such as philosophy, law, administration, implementation of programs, etc.

791—**Research in Special Education.** One to twelve hours.

Prerequisite: Approval of the major professor.

792—**Special Problems.** Four hours.

796—**Practicum in Case Work and Guidance of the Exceptional Child.** Two to eight hours. As needed.

Individual cases are tested by students and all available information is integrated for diagnostic and educational purposes.

797—**Independent Study and Research.** Hour arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798—**Dissertation.**

523—**Research and Problems in Mathematics Education.** Four hours. As needed.

A seminar for experienced teachers who wish to plan developmental programs of instruction in light of recent investigation and research. Topics to be considered include teaching strategies, language and symbolism, programmed instruction, current research in mathematics education, and other topics of general interest.

550—**Advanced Study of Problems and Issues in Teaching Secondary School Social Studies.** Four hours. Summer.

Explores inquiry strategies for the social studies classroom and seeks to foster a firm understanding of basic analytical concepts and principles for the experienced social studies teacher.

554—**Reading in the Secondary Schools.** Four hours. Spring, Summer.

A course providing for extensive study of recent trends in materials and methods in reading in secondary school including significant research studies which relate to these.

592—**Special Problems I, II, III.** One hour each.

594—**Field Problems.** Four hours. As needed.

597—**Independent Study and Research.** Hours arranged.

Not to be counted as credit toward a degree.

Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Six hours. Credit deferred until thesis is completed.

600—**Seminar in Secondary Education.** Four hours. As needed.

An investigation of the major trends in the disciplinary areas of the curriculum with emphasis upon research findings within each area as related to how each contributes to the accomplishment of the objectives of the secondary school.

605—**Professional Subject Matter in Mathematics.** Four hours. As needed.

A study of ways to enrich teaching of high school mathematics by the introduction of elementary topics from college mathematics.

607—**Materials in the Teaching of Mathematics.** Four hours. As needed.

A study of materials to be used in the teaching of secondary mathematics for multi-sensory aids, mathematics clubs, evaluation, and applications.

608–**Mathematics for Junior High School Teachers.** Four hours. As needed.
Prerequisite: To be teaching junior high school mathematics or have at least a minor in college mathematics.
A consideration of problems peculiar to the teaching of mathematics in grades 7, 8, and 9, and the organization of mathematical subject matter for these grades.

609–**Advanced Professional Subject Matter in Mathematics.** Four hours. As needed.
Prerequisite: CIS 605.

697–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a research problem and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

698–**Research Problem.** Four hours. (For Specialist Certificate)

791–**Research in Secondary Education.** One to twelve hours.
Prerequisite: Approval of the major professor.

792–**Special Problems.** Four hours.

797–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798–**Dissertation.**

SOCIOLOGY (SOC – 292)

G-401–**Population.** Four hours. Winter.
A course in population analysis. An introduction to the science of demography. Instruction is given in how to compute and interpret vital data. Special attention is given to Mississippi population data.

G-410–**Social Control and Collective Behavior.** Four hours. Winter.
A study of principles and techniques by which conformity to the laws and other norms of social units is produced and maintained. Additional emphasis is placed on collective efforts to escape from or redefine social forms.

G-420—**Industrial Sociology.** Four hours. Spring.
An advanced sociological study of industrial and business units as social systems in their institutional setting.

G-429—**Juvenile Deliquency.** Four hours. Fall, Spring.
A study of causes and the nature of juvenile delinquency, the development of the juvenile court, of probation and other rehabilitative programs.

G-430—**Social Foundations of Personality.** Four hours. Winter, Summer.
A comprehensive treatment of the role of the social group and the cultural heritage in the development and functioning of human personality.

G-436—**Sociology of Education.** Four hours. Summer.

G-450—**Social Institutions.** Four hours. Spring.
A detailed study of major American social institutions; their functions, interrelationships, and significant trends.

G-465—**Gerontology.** Four hours. Winter.
Sociology of aging.

G-470—**Advanced General Sociology.** Four hours. Fall, Spring.
An advanced course in general sociology giving expanded treatment to the basic sociological concepts and subject matter areas. A basic course in a graduate program.

G-481—**History of Social Thought.** Four hours. Fall.
An introduction to social theory. A survey of men and ideas that have influenced the development of Western civilization.

G-482—**Sociological Theory.** Four hours. Fall, Spring.
A survey of the growth and development of sociological theory from Comte to the present.

G-485—**Methods of Social Research.** Four hours. Fall, Spring.
A survey of the basic techniques and methods essential to locating, processing, and presenting research materials.

Courses Exclusively for Graduate Students

501—**Departmental Seminar.** One hours. May be repeated once for a total of two quarter hours. Quarterly.
Required of all graduate majors.

507—**American Community Life.** Four hours. Fall.
A study of American community life and its social and cultural patterns.

530—**Social Control and Social Change.** Four hours. Fall.
A study of the forms of social control. Independent research projects are reported to the class for discussion and evaluation.

550—**Social Institutions.** Four hours. Winter.
An advanced course in social institutions. A study of the structure and function of the five basic institutions. Each student will select one institution for intensive study.

570—**Seminar in Sociological Theory.** Four hours. Winter.
A detailed study of the content and influence of selected major contributors to sociological theory.

580—**Seminar in Demography.** Four hours. Summer.
Designed to develop understanding of data and trends in world and national population and to provide basis for assessing demographic implications of social and scientific change.

592—**Special Study Projects in Sociology I, II, III, IV.** Two hours each.
Special projects in reading, survey, or research in sociology. Work will be under direction of the major professor or a member of the graduate faculty. Work will be designed to earn credit in two hour units. Maximum credit is eight hours.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.
Credit will not be recorded in 598 until thesis is accepted by the major professor.

SPANISH (SPA – 264)

G-411—**Proseminar in Literary Genres.** Four hours. May be taken for a total of sixteen hours. Quarterly.

561—**Introduction to Old Spanish.** Four hours. Spring.

562–**Seminar in Literary Periods.** Four hours. May be taken for a total of twenty hours. Fall.

563–**Seminar in Literary Topics.** Four hours. May be taken for a total of twenty hours. Winter.

SPECIAL EDUCATION (SPE – 190)

G-441–**Physiology and Hygiene of the Eye.** Four hours. Fall.
Identification, function, and care of the eye as it relates to the visually handicapped.

G-442–**Methods and Materials in Teaching Visually Handicapped.** Four hours. Winter.
A study of practices commonly used in educational programs including Braille, space orientation, special materials, and organization.

G-450–**Psychology and Education of the Mentally Retarded.** Four hours. Fall, Winter, Summer.
A study of the social, emotional, physical, and intellectual characteristics of the mentally retarded; methods of diagnosis and differentiation; special class organization.

G-453–**Learning Disabilities.** Four hours. Fall, Winter, Summer.
A study of the social, emotional, physical, and intellectual characteristics of the perceptually handicapped; methods of diagnosis and differentiation; and special class organization.

G-455–**Speech and Hearing Problems for the Classroom Teacher.** Four hours. Winter, Summer.
This course is designed to familiarize the public school classroom teacher and the education major with speech and hearing problems often found in the public school classroom.

G-460–**Methods and Materials for Teaching the Mentally Retarded.** Four hours. Winter, Spring, Summer.
A study of methods and materials most useful in teaching the mentally handicapped.

G-461–**Psychology and Education of the Physically Handicapped.** Four hours. Winter.
A study of major handicapping conditions, adaptations, social, emotional, and intellectual considerations.

G-462—**Curriculum for the Physically Handicapped.** Four hours. Spring.
A study of educational programs for the physically handicapped.

G-465—**Methods and Materials for Teaching Learning Disabilities.** Four hours. Winter, Spring, Summer.
A study of methods and materials most useful in teaching children with learning disabilities. A variety of media and methods will be emphasized to meet the needs of this exceptionality.

G-486—**The Psychology and Education of the Exceptional Child.** Four hours. Quarterly.
Considers the psychological and educational needs of children in the typical groups; physically, visually, or auditorially handicapped; defective speech, mentally retarded, emotionally disturbed, socially maladjusted, and the gifted.

G-490—**Workshops in Special Education.** Four and one-half hours. Summer.
Workshops in selected areas of special education.

500—**Issues in Special Education.** Two hours. Quarterly.
A study of current theories, models, programs, and reports in special education.

505—**The Psychology and Education of the Emotionally Disturbed.** Four hours. Fall, Summer.
This course explores the characteristics of deviant behavior, causation, and observation of the emotionally disturbed.

506—**Problems and Methodologies for the Socially Maladjusted.** Four hours. Winter, Summer.
This course explores educational programs for the disadvantaged, delinquent, migrant, and other socially deviant groups; and the application of specific methods and curricula to such programs.

508—**Basic Curriculum for the Emotionally Disturbed.** Four hours. Spring, Summer.
A course investigating programs, methods, and materials in the education of the emotionally disturbed child; the role of the teacher in relation to a team of specialists; use of resources, records, and reports.

513—**Issues in Extreme Learning Disabilities.** Four hours. Winter, Summer.
A theoretical and philosophical study of concepts related to neurological factors, dyslexia, and the autistic in learning disorders.

520—**Advanced Methods in Learning Disabilities.** Four hours. Fall, Summer.
Study of developing individual programs for specific learning disabilities. This

course meets certification requirements.

530–**Methods and Materials in Teaching the Gifted.** Four hours. Spring.
A study of programs, curricula, models, and methodologies for the intellectually advanced.

580–**Advanced Practicum in Special Education.** Six to twelve hours. Quarterly.
Supervised diagnostic teaching for advanced students in expectional children.

587–**Administration and Supervision of Program for Exceptional Children.** Four hours. Spring, Summer.
This course is designed for public school administrators and supervisors of programs for exceptional children. It will provide information concerning the organization and administration of programs for exceptional children. The availability of resources and resource personnel for these programs on the school and the community.

591–**Research in Special Education.** One to twelve hours.

592–**Special Problems I, II.** Two hours each.
Examination of medical, sociological, biological, psychological, and institutional aspects of exceptional children.

594–**Field Problems.** Four hours. As needed.

595–**Advance Psycho-Educational Evaluation of Exceptional Children.** Four hours. Fall, Spring, Summer.
Interpretation and application of measurements for exceptional children with emphasis on curriculum decision making.

SPEECH AND HEARING SCIENCES (SHS – 296)

G-402–**Language Development.** Four hours. Fall, Spring.

G-404–**Stuttering and Related Problems.** Four hours. Fall.
Prerequisite: SHS 301 or equivalent.

G-405–**Clinical Audiology I.** Four hours. Winter.
Prerequisite: SHS 302 or equivalent.

G-406–**Acoustic Phonetics.** Four hours. Fall.
Prerequisite: SHS 201.

G-407—**Clinical Audiology II.** Four hours. Spring.
Prerequisite: SHS 302 or equivalent.
A two-course sequence dealing with advanced audiometric techniques and clinical procedures.

G-408—**Infant Audiometry.** Four hours. Winter.
Prerequisite: Consent of instructor.
A course designed to study the behavior, test procedures, and hearing responses of newborn and young infants.
Practicum required.

G-410—**Anatomy and Physiology of the Hearing Mechanism.** Four hours. Spring.

G-412—**Aural Rehabilitation.** Four hours. Winter.
Prerequisite: SHS 302 or equivalent.

G-413—**Pre-School Hard of Hearing and Deaf.** Four hours. Fall.
Prerequisite: SHS 302 or equivalent.
Practicum required.

G-414—**Diagnostic Procedures in Speech Pathology I.** Fall hours. Fall, Spring.

G-415—**Diagnostic Procedures in Speech Pathology II.** Four hours. Spring.
Prerequisite: SHS 414 or equivalent.

G-417—**Audiological Instrumentation.** Four hours. Spring.
Prerequisite: SHS 302 or equivalent.

G-424—**Speech and Language Disorders of the Cerebral Palsied.** Four hours. Winter.
Prerequisite: SHS 301 or equivalent.

G-425—**Pathologies of the Hearing Mechanism.** Four hours. Fall.
Prerequisite: SHS 302 or equivalent.

G-428—**Adult Aphasia and Related Problems.** Four hours. Spring.
Prerequisite: SHS 301 or equivalent.

G-430—**Phonetics for the Acoustically Handicapped.** Four hours. Fall.

G-431—**Language Disorders I: Assessment of Children with Language Disorders.** Four hours. Fall.

G-432—**Language Disorders II: Habilitation of the Aphasic Child.** Four hours. Winter.
Prerequisites: SHS 430, 431. (SHS 433 desirable)

G-433—**Language for Deaf and Other Language-Impaired Children.** Four hours. Spring.

G-434—**Speech for the Hard-of-Hearing and Deaf.** Two hours. Spring.
Prerequisite: SHS 430.

G-435—**Problems in Reading and Related Subjects for the Hard-of-Hearing and Deaf.** Four hours. Summer.
Prerequisite: SHS 433 or consent of the instructor.

G-437—**History, Education, and Guidance for the Deaf.** Two hours. Spring.

G-438—**Speech and Language Disorders Related to Cleft Palate.** Four hours. Summer.
Prerequisite: SHS 301 or equivalent.

G-440—**Medical Diagnosis and Treatment of Speech and Hearing Pathologies I.** Two hours. Fall.
Prerequisite: Consent of instructor.

G-441—**Medical Diagnosis and Treatment of Speech and Hearing Pathologies II.** Two hours. Winter.
Prerequisite: Consent of instructor.

G-442—**Medical Diagnosis and Treatment of Speech and Hearing Pathologies III.** Two hours. Spring.
Prerequisite: Consent of instructor.

G-443—**Anatomy and Physiology of the Speech Mechanism.** Four hours. Fall.

G-444—**Neurology of the Speech and Hearing Mechanism.** Four hours. Winter.

500—**Designs in Research for Speech and Hearing.** Four hours.

501—**Audiology.** Four hours. Summer.
The study of the body of knowledge pertaining to current topics in hearing.

504—**Speech Pathology.** Four hours. Fall.
The study of the body of knowledge pertaining to current topics in speech pathology.

592—**Practicum in Speech and Hearing Science, Audiology, Language Disorders, or Speech Pathology.** Credit arranged.

597—**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598—**Thesis.** Ten hours.

600—**Seminars in Speech and Hearing Science.** One to four hours each. As needed.
A. Acoustic Phonetics
B. Experimental Phonetics
C. Language Development
D. Physiological Mechanisms in Speech and Hearing
E. Psychoacoustics
F. Psychology of Speech
G. Quantitative Methods in Speech and Hearing
H. Semantics
I. Speech Encoding and Decoding
J. Speech Intelligibility

601—**Seminars in Speech Pathology.** One to four hours each. As needed.
A. Aphasia and Related Disorders
B. Articulation Disorders
C. Cerebral Palsy
D. Cleft Palate
E. Clinical Counseling in Speech Pathology
F. Neuropathologies of Speech
G. Stuttering and Related Problems
H. Voice Disorders

602—**Seminars in Audiology.** One to four hours each. As needed.
A. Aural Rehabilitation
B. Differential Audiology
C. Electrophysiologic Audiometry
D. Industrial, Military, and Community Hearing Conservation
E. Measurement of Auditory Reception
F. Non-Organic Hearing Losses
G. Peripheral and Central Hearing Process

603–**Seminars in Laboratory Research.** One to four hours each. As needed.
A. Laboratory in Speech and Hearing Sciences
B. Laboratory in Audiology
C. Laboratory in Speech Pathology
D. Laboratory in Language Disorders

604–**Seminars in Language Disorders.** One to four hours each. As needed.
A. Psychology of the Deaf and Speech Handicapped
B. Problems and Procedures in Evaluating Children

692–**Individual Study.** Credit arranged. Six hours maximum.

791–**Research in Speech and Hearing Sciences.** One to twelve hours.
Prerequisite: Approval of the major professor.

792–**Special Problems.** Four hours.

797–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a dissertation and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

798–**Dissertation.**

THEATRE ARTS (THE – 685)

G-401–**History and Design of Costumes.** Four hours. Spring.
Prerequisite: Consent of instructor.
Study of historical and contemporary costume designs and their methods of construction for theatrical presentation.

G-412–**Stage Lighting.** Four hours. Fall.
Prerequisite: Consent of instructor.
Theory and application of general and special lighting, color, instrumentation, and control.

G-416–**Playwrighting.** Four hours. As needed.
Prerequisite: Consent of instructor.
Study and research in the elements of play structuring.

G-417–**Advanced Acting.** Four hours. Winter.

G-420–**Advanced Theory of Stage Directing.** Four hours. Winter.
Prerequisite: THE 320 or equivalent.

G-421, G-422–**History of The American Theatre.** Four hours each. As needed.

G-427, G-428, G-429–**History of European Theatre.** Four hours each. Fall, Winter, Spring.

G-430, G-431–**Summer Theatre I, II.** Four hours each. Summer.
Prerequisite: Consent of staff.
An eleven-week program covering all phases of theatre production.

G-435–**Advanced Scene Design.** Four hours. Spring.
Prerequisite: THE 306 or consent of instructor.

G-458–**Modern Dance Technique and Analysis.** Two hours. As needed.

G-465–**Music Resources for Dance.** Two hours. Fall, alternate years.
Studying and gathering of music resources for dance.

G-466–**Dance Lecture and Demonstration.** Four hours. Spring, alternate years.
Techniques of preparing dance lecture-demonstrations and tours.

G-467–**Dance Curriculum and Organization.** Four hours. Winter, alternate years.
Study of dance curriculums and administrative problems.

G-480–**Directing Children's Theatre.** Four hours. As needed.
Prerequisites: THE 320, THE 420, and consent of instructor.
The techniques of directing, organizing, and administering a children's theatre program in all phases of application.

G-490–**Theatre Workshop.** Four hours. Summer.
Designed for the non-theatre major (i.e., English, speech, music, etc.) who is responsible for directing school or community drama activities.

501–**Introduction to Graduate Study in Theatre.** Two hours. Fall.
Seminar in methods and materials of research in theatre; introduction to the bibliography of the field; organization and form of thesis. Initial enrollment in the program must be in this course.

506–**Dramatic Theory and Criticism.** Four hours. Winter.
Examination and evaluation of dramatic theory from antiquity to present.

511–**Seminar: Contemporary Trends in Theatre.** Four hours. As needed.

512–**Seminar in Theatre Production.** Four hours. As needed.
Theory behind newer staging techniques, such as multiple media, and research in other advances in staging.

513–**Seminar in Theatre Design and Structure.** Four hours. As needed.
Research in architectural and acoustical design, lighting, seating, color, use and stage requirements.

514–**Seminar in Acting and Directing.** Four hours. As needed.

515–**Seminar in Dance, Opera, and Theatre.** Four hours. As needed.

516–**Seminar in Community and Regional Theatre.** Four hours. As needed.

588–**Practicum in Theatre I, II, III.** Four hours.
Directed independent study and practical application in an area of theatre production. May be taken three times for a total of twelve hours.

591–**Research in Theatre.** One to four hours.

592–**Special Studies I, II, III.** One to three hours each, for a maximum of nine hours.
Investigation into specialized areas of interest within the broad area of theatre.

597–**Independent Study and Research.** Hours arranged.
Not to be counted as credit toward a degree.
Students who are not in residence but who are actively working on a thesis and consulting with the major professor or making use of the library or other University facilities must enroll in this course.

598–**Thesis in Theatre.** Six hours.

599–**Creative Project.** Ten hours. As needed.

PART SEVEN

THE GRADUATE FACULTY

THE GRADUATE FACULTY

THE FACULTY

WILLIAM DAVID McCAIN, B.S., M.A., Ph.D., Litt.D. . . . . President of the University
B.S., Delta State College; M.A., University of Mississippi; Ph.D., Duke University; Litt.D., Mississippi College.

JOHN DOUGLAS ALCORN, B.S., M.Ed., Ph.D. . . . . Chairman of Department of Guidance and Professor of Guidance
B.S., M.Ed., Ph.D., East Texas State University.

PAUL DAVID ANDERSEN, B.Mus., M.Mus., Ph.D. . . . . Associate Professor of Music
B.Mus., Drake University; M.Mus., Syracuse University; Ph.D., Washington University.

BOBBY DEAN ANDERSON, B.S.E., M.Ed., Ed.D. . . . . Assistant Dean of the Graduate School and Professor of Educational Administration and Supervision
B.S.E., Arkansas State College; M.Ed., University of Missouri; Ed.D., University of Tennessee.

HAYWARD GLENN ANDERSON, B.S., M.A., C.P.A. . . Associate Professor of Accounting
B.S., M.A., University of Southern Mississippi; graduate study University of Alabama.

WILLIAM HILTON ANDERSON, A.B., M.A., Ph.D. . . . . Associate Professor of English
A.B., Wofford College; M.A., Ph.D., University of South Carolina.

JAY PASCAL ANGLIN, B.A., Ph.D. . . . . Associate Professor of History
B.A., Louisiana State University; Ph.D., University of California at Los Angeles.

BIRTHNEY ARDOIN, B.A., M.A., Ph.D. . . . . Assistant Professor of Communication
B.A., M.A., Louisiana State University; Ph.D., Ohio University.

WILLIAM DAVID ATCHISON, M.D. . . . . Associate Professor of Medical Technology
M.D., Medical College of Georgia.

GARY MICHAEL ATKINSON, A.B., Ph.D. . . . . Associate Professor of Philosophy
A.B., College of Holy Cross; Ph.D., Duke University.

KAREN ODELL AUSTIN, B.A., M.A. . . . . Assistant Professor of Foreign Languages
B.A., Agnes Scott College; M.A., Middlebury College.

WAYNE LOUIS BABIN, B.S., M.S., Ed.D. . . . . Chairman of Department of Physical Education and Professor of Physical Education
B.S., M.S., Ed.D., University of Southern Mississippi.

HOWARD WILSON BAHR, A.B., Ph.D. . . . . Professor of English
A.B., Oberlin College; graduate study, The Ohio State University, Oberlin College; Ph.D., University of North Carolina.

NANCY LORENE BAKER, B.A., M.S.W., C.S.W. . . . . Associate Professor of Psychology
B.A., Texas College of Arts and Industries; M.S.W., C.S.W., Louisiana State University.

CHARLIE RUSSELL BALDOCK, A.B., M.A., M.S., Ph.D. . . . . Professor of Physics
A.B., Lynchburg College; M.S., Virginia Polytechnic Institute; M.A., Ph.D., Cornell University.

MABEL MAE BALDWIN, B.S. in Ed., M.A. . . . . Associate Professor of Business Education
B.S. in Ed., Central Missouri State College; M.A., University of Iowa; graduate study, Columbia University.

ANGELA OWEN BEDENBAUGH, B.S., Ph.D. . . . . Research Associate in Chemistry
B.S., University of Texas; Ph.D., University of South Carolina.

EDGAR HUGH BEDENBAUGH, JR., B.A., M.Ed., Ed.D. . . . . Associate Professor of Educational Administration and Supervision
B.A., M.Ed., Ed.D., University of Florida.

JOHN HOLCOMBE BEDENBAUGH, B.S., M.A., Ph.D. . . . . Chairman of Department of Chemistry and Associate Professor of Chemistry
B.S., Newberry College; M.A., University of North Carolina; Ph.D., University of Texas.

FRANCES ELIZABETH BENNER, B.M., Mus.M. . . . . Associate Professor of Music
Arthur Jordan Conservatory, Butler University, Soloist Diploma in Piano; Fontainbleau School of Music; B.M., Mus.M. in voice, Cincinnati College of Music.

JAMES C. BISHOP, B.A., M.S. . . . . Director of Communication Services and Assistant Professor of Communication
B.A., University of Mississippi; M.S., University of Southern Mississippi.

HAROLD TYRONE BLACK, B.B.A., M.A., Ph.D. . . . . Associate Professor of Economics
B.B.A., M.A., Texas Technological College; Ph.D., Tulane University.

LILLY ANNELLE BONNER, B.S., M.A., Ed.D. . . . . Chairman of Department of Business Education and Professor of Business Education
B.S., M.A., University of Southern Mississippi; Ed.D., Indiana University.

HERMAN BOROUGHS, B.S., M.Ed., Ed.D. . . . . Coordinator of Graduate Studies in in Education and Psychology and Professor of Guidance
B.S., Texas College of Arts and Industries; M.Ed., Ed.D., University of Missouri.

LAWRENCE LOUIS BOURGEOIS, A.B., M.A., Ph.D. . . . . Professor of Sociology
A.B., Loyola University; M.A., Louisiana State University; Ph.D., Harvard University.

COLEN JESSE BOUTWELL, JR., B.S., M.S., Ed.D. . . . . Associate Professor of Industrial and Technical Education
B.S., M.S., University of Southern Mississippi; Ed.D., University of Missouri.

RICHARD LEE BOWEN, A.B., M.A., Ph.D. . . . . Chairman of Department of Geology and Professor of Geology
A.B., University of North Carolina; M.A., Indiana University; Ph.D., University of Melbourne; Fulbright Scholar to Australia.

RICHARD HUGH BOWERS, B.A., M.A., Ph.D. . . . . Associate Professor of History
B.A., M.A., Ph.D., Mississippi State University.

HYLER JEFFERY BRACEY, B.B.A., M.B.A., Ph.D. . . . . Associate Professor of Management
B.B.A., Lamar State College of Technology; M.B.A., Ph.D., Louisiana State University.

LOUIS KOHL BRANDT, B.E., M.A., Ph.D. . . . . Chairman of Department of Finance and General Business and Professor of Finance
B.E., Wisconsin State College at Whitewater; M.A., Ph.D., University of Wisconsin.

JULIUS CHRISTIAN BRAUN, B.S., Ed.M., Ed.D. . . . . Professor of Educational Administration and Supervision
B.S., Buffalo State Teachers College; Ed.M., University of Buffalo; Ed.D., Columbia University.

JOSEPH BERENGHER BRECHTEL, B.S., M.S. . . . . Assistant Dean of Students and Instructor of Recreation
B.S., M.S., University of Southern Mississippi.

CHARLES RAY BRENT, B.A., M.S., Ph.D. . . . . Professor of Chemistry
B.A., University of Southern Mississippi; M.S., Ph.D., Tulane University.

ROBERT ARTHUR BRENT, A.B., M.A., Ph.D. . . . . Professor of History
A.B., Gettysburg College; M.A., Ph.D., University of Virginia.

GIPSIE JOY BROOM, B.A., M.Ed., Ed.D. . . . . Assistant Professor of Physical Education
B.A., Judson College; M.Ed., Ed.D., University of Southern Mississippi.

BAHNGRELL WALTER BROWN, B.A., M.S., Ph.D. . . . . Professor of Geology
B.A., University of Omaha; M.S., Ph.D., University of Nebraska.

FRED WALDO BROWN, B.S., M.A., Ed.D. . . . . Professor of Science Education
B.S., Georgia Southern College; M.A., University of Alabama; Ed.D., University of Georgia.

IVA DINKINS BROWN, B.S., M.Ed., Ed.D. . . . .Associate Professor of Science Education
B.S., Georgia Southern College; M.Ed., Ed.D., University of Georgia.

MARICE COLLINS BROWN, A.B., M.A., Ph.D. . . . . Acting Chairman of Department of English and Professor of English
A.B., Mississippi State College for Women; M.A., University of Southern Mississippi; Ph.D., Louisiana State University.

NANCY WORTHINGTON BROWN, B.A., M.A., Ed.D. . . . . Assistant Professor of Special Education
B.A., University of Miami; M.A., East Carolina University; Ed.D., University of Northern Colorado.

WILLIAM GREGORY BRUNDAGE, B.S., M.S., Ph.D. . . . . Chairman of Department of Medical Technology and Associate Professor of Medical Technology
B.S., M.S., Northwestern State College; Ph.D., Louisiana State University.

BILLY GEORGE BUFKIN, B.S., Ph.D. . . . . Assistant Professor of Polymer Science
B.S., Ph.D., University of Southern Mississippi.

CECIL DWIGHT BURGE, B.S., M.S., Ph.D. . . . . Assistant Professor of Computer Science and Statistics
B.S., M.S., Ph.D., Mississippi State University.

CHARLES DUANE BURGESS, JR., B.S., M.D. . . . . Part-time Associate Professor of Psychology
B.S., Mississippi College; M.D., University of Mississippi Medical School.

WILLIAM BAXTER BURNS, B.S., M.S. . . . . .Instructor of Industrial and Technical Education
B.S., M.S., University of Southern Mississippi.

ZED HOUSTON BURNS, B.S., M.S., M.A., Ed.D. . . . . Professor of Educational Psychology, Division of Continuing Education
B.S., in Arch., M.S., Auburn University; M.A., University of Southern Mississippi; Ed.D., University of Cincinnati.

JOHN NEWELL BURRUS, A.B., M.A., Ph.D. . . . . Distinguished University Professor of Sociology
A.B., University of Mississippi; M.A., Ph.D., Louisiana State University.

RAYMOND LEROY BUSBEE, B.S., M.S., Ph.D. . . . . .Assistant Professor of Recreation
B.S., M.S., Ph.D., University of Georgia.

OTTAMISE COLLEEN WHITTINGTON CAMERON, B.S., M.S., D.B.A. . . . . Associate Professor of Economics
B.S., M.S., University of Southern Mississippi; D.B.A., Indiana University.

BRUCE HENRY CAMPBELL, B.S., M.A., Ph.D. . . . . Associate Professor of Chemistry
B.S., University of Kansas; M.A., University of South Dakota; Ph.D., University of Texas.

CLAUDE LOUIS CAMPBELL, B.S., M.A., Ed.D. . . . . .Associate Professor of Curriculum and Instruction
B.S., University of Southern Mississippi; M.A., Ed.D., George Peabody College.

RICHARD EDWARD CAPES, B.S., M.A.E. . . . . .Assistant Professor of Art Education
B.S., M.A.E., doctoral study, University of Georgia.

AUGUST NORBERT CARNOVALE, B.M., M.A. . . . . Assistant Professor of Music Education
B.M., Louisiana State University; M.A., Columbia University; advanced study, Colorado Western State College, Oklahoma State University.

STANLEY MALCOLM CARPENTER, B.S., M.B.A., C.P.A. . . . . Associate Professor of Accounting
B.S., University of Southern Mississippi; M.B.A., doctoral study, University of Georgia.

WILBUR LLOYD CARR, B.A., M.A., Ph.D. . . . . Chairman of Department of Health and Professor of Health
B.A., M.A., Ph.D., University of North Carolina.

JOSEPH O'HARA CARSON, JR., B.A., M.A., Ph.D. . . . . Professor of Educational Administration and Supervision
B.A., M.A., Tulane University; Ph.D., Florida State University.

DANNY REED CARTER, B.S., M.S. . . . . Acting Chairman Department of Computer Science and Statistics and Associate Professor of Computer Science and Statistics
B.S., M.S., University of Southern Mississippi; doctoral study, Virginia Polytechnic Institute.

ORLEY BRANDT CAUDILL, B.S., M.A., Ph.D. . . . . Associate Professor of Political Science
B.S., M.A., Ph.D., University of Maryland.

DAVID JAMES CAVENY, B.S., M.A., Ph.D. . . . . Chairman of Department of Mathematics and Associate Professor of Mathematics
B.S., Western Carolina College; M.A., Ph.D., University of Kentucky.

JOHN H. M. CHEN, B.S., M.S., M.S. in L.S., M.A., Ed.D. . . . . Chairman of Department of Library Science and Professor of Library Science
B.S., Kansas University; M.S., Virginia Polytechnic Institute; M.S. in L.S., Columbia University; M.A., New York University; Ed.D., The Pennsylvania State University.

ELSIE BOSCHERT CHICHESTER, B.S., M.S. . . . . Assistant Professor of Family Life Services
B.S., Delta State Teachers College; M.S., University of Tennessee.

ORAZIO ANDREA CICCARELLI, B.A., M.A., Ph.D. . . . . Assistant Professor of History
B.A., Francis College; M.A., Ph.D., University of Florida.

JOSEPH HARDIN CLEMENTS, A.B., M.B.A., Ed.D. . . . . Professor of Finance
A.B., University of Kentucky; M.B.A., University of Mississippi; Ed.D., University of Oklahoma.

JOSEPH WILLIAM CLIBURN, B.S., M.A., Ph.D. . . . . Professor of Biology
B.S., Millsaps College; M.A., University of Southern Mississippi; Ph.D., University of Alabama.

EDGAR D. COOK, JR., B.S. in B.A., M.A., Ph.D. . . . . The Parham Bridges Chair of Real Estate and Professor of Finance
B.S. in B.A., M.A., Ph.D., University of Florida.

ROBERT SAMUEL COOKE, JR., B.S., M.D. . . . . Associate Professor of Medical Technology
B.S., M.D., University of Arkansas.

JACK CARLUS COOLEY, B.S., M.S., C.P.A. . . . . Assistant Professor of Accounting
B.S., M.S., University of Southern Mississippi.

WALTER ELMORE COOPER, JR., B.S., M.A., Ed.D. . . . . Assistant to the Dean of Education and Psychology and Associate Professor of Research and Human Development
B.S., Huntingdon College; M.A., Ed.D., University of Alabama.

GEORGE EDWARD CRADDOCK, JR., A.B., M.A., Ph.D. . . . . Associate Professor of Foreign Languages
A.B., University of North Carolina; M.A., Ph.D., Louisiana State University.

BOBBY EUGENE CRAVEN, B.S., M.Ed., Ed.D. . . . . Associate Professor of Science Education
B.S., Mississippi College; M.Ed., Ed.D., University of Mississippi.

ROBERT THORNTON CREWS, B.S., M.S., M.T. (ASCP) . . . . . Assistant Professor of Medical Technology
B.S., M.S., Auburn University; M.T. (ASCP), Baylor University Hospital.

GEORGE TRUETT CROOK, JR., B.A., M.A. . . . . Assistant Professor of Theatre Arts and Technical Director
B.A., M.A., University of California, Davis.

RALPH DONALD CROSS, A.B., M.A., Ph.D. . . . . Associate Professor of Geography
A.B., Eastern Michigan; M.A., University of Oklahoma; Ph.D., Michigan State University.

JAMES OLIN CULBERSON, B.S., M.A., M.Ed., Ed.D. . . . Associate Professor of Guidance
B.S., Bob Jones University; M.A., Columbia Bible College; M.Ed., University of South Carolina; Ed.D., University of Georgia.

ROBERT RAY CUMMINGS, B.B.A., M.B.A., C.P.A. . . . Assistant Professor of Accounting
B.B.A., M.B.A., Memphis State University; doctoral study, University of Mississippi.

DAVID FRANKLIN CUNNINGHAM, B.S.E., M.A., Ed.D. . . . . Professor of Curriculum and Instruction
B.S.E., Arkansas State Teachers College; M.A., George Peabody College; Ed.D., University of Houston.

EDDIE WAYNE CUPP, B.A., Ph.D. . . . . Assistant Professor of Biology
B.A., Murray State College; Ph.D., University of Illinois.

JACK LEMORE DANIELS, B.S., M.Ed., Ph.D. . . . . Associate Professor of Guidance
B.S., University of Texas, M.Ed., Stephen F. Austin State College; Ph.D., East Texas State University.

CHARLES WINFREY DAVIDSON, B.S., M.Ed., Ed.D. . . . . Assistant Professor of Research and Human Development
B.S., Louisiana Polytechnic University; M.Ed., Ed.D., University of Arkansas.

BONNIE JEAN DAVIS, B.S., M.S., Ph.D. . . . . Associate Professor of Curriculum and Instruction
B.S., M.S., Ph.D., University of Southern Mississippi.

JAMES LOUIS DAVIS, B.S., M.S. . . . . Associate Professor of Management
B.S., M.S., University of Southern Mississippi; doctoral study, Louisiana State University.

JAMES TREADWELL DAVIS, B.S., M.A., Ph.D. . . . . Professor of History
B.S., Memphis State University; M.A., Ph.D., Vanderbilt University.

CHARLES E. DAWSON, B.S. . . . . Assistant Professor of Biology
Gulf Coast Research Laboratory
B.S., University of Miami.

JAMES ESTUS DEAR, B.S., M.B. A., C.P.A., Ph.D. . . . . Professor of Accounting
B.S., Northeast Louisiana State College; M.B. A., Ph.D., Louisiana State University.

CHARLES N. DENNIS, B.A., M.A. . . . . Assistant Professor of Finance
B.A., Southern Methodist University; M.A., Memphis State University.

JOHN ROBERT DONOHUE, B.M., M.M., Ph.D. . . . . Associate Professor of Music
B.M., M.M., Louisiana State University; Ph.D., Michigan State University.

JACK POLLARD DONOVAN, B.S., M.Mus., Ph.D. . . . . Associate Professor of Music Education
B.S., M.Mus., University of Nebraska; Ph.D., University of Southern Mississippi.

DONALD EDWARD DORE, JR., B.S., M.D. . . . . Associate Professor of Medical Technology
B.S., M.D., Louisiana State University.

CHRISTOS LEONIDAS DOUMAS, B.A., M.A., Ph.D. . . . . Professor of Political Science
B.A., M.A., Ph.D., University of California at Los Angeles.

LOIS ARENDER DRAIN, B.S., M.S. . . . . Assistant Professor of Home Economics Education
B.S., Northeastern State College; M.S., Oklahoma State University.

NETTIE ETOILE DUBARD, B.S., M.A., Ph.D. . . . . Associate Professor of Speech and Hearing Sciences
B.S., Mary Hardin-Baylor University; M.A., George Peabody College; graduate study, University of Texas, University of Utah, Central Institute of the Deaf at Washington University; Ph.D., University of Southern Mississippi.

EUGENE DANIEL DUKES, B.A., M.A.L.S., M.A. . . . . Assistant Professor of Library Science
B.A., Quincy College; M.A.L.S., University of Michigan; M.A., John Carroll University; doctoral study, Kent State University.

ROBERT WINSTON DUNAWAY, B.S., M.Ed. . . . . Assistant Professor of Athletic Administration and Coaching
B.S., Mississippi College; M.Ed., University of Southern Mississippi; doctoral study, Indiana University.

NANCY CASEY DUNIGAN, A.B., M.M. . . . . Assistant Professor of Mathematics
A.B., Greensboro College; M.M., University of Tennessee; doctoral study, Northwestern University.

PETER EASTON DURKEE, A.B., M.A., Ph.D. . . . . Dean of Student Affairs and Associate Professor of Guidance
A.B., M.A., Colgate University; Ph.D., University of Southern Mississippi.

HENRY BENJAMIN EASTERLING, B.S., M.A., Ed.D. . . . . Professor of Research and Human Development
B.S., University of Southern Mississippi; M.A., University of Alabama; Ed.D., Duke University.

JAMES PAUL ELDRIDGE, B.A., Ph.D. . . . . Assistant Professor of Microbiology
B.A., University of California; Ph.D., University of Oregon.

THOMAS GLENVALL ESTES, JR., B.S., M.S., Ph.D., C.P.A. . . . . Associate Professor of Accounting
B.S., University of Southern Mississippi; M.S., Oklahoma State University; ph.D., University of Arkansas

CEDRIC OLIVER EVANS, B.A., M.A., Ph.D. . . . . Chairman of Department of Philosophy and Associate Professor of Philosophy
B.A., University of Witwatersand; B.A., M.A., University of Oxford; Ph.D., University of Edinburgh.

WALTER KENNEDY EVERETT, B.A., M.A. . . . . Assistant Professor of English
B.A., M.A., Mississippi College; doctoral study, University of North Carolina.

MARY EVELYN McCOMIC FAULKINBERRY, B.S., M.S., Ph.D. . . . . Chairman of the Department of Home Economics Education and Professor of Home Economic Education
B.S., Texas Woman's University; M.S., Colorado State University; Ph.D., Texas Woman's University.

VIRGINIA ISABELLE FELDER, A.B., M.S., Ed.D. . . . . Professor of Mathematics
A.B., Mississippi State College for Women; M.S., Tulane University; Ed.D., Columbia University.

LAWRENCE LEE FETH, B.E.E., Ph.D. . . . . Assistant Professor of Speech and Hearing Sciences
B.E.E., The Ohio State University; Ph.D., University of Pittsburg.

CLAUDE EDWIN FIKE, A.B., A.M., Ph.D. . . . . Dean of the College of Liberal Arts and Professor of History
A.B., Duke University; A.M., Columbia University; Ph.D., University of Illinois.

BARBARA ANN FISCHER, B.A., M.A., Ph.D. . . . . Assistant Professor of Biology
B.A., University of Missouri; M.A., University of California at Berkeley; Ph.D., St. Louis University.

ARTHUR GEOFFREY FISH, B.S., M.S., Ph.D. . . . . Associate Professor of Biology
B.S., Carleton University; M.S., McGill University; Ph.D., University of British Columbia.

HUBERT VENSON FITCH, B.Mus., M.Mus. . . . . Assistant Professor of Music
B.Mus., M.Mus., University of Michigan; doctoral study, Columbia University.

GERALD VINCENT FLANNERY, B.A., M.A., Ph.D. . . . . Professor of Communication
B.A., University of Miami; M.A., University of Florida; Ph.D., Ohio University.

JOHN MORGAN FLOWERS, JR., A.B., M.S., M.Ed., Ed.D. . . . . Associate Professor of Science Education
A.B., M.S., University of Alabama; M.Ed., Ed.D., Duke University.

RAYMOND FRANCIS FOLSE, JR., B.S. Ph.D. . . . . Associate Professor of Physics
B.S., Loyola University; Ph.D., Louisiana State University.

DAVID BARON FOLTZ, B.M., M.M., Mus.D. . . . . Chairman of Department of Music and Professor of Music
B.M., M.M., Illinois Wesleyan University; Mus.D., Texas Wesleyan College.

LORA RUTH MOSKOWITZ FRIEDMAN, B.S., M.A., Ed.D. . . . . Associate Professor of Curriculum and Instruction
B.S., M.A., City College of New York; Ed.D., University of Florida.

NICHOLAS HUGH FRUGE, B.A., M.Ed., Ed.D. . . . . Assistant Professor of Research and Human Development
B.A., M.Ed., Ed.D., McNeese State University.

GENE BOB FULLER, B.S., M.S., Ph.D. . . . . Assistant Professor of Biology
B.S., Sam Houston State College; M.S., Oklahoma State University; Ph.D., Purdue University.

RUDOLPH BURKS GANDY, B.S., M.A. . . . . Instructor of Communication
B.S., Arkansas A. and M.; M.A., University of Mississippi

CARL JAY GATES, B.S., M.S., Ed.D. . . . . Counselor and Associate Professor of Guidance
B.S., M.S., Ed.D., University of Southern Mississippi.

ALBERT DONALD GEORGE, A.B., M.A., Ph.D. . . . . Professor of Communication
A.B., M.A., Ph.D., Louisiana State University.

JEWEL GOLDEN, B.S., M.A., Ph.D. . . . . Chairman of Department of Environmental Design and Professor of Environmental Design
B.S., Auburn University; M.A., Columbia University; Ph.D., Florida State University.

JOHN EDMOND GONZALES, B.S., M.A., Ph.D. . . . . The William D. McCain Professor of History
B.S., M.A., Louisiana State University; Ph.D., University of North Carolina.

HENRY ARTHUR GOTTLEBER, B.S., M.B.A., Ph.D. . . . . Associate Professor of Management
B.S., University of Southern Mississippi; M.B.A., Boston University, Ph.D., University of Arkansas.

ALBERT EDWARD GOWER, JR., A.B., M.M., Ph.D. . . . . Associate Professor of Music
A.B., Sacramento State College; M.M., University of Oregon; Ph.D., North Texas State University.

WILLIAM TURNER GOWER, B.Mus., M.Mus., M.F.A., Ph.D. . . . . Chairman of Department of Music Education and Professor of Music Education
B.Mus., M.Mus., University of Denver; M.F.A., Ph.D., University of Iowa.

BILLY JOE GRANTHAM, B.S., M.S., Ph.D. . . . . Associate Professor of Biology
B.S., M.S., Ph.D., University of Southern Mississippi.

JOSEPH ARTHUR GREENE, JR., B.A., M.A., Ph.D. . . . . .Dean of the School of Business Administration and Professor of Economics
B.A., Berea College; M.A., PH.D., University of Virginia.

JOHN ROBERT GREGORY, B.A., M.A., Ph.D. . . . Associate Professor of Communication
B.A., M.A., Montana State University; Ph.D., University of Illinois.

JOHN DAVID WYNNE GUICE, B.A., M.A., Ph.D. . . . . Associate Professor of History
B.A., Yale University; M.A., University of Texas; Ph.D., University of Colorado.

ERIC McCOY GUNN, B.S., M.A., Ed.D. . . . . .Dean of College of Education and Psychology and Professor of Research and Human Development
B.S., M.A., University of Southern Mississippi; Ed.D., George Peabody College.

GORDON GUNTER, A.B., M.A., Ph.D. . . . . .Professor of Biology
A.B., Northwestern State College of Louisiana; M.A., Ph.D., University of Texas.

KENNETH URIAL GUTSCH, B.M., M.Ed., Ed.D. . . . . .Professor of Guidance
B.M., University of Miami; M.Ed., University of Mississippi; Ed.D., Florida State University.

STANFORD PAYNE GWIN, B.S., M.S., Ph.D. . . . . Chairman of Department of Communication and Associate Professor of Communication
B.S., M.S., University of Southern Mississippi; Ph.D., University of Florida.

GRAHAM LEE HALES, JR., B.A., B.D., Th.D. . . . . Chaplain and Coordinator of Religious Activities and Assistant Professor of Anthropology and Comparative Religious Studies
B.A., Millsaps College; B.D., Th.D., Southern Baptist Seminary.

ALTRA HOWSE GILL HAMMAN, B.S., M.S., Ph.D. . . . . Chairman of the Department of Family Life Services and Assoicate Professor of Family Life Services
B.S., University of Southern Mississippi; M.S., University of Tennessee; Ph.D., Texas Woman's College.

KENNETH GERALD HAMPTON, B.S., Ph.D. . . . . .Associate Professor of Chemistry
B.S., Wake Forest College; Ph.D., Duke University.

ISKANDAR SALOUM HAMWI, B.A., M.A.S., M.A., Ph.D. . . . . Assistant Professor of Finance
B.A., Damascus University; M.A.S., University of Michigan; M.A., Ph.D., University of Pennsylvania.

GLENN TERRY HARPER, B.A., M.A., Ph.D. . . . . Associate Professor of History
B.A., Furman University; M.A., Ph.D., Duke University.

GILBERT FREDERICK HARTWIG, Ph.B., M.A., Ph.D. . . . . Professor of Theatre Arts
Ph.B., M.A., Marquette University, Ph.D., University of Wisconsin.

WILLIAM HAMILTON HATCHER, B.A., M.A., Ph.D. . . . . Chairman of Department of Political Science, Director of George Robert Olliphant University Honors Program, and Professor of Political Science
B.A., M.A., University of Arkansas; Ph.D., Duke University.

JERRY THOMAS HAYNIE, B.M., M.M, Ph.D. . . . . Assistant Professor of Music Education
B.M., Union University; M.M., Ph.D., George Peabody College.

PHYLLIS ANN HEAVERN, B.S., M.S., PH.D. . . . . Assistant Professor of Physical Education
B.S., M.A., Indiana University; Ph.D., University of Iowa.

[1]LEE KEMERLY HILDMAN, B.S., M.S., ... Assistant Professor of Psychology
B.S., M.S., Florida State University; doctoral study, University of Florida.

ROBERT BYRON HILL, B.A., M.F.A. . . . . Auditorium Manager and Technical Director
B.A., Catawba College; M.F.A., Southern Methodist University.

ROGER HARVEY HILL, B.M., M.M. . . . . Assistant Professor of Music
B.M., M.M., Indiana University.

VIRGINIA SWANN HILL, B.S., M.B.A., Ph.D. . . . . Assistant Professor of Management
B.S., M.B.A., University of Southern Mississippi; Ph.D., Louisiana State University.

PAUL EDWARD HORN, B.A., M.A., Ph.D. . . . . Associate Professor of Psychology
B.A., M.A., Ph.D., University of Mississippi.

CHARLES MORRIS HOSKIN, B.S., A.M., Ph.D. . . . . Associate Professor of Geology
B.S., Heidelberg College; A.M., Duke University; Ph.D., University of Texas.

CARL B. HOUSLEY, B.S., Ph.D. . . . . Assistant Professor of Economics
B.S., East Tennessee State University; Ph.D., Florida State University.

JOHN EMORY HOWELL, B.S.Ed., M.N.S., Ph.D. . . . . Assistant Professor of Chemistry
B.S.Ed., Marion College; M.N.S., Arizona State University; Ph.D., University of Iowa.

HAROLD D. HOWSE, B.S., M.S., Ph.D. . . . . Director of Gulf Coast Research Laboratory
B.S., M.S., University of Southern Mississippi; Ph.D., Tulane University.

WILLIAM EUGENE HUGHES, B.S., Ph.D. . . . . Chairman of Department of Physics and Astronomy and Professor of Physics and Astronomy
B.S., University of Southern Mississippi; Ph.D., University of Alabama.

ELVIN MAX HUNTER, B.S., M.Ed., Ed.D. . . . . Chairman of Department of Industrial and Technical Education and Professor of Industrial and Technical Education
B.S., M.Ed., Ed.D., University of Missouri.

GEORGE EUGENE IMBRAGULIO, B.M., M.M. . . . . Assistant Professor of Music
B.M., M.M., Michigan State University; summer study, Aspen, Colorado; St. Cecilia Conservatory, Rome, Italy; Florida State University; Michigan State University.

BOBBY NEWELL IRBY, B.A., M.S., Ed.D. . . . . Chairman of Department of Science Education and Associate Professor of Science Education
B.A., University of Washington; M.S., Ed.D., University of Mississippi.

THOMAS TUCKER IVY, B.A., M.Ed. . . . . Assistant Professor of Marketing
B.A., Hendrix College; M.Ed., University of Arkansas; doctoral study, Arizona State University.

HOWARD OLIVER JACKSON, B.S., M.A., C.P.A. . . . . Assistant Dean of School of Business Administration and Associate Professor of Accounting.
B.S., M.A., University of Southern Mississippi; graduate study, University of Alabama.

MARY ELLEN LINGO JAMES, B.S.E., M.S.E., Ed.D. . . . . Assistant Professor of Curriculum and Instruction
B.S.E., M.S.E., State College of Arkansas; Ed.D., University of Arkansas.

MELVYN WILLIAM JETER, B.S., M.S. Ph.D. . . . . Assistant Professor of Mathematics, Keesler Air Force Resident Center
B.S., Midwestern University; M.S., North Texas State University; Ph.D., Oklahoma State University.

MARION CLOWER JOHNSON, B.S., M.S. . . . . Chairman of Department of Athletic Administration and Coaching and Associate Professor of Athletic Administration and Coaching
B.S., University of Southern Mississippi; M.S., Louisiana State University; doctoral study, Indiana University.

ROGER BARTON JOHNSON, JR., B.A., A.M., Ph.D. . . . . Chairman of Department of Foreign Languages and Associate Professor of Foreign Languages
B.A., University of Southern Mississippi; A.M., Ph.D., University of Illinois.

LEROY JOHNSTON, B.A., M.S. . . . . Assistant Professor of Music Education
B.A., Kansas State Teachers College; M.S., Juilliard School of Music; doctoral study, University of Southern California.

LEE WAYNE JONES, B.M., M.Ed., ... Assistant Professor of Research and Human Development
B.M., M.Ed., Stephen F. Austin University.

BRYCE DONNELL JORDAN, B.S., M.P.A. . . . . Associate Professor of Finance
B.S., Mississippi State University; M.P.A., Harvard University; doctoral study, University of Alabama.

PHILIP ARTHUR KALISCH, B.S., M.A., Ed.D. . . . . Assistant Professor of Curriculum and Instruction and Assistant Professor of History
B.S., M.A., University of Nebraska; Ed.D., The Pennsylvania State University.

WALLACE GRANT KAY, B.A., M.A., Ph.D. . . . . Curriculum Director of George Robert Olliphant University Honors Program and Associate Professor of English
B.A., Southern Methodist University; M.A., Ph.D., Emory University.

RICHARD KAZELSKIS, B.S., Ed.D. . . . . Director of Bureau of Research and Educational Programs and Assistant Professor of Research and Human Development
B.S., Ed.D., University of Georgia.

WILLIAM THOMAS KECK, B.M., M.M. . . . . Assistant Professor of Music Education
B.M., Eastman School of Music; M.M., Vandercook College of Music.

ARTHELL KELLEY, B.S., M.A., Ph.D. . . . . Professor of Geography
B.S., University of Southern Mississippi; M.A., University of Missouri; Ph.D., University of Nebraska.

FREDERICK DILL KENAMOND, A.B., M.S., Ph.D., C.P.A. . . . Professor of Accounting
A.B., Shepherd College; M.S., University of Southern Mississippi; Ph.D., University of Alabama.

JOHN MORGAN KING, B.S., M.S., Re.D. . . . . Chairman of Department of Recreation, and Professor of Recreation
B.S., Mississippi College; M.S., University of Florida; Re.D., Indiana University.

ROBERT WILLIAM KING, B.S., M.A., M.S., Ph.D. . . . Associate Professor of Mathematics
B.S., M.A., University of Southern Mississippi; M.S., Ph.D., Florida State University.

ROGER TERRY KING, B.B.A., M.B.A., D.B.A. . . . . Associate Professor of Finance
B.B.A., University of Mississippi; M.B.A., D.B.A., Texas Technological College.

HAROLD VICTOR KNIGHT, B.S., M.S.Ed., Ed.D. . . . . Associate Professor of Research and Human Development
B.S., Livingston State College; M.S.Ed., Northwestern State College of Louisiana; Ed.D., University of Southern Mississippi.

JOHN CARRINGTON KOEPPEL, B.S., M.A., Ph.D. . . . Associate Professor of Psychology
B.S., M.A., Memphis State University; Ph.D., Oklahoma State University.

ARNOLD JOSEPH KRUBSACK, B.A., Ph.D. . . . . Assistant Professor of Chemistry
B.A., St. Olaf College; Ph.D., Stanford University.

JAMES LARRY LADNER, B.S., M.Ed. . . . . Assistant Professor of Athletic Administration and Coaching
B.S., Louisiana College; M.Ed., University of Southern Mississippi; doctoral study, Indiana University.

NORVIN LAWRENCE LANDSKOV, B.A., M.A., Ph.D. . . . . Professor of Curriculum and Instruction
B.A., St. Olaf College; M.A., Ph.D., University of Minnesota.

JAMES GILBERT LANGDON, B.S., M.S., Ed.D. . . . . Registrar and Assistant Professor of Guidance
B.S., Southern State College; M.S., Ed.D., University of Southern Mississippi.

ALICE ELIZABETH LASATER, B.A., M.A., Ph.D. . . . . Assistant Professor of English
B.A., Morehead State University; M.A., Ph.D., University of Tennessee.

SHARON ELAINE LEBSACK, B.A., B.M., M.A. . . . . Assistant Professor of Music Education
B.A., B.M., M.A., Colorado State College.

REX LEE LEONARD, B.S., M.S., Ph.D. . . . . Assistant Professor of Research and Human Development
B.S., United States Naval Academy; M.S., Texas A and I University; Ph.D., University of Northern Colorado.

ARNOLD DAVID LEWIS, B.S., M.S., Ph.D. . . . . Associate Professor of Biology
B.S., Louisiana State University; M.S., Auburn University; Ph.D., Louisiana State University.

CAROLYN McKEE LEWIS, B.S., M.S. . . . . Assistant Professor of Business Education
B.S., M.S., University of Southern Mississippi; doctoral study, University of Houston.

CHEN-TUAN LI, B.A., M.A., Ph.D. . . . . Associate Professor of Economics
B.A., National Chingchi University; M.A., Ph.D., University of Florida.

WALTER JAMES LOK, B.Des, M.Des., Ph.D. . . . . Chairman of Department of Art and Professor of Art
B.Des., M.Des., University of Michigan; Ph.D., University of Alabama.

JAMES DOUGLAS LOWE, JR., B.S., M.A., Ph.D. . . . . .Professor of Psychology
B.S., M.A., Ph.D., University of Alabama.

HERBERT EUGENE LUCY, B.S., M.Ed., Ed.D. . . . . Director of Student Counseling and Associate Professor of Psychology
B.A., William Carey College; M.Ed., Ed.D., University of Southern Mississippi.

DIETRICH LUTH, B.A., M.A. . . . . Assistant Professor of Anthropology and Comparative Religious Studies
B.A., M.A., University of British Columbia; doctoral study, University of Hamburg and University of California at Los Angeles.

DOUGLAS CLAYTON McCAIN, B.S., Ph.D. . . . . .Assistant Professor of Chemistry
B.S., Purdue University; Ph.D., University of California (Berkeley).

MARY MARGARET McCARTHY, B.S., M.A., Ph.D. . . . . Chairman of Department of Food and Nutrition and Associate Professor of Food and Nutrition
B.S., M.A., University of Southern Mississippi; Ph.D., Louisiana State University.

JESSE FRANKLIN McCARTNEY, B.S., M.A., Ph.D. . . . . .Assistant Professor of English.
B.S., Oklahoma State University; M.A., Ph.D., University of Arkansas.

KENNETH GRAHAM McCARTY, JR., B.S., M.A., Ph.D. . . . . Associate Professor of History
B.S., M.A., University of Southern Mississippi; Ph.D., Duke University.

CLARENCE EDWARD McCARVER, A.B., B.S., M.A., Ed.D. . . . . .Coordinator of Graduate Studies and Professor of Health
A.B., Howard Payne College; B.S., M.A., George Washington University; Ed.D., University of Texas.

PATRICIA KAY McCONNELL, B.A., M.F.A. . . . . Assistant Professor of Theatre Arts and Director of Dance
B.A., Arizona State University; M.F.A., University of Utah.

HARRY WELLS McCRAW, B.S., M.A., Ph.D. . . . . Assistant Professor of English
B.S., Massachusetts Institute of Technology; M.A., Ph.D., Tulane University.

JAMES PEARSE McCULLOUGH, JR., B.A., B.D., M.S., Ph.D. . . . . Assistant Professor of Psychology
B.A., Louisiana State University; B.D., Southern Methodist University; M.S., Ph.D., University of Georgia.

MAX HAROLD McDANIEL, B.A., M.A., Ph.D. . . . . Associate Professor of Psychology
B.A., Millsaps College; M.A., University of Mississippi; Ph.D., Purdue University.

JESSE OSCAR McKEE, B.S. in Ed., M.A. . . . . Assistant Professor of Geography
B.S. in Ed., Clarion State College; M.A., Michigan State University.

NEIL RAYMOND McMILLEN, B.A., M.A., Ph.D. . . . . Associate Professor of History
B.A., M.A., University of Southern Mississippi; Ph.D., Vanderbilt University.

GEORGE HAAS McNINCH, B.S., M.Ed., Ed.D. . . . . Director of Developmental Reading Center and Associate Professor of Curriculum and Instruction
B.S., University of Southern Mississippi; M.Ed., University of Mississippi; Ed.D., University of Georgia.

JAMES HAROLD McPHAIL, B.S., M.Ed., Ed.D. . . . . Chairman of Department of Educational Administration and Supervision and Professor of Educational Administration
B.S., M.Ed., University of Southern Mississippi; Ed.D., Boston University.

JAMES MERWYN McQUISTON, JR., B.S. . . . . Assistant Professor of Economics
B.S., University of Southern Mississippi; doctoral study, University of Virginia.

THEODORE WALTER MADSEN, B.A., M.A. . . . . Assistant Professor of Music Education
B.A., Colorado State College; M.A., University of Iowa.

[1]RAYMOND MANNONI, B.S., B.M., M.M.Ed., Mus. Ed.D. . . . . Dean of School of Fine Arts and Professor of Music
B.S., Kansas State College; B.M., University of Michigan; M.M.Ed., Northwestern University; Mus. Ed.D., Chicago Musical College; study, U.S. Navy School of Music, University of Chicago, Kansas University.

WINSTON ERNEST MARKWALDER, B.A. . . . . Assistant Professor of Special Education
B.A., Drake University; doctoral study, University of Minnesota.

THOMAS STANLEY MARTIN, B.S., M.Ed., M.D. . . . . Director of Student Health Services and Assistant Professor of Athletic Administration and Coaching
B.S., Mississippi College; M.Ed., University of Southern Mississippi; M.D., University of Mississippi.

ROBERT FINLAY MASON, D.R.S.A.M., M.M. . . . . Assistant Professor of Music Education
D.R.S.A.M., Royal Scottish Academy of Music; M.M., University of Southern Mississippi.

JACK GIBSON MATTHEWS, B.S.E., M.S., Ph.D. . . . . Assistant Professor of Science Education
B.S.E., Henderson State College; M.S., University of Arkansas; Ph.D., The Ohio State University.

JAMES WALTER MEADE, JR., B.S., M.A., M.F.A. . . . . Assistant Professor of Art
B.S., M.A., East Tennessee State University; M.F.A., University of Georgia.

WILLIAM THEODORE MEALOR, JR., B.A., M.A. . . . . Assistant Professor of Geography
B.A., University of Florida; M.A., doctoral study, University of Georgia.

LILLIEN ERL MEHEARG, B.A., M.A., Ph.D. . . . . Professor of Psychology
B.A., Millsaps College; M.A., Louisiana State University; Ph.D., University of Southern Mississippi.

ROBERT MESROBIAN, B.F.A., M.F.A. . . . . Assistant Professor of Theatre Arts and Director of Opera Theatre
B.F.A., M.F.A., Boston University College of Music.

JESSE LLOYD MILAM, B.A., M.A., Ed.D. . . . . Professor of Physical Education
B.A., Louisiana Polytechnic Institute; M.A., Ed.D., Columbia University.

MARLENE MARIE MILKENT, B.S., Ph.D. . . . . Assistant Professor of Science Education
B.S., California State College; Ph.D., University of Texas.

JERRY LOUIS MILLER, B.S., M.A., Ed.D. . . . . Assistant Professor of Research and Human Development
B.S., M.A., Northwestern State College of Louisiana; Ed.D., Oklahoma State University.

LEO REYNOLDS MILLER, B.S.Ed., M.S.Ed., Ed.D. . . . . Professor of Curriculum and Instruction
B.S.Ed., Kansas City, Missouri Teachers College; M.S.Ed., University of Kansas; Ed.D., The Pennsylvania State University.

WALLACE DYETT MILLER, A.B., M.A., Ph.D. . . . . Associate Professor of Curriculum and Instruction
A.B., Southwest Missouri State College; M.A., Northeast Missouri State College; Ph.D., Southern Illinois University.

LOUELLA GILL MILNER, B.S., M.S., Ed.D. . . . . Associate Professor of Home Economics Education
B.S., M.S., Ed.D., University of Southern Mississippi.

CARL A. MOELLER, A.B., M.Ed., Ed.D. . . . . Associate Professor of Industrial and Technical Education
A.B., Michigan State College; M.Ed., Texas Agricultural and Mechanical College; Ed.D., Wayne State University.

GENE HERBERT MOFFAT, B.S., A.M., Ph.D. . . . . Assistant Professor of Psychology
B.S., Allegheny College; A.M., Northern Illinois University; Ph.D., University of South Dakota.

BOBBY DEAN MOORE, B.S., M.Ed., Ed.D. . . . . Assistant Professor of Research and Human Development
B.S., Lamar State College of Technology; M.Ed., North Texas State University; Ed.D., Southwestern State College (Oklahoma).

ROY NEWTON MOORE, B.S., M.B.A., Ph.D. . . . . Assistant Professor of Management
B.S., M.B.A., University of Southern Mississippi; Ph.D., University of Alabama.

CHARLES WICKLIFFE MOORMAN, A.B., M.A., Ph.D. . . . . Dean of the University and Professor of English
A.B., Kenyon College; M.A., Ph.D., Tulane University; Guggenheim Fellow.

JEROLD JOSEPH MORGAN, B.S., M.B.A., Ph.D. . . . . Chairman of Department of Accounting and Professor of Accounting
B.S., University of Southern Mississippi; M.B.A., University of Houston; Ph.D., University of Alabama.

[2]JOSEPH SALVADORE MORRELL, B.S., M.S., Ph.D. . Associate Professor of Mathematics
B.S., University of Southwest Louisiana; M.S., Louisiana State University; Ph.D., Florida State University.

JOE BARRY MULLINS, B.Mus., M.M., Ed.D. . . . . Professor of Music
B.Mus., Southwestern at Memphia; M.M., George Peabody College; Ed.D., University of Illinois.

DONALD THOMAS MUNSELL, B.M., M.A., Ph.D. . . . . Assistant Professor of Music Education
B.M., University of Miami; M.A., Ph.D., State University of Iowa.

RAY SIGLER MUSGRAVE, B.A., M.A., Ph.D. . . . . Chairman of Department of Psychology and Professor of Psychology
B.A., Bethany College; M.A., Ohio Wesleyan University; Ph.D., Syracuse University.

JOHN FREDERICK NAU, B.D., M.A., Ph.D. . . . . Distinguished University Professor of Philosophy
B.D., Concordia Seminary; M.A., Tulane University; Ph.D., University of South Carolina.

HOWARD CARROLL NESBITT, B.A., M.A., Ed.D. . . . . Professor of Recreation
B.A., Washington College; M.A., Ed.D., Columbia University.

EDITHA SCHLANSTEDT NEUMANN, B.A., M.S.W., Ph.D. . . . . Associate Professor of Foreign Languages
B.A., University of Berlin; M.S.W., University of Pittsburgh; Ph.D., Tulane University.

KARL NEUMANN, LL.D., M.F.A. . . . . Part-time Professor of Music
LL.D., Prague University; M.F.A., Carnegie Institute of Technology.

CLINTON COLGATE NICHOLS, B.M.Ed., M.M., D.M. . . . . Assistant Professor of Music
B.M.Ed., Oklahoma Baptist University; M.M., New Orleans Baptist Theological Seminary; D.M., Florida State University.

[1]EDWARD NISSAN, B.S., M.A., Ph.D. . . . . Associate Professor of Computer Science and Statistics
B.S., M.A., University of Kansas; Ph.D., Texas A. and M. University.

DONALD EARL NORRIS, JR., B.S., M.S., Ph.D. . . . . Assistant Professor of Biology
B.S., Indiana State University; M.S., Ph.D., Tulane University.

JOHN McCALL NORSWORTHY, B.S., M.Ed., Ed.D. . . . . Associate Professor of Special Education
B.S., M.Ed., Mississippi State University; Ed.D., University of Southern Mississippi.

WILLIAM DURWARD NORWOOD, B.A., M.A., Ph.D. . . . . Professor of English
B.A., Baylor University; M.A., Lamar State College of Technology; Ph.D., University of Texas.

MARIAN ZYGMUNT NOWAKOWSKI . . . . . Assistant Professor of Music
Performance Diploma, Conservatory of Music and Fine Arts, Lwon, Poland.

BOB GILLHAM OLSEN, A.A., B.A., M.A., Ed.D. . . . . Assistant Professor of Research and Human Development
A.A., Wilmington College; B.A., M.A., University of North Carolina; Ed.D., North Carolina State University.

LINWOOD ELDEN ORANGE, A.B., M.A., Ph.D. . . . . Professor of English
A.B., M.A., Ph.D., Duke University

ROBIN M. OVERSTREET, B.S., M.S., Ph.D. . . . . Assistant Professor of Biology Gulf Coast Research Laboratory
B.S., University of Oregon; M.S., Ph.D., University of Miami

DAVID McINTOSH OWEN, B.S., M.D. . . . . Associate Professor of Medical Technology
B.S., M.D., University of Mississippi School of Medicine.

RALPH SEER OWINGS, A.B., M.A., Ed.D. . . . . Professor of Educational Administration and Supervision
A.B., M.A., Wofford College; M.A., Ed.D., Columbia University.

EDWIN PAUL OXFORD, B.S., M.S., Ph.D. . . . . Assistant Professor of Mathematics
B.S., M.S., Louisiana Polytechnic Institute; Ph.D., New Mexico State University.

OSCAR LAWRENCE PAULSON, JR., B.S., M.S., Ph.D. . . Associate Professor of Geology
B.S., M.S., Mississippi State University; Ph.D., Louisiana State University.

ROGER PEARSON, B.Sc., M.Sc., Ph.D. . . . . Chairman of Department of Anthropology and Comparative Religious Studies and Associate Professor of Anthropology and Comparative Religious Studies
B.Sc., M.Sc., Ph.D., University of London.

HERSCHEL QUINTON PEDDICORD, JR., B.A., M.Ed., Ed.D. . . . . Assistant Professor of Research and Human Development
B.A., Presbyterian College; M.Ed., University of South Carolina; Ed.D., Duke University.

PAUL WALLACE PEDDICORD, B.A., M.Ed., Ed.D. . . . . Chairman of Department of Curriculum and Instruction and Professor of Curriculum and Instruction
B.A., Furman University; M.Ed., University of Houston; Ed.D., Duke University.

GEORGE FRANCIS PESSONEY III, B.S., M.A., Ph.D. . . . . Chairman of Department of Biology and Associate Professor of Biology
B.S., M.A., Sam Houston State College; Ph.D., University of Texas.

OLIVER OTTO PHILLIPS, B.S., M.A., Ed.D. . . . . Assistant Professor of Research and Human Development
B.S., M.A., Ed.D., University of Southern Mississippi.

MONTE EDDY PILIAWSKY, B.A., M.A., Ph.D. . . . . Assistant Professor of Political Science
B.A., Louisiana State University at New Orleans; M.A., Ph.D., Tulane University.

JAMES WESLEY PINSON, B.S., M.S., Ph.D. . . . . Associate Professor of Chemistry
B.S., William Carey College; M.S., Ph.D., University of Mississippi.

PAUL HOWARD PITTMAN, B.A. . . . . .Part-time Instructor of Communication
B.A., University of Mississippi.

WILLIAM VILAS PLUE, B.S., M.Ed., Ed.D. . . . . Chairman of Department of Special Education and Associate Professor of Special Education
B.S., M.Ed., Lewis and Clark College; Ed.D., University of Oregon.

WILLIAM HARVEY POIRIER, B.S., M.A., Ed.S., Ed.D. . . . . Chairman of Department of Art Education and Associate Professor of Art Education
B.S., Eastern Michigan University; M.A., Ed.S., George Peabody College; Ed.D., University of Southern Mississippi.

LLOYD FRANKLIN POSEY, B.S., M.A., Ed.D. . . . . Associate Professor of Curriculum and Instruction
B.S., University of Alabama; M.A., Ed.D., George Peabody College.

GOMER JEFFREY POUND, Mus. B., M.Mus.Ed., Ph.D. in M.Ed. . . . . .Acting Dean of the School of Fine Arts and Professor of Music Education
Mus.B., Michigan State University; M.Mus.Ed., Ph.D. in M.Ed., Florida State University.

ERIC RICHARD PRENSHAW, B.M., M.M., D.M.A. . . . . Director of Music Camp Activities and Assistant Professor of Music Education
B.M., M.M., Northwestern University; D.M.A., University of Texas.

PEGGY WHITMAN PRENSHAW, B.A., M.A., Ph.D. . . . . Assistant Professor of English
B.A., M.A., Mississippi College; Ph.D., University of Texas.

WILLIAM HENRY PRESSER, A.B., Mus.M., Ph.D. . . . . Associate Professor of Music
A.B.. Alma College; Mus.M., University of Michigan; Ph.D., University of Rochester.

JOANNE CAVE PRESTON, A.B., M.A., Ph.D. . . . . Assistant Professor of Psychology
A.B., Florida Southern College; M.A., Ph.D., Louisiana State University.

CHARLES H. PROBST, B.S., M.A., Ed.D. . . . . Counselor in Student Counseling and Assistant Professor of Guidance
B.S., M.A., University of Southern Mississippi; Ed.D., University of Mississippi.

THOMAS FRANKLIN PUCKETT, B.A., M.S., M.D. . . . . .Professor of Medical Technology
B.A., M.S., University of Colorado; M.D., University of California.

JOHNNY RAY PURVIS, B.A., M.Ed. . . . . Assistant Professor of Research and Human Development
B.A., M.Ed., doctoral study, Northwestern State College of Louisiana.

ISAAC BLAINE QUARNSTROM, B.S., M.A., Ph.D. . . . . Chairman of Department of Theatre Arts and Associate Professor of Theatre Arts
B.S., M.A., Brigham Young University; Ph.D., The Ohio State University.

OHREN WILLIS RAINS, B.S., M.Ed., Ed.D. . . . . Assistant Professor of Curriculum and Instruction

B.S., Arkansas Agricultural and Mechanical College; M.Ed., Alabama Polytechnic Institute; Ed.D., Oklahoma State University.

DANIEL LEE RANDOLPH, B.S., M.Ed., Ph.D. . . . . Associate Professor of Guidance

B.S., University of West Virginia; M.Ed., Marquette University; Ph.D., Florida State University.

CHARLES HENRY RATCLIFF, B.M.E., M.S., Ph.D. . . . . Associate Professor of Mathematics

B.M.E. Georgia Institute of Technology; M.S., Mississippi State University; Ph.D., University of Alabama.

RUTH ANN TAYLOR RATCLIFF, B.S., M.A., Ph.D. . . . . Associate Professor of Mathematics

B.S., Mississippi State University; M.A., Ph.D., University of Alabama.

GRAYSON HANKS RAYBORN, B.S., Ph.D. . . . . Assistant Professor of Physics

B.S., Rensselaer; Ph.D., University of Florida.

ROBERT CLYDE RHODES, B.S., M.A., Ph.D. . . . . Chairman of the Department of Speech and Hearing Sciences and Associate Professor of Speech and Hearing Sciences

B.S., Colorado State University; M.A., University of Colorado; Ph.D., University of Pittsburgh.

THOMAS JOSEPH RICHARDSON, B.A., M.A. . . . . Assistant Professor of English

B.A., University of Southern Mississippi; M.A., University of Alabama.

LUIS RIVAS, B.L.-B.S. . . . . Associate Professor of Biology

B.L.-B.S., Quebec Technical School.

ONIS EUGENE JACK ROBERTS, JR., B.A., M.A., Ph.D. . . . . Associate Professor of Foreign Languages

B.A., M.A., Ph.D., Louisiana State University.

WILLIAM MARVIN ROBERTS, JR., B.A., M.A., Ph.D. . . . . Chairman of Department of Geography and Professor of Geography

B.A., M.A., University of Iowa; Ph.D., University of Washington.

KEN EDWARD ROGERS, B.S., M.S., Ph.D. . . . . Assistant Professor of Biology

B.S., Tennessee Polytechnic Institute; M.S., Auburn University; Ph.D., University of Tennessee.

LOUIS LEROY ROGERS, B.S., M.A., Ed.D. . . . . Director of Office of Student Teaching and Professor of Research and Human Development

B.S., M.A., University of Southern Mississippi; Ed.D., University of Tennessee.

WINFIELD HARRISON ROSE, B.A., M.A. . . . . Assistant Professor of Political Science

B.A., Carson-Newson College; M.A., graduate study, Duke University.

MARGARET WILSON RYAN, B.A., M.Ed., Ed.D. . . . . Assistant Professor of Art Education

B.A., M.Ed., Florida Atlantic University; Ed.D., University of Florida.

RICHARD XAVIER SANCHEZ, B.A., M.A. . . . . Assistant Professor of Music

B.A., Tulane Univeristy; M.M., doctoral study, Louisiana State University.

AUBREY CECIL SANFORD, B.S. in B.A., M.B.A., Ph.D. . . . . Associate Professor of Management

B.S. in B.A., M.B.A., University of Southern Mississippi; Ph.D. Louisiana State University.

EVALYN VIRGINIA SCAMELL, B.F.A., B.A.E., M.Ed. . . . . Assistant Professor of Art Education

B.F.A., B.A.E., University of Kansas; M.Ed., The Pennsylvania State University; doctoral study, Indiana University.

WILLIAM KAUFFMAN SCARBOROUGH, A.B., M.A., Ph.D. . . . . Associate Professor of History

A.B., University of North Carolina; M.A., Cornell University; Ph.D., University of North Carolina.

EDUARDO GONZALEZ SCHEEL, B.A., M.A. . . Associate Professor of Foreign Languages

B.A., M.A., doctoral study, University of Texas.

RAYMOND WAYNE SCHEETZ, B.S., M.S., Ph.D. . . . . .Assistant Professor of Biology

B.S., Philadelphia College of Pharmacy and Science; M.S., Ph.D., University of Delaware.

WILLIAM FREDERICK SCHOELL III, B.A., M.B.A., Ph.D. . . . . Associate Professor of Marketing

B.S., Louisiana State University at New Orleans; M.B.A., Ph.D., University of Arkansas.

HAROLD WALTER SCHULTZ, B.S., M.S. . . . . .Assistant Professor of Microbiology

B.S., M.S., doctoral study, University of Mississippi.

JOHN RICHARD SHAFFER, B.S., M.A., Ed.D. . . . . .Director of Media Service Center, Director of Audiovisual Aids, and Professor of Research and Human Development

B.S., Memphis State University; M.A., Teacher's College, Columbia University; Ed.D., Indiana University.

DONALD JOSEPH SHOEMAKER, B.A., M.A., Ph.D. . . . Assistant Professor of Sociology

B.A., Millsaps College; M.A., Ph.D., University of Georgia.

WILLIAM ARNOLD SIRMON, B.S., M.S., D.B.A. . . . . .Associate Professor of Finance

B.S., M.S., University of Southern Mississippi; D.B.A., Mississippi State University.

DAVID ALLEN SISEMORE, B.A., M.A., Ph.D. . . . . Assistant Professor of Psychology

B.A., M.A., Ph.D., University of Arkansas.

JOHN RAY SKATES, JR., B.B.A., M.A., Ph.D. . . . . Chairman of Department of History and Professor of History

B.B.A., University of Mississippi; M.A., Ph.D., Mississippi State University.

BILLY BORDEN SLAY, B.S., M.S., Ed.D. . . . . Associate Professor of Physical Education

B.S., M.S., University of Southern Mississippi; Ed.D., Louisiana State University.

BYRON COLMAN SMITH, B.S., M.A., Ph.D. . . . . .Professor of Biology

B.S., Indiana State University; M.A., DePauw University; Ph.D., University of Georgia.

JACK ALAN SMITH, B.S., M.A., Ph.D. . . . . .Administrative Assistant to Dean of University and Professor of English

B.S., Troy State College; M.A., Ph.D., Auburn University.

JOHN LARRY SMITH, B.S., M.D. . . . . .Associate Professor of Medical Technology

B.S., University of Oklahoma; M.D., Tulane University School of Medicine.

ROBERT DALTON SMITH, B.A., Ph.D. . . . . Assistant Professor of Political Science

B.A., University of Virginia; Ph.D., Vanderbilt University.

ISADORE LEON SONNIER, A.B., A.M., Ed.D. . . . . .Associate Professor of Science Education

A.B., University of Southwestern Louisiana; A.M., Louisiana State University; Ed.D., Colorado State College.

DONALD RAY SOUTH, B.S., M.S., Ph.D. . . . . Chairman of Department of Sociology and Associate Professor of Sociology.

B.S., University of Southern Mississippi; M.S., Ph.D., Louisiana State University.

JERRY DAVID SPARKS, B.S. . . . . .Assistant Professor of Research and Human Development

B.S., Mississippi State University; doctoral study, Indiana University.

BEVERLY LOUISE STAFFORD, B.S., M.S., Ed.D. . . . . Director of Women's Physical Education Program and Professor of Physical Education
B.S., Southeastern Louisiana College; M.S., Ed.D., Louisiana State University.

DONALD REXFORD STAMPER, B.A., M.A. . . . . Assistant Professor of English
B.A., Morehead State University; M.A., doctoral study, University of Arkansas.

MARTIN STEGENGA, B.S., M.S., D.B.A. . . . . Chairman of Department of Management and Professor of Management
B.S., M.S., Mississippi State University; D.B.A., Indiana University.

ROBERT ELLIS STEVENS, B.S., M.B.A., Ph.D. . . . . Assistant Professor of Marketing
B.S., Arkansas State College; M.B.A., Ph.D., University of Arkansas.

JAMES LOGAN STITH, A.B., M.D. . . . . Associate Professor of Medical Technology
A.B., M.D., George Washington University.

LEONARD DON STOCKER, A.B., M.A., Ph.D. . . . . Associate Professor of Music
A.B., University of Michigan; M.A., Columbia University; Ph.D., Florida State University.

PETER KONRAD STOCKS, B.S., M.S., Ph.D. . . . . Chairman of Department of Microbiology and Professor of Microbiology
B.S., Millsaps College; M.S., University of Southern Mississippi; Ph.D., Louisiana State University.

MICHAEL LINWOOD STRATIL, B.A., M.A. . . . . Assistant Professor of Psychology
B.A., M.A., doctoral study, University of Florida.

WARREN CLAYTON SULLIVAN, B.A., B.D., Th.D. . . . . Associate Professor of Anthropology and Comparative Religious Studies
B.A., Mississippi College; B.D., Th.D., Southern Baptist Theological Seminary.

DANIEL ALVIN SUNDEEN, B.A., A.M., Ph.D. . . . . Assistant Professor of Geology
B.A., University of New Hampshire; A.M., Ph.D., Indiana University.

C DOWNING SWEAT, JR., B.M.E., M.S. . . . . Assistant Professor of Management
B.M.E., Auburn University; M.S., Florida State University; doctoral study, University of Alabama.

JAMES REGINALD SWITZER, B.S., M.S., Ed.D. . . . . Professor of Health
B.S., University of Southern Mississippi; M.S., Louisiana State University; Ed.D., University of Texas.

GLORIA BRUEMMER TAYLOR, B.S., M.S., Ed.D. . . . . Assistant Professor of Business Education
B.S., M.S., Ed.D., University of Southern Mississippi.

SHELBY FRELAND THAMES, B.S., M.S., Ph.D. . . . . Dean of College of Science and Professor of Polymer Science
B.S., M.S., University of Southern Mississippi; Ph.D., University of Tennessee.

JAC LYNDON THARPE, B.A., M.A., Ph.D. . . . . Professor of English
B.A., M.A., University of Tennessee; Ph.D., Harvard University.

ROBERT CHARLES THOMAS, B.A., M.A., Ph.D. . . . . Assistant Professor of Speech and Hearing Sciences
B.A., Texas Christian University; M.A., Ph.D., University of Southern Mississippi.

JOHN RICHARD THOMPSON, B.A., M.A., Ph.D. . . . . Associate Professor of Biology
B.A., Albion College; M.A., Ph.D., Duke University.

JOE BARHAM THRASH, JR., B.S., M.S., Ph.D. . . . . Assistant Professor of Mathematics
B.S., M.S., Lamar State College; Ph.D., Texas Technological College.

LOIS GLENN THRASH, B.S., M.A. . . . . Assistant Professor of English
B.S., Lamar State College; M.A., Texas Technological College.

PAUL MARVIN TOOM, B.A., Ph.D. . . . . .Assistant Professor of Chemistry
B.A., Central College (Iowa); Ph.D., Colorado State University.

PAUL DELMAS TORRES, B.S.C., M.B.A., Ph.D. . . . . Associate Professor of Accounting
B.S.C., Spring Hill College; M.B.A., Ph.D., University of Alabama.

JAMES AIRD TOWNLEY, B.S., M.A. . . . . Assistant Professor of Physical Education
B.S., M.A. University of Southern Mississippi; doctoral study, Louisiana State University.

JACK LEONARD TRABONT, B.S., M.S., Ph.D. . . . . .Associate Professor of Special Education
B.S., M.S., Ph.D., University of Oregon.

WARREN FRANCIS TRACY, A.B., B.S. in L.S., M.A., Ph.D. . . . . .Librarian and Professor of Library Science
A.B., Earlham College; B.S. in L.S., Western Reserve University; M.A., Ph.D., University of Chicago.

GUY THOMAS TRAIL, A.B., A.M., Ph.D. . . . . .Assistant Professor of Foreign Languages
A.B., A.M., Ph.D., University of Illinois.

WILLIAM TUCHAK, LL.M., I.A.M., Ph.D. . . . . .Professor of Political Science
LL.M., Cashmir University; I.A.M., Columbia University; Ph.D., University of Colorado.

FORREST DALE TUCKER, B.A., M.A., Ph.D. . Chairman of Division of Communications, Professor of Communication, and Director of Office of Public Information
B.A., University of Wichita; M.A., Ph.D., Cornell University.

ROBERT JOSEPH TULEY, B.M.Ed., M.A.Ed., Ed.D. . . . . Associate Professor of Music Education
B.M.Ed., M.A.Ed., Murray State University; Ed.D., University of Illinois.

FERN TUTEN, B.S., M.S., Ph.D. . . . . .Assistant Professor of Art
B.S., Columbia College; M.S., University of North Carolina at Greensboro; Ph.D., Florida State University.

SIDNEY D. UPHAM, A.B., Ph.D. . . . . .Professor of Chemistry and Director of The Universities' Marine Center
A.B., Clark University; Ph.D., Oklahoma State University.

ROBERT THOMAS van ALLER, B.S., M.S., Ph.D. . . . . .Dean of the Graduate School and Professor of Chemistry
B.S., M.S., Ph.D., University of Alabama.

FRANK VIRDEN, B.S., M.A., D.P.A. . . . . .Associate Professor of Political Science
B.S., United States Naval academy; M.A., D.P.A., George Washington University.

PETER HAROLD CAMPION von WAHLDE, A.B., A.M., Ph.D. . . . . Associate Professor of History
A.B., A.M., Ph.D., Indiana University.

RICHARD CRAWFORD VREELAND, B.A., M.B.A., Ph.D. . . . . Chairman of Department of Marketing and Professor of Marketing
B.A., Rollins College; M.B.A., Ph.D., University of Florida.

THOMAS BEALL WALDEN, M.D. . . . . .Associate Professor of Medical Technology
M.D., University of Mississippi School of Medicine.

STANLEY WALDOFF, B.S., M.S., Ed.D. . . . . .Assistant Professor of Music
B.S., M.S., Juilliard School of Music; Ed.D., Columbia University.

ROBERT WARE WALES, B.S., M.S. . . . . Assistant Professor of Geography
B.S., M.S., Oregon State University; doctoral study, University of Kansas.

JAMES FREDERICK WALKER, A.B., M.S., Ph.D. . . . . Professor of Biology
A.B., M.S., University of Mississippi; Ph.D., University of Iowa.

PATRICIA ALICE PARKER WALKER, B.Mus, M.Mus, ... Assistant Professor of Music
B.Mus., M.Mus., University of Michigan.

JESSIE STEWART WALL, A.B., A.M., Ed.D. . . . . Professor of Curriculum and Instruction
A.B., Fairmont State College; A.M., West Texas State College; Ed.D., Florida State University.

NANCY KAY WALLNER, A.A., B.A., M.Ed. Ed.D. . . . . Assistant Professor of Curriculum and Instruction
A.A., B.A., University of California; M.Ed., Ed.D., University of Missouri.

HARRY CALVIN WARD, JR., B.A., M.A. . . . . Assistant Professor of Art
B.A., University of Southern Mississippi; M.A., East Tennessee State University.

SIDNEY EDWARD LEE WEATHERFORD, JR., B.S., M.A., Ed.D. . . . . Director of the Bureau of Institutional Research and Professor of Educational Administration and Supervision
B.S., M.A., University of Southern Mississippi; Ed.D., University of Florida.

GORDON ALLISON WEAVER, B.A., M.A., Ph.D. . . . . Assistant Professor of English
B.A., University of Wisconsin; M.A., University of Illinois; Ph.D., University of Denver.

SARAH LITTLETON WEAVER, B.S., M.A., Ph.D. . . . . Dean of the School of Home Economics and Professor of Food and Nutrition
B.S., M.A., University of Southern Mississippi; Ph.D., Florida State University.

CHARLES FIRMIN WEBB, B.S., M.A. . . . . Director of Driver Training Program and Assistant Professor of Health
B.S., M.A., University of Southern Mississippi; doctoral study, University of Georgia.

PORTER GRIGSBY WEBSTER, B.A., M.S., Ph.D. . . . . Professor of Mathematics
B.A., Georgetown College; M.S., Ph.D., Auburn University

LATNEY CONRAD WELKER, JR., B.S., M.A., Ed.D. . . . . Chairman of Department of Research and Human Development and Professor of Research and Human Development
B.S., Millsaps College; M.A., Ed.D., University of Southern Mississippi.

DAVID LEE WERTZ, B.S., M.S., Ph.D. . . . . Associate Professor of Chemistry
B.S., Arkansas State University; M.S., Ph.D., University of Arkansas.

BEN MARSHALL WEST, B.S., M.S., J.D. . . . . Associate Professor of Finance and Staff Counselor
B.S., United States Military Academy; M.S., University of Colorado; J.D., University of Mississippi.

FRANK COOK WHITESELL, B.A., M.A., Ph.D. . . . . Assistant Professor of Economics
B.A., M.A., University of South Carolina; Ph.D., Tulane University.

LEON AUSTIN WILBER, A.B., M.A., Ph.D. . . . . Distinguished Univeristy Professor of Political Science
A.B., M.A., Ph.D., University of Michigan.

GARY CECIL WILDMAN, A.B., Ph.D. . . . . Associate Professor of Polymer Science
A.B., Thiel College; Ph.D., Duke University.

D.C. WILLIAMS, JR., B.S., M.S., Ph.D. . . . . Director, Bureau of Business Research and Associate Professor of Economics
B.S., Southeastern Louisiana College; M.S., Ph.D., Louisiana State University.

HOWARD PERSON WILLIAMS, A.B., M.S., Ph.D. . . . . Associate Professor of Chemistry
A.B., East Carolina University; M.S., Ph.D., University of Florida.

CARL LESTER WILLIS, B.A., A.M. . . . . Assistant Professor of Communication
B.A., Ouachita Baptist University, A.M., University of Missouri.

JACK COOK WIMBERLY, B.A., M.A., Ph.D. . . . . Chairman of Department of Economics and Professor of Economics
B.A., Louisiana Polytechnic Institute; M.A., Ph.D., Louisiana State University.

ROGER KOHLER WINGER, B.S., M.A., Ph.D. . . . . Assistant Professor of Speech and Hearing Sciences.
B.S., Ashland College; M.A., Ph.D., The Ohio State University.

FORREST EDWARDS WOOD, JR., B.A., Th.D. . . . . Associate Professor of Philosophy
B.A., Baylor University; Th.D., Southwestern Baptist Theological Seminary.

JOHN HERBERT WOOD, B.S., M.S., Ph.D. . . . . Assistant Professor of Physics and Astronomy
B.S., M.S., Ph.D., Virginia Polytechnic Institute.

SANFORD WATTS WOOD, B.A., Ph.D. . . . . Associate Professor of Philosophy
B.A., Louisiana College; Ph.D., Vanderbilt University.

VIVIAN POATES WOOD, B.M., M.M. . . . . Assistant Professor of Music
B.M., Hartt College of Music; M.M., Washington University.

KAREN MARGUERITE YARBROUGH, B.S., M.S., Ph.D. . . . . Associate Professor of Microbiology
